

Enrichment in spots: acetylcholine-activated cation-selective channel activity

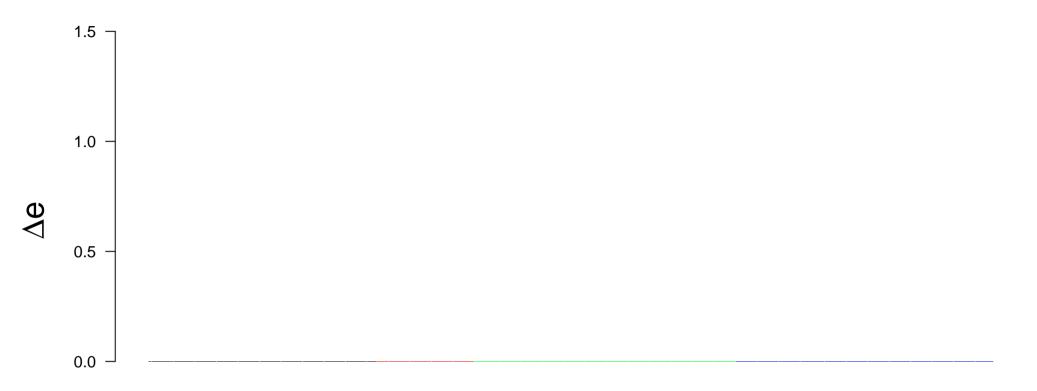

Expression of acetylcholine-activated cation-selective channel activity in Spot A

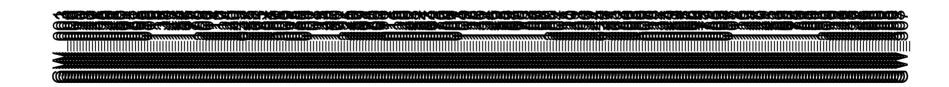

Expression of acetylcholine-activated cation-selective channel activity in Spot B

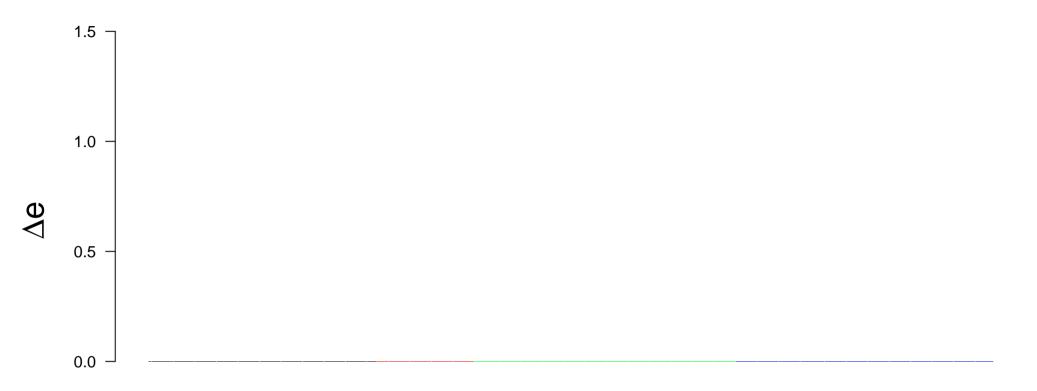

Expression of acetylcholine-activated cation-selective channel activity in Spot C

