

negative regulation of interferon-gamma production

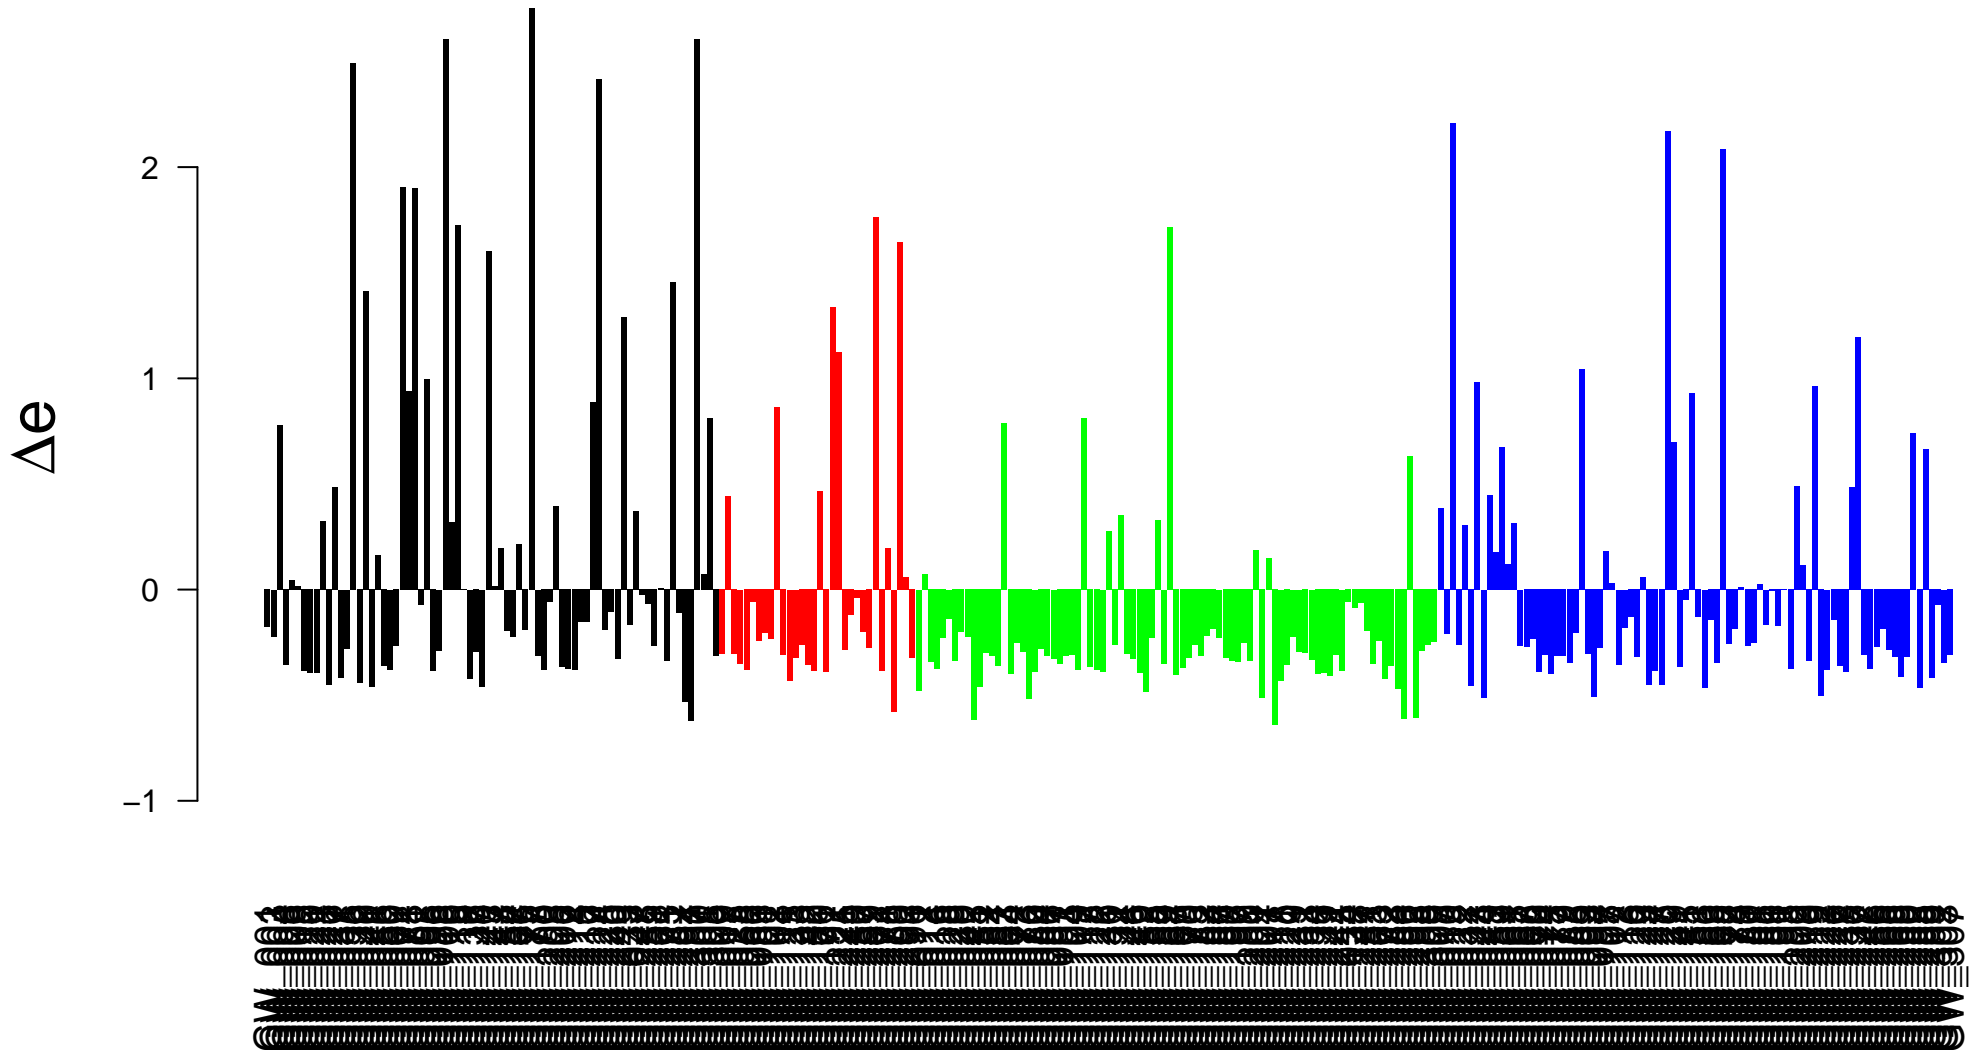

negative regulation of interferon-gamma production

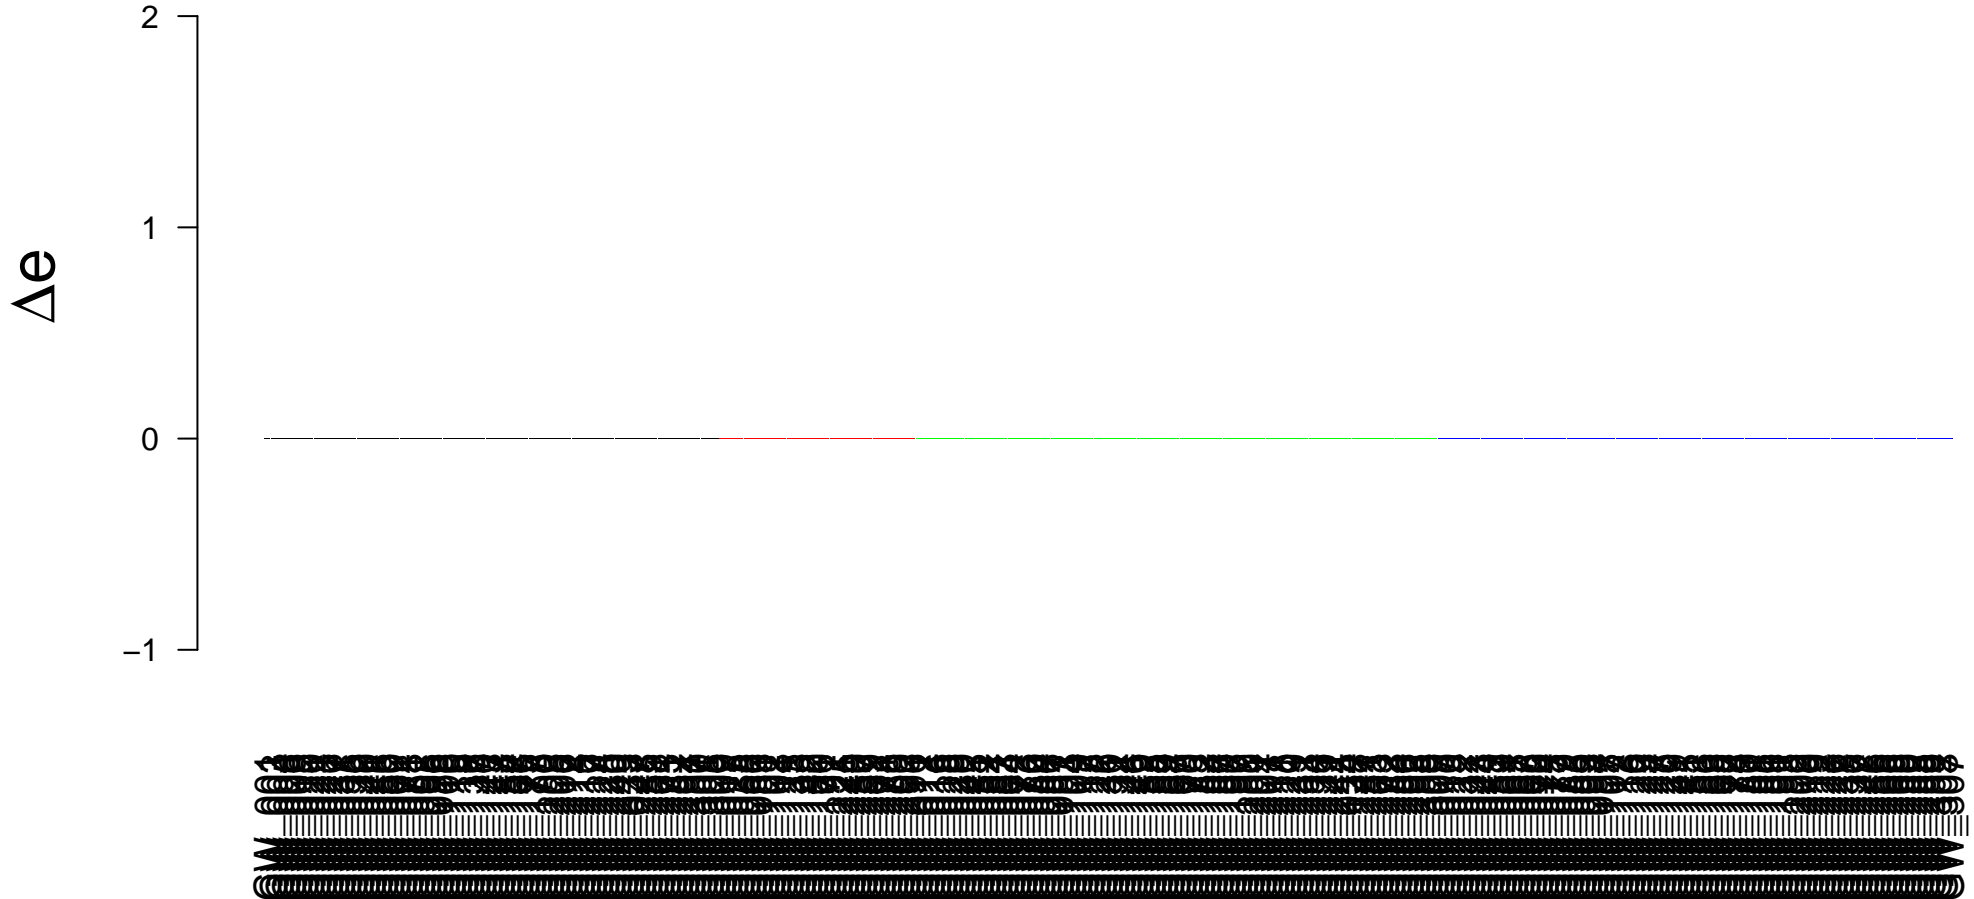

Enrichment in spots: negative regulation of interferon-gamma production

