

double-strand break repair via homologous recombination

double-strand break repair via homologous recombination

Enrichment in spots: double-strand break repair via homologous recombination

Expression of double-strand break repair via homologous recombination in Spot A

Expression of double-strand break repair via homologous recombination in Spot B

Expression of double-strand break repair via homologous recombination in Spot G

Expression of double-strand break repair via homologous recombination in Spot H

Expression of double-strand break repair via homologous recombination in Spot I

Expression of double-strand break repair via homologous recombination in Spot J

Expression of double-strand break repair via homologous recombination in Spot K

Expression of double-strand break repair via homologous recombination in Spot L

Expression of double-strand break repair via homologous recombination in Spot M

Expression of double-strand break repair via homologous recombination in Spot N

Expression of double-strand break repair via homologous recombination in Spot O

Expression of double-strand break repair via homologous recombination in Spot P

Expression of double-strand break repair via homologous recombination in Spot R