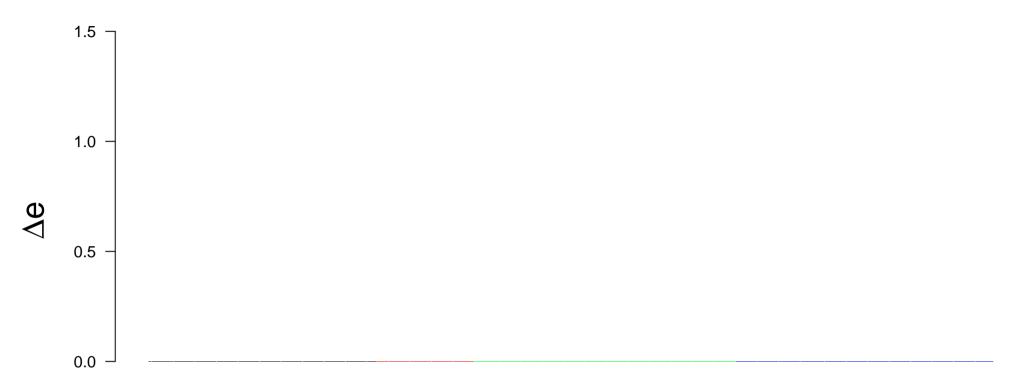

Expression of acetylcholine-activated cation-selective channel activity in Spot D

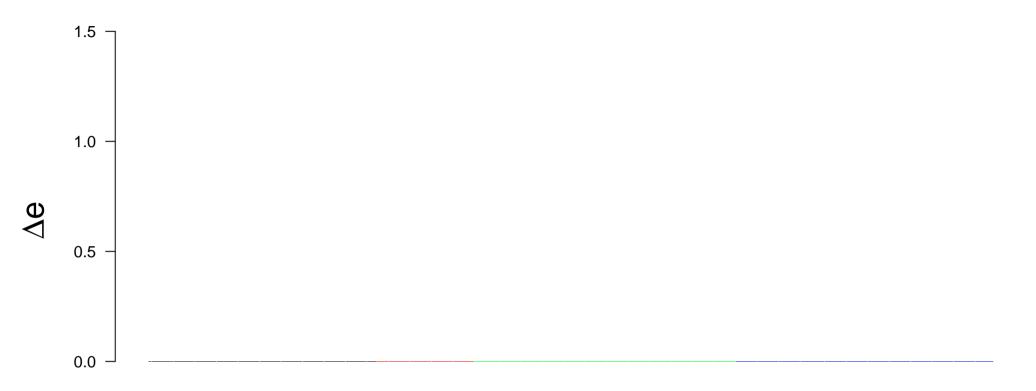

Expression of acetylcholine-activated cation-selective channel activity in Spot E