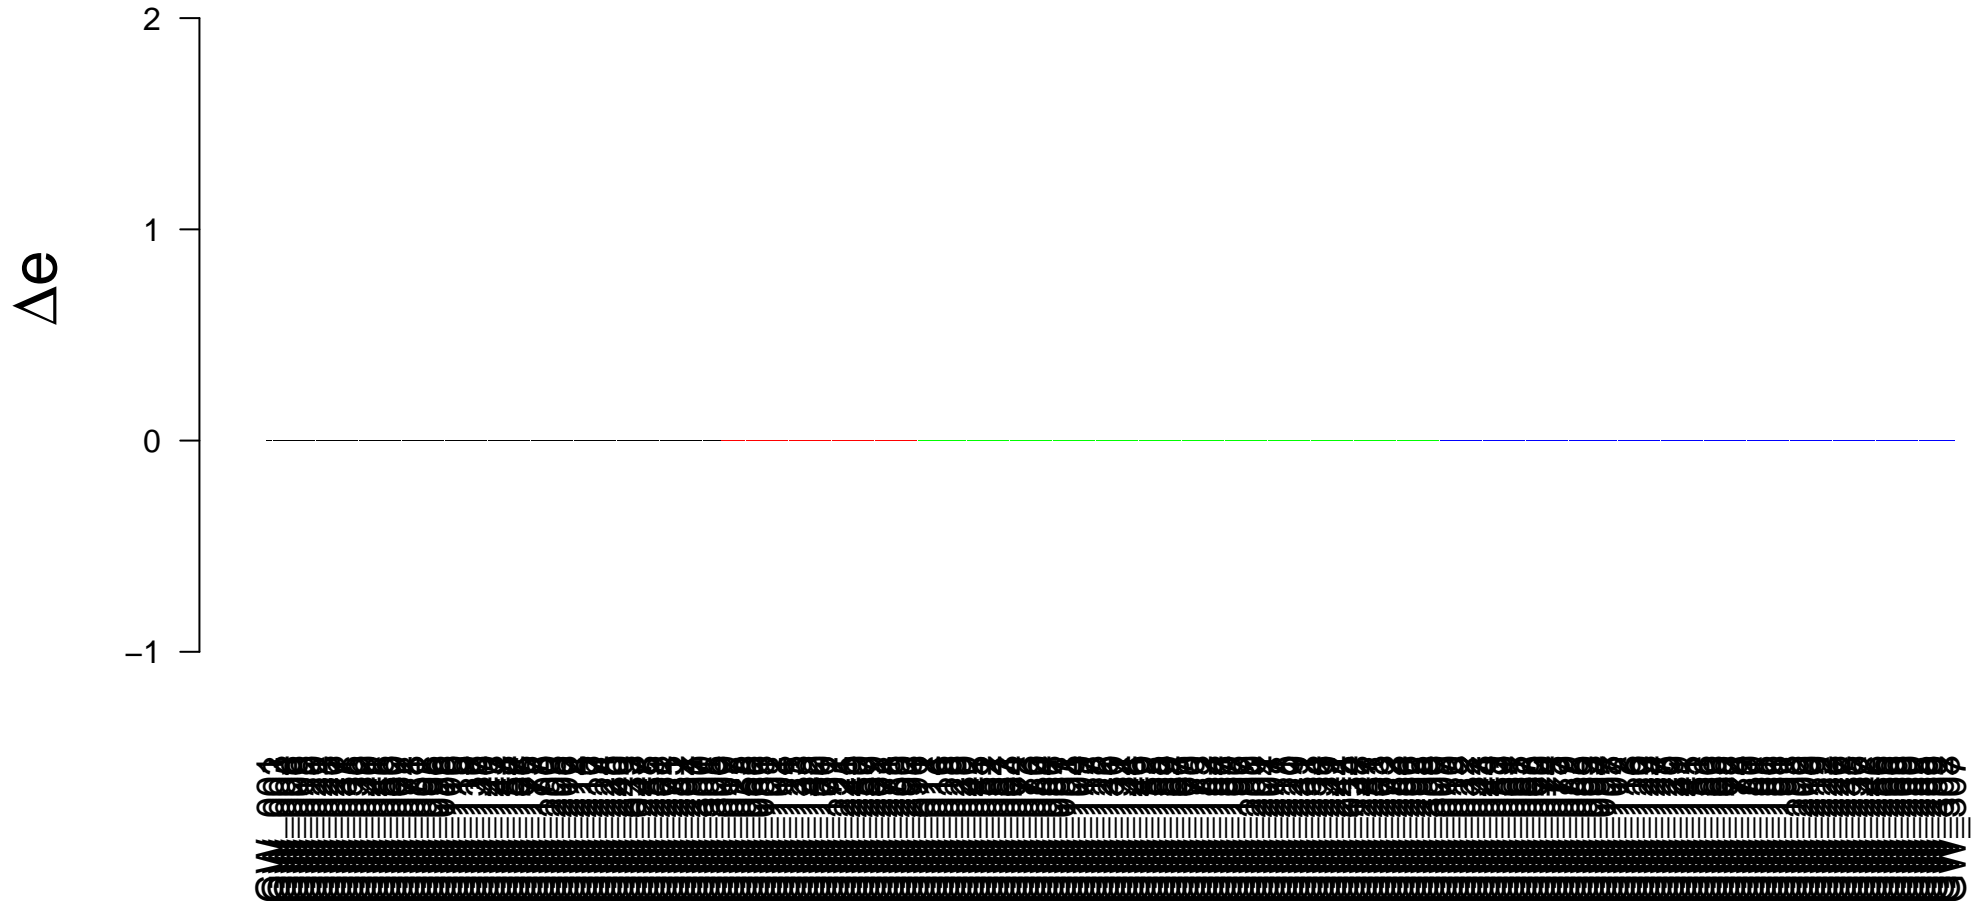

Expression of negative regulation of interferon-gamma production in Spot A

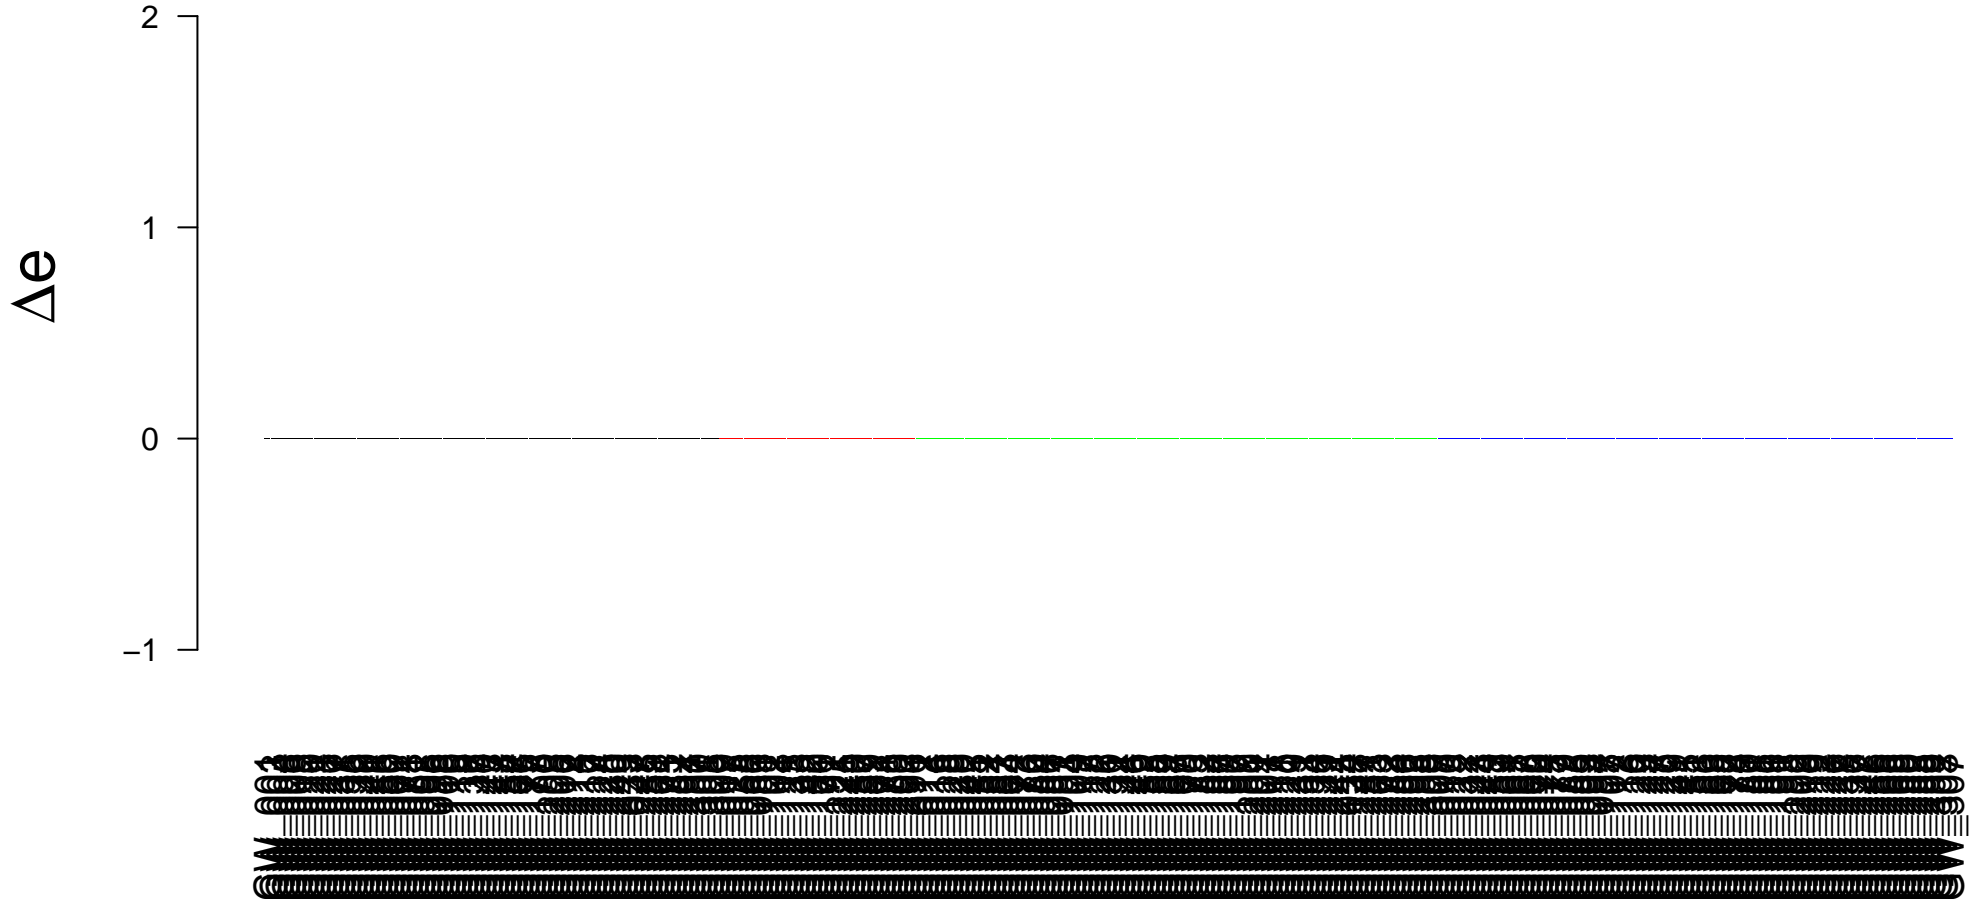

Expression of negative regulation of interferon-gamma production in Spot B

