

antigen processing and presentation of exogenous peptide antigen via MHC class II

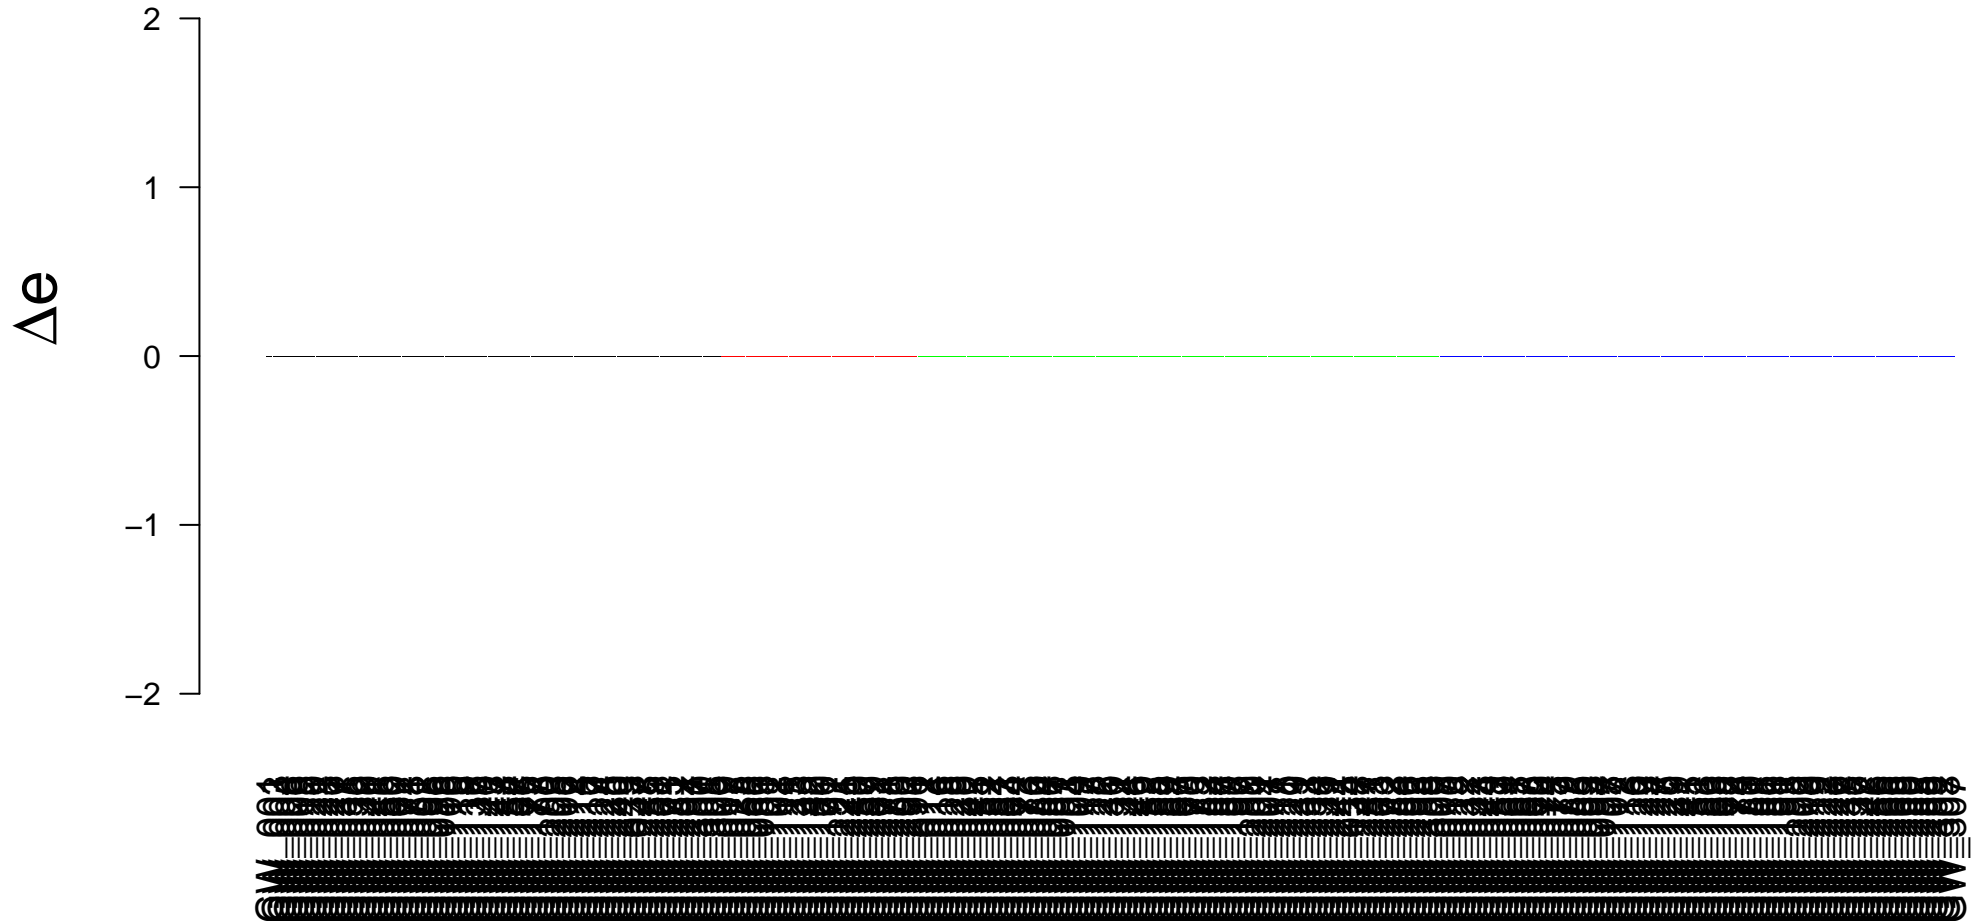

antigen processing and presentation of exogenous peptide antigen via MHC class II

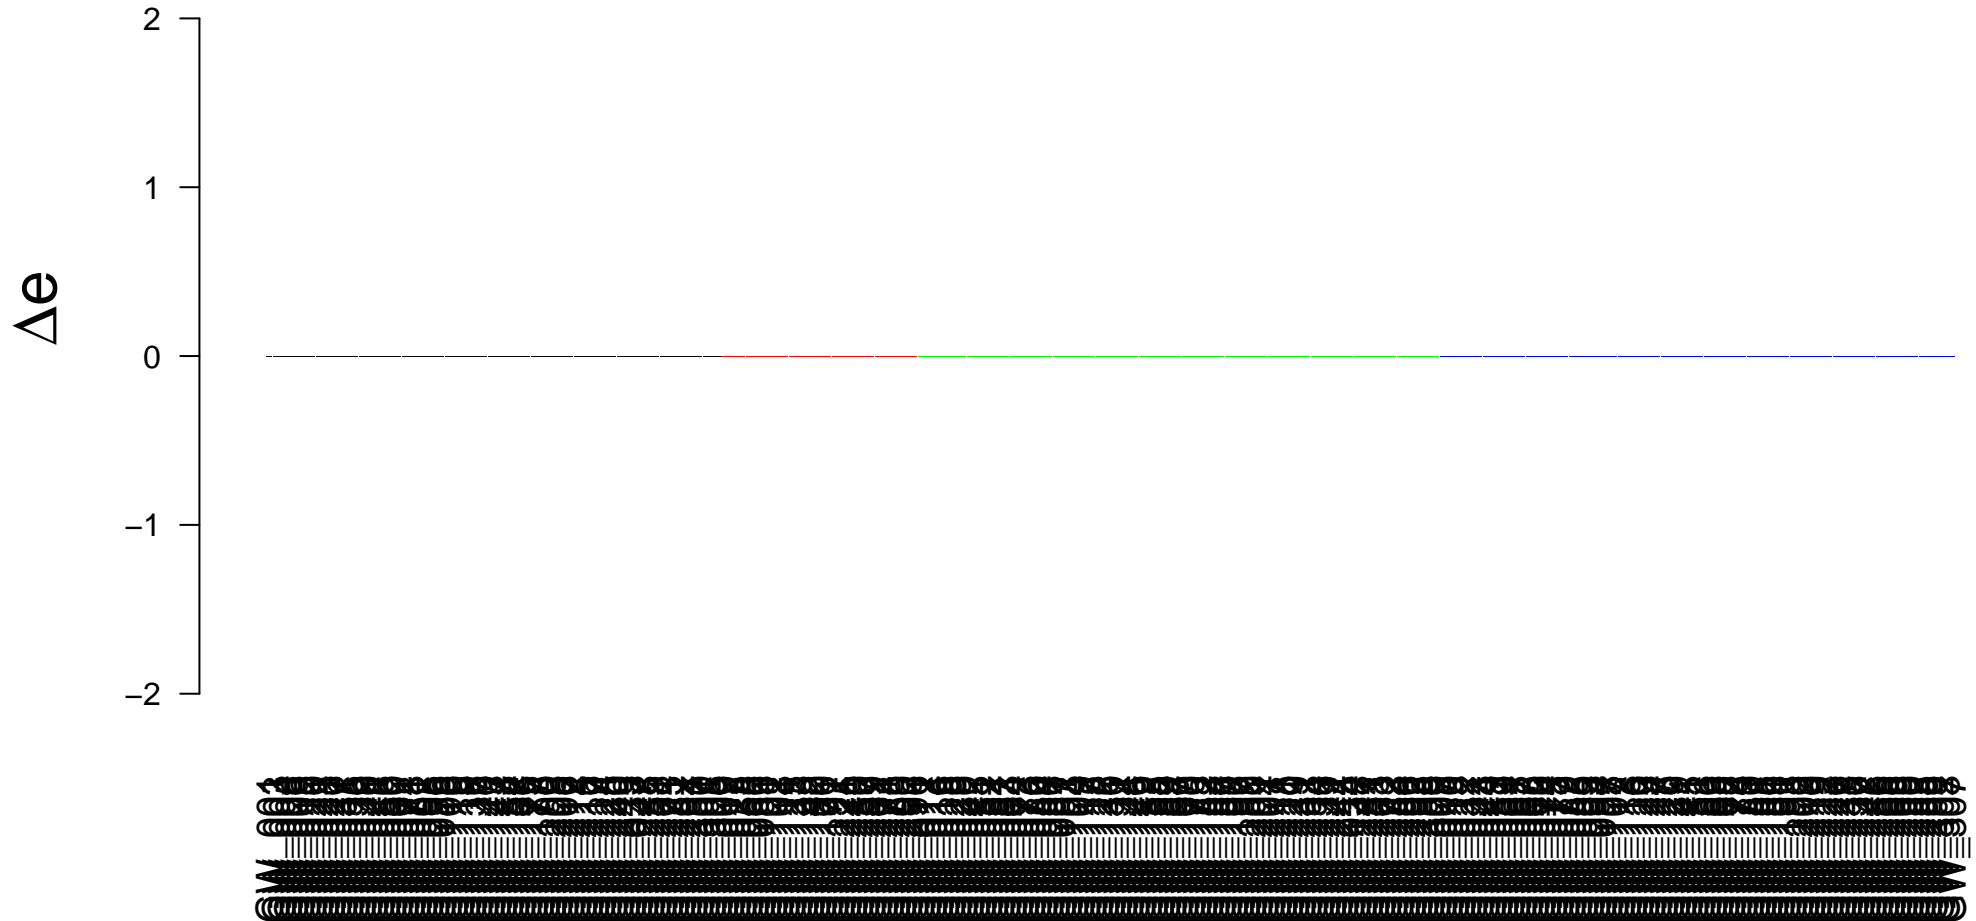

Enrichment in spots: antigen processing and presentation of exogenous peptide antigen via MHC class II