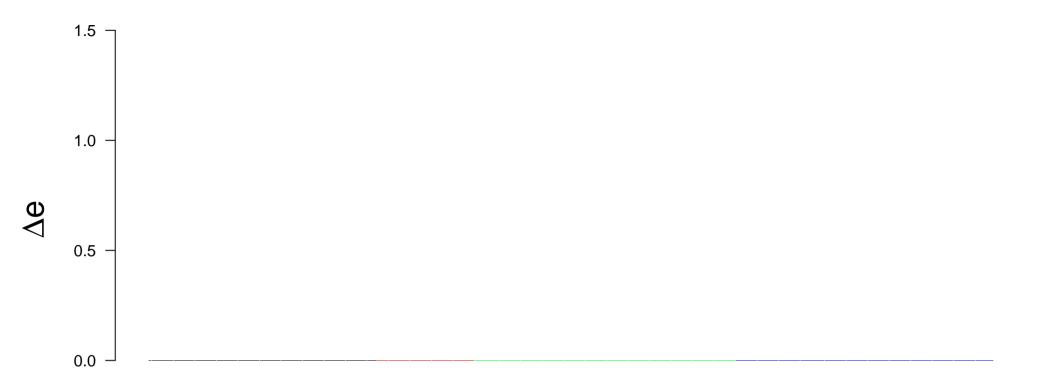

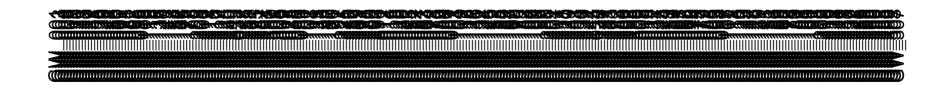

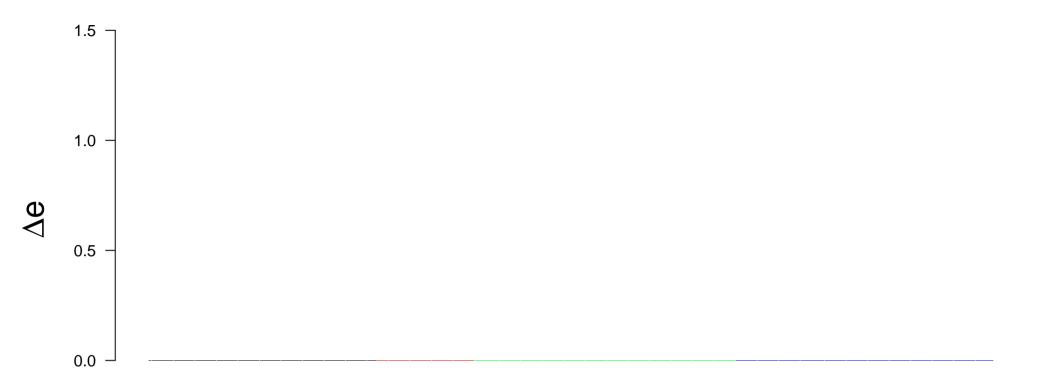

Expression of acetylcholine-activated cation-selective channel activity in Spot G

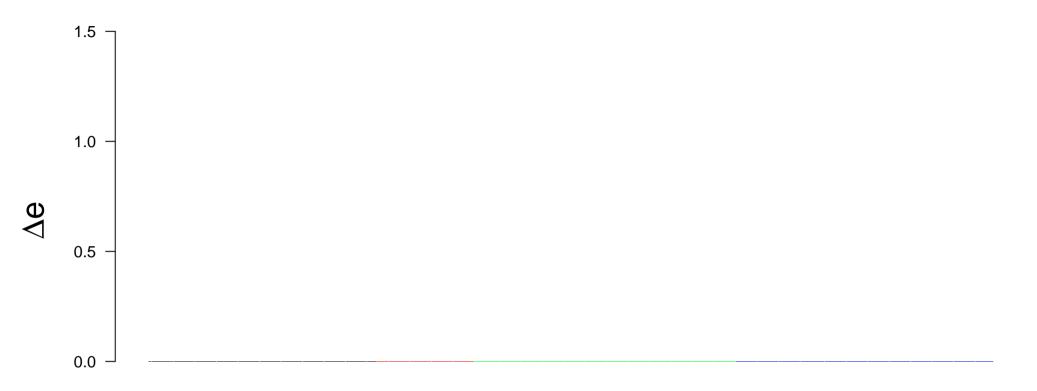

Expression of acetylcholine-activated cation-selective channel activity in Spot H

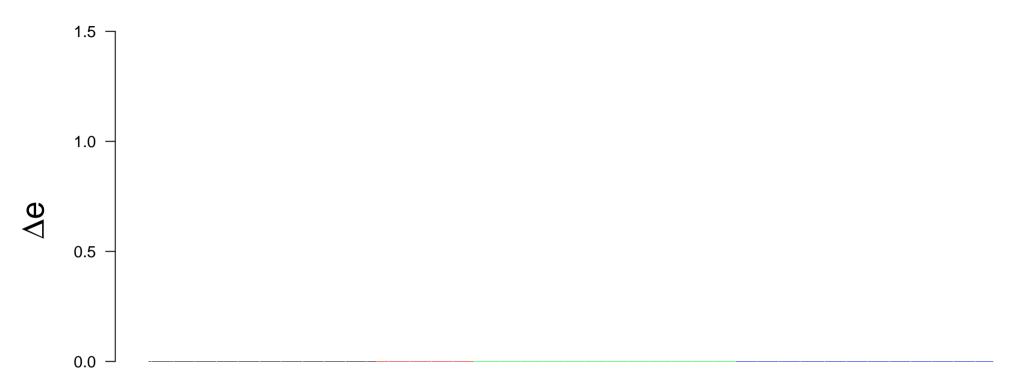

Expression of acetylcholine-activated cation-selective channel activity in Spot I