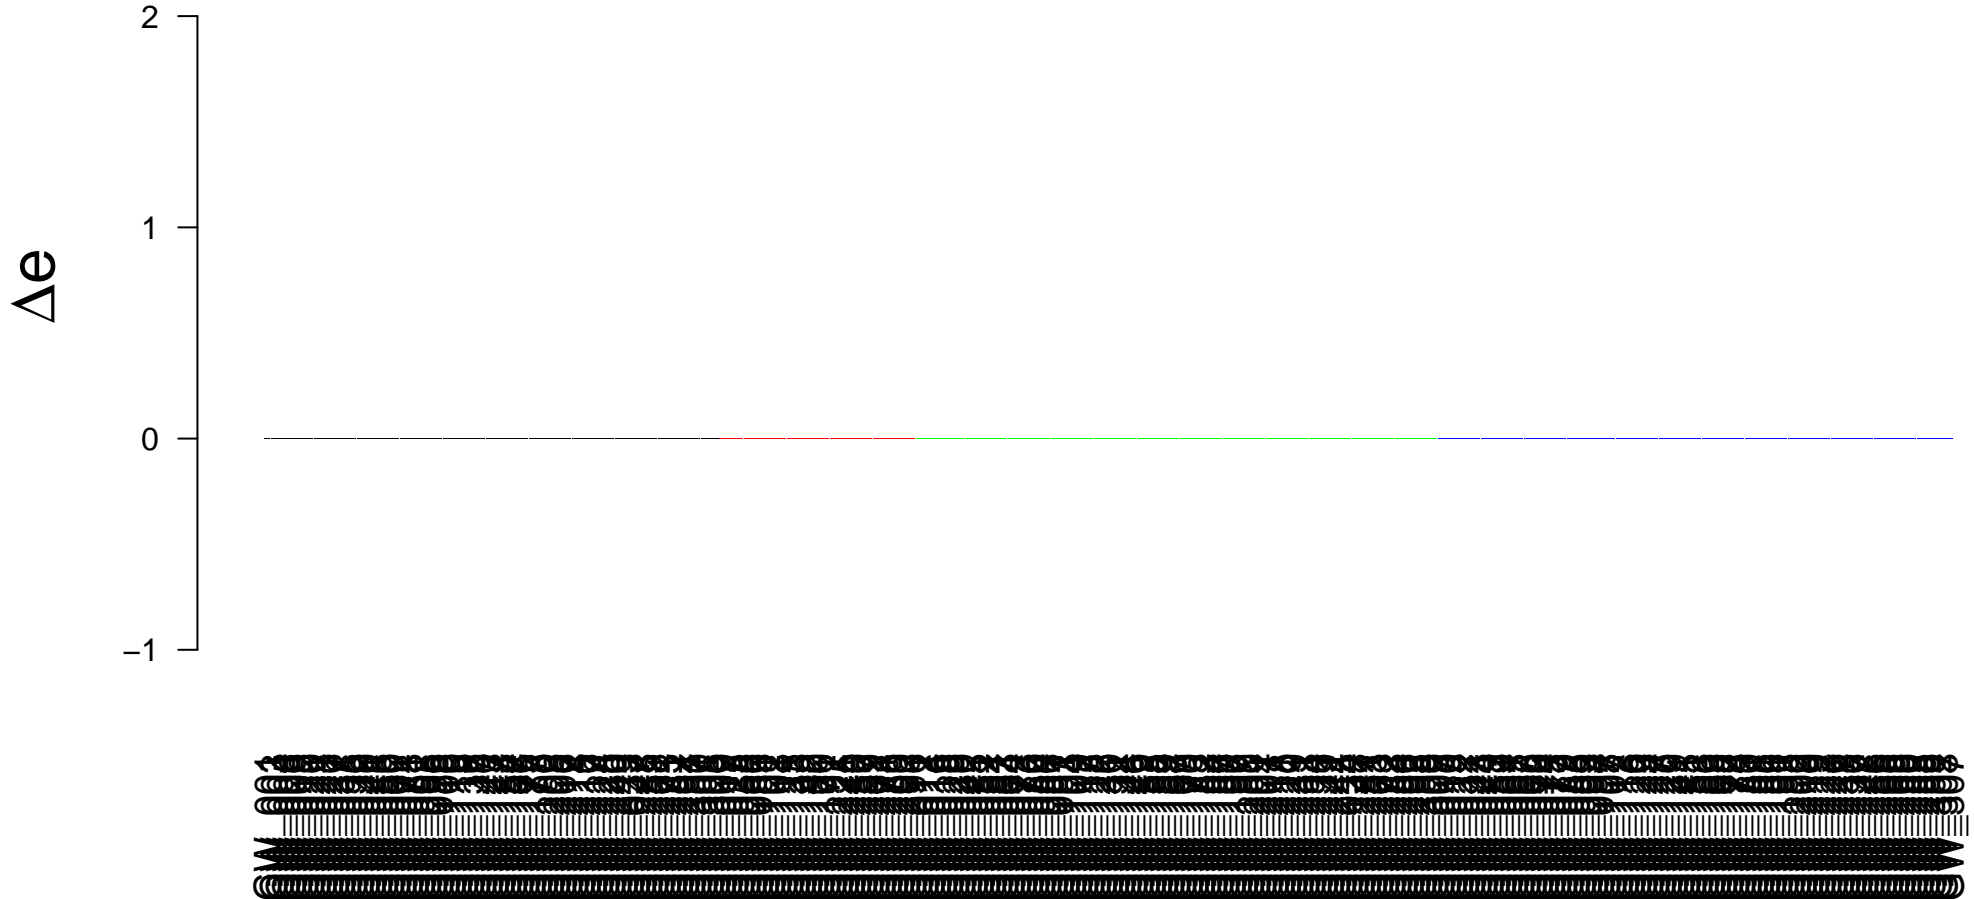

Expression of negative regulation of interferon-gamma production in Spot C

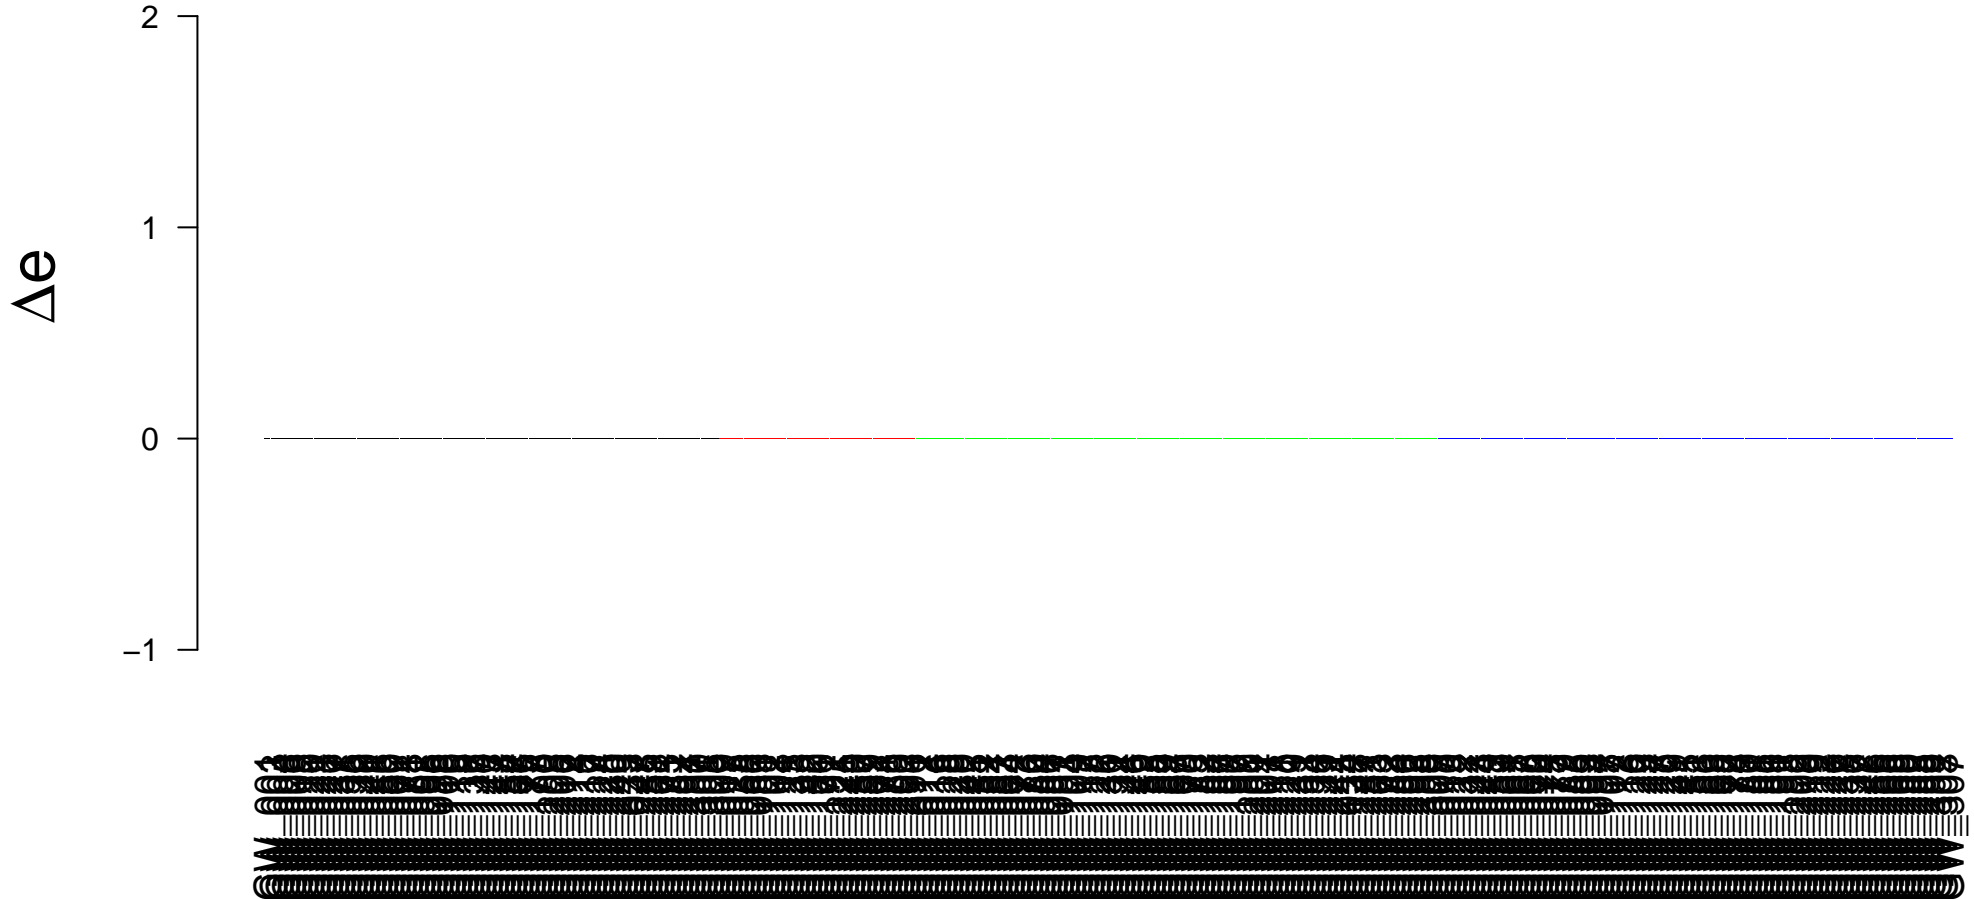

Expression of negative regulation of interferon-gamma production in Spot D