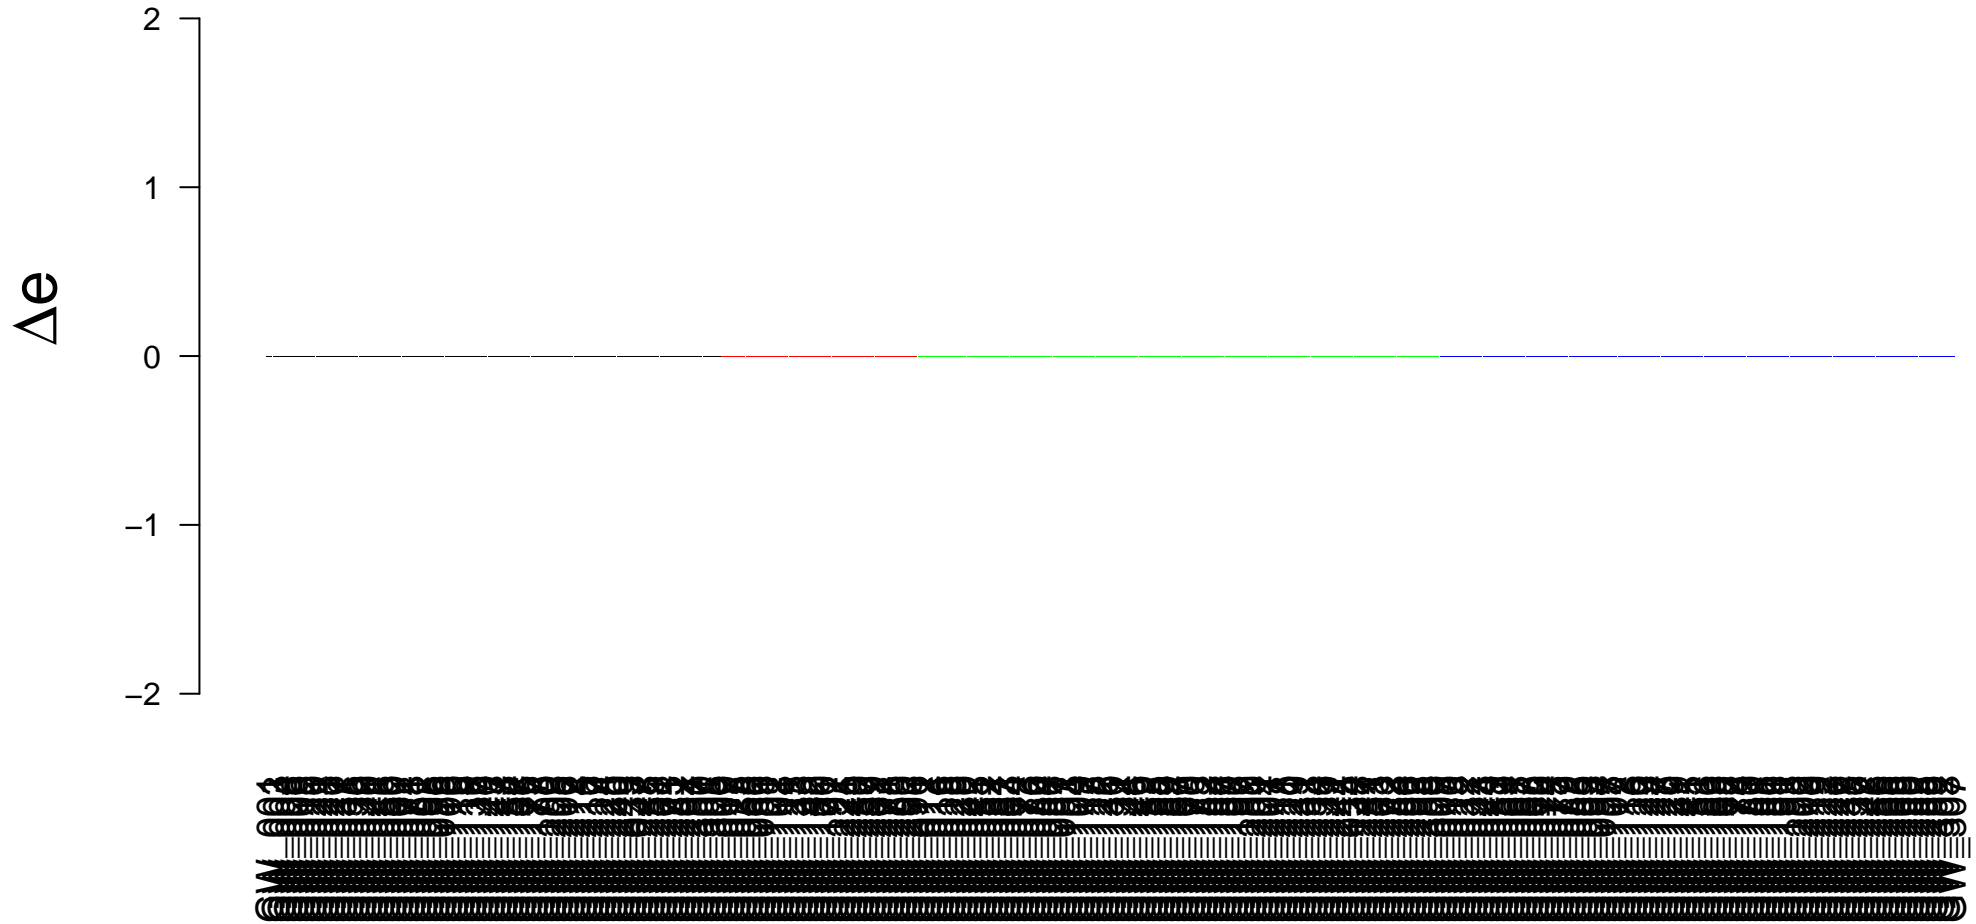

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot A

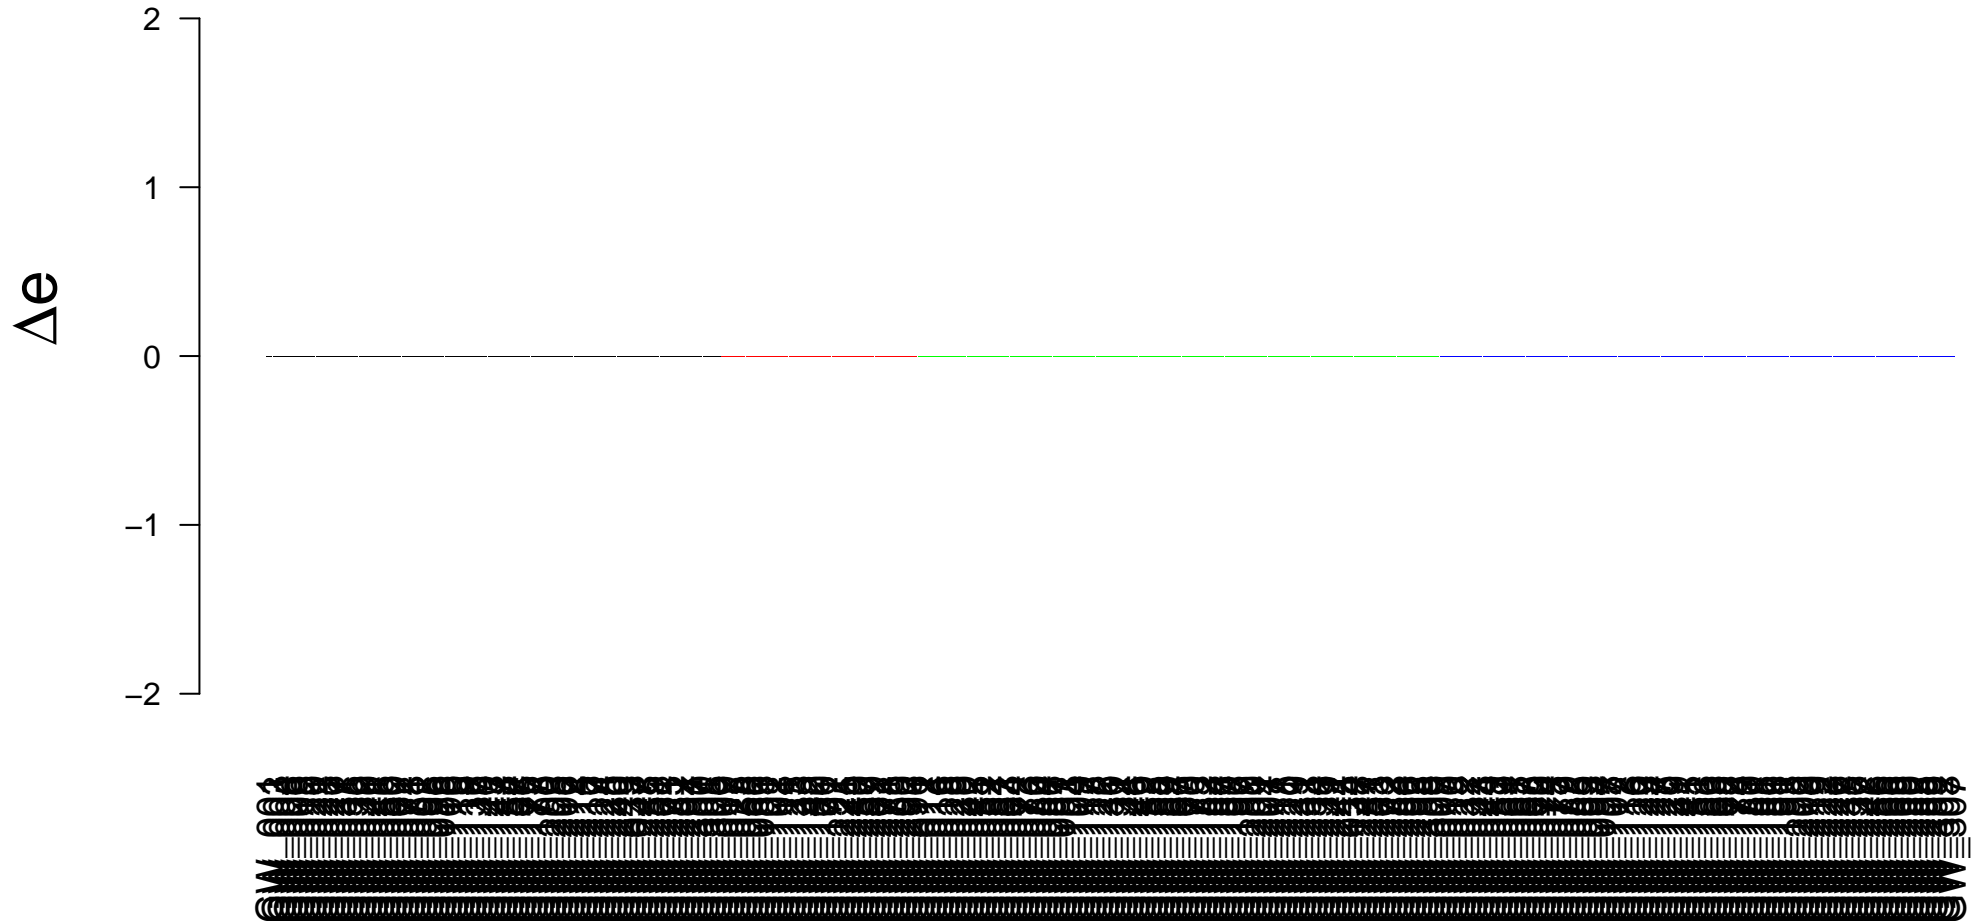

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot B

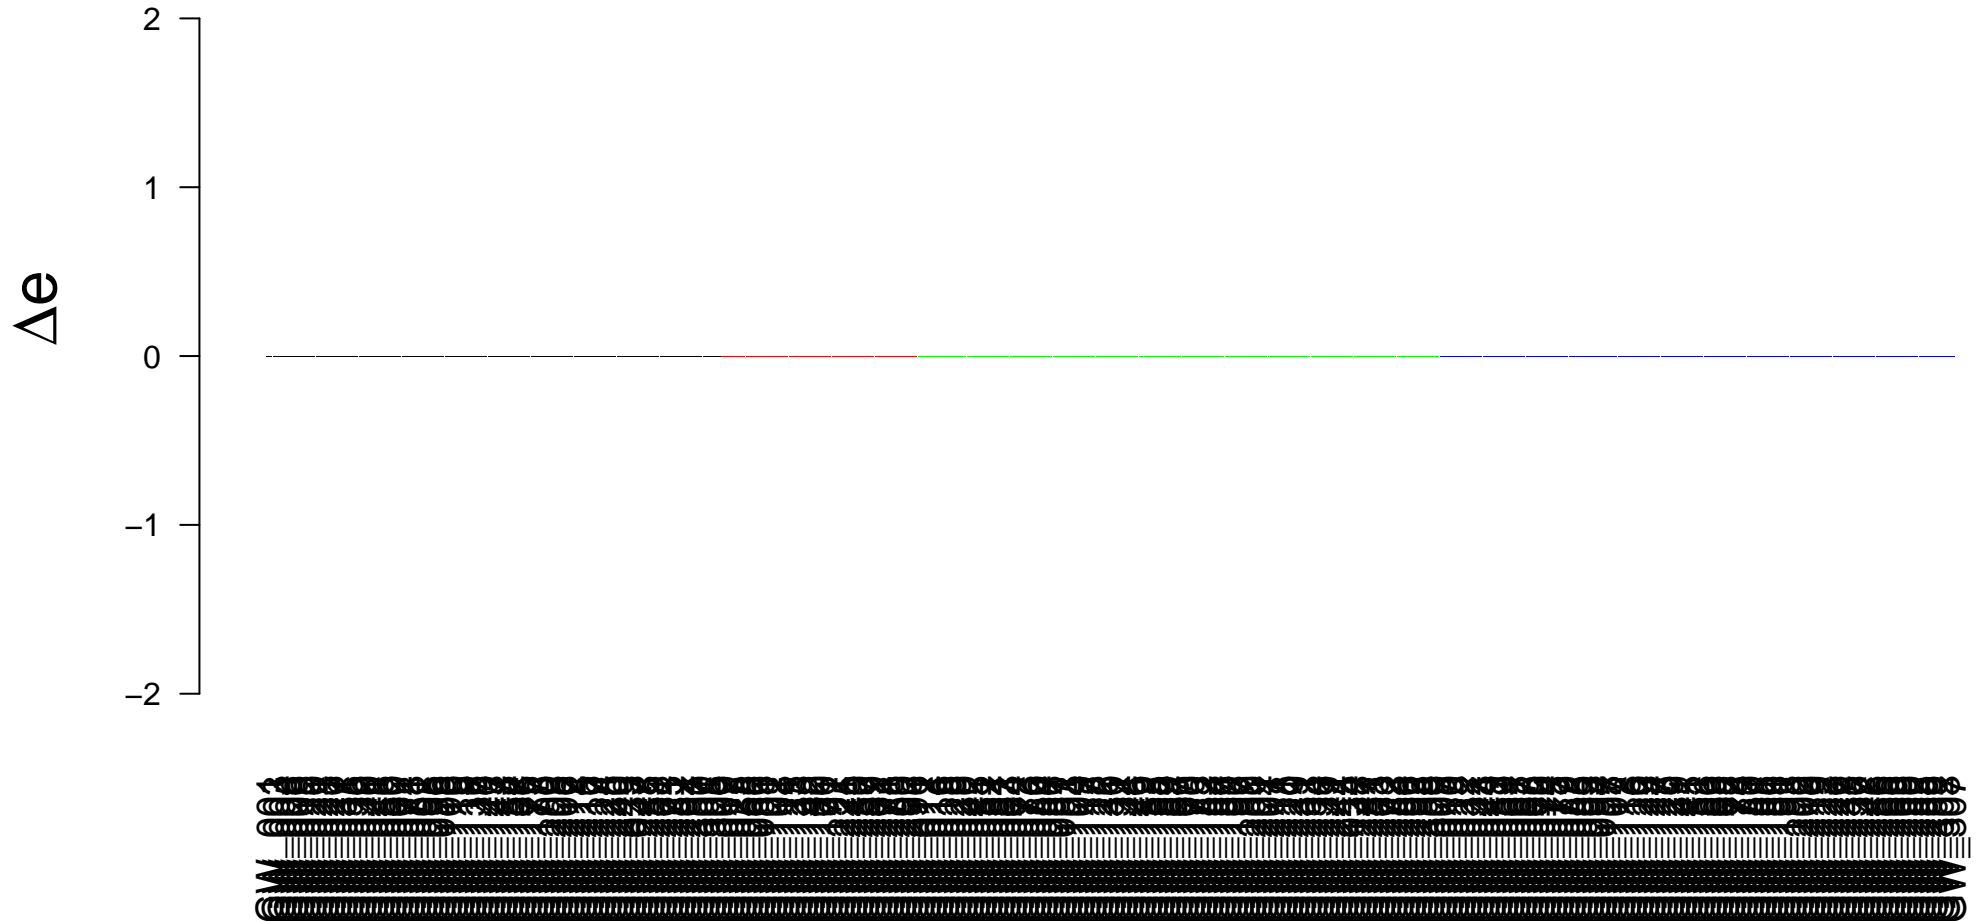