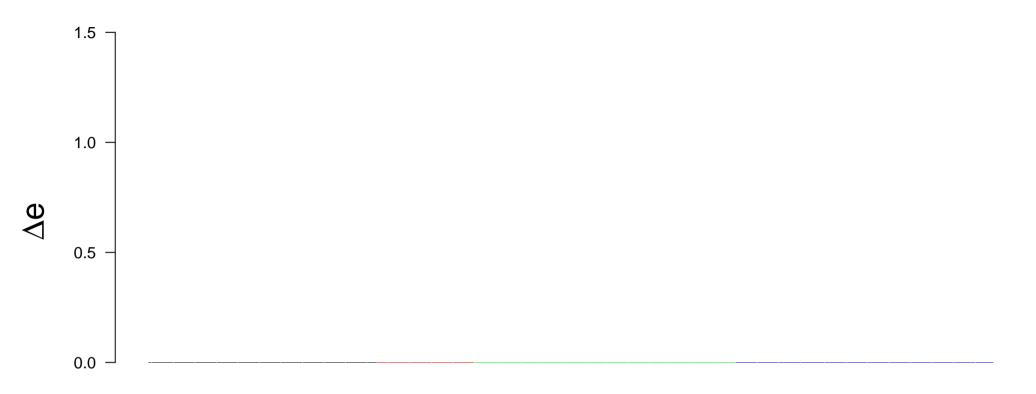

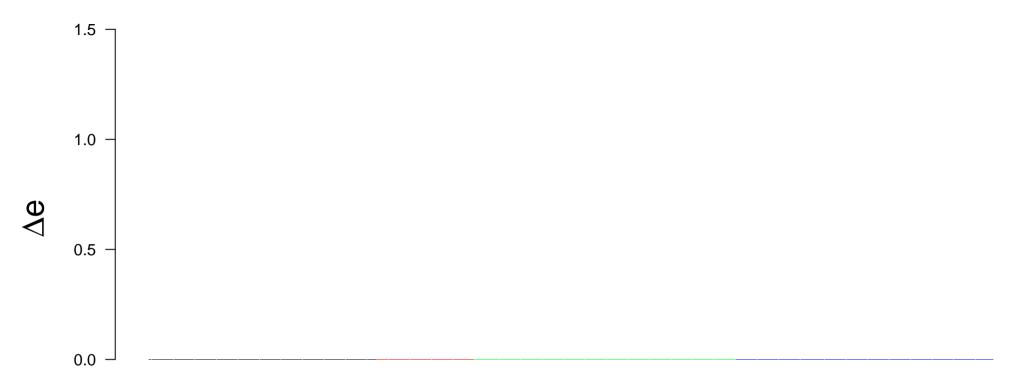

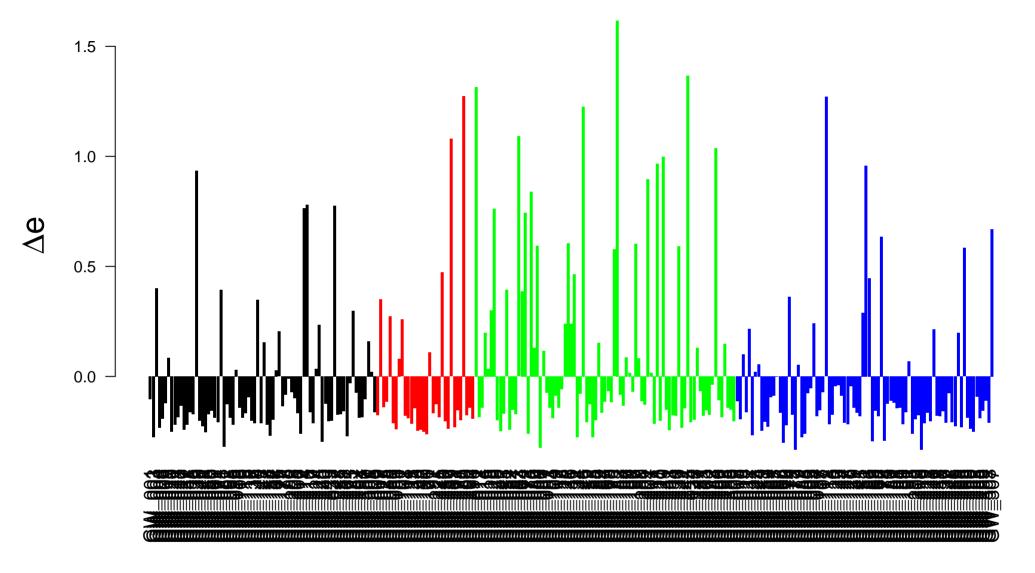

Expression of acetylcholine-activated cation-selective channel activity in Spot L

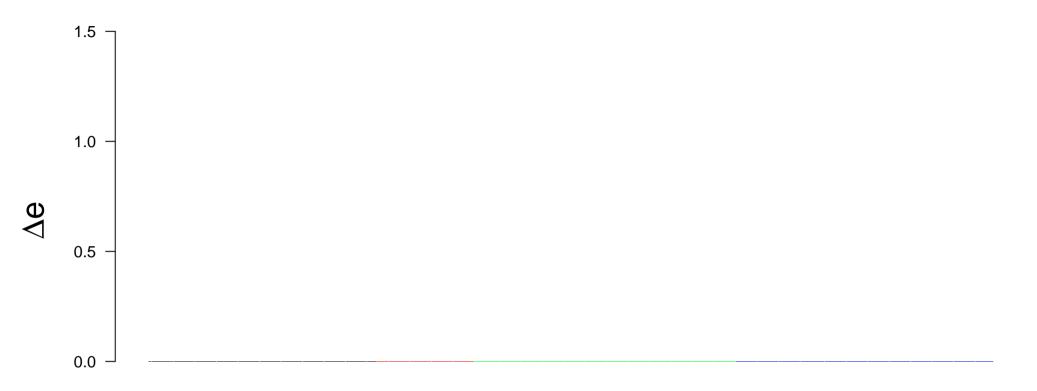