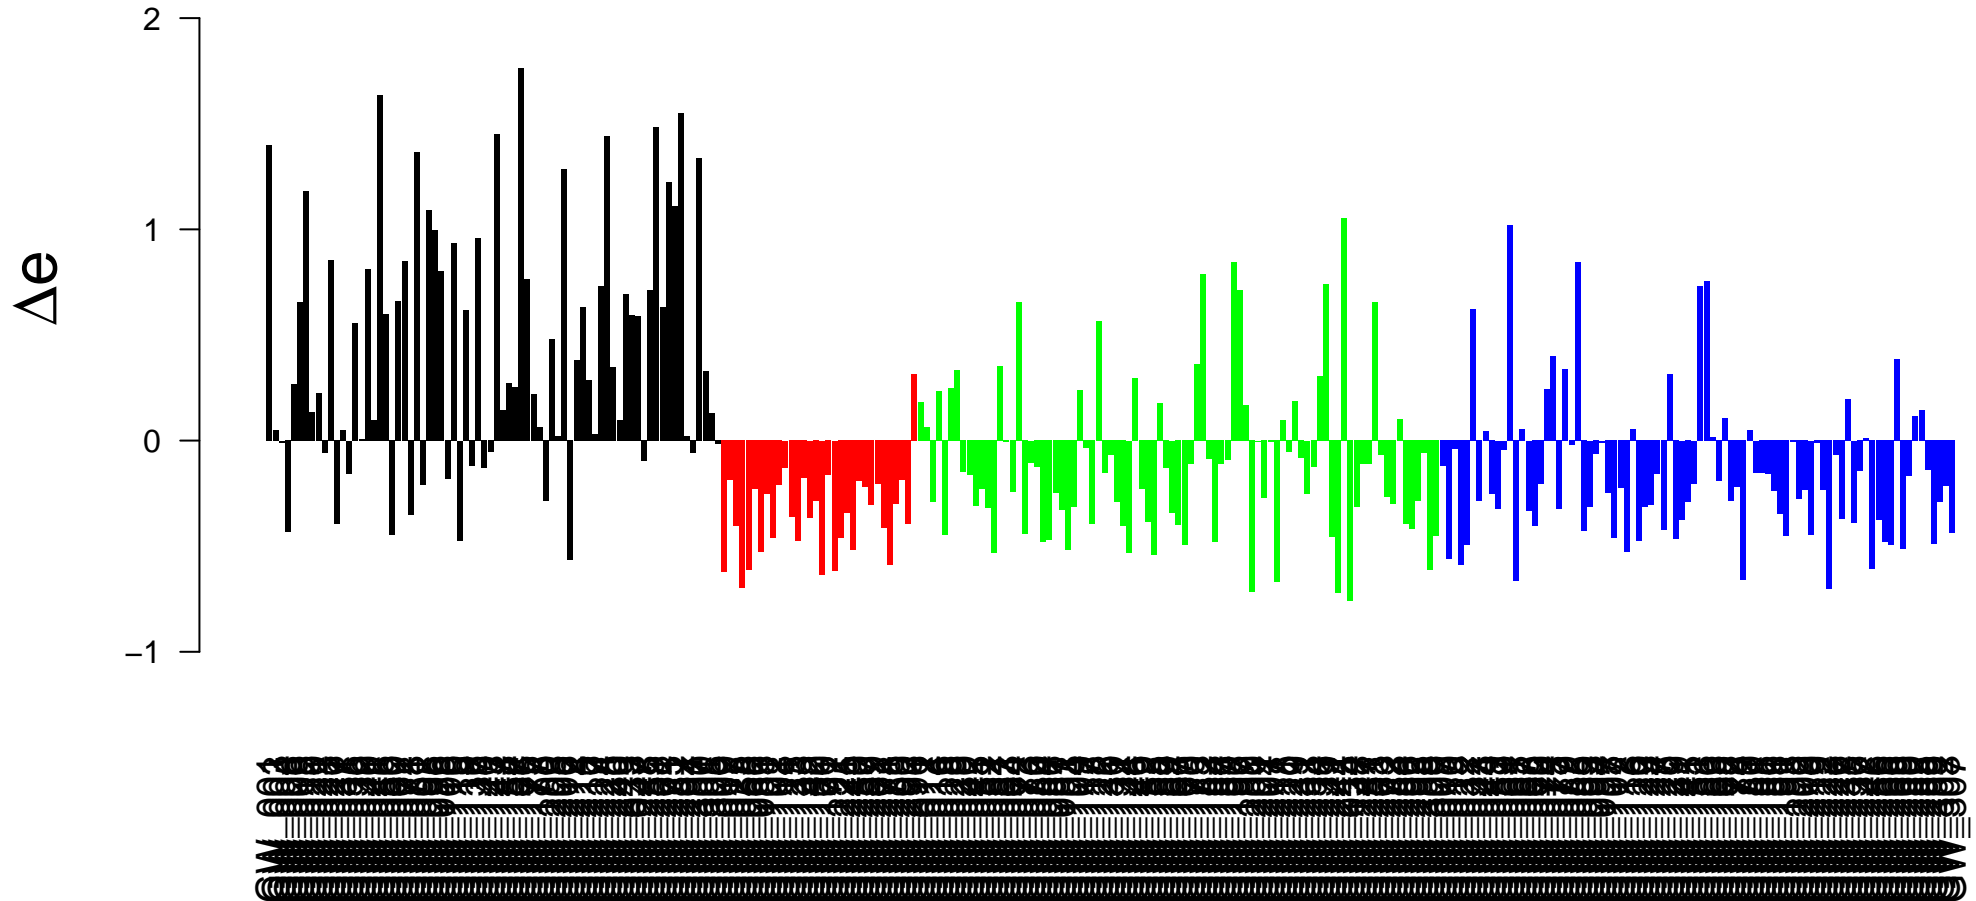

Expression of negative regulation of interferon-gamma production in Spot E

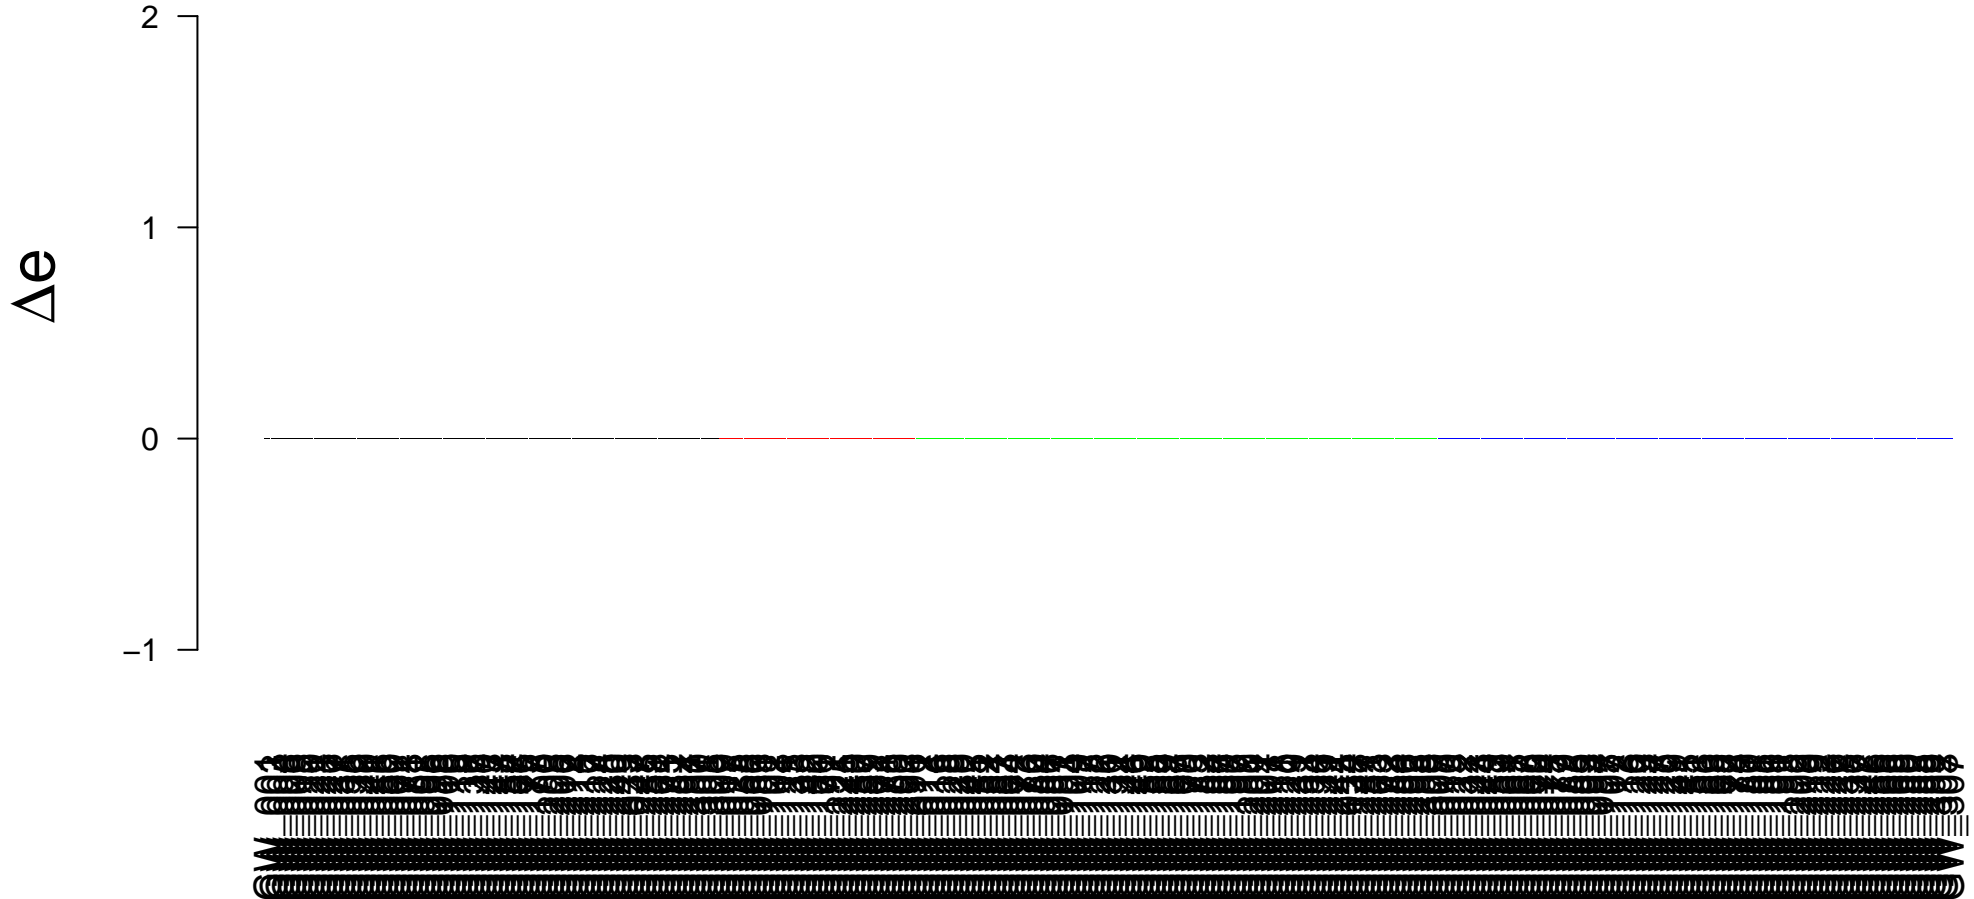

Expression of negative regulation of interferon-gamma production in Spot F