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot C

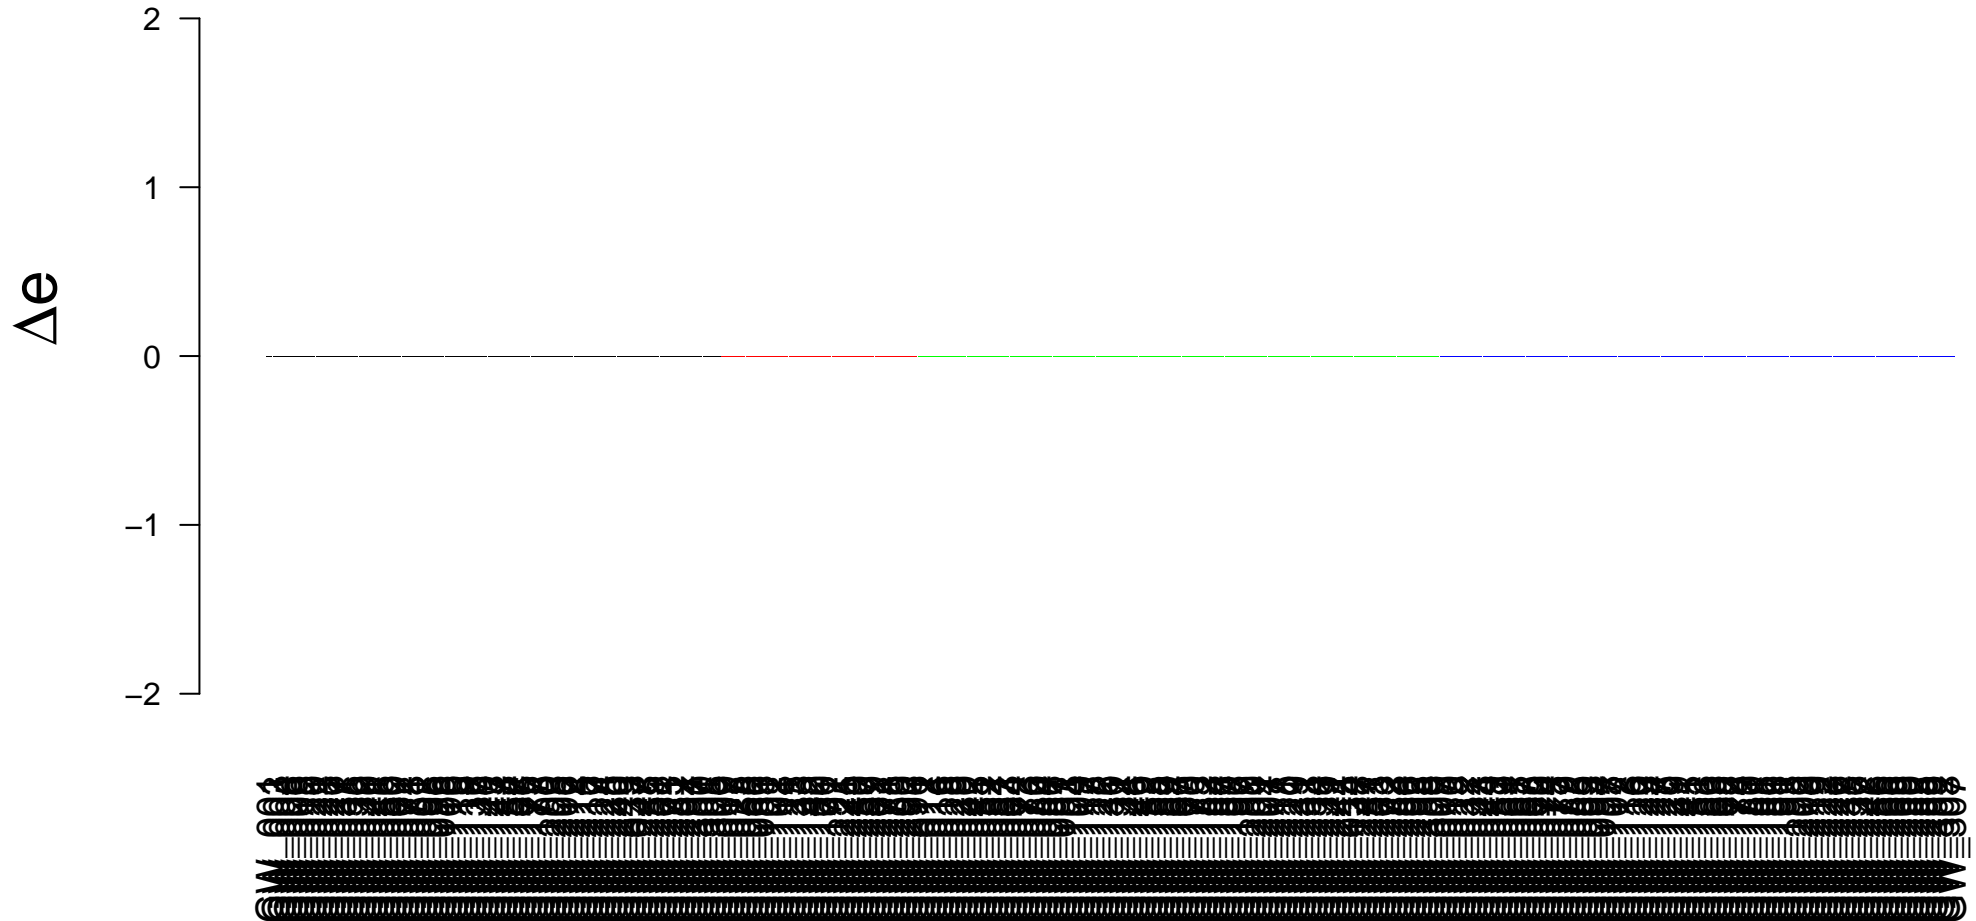

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot D

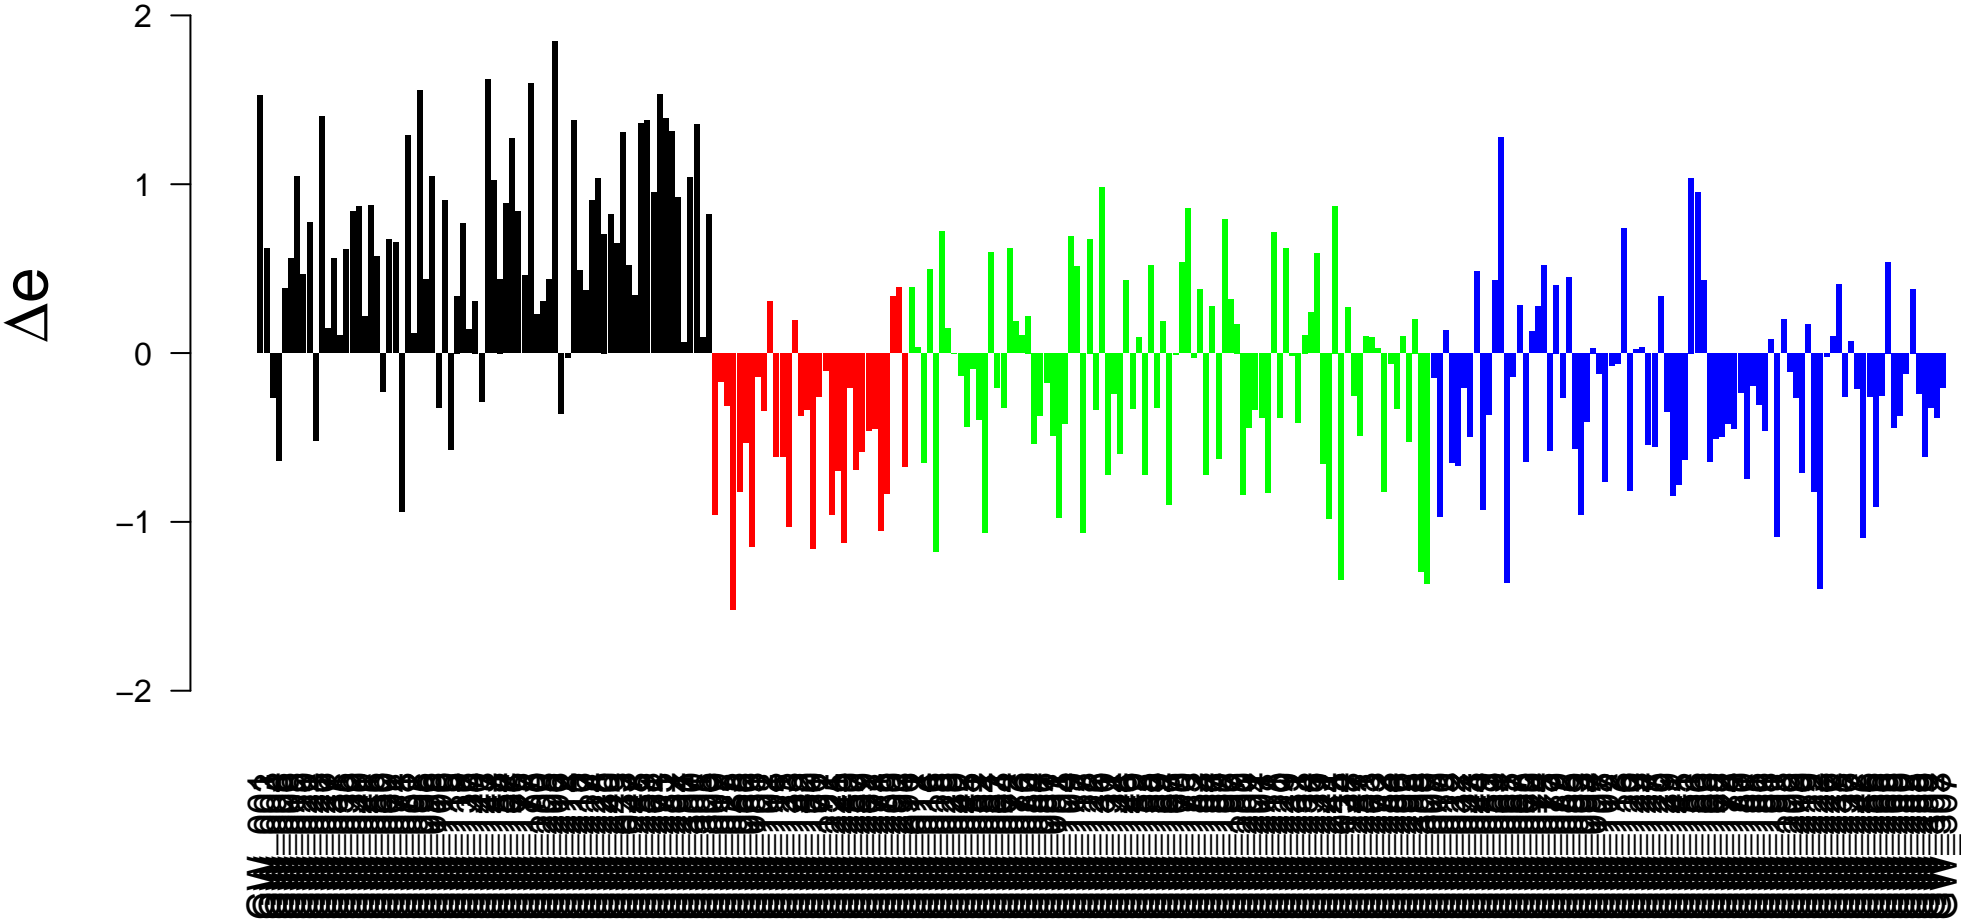

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot E