Expression of acetylcholine-activated cation-selective channel activity in Spot O

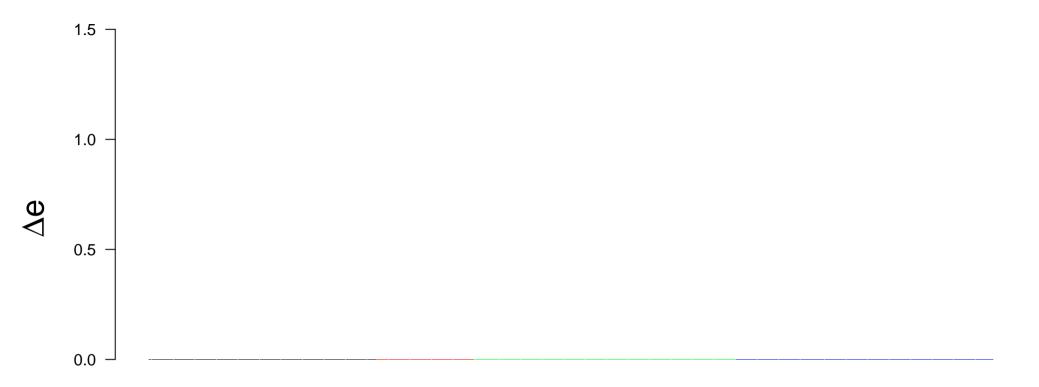

Expression of acetylcholine-activated cation-selective channel activity in Spot Q

Expression of acetylcholine-activated cation-selective channel activity in Spot R