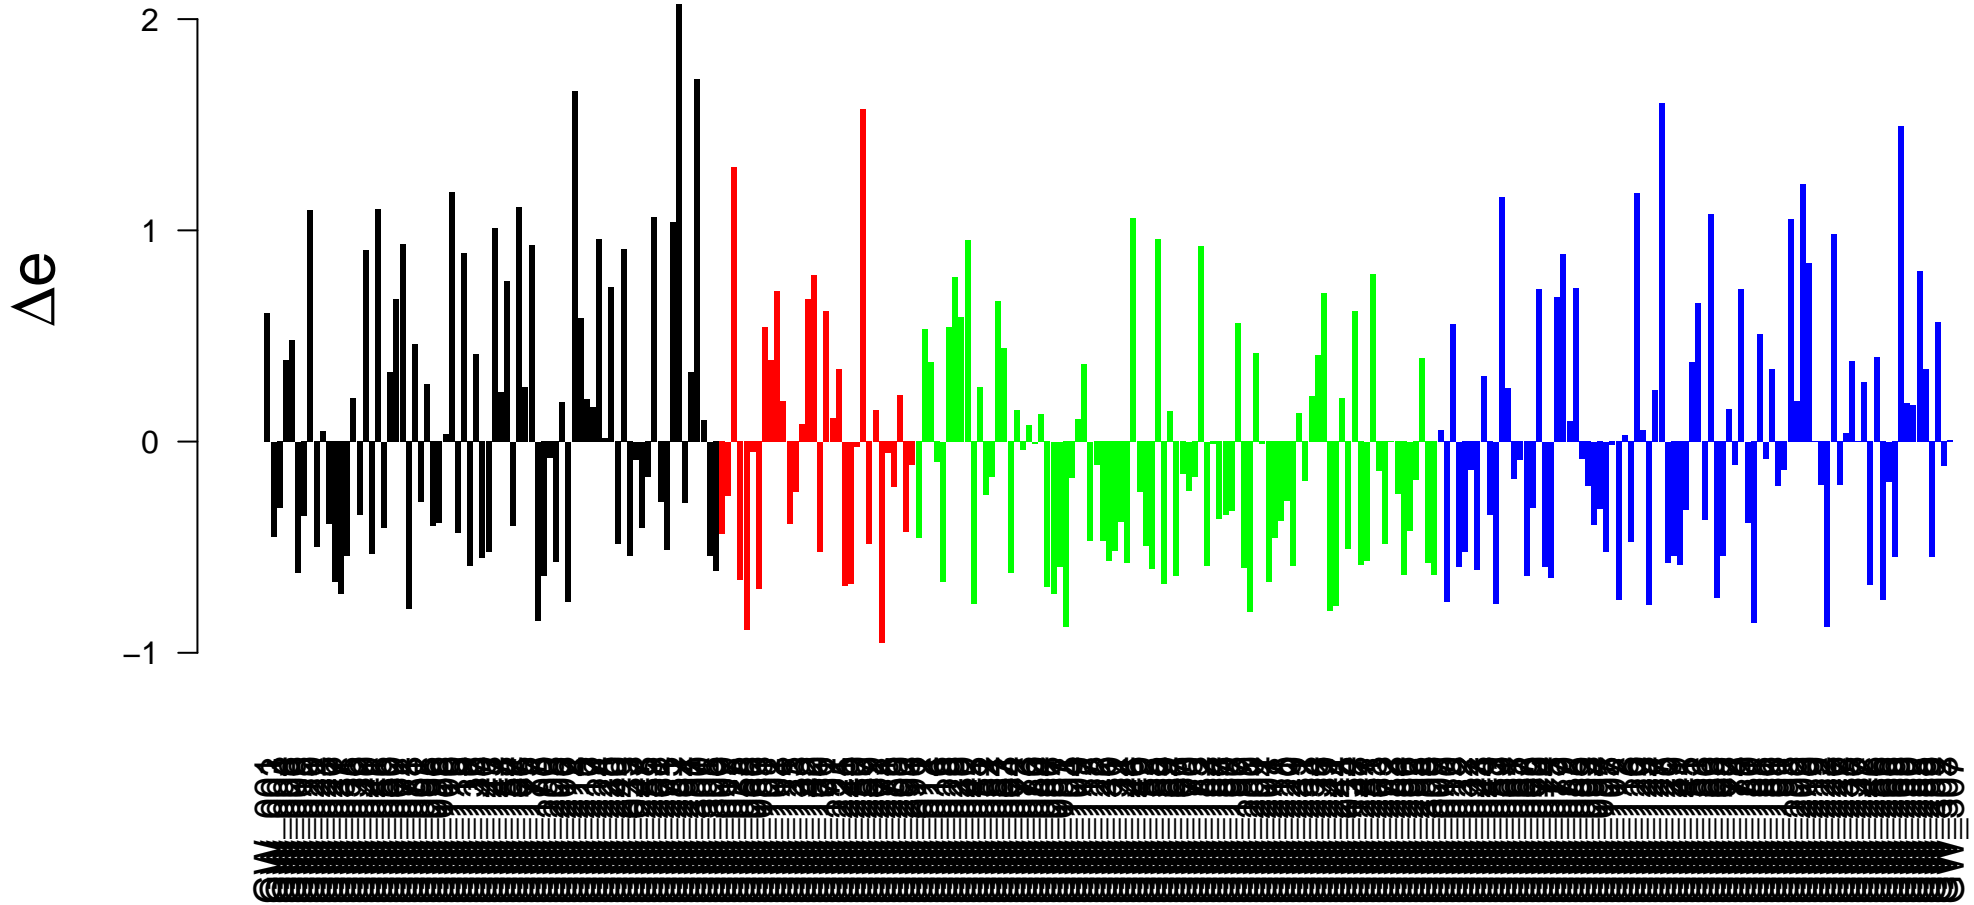

Expression of negative regulation of interferon-gamma production in Spot G

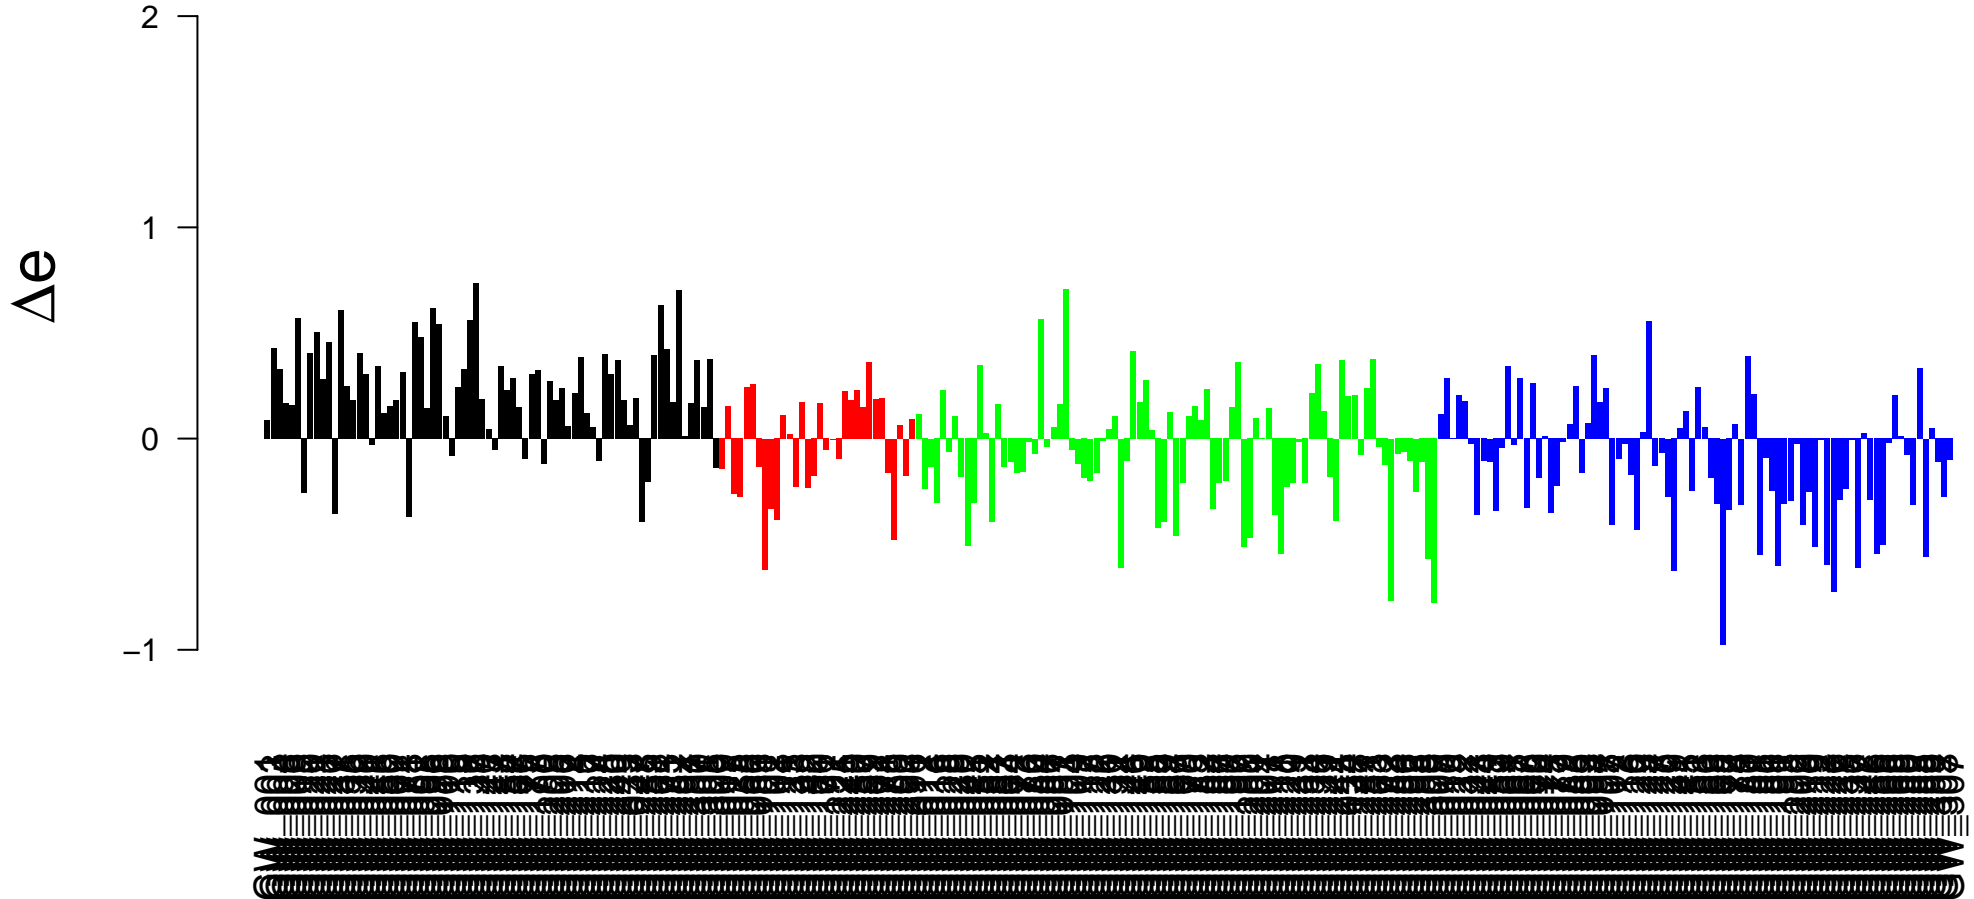

Expression of negative regulation of interferon-gamma production in Spot H