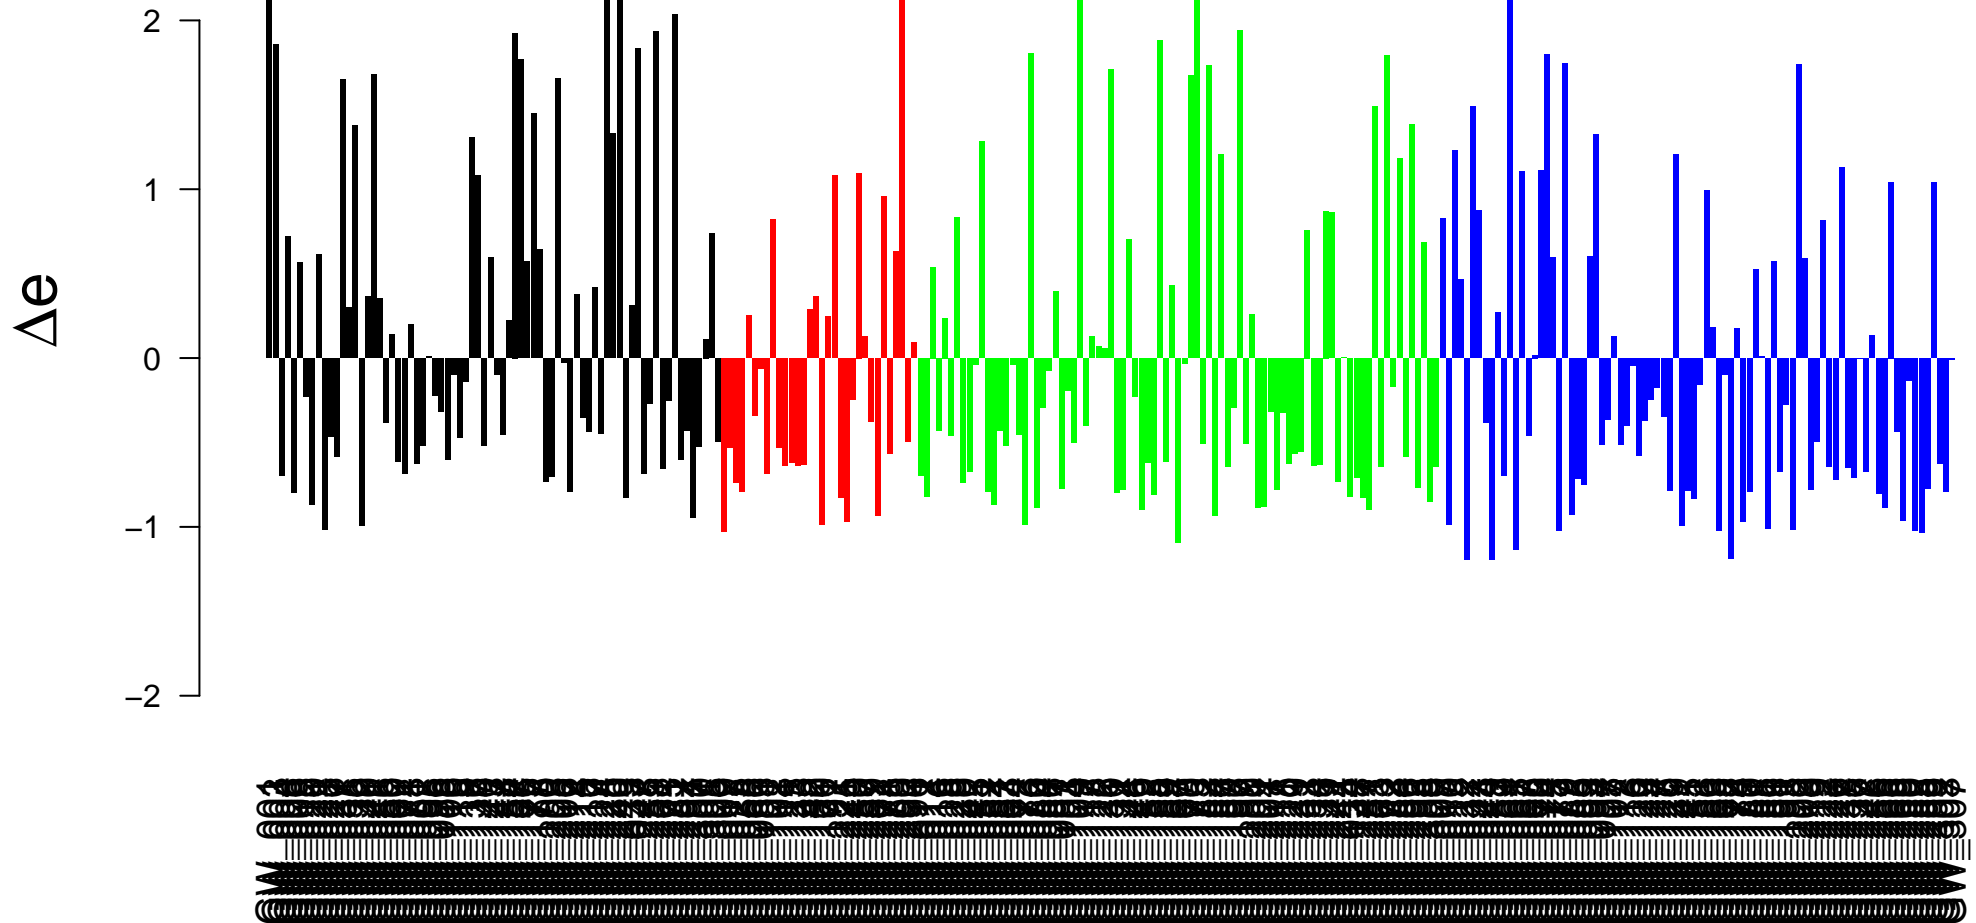

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot F

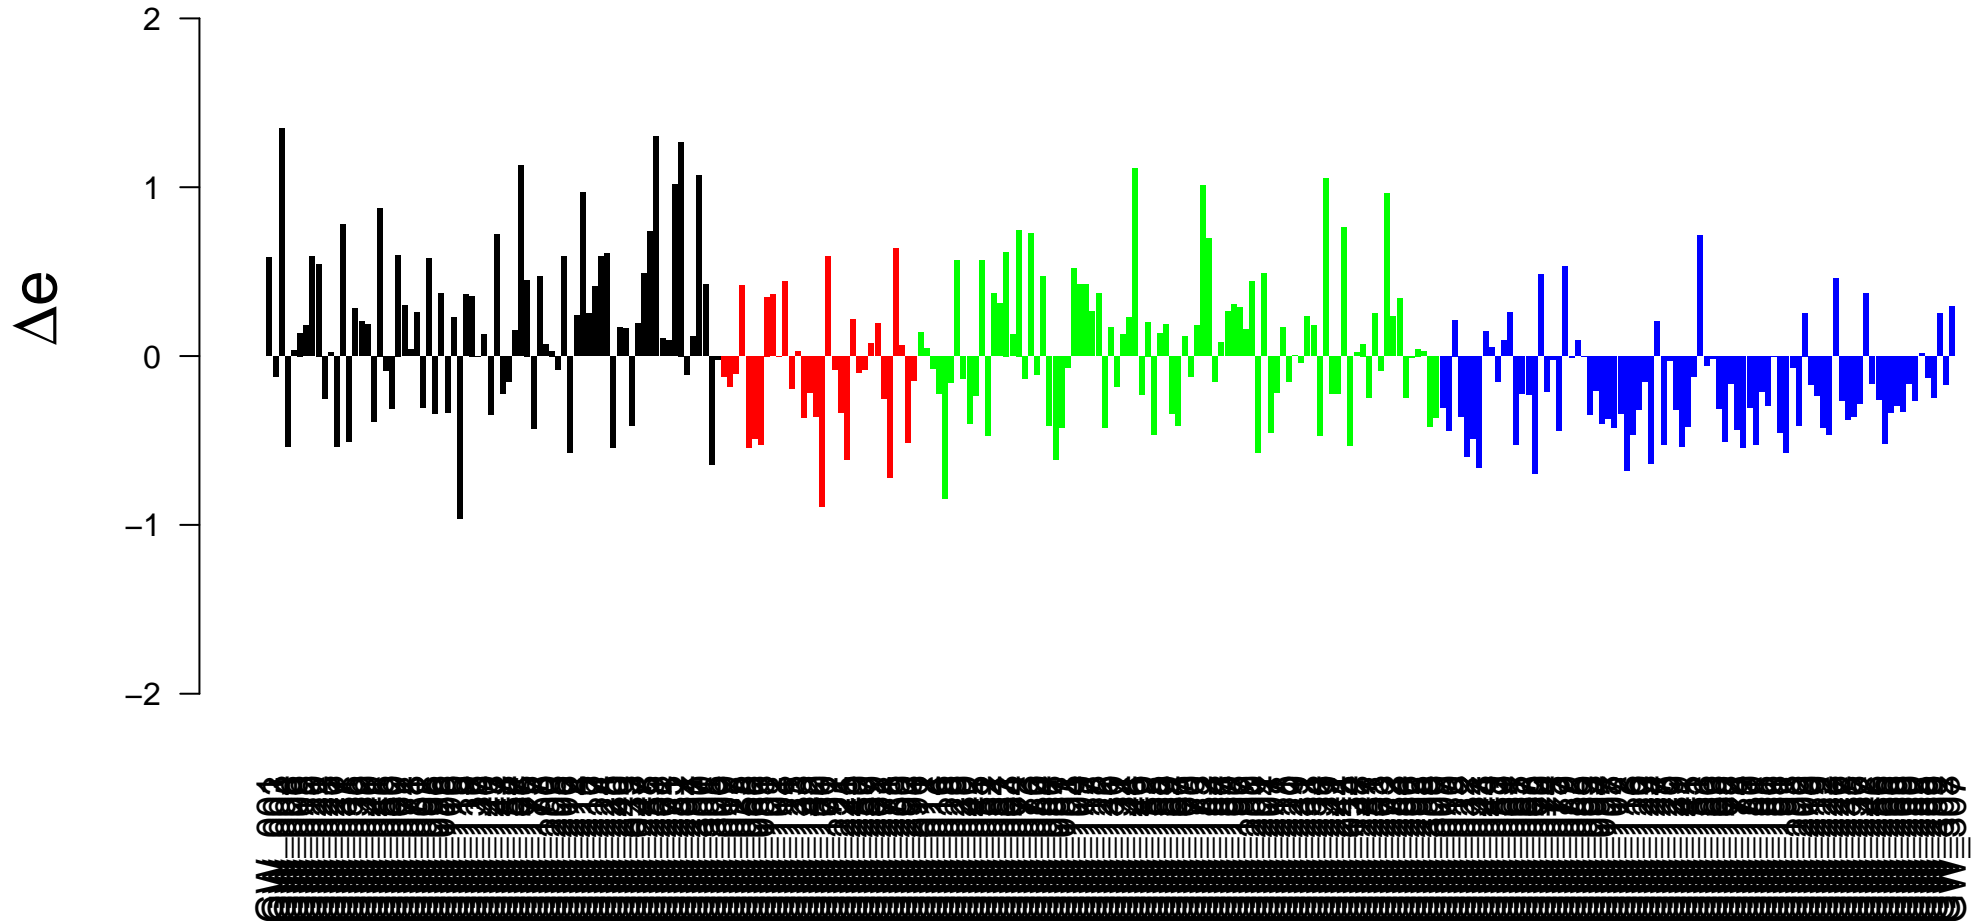

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot G

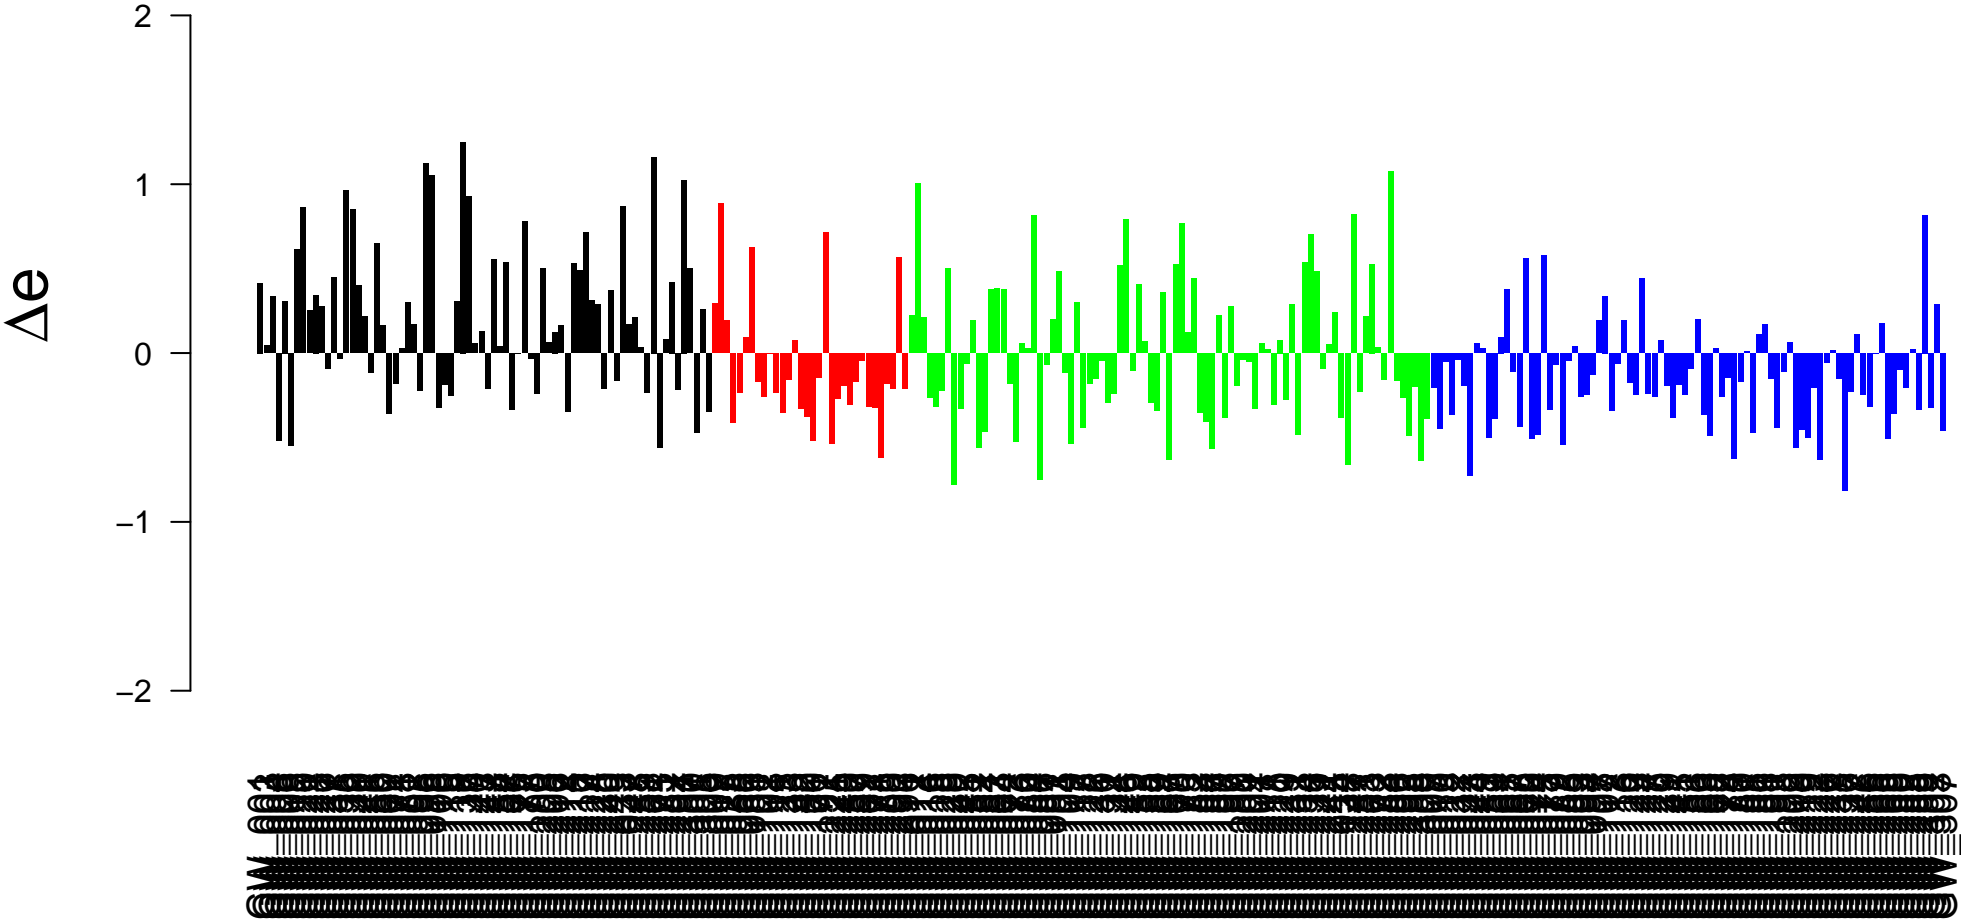

