

A polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of transcr

A polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of transcr

A polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of tran

Δe

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans

RNA polymerase II transcription regulatory region sequence-specific DNA binding transcription factor activity involved in positive regulation of trans