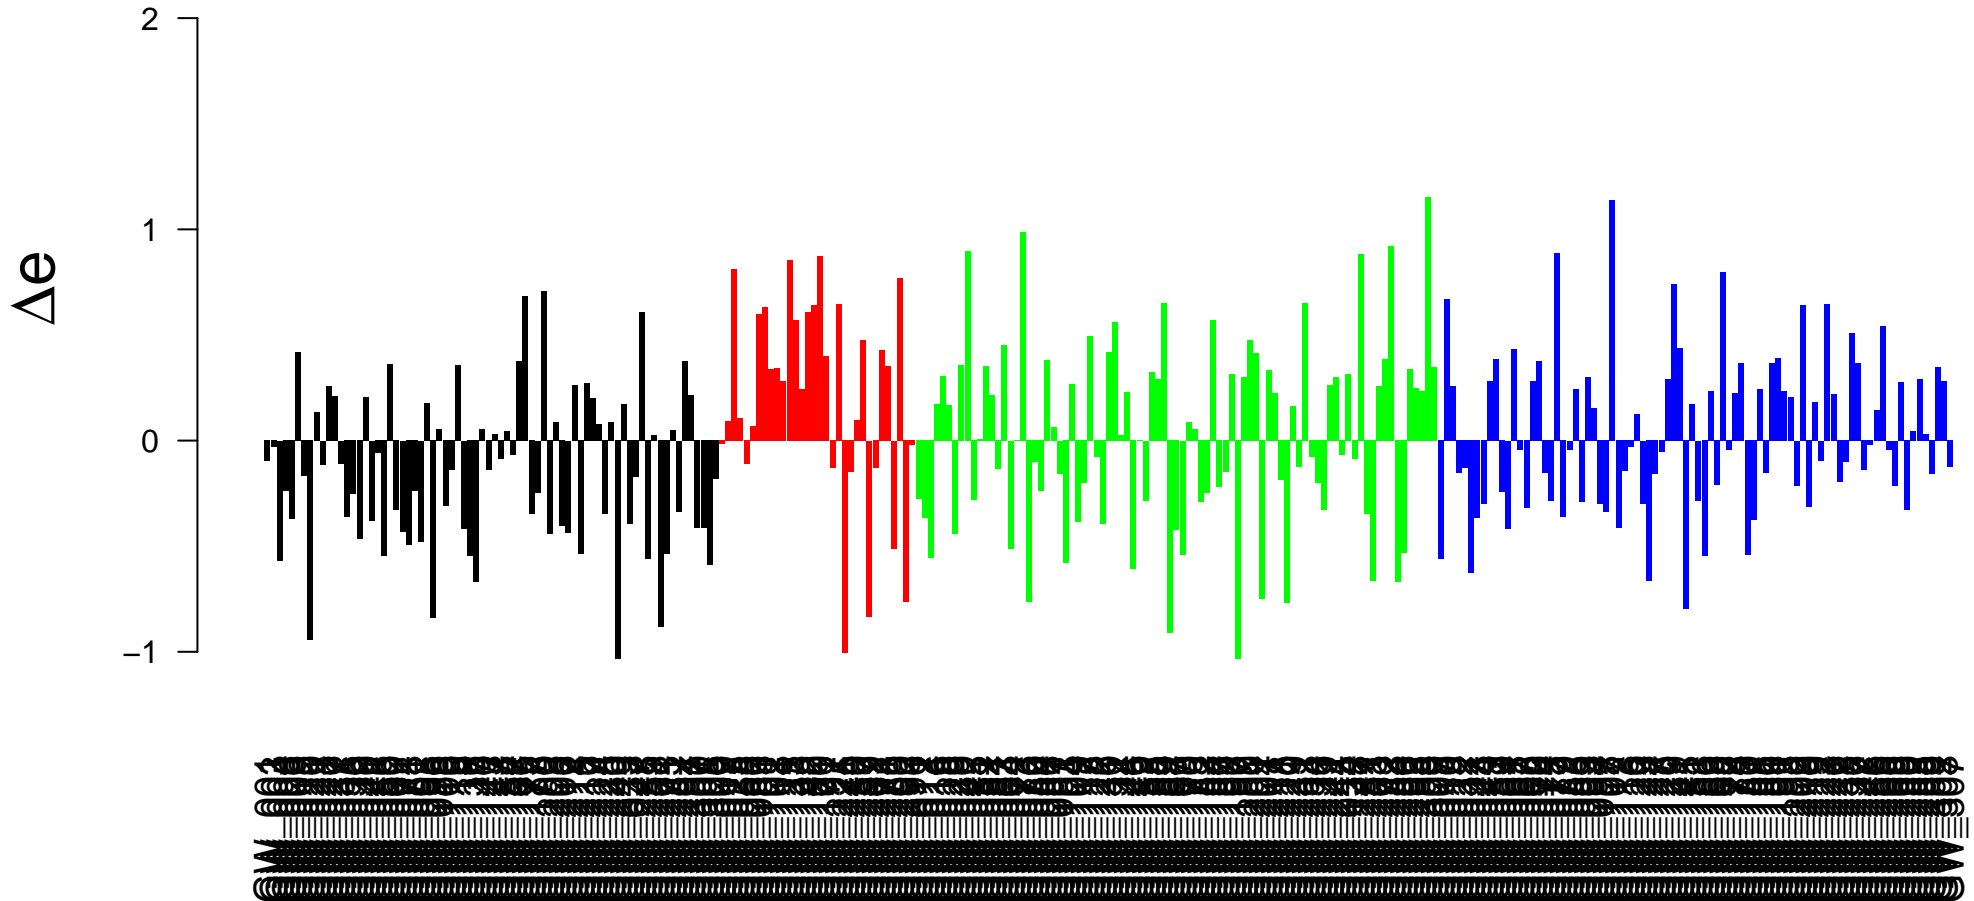

Expression of negative regulation of interferon-gamma production in Spot I

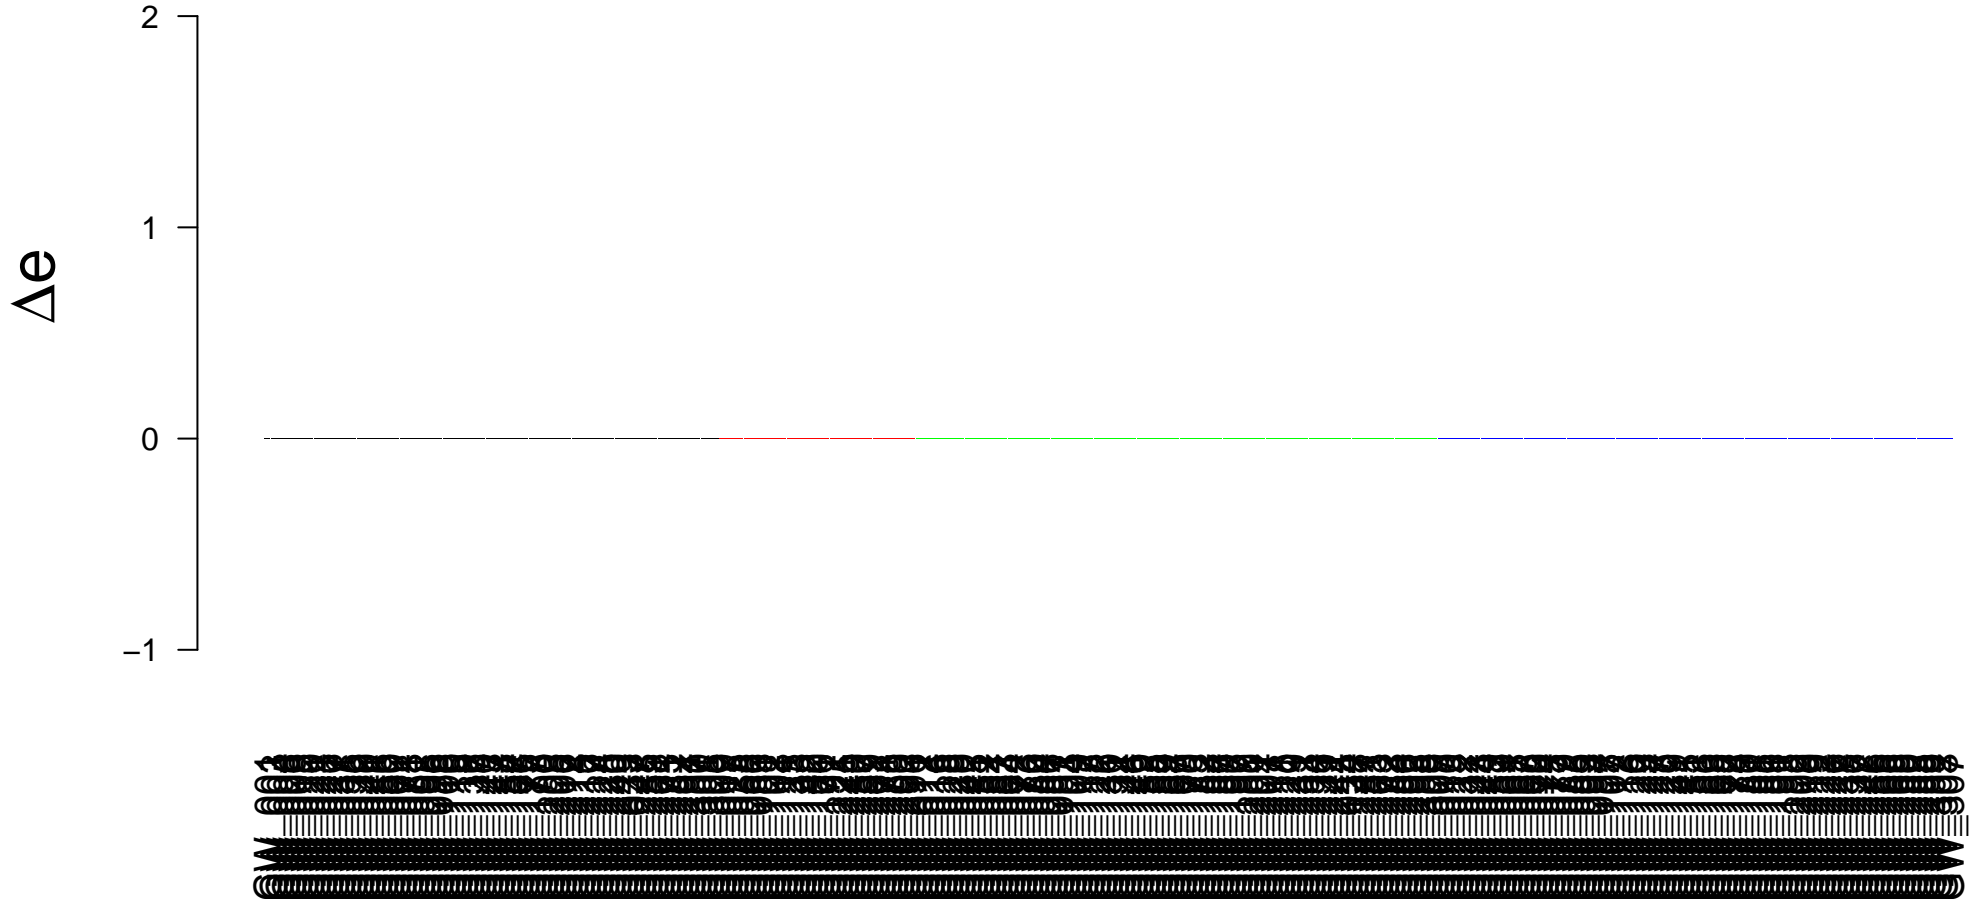

Expression of negative regulation of interferon-gamma production in Spot J