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot H

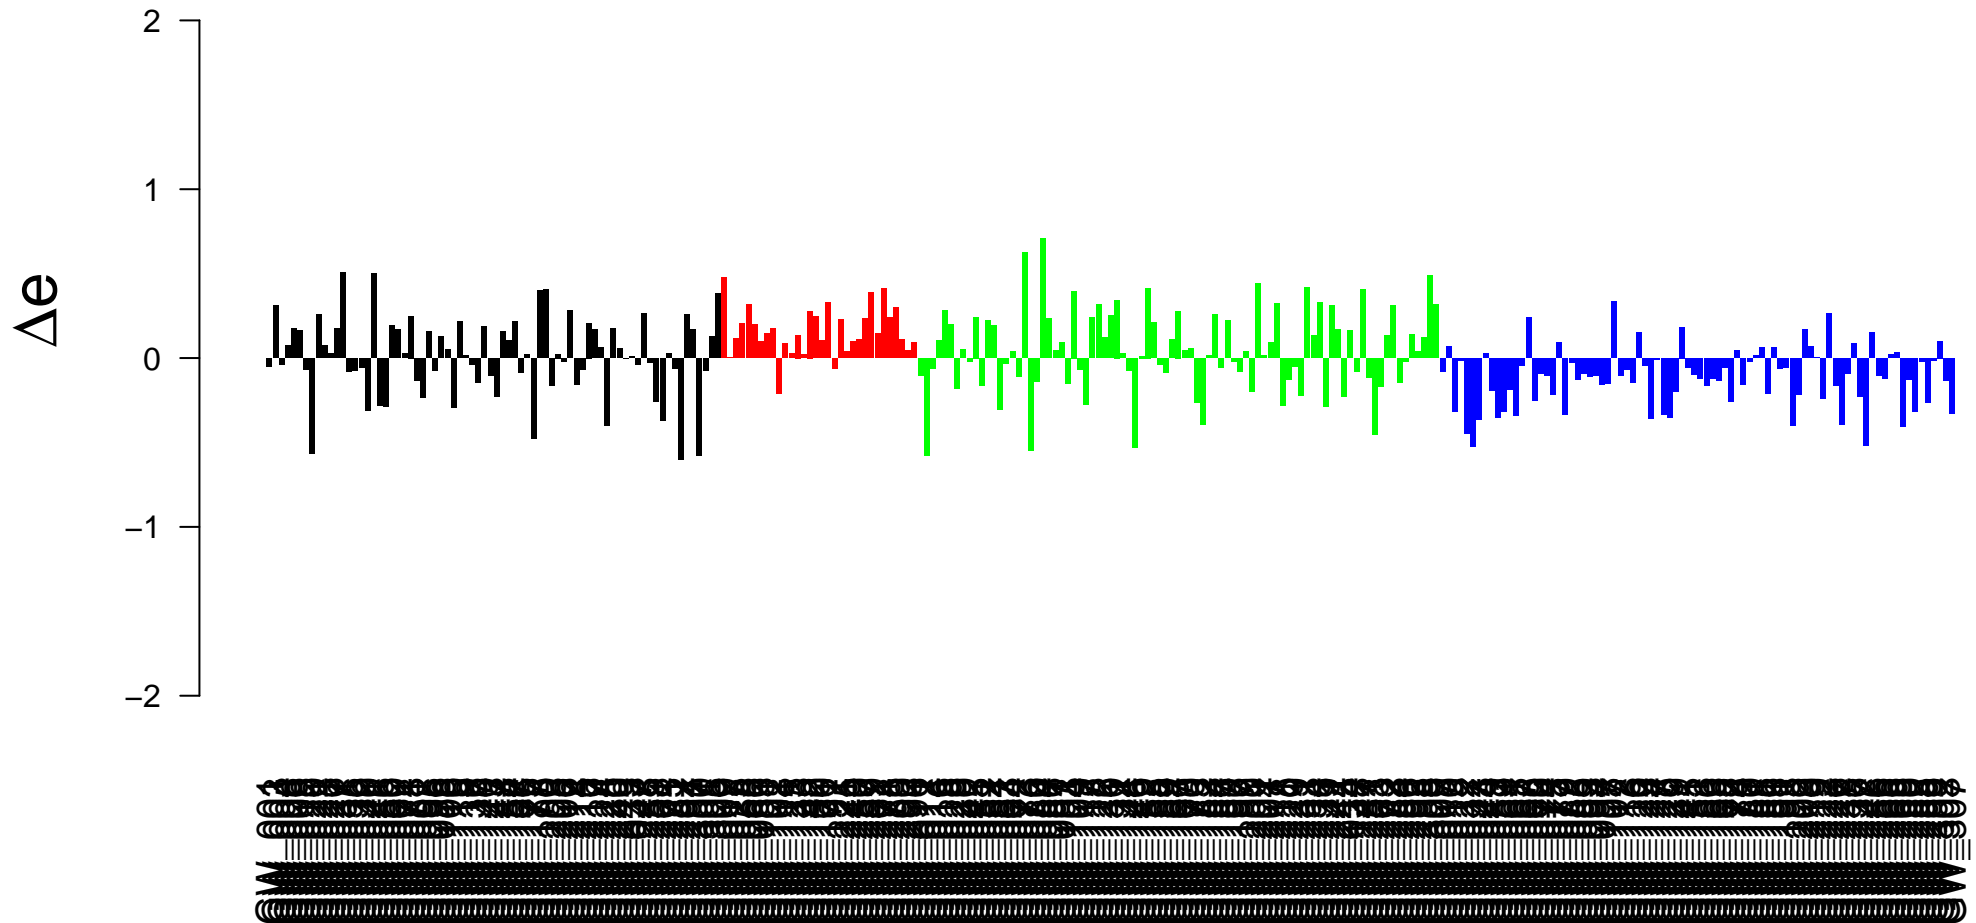

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot I

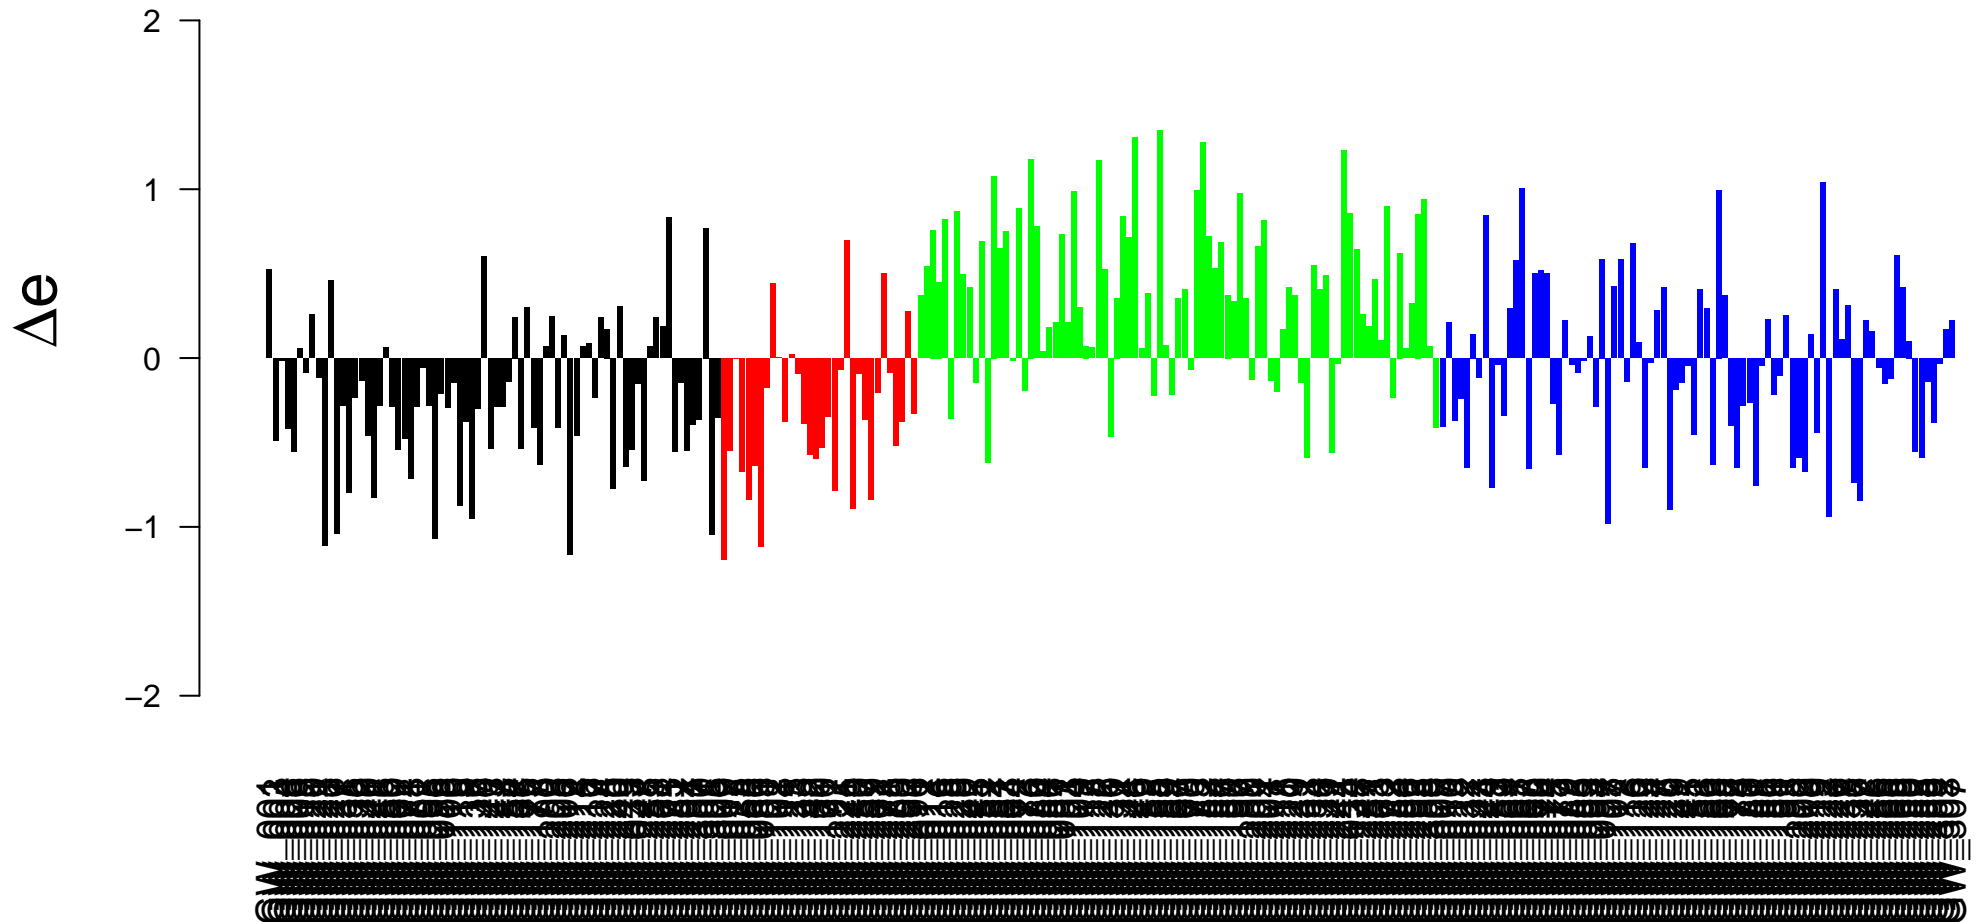

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot J