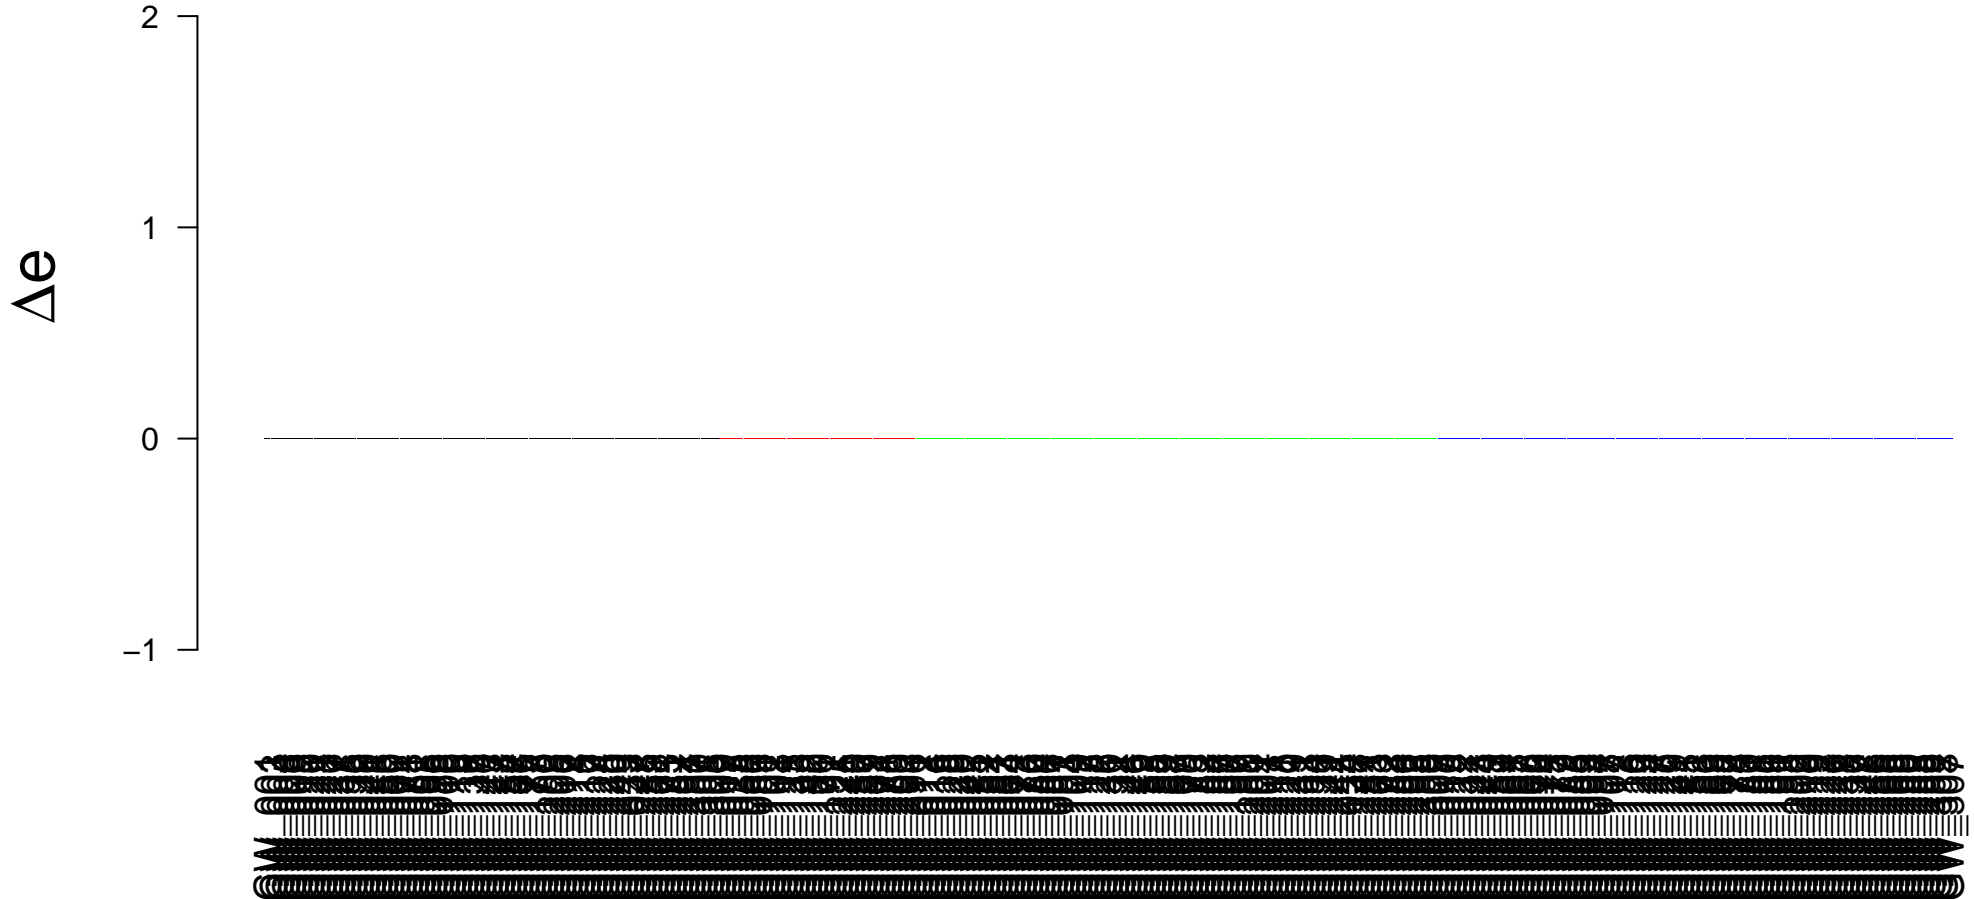

Expression of negative regulation of interferon-gamma production in Spot K

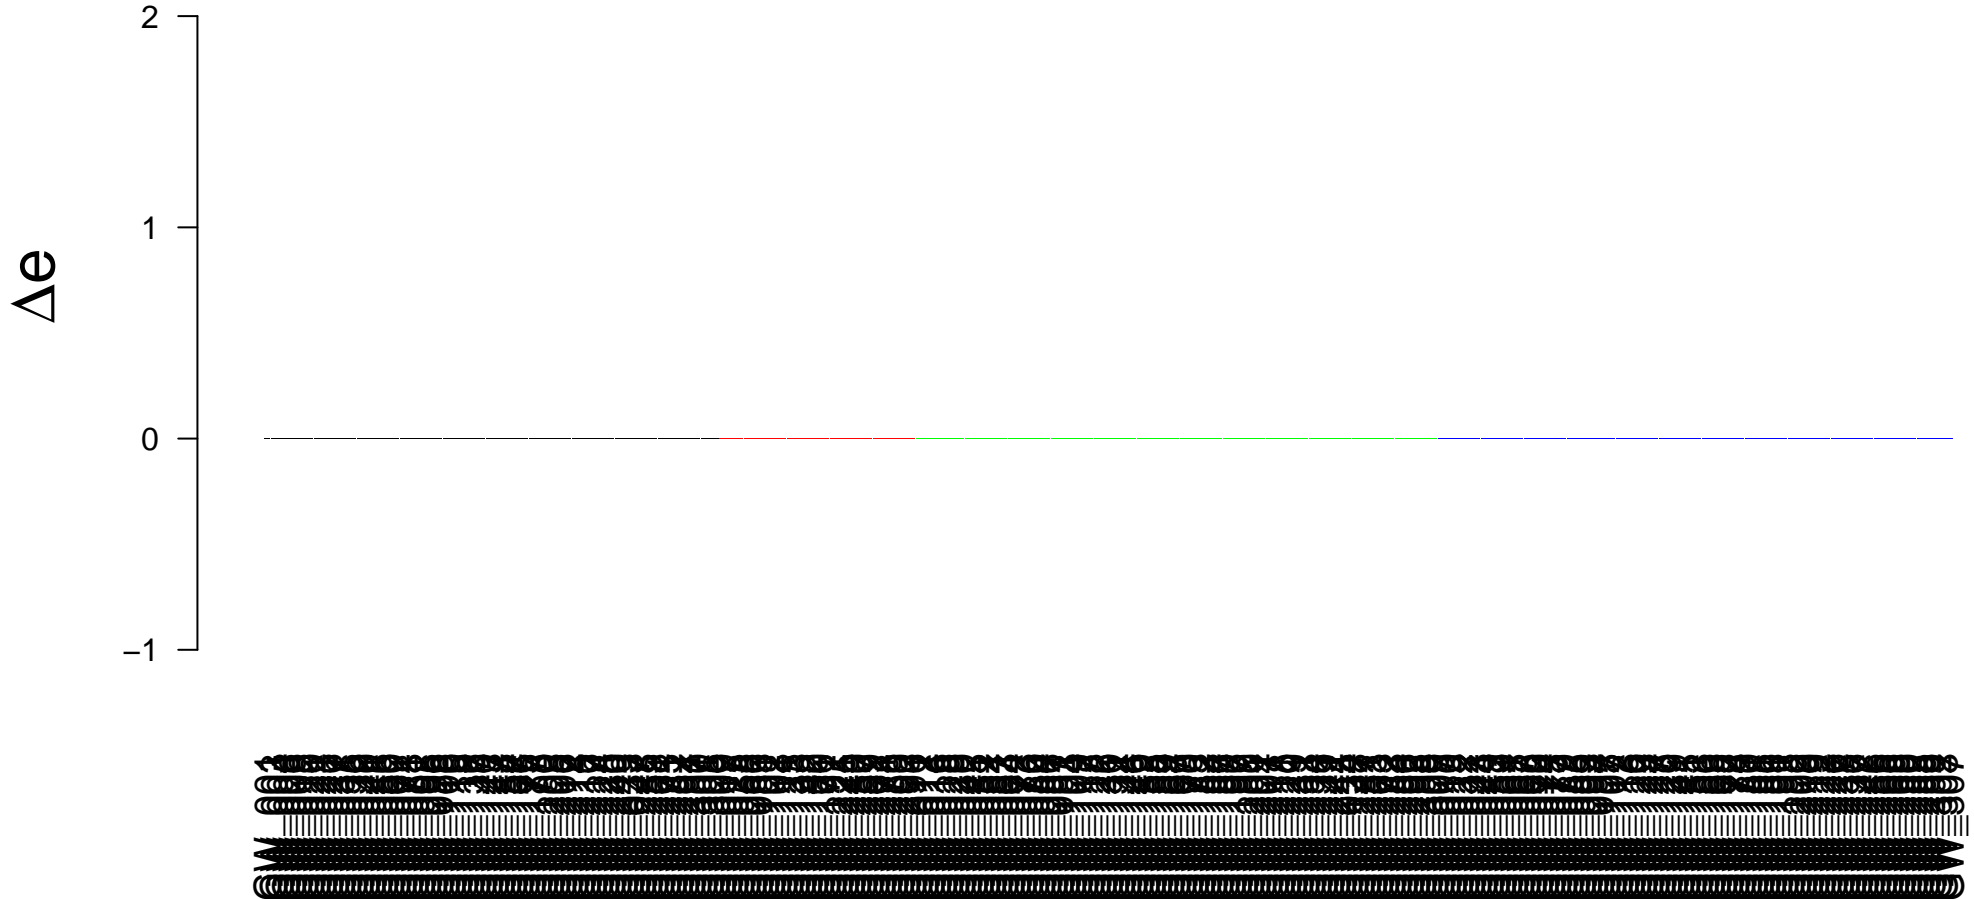

Expression of negative regulation of interferon-gamma production in Spot L