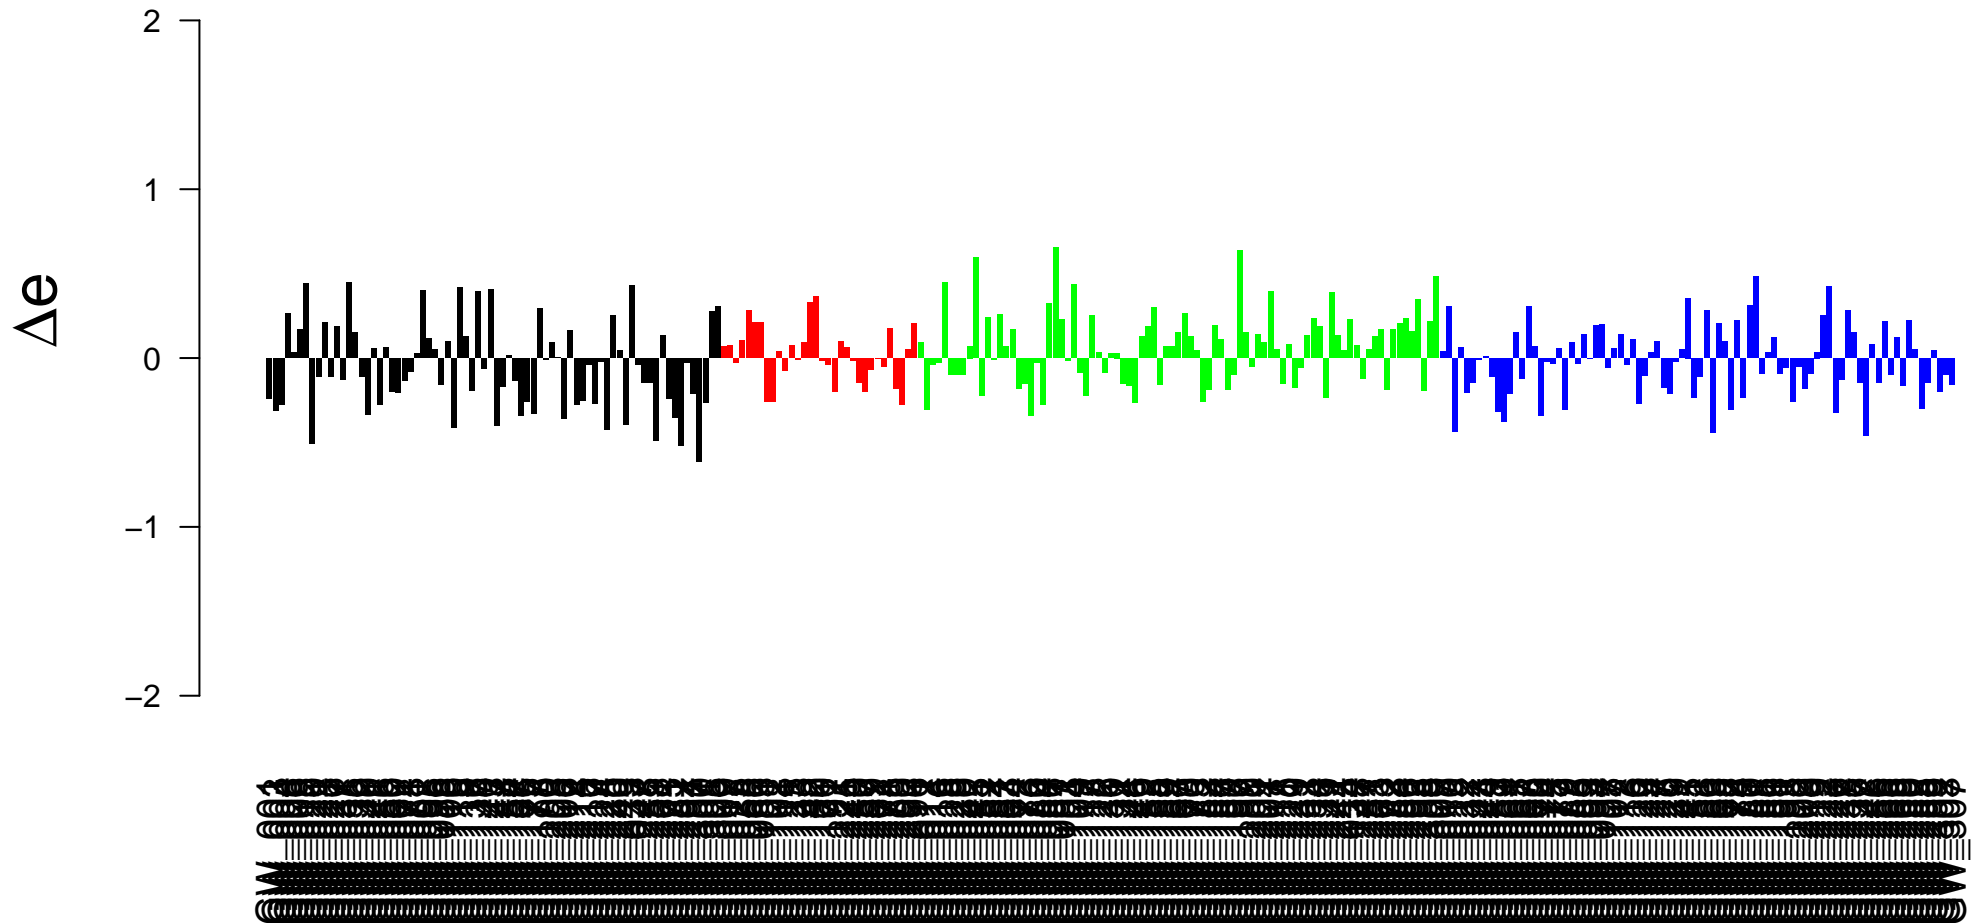

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot K

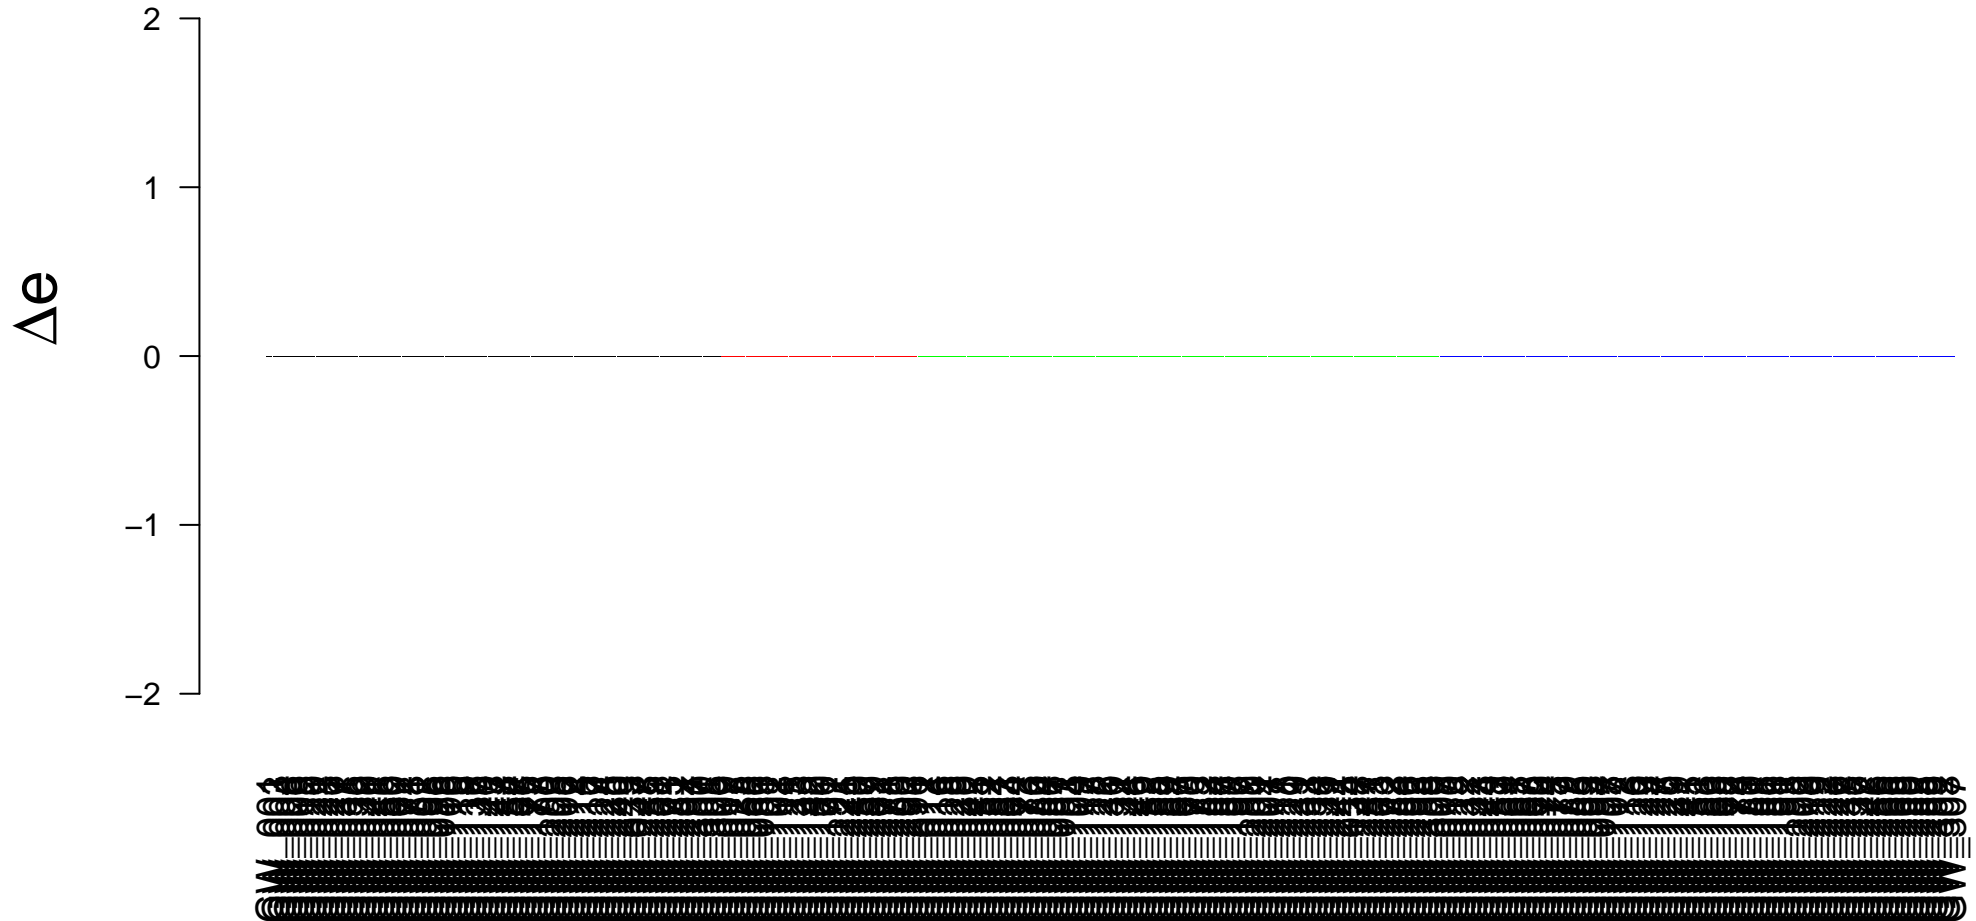

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot L

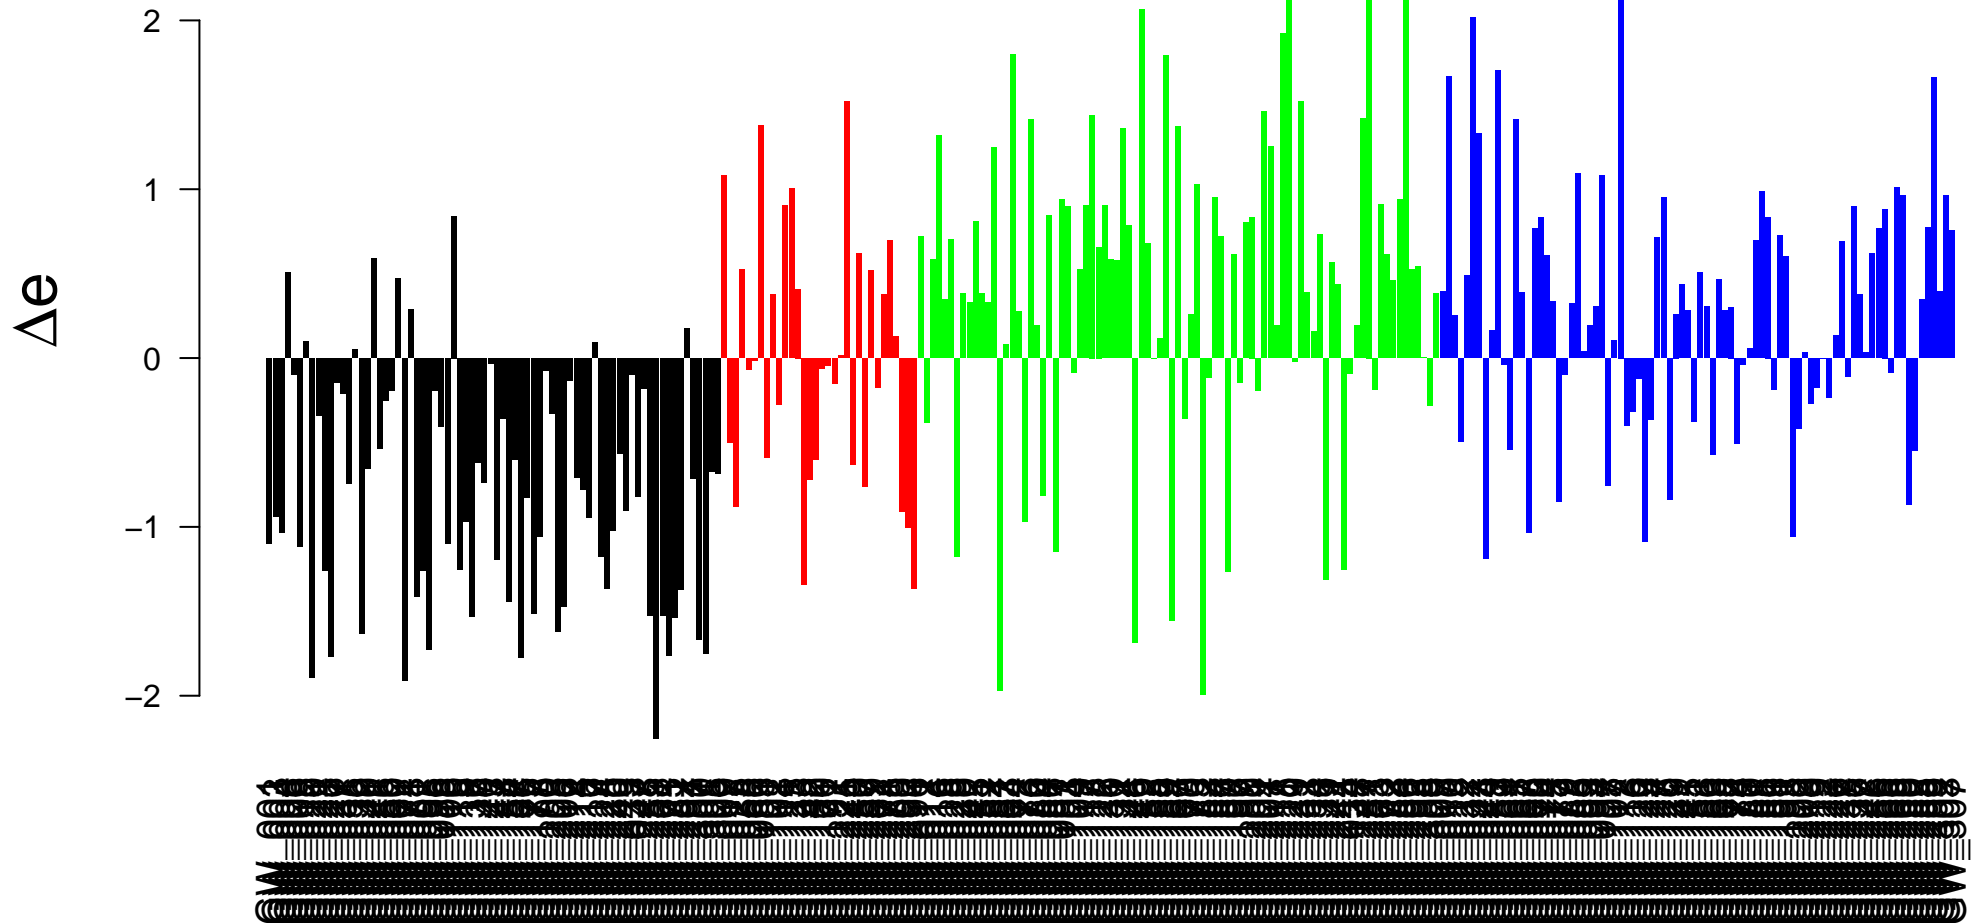

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot M

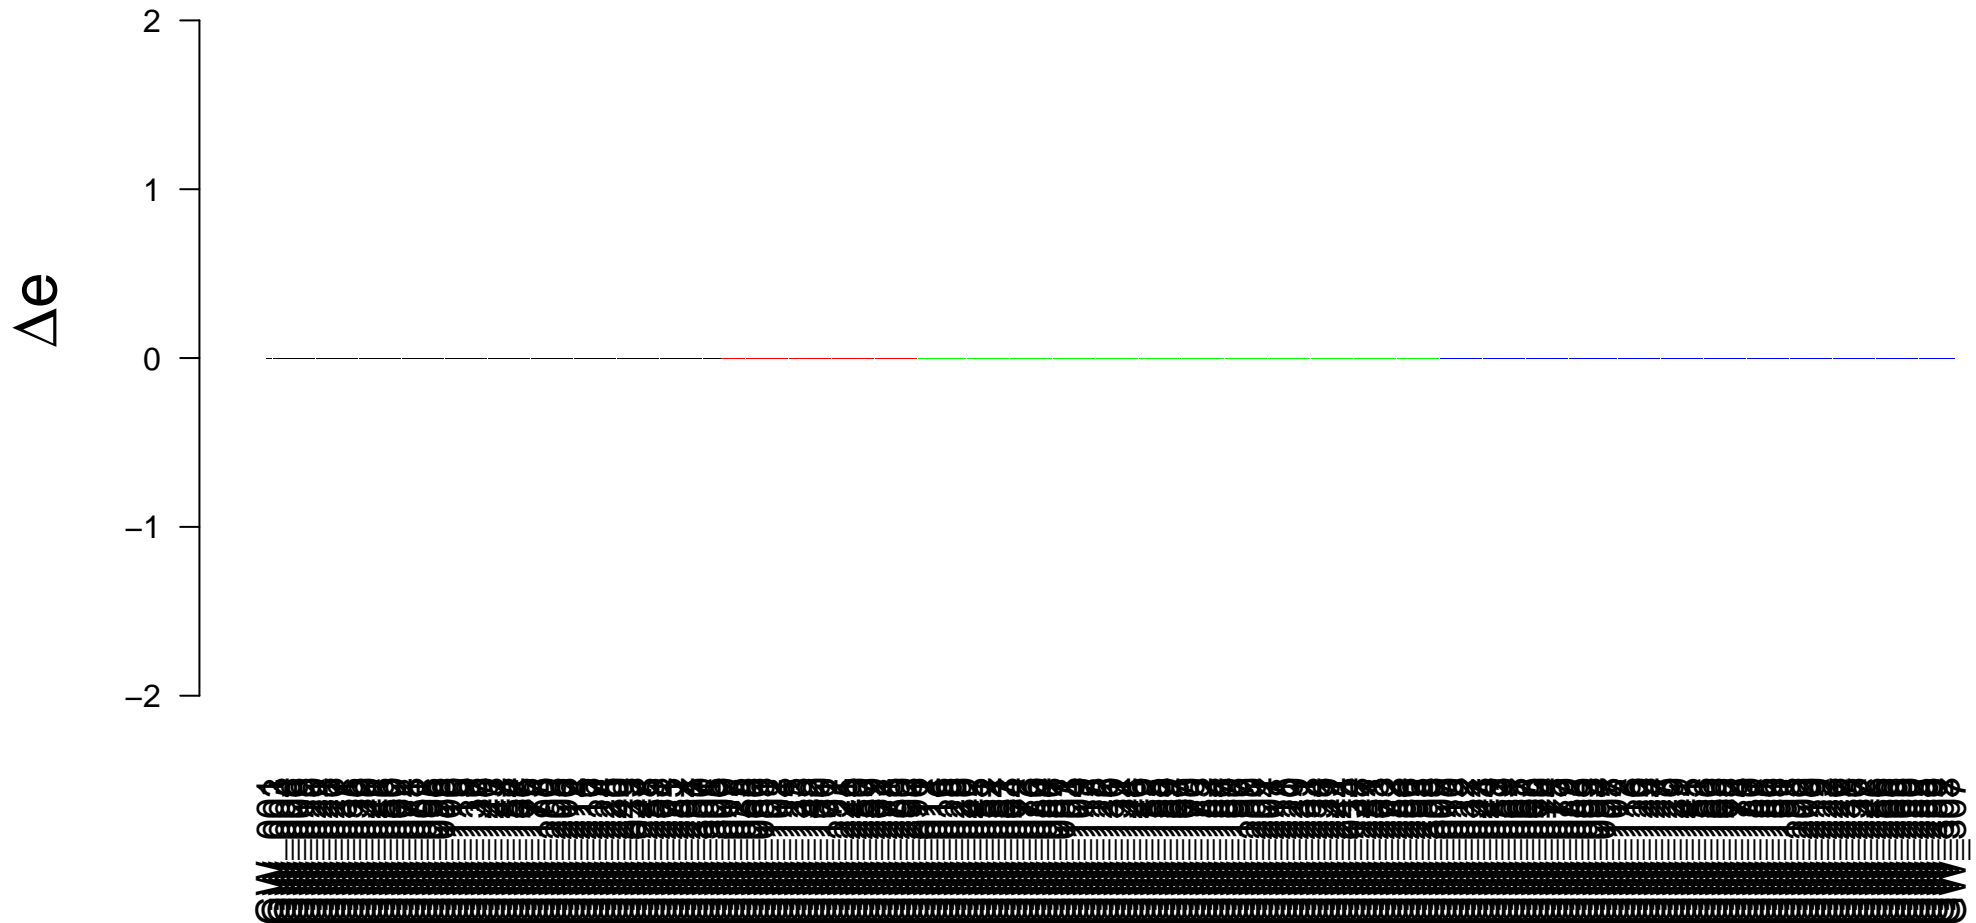

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot N

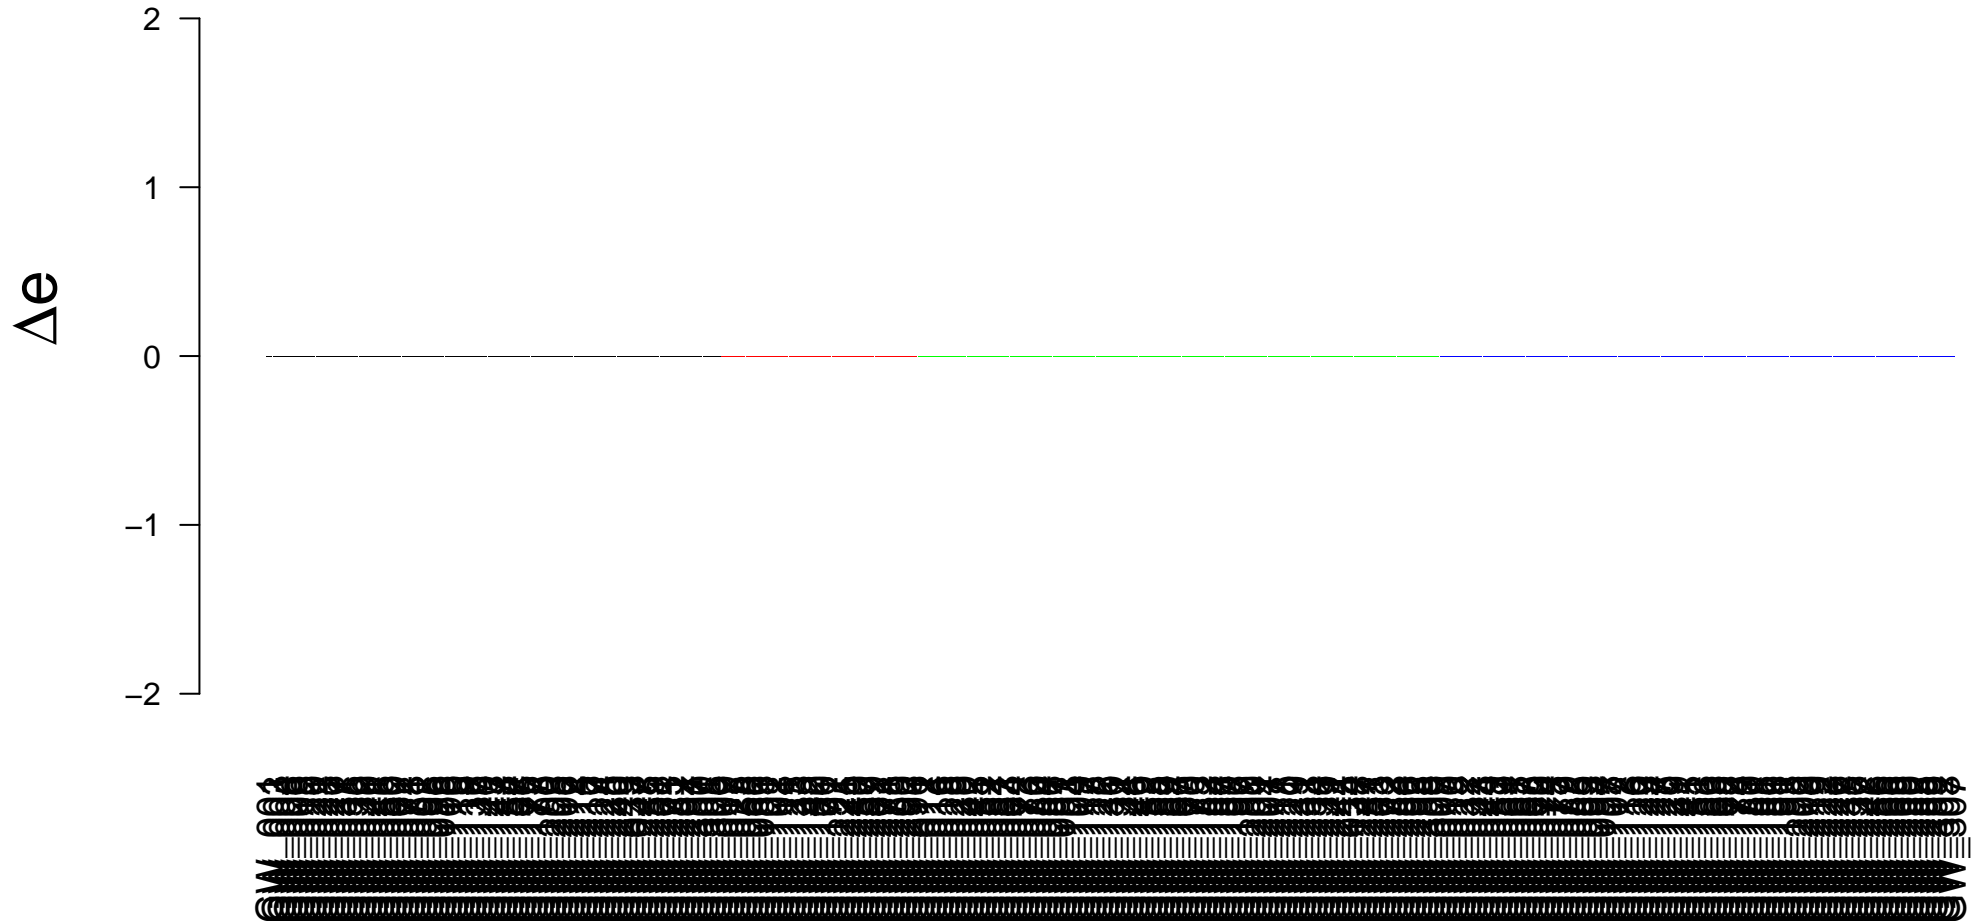

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot O

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot P

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot Q

Expression of antigen processing and presentation of exogenous peptide antigen via MHC class II in Spot R