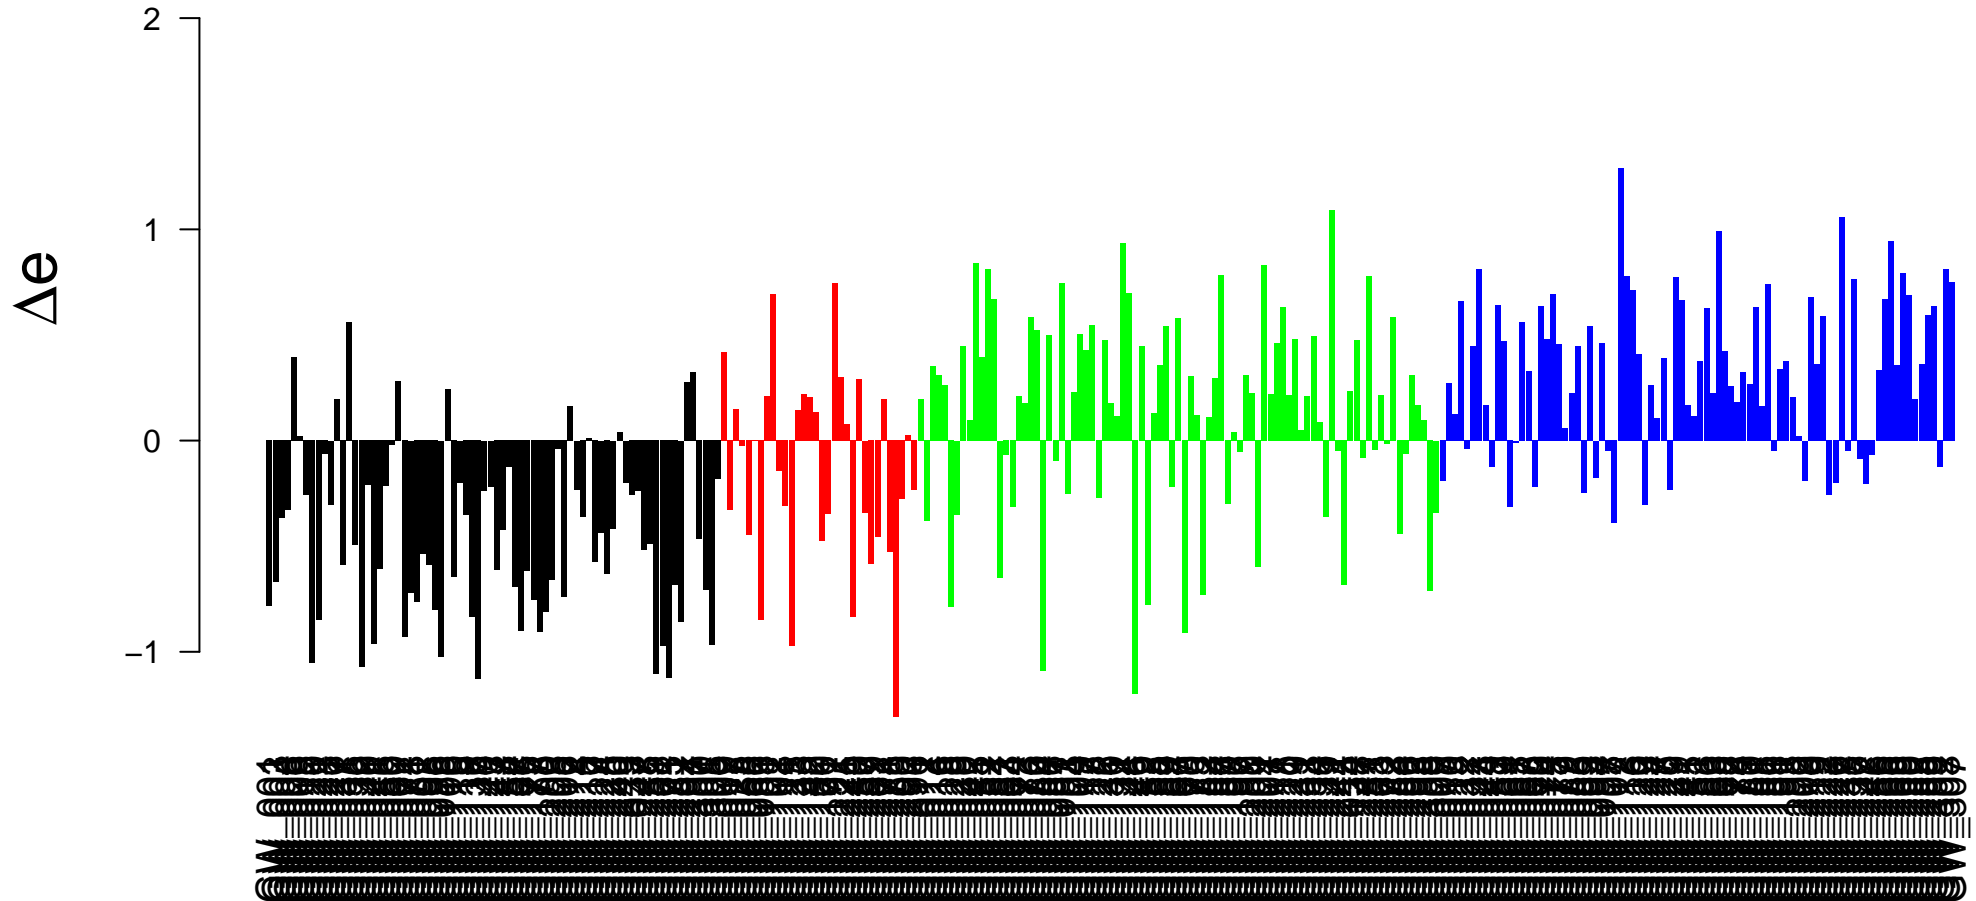

Expression of negative regulation of interferon-gamma production in Spot M

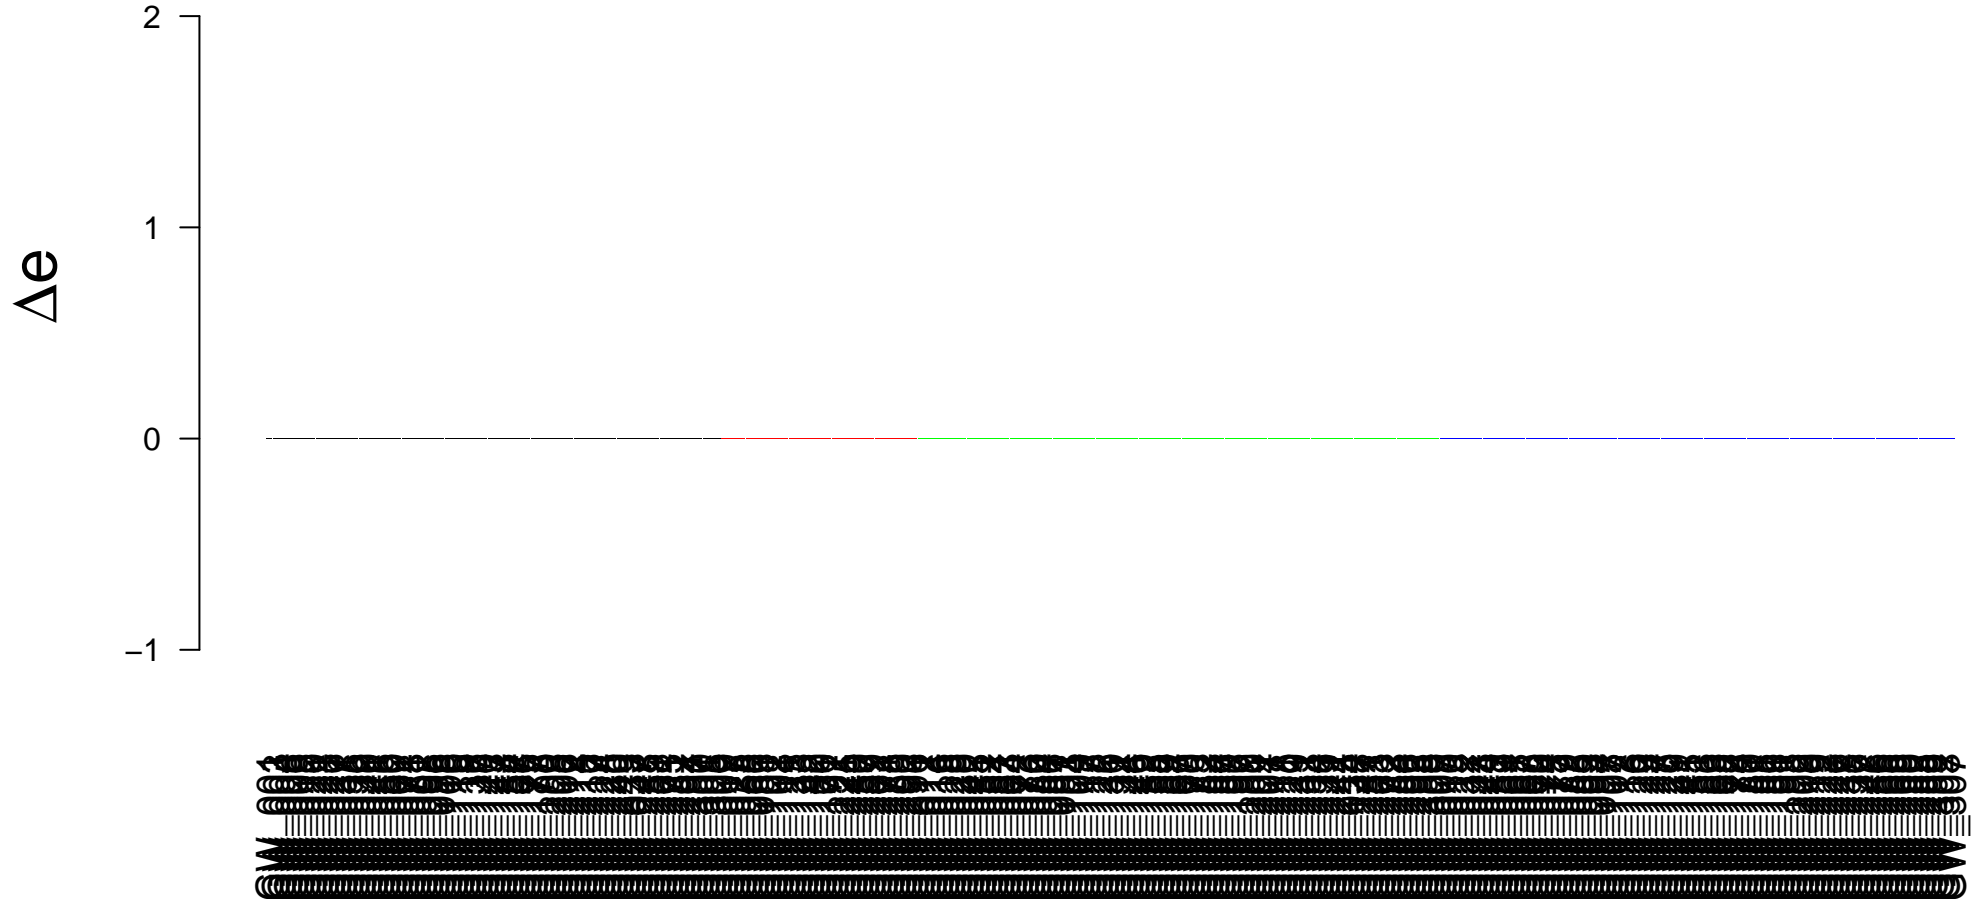

Expression of negative regulation of interferon-gamma production in Spot N

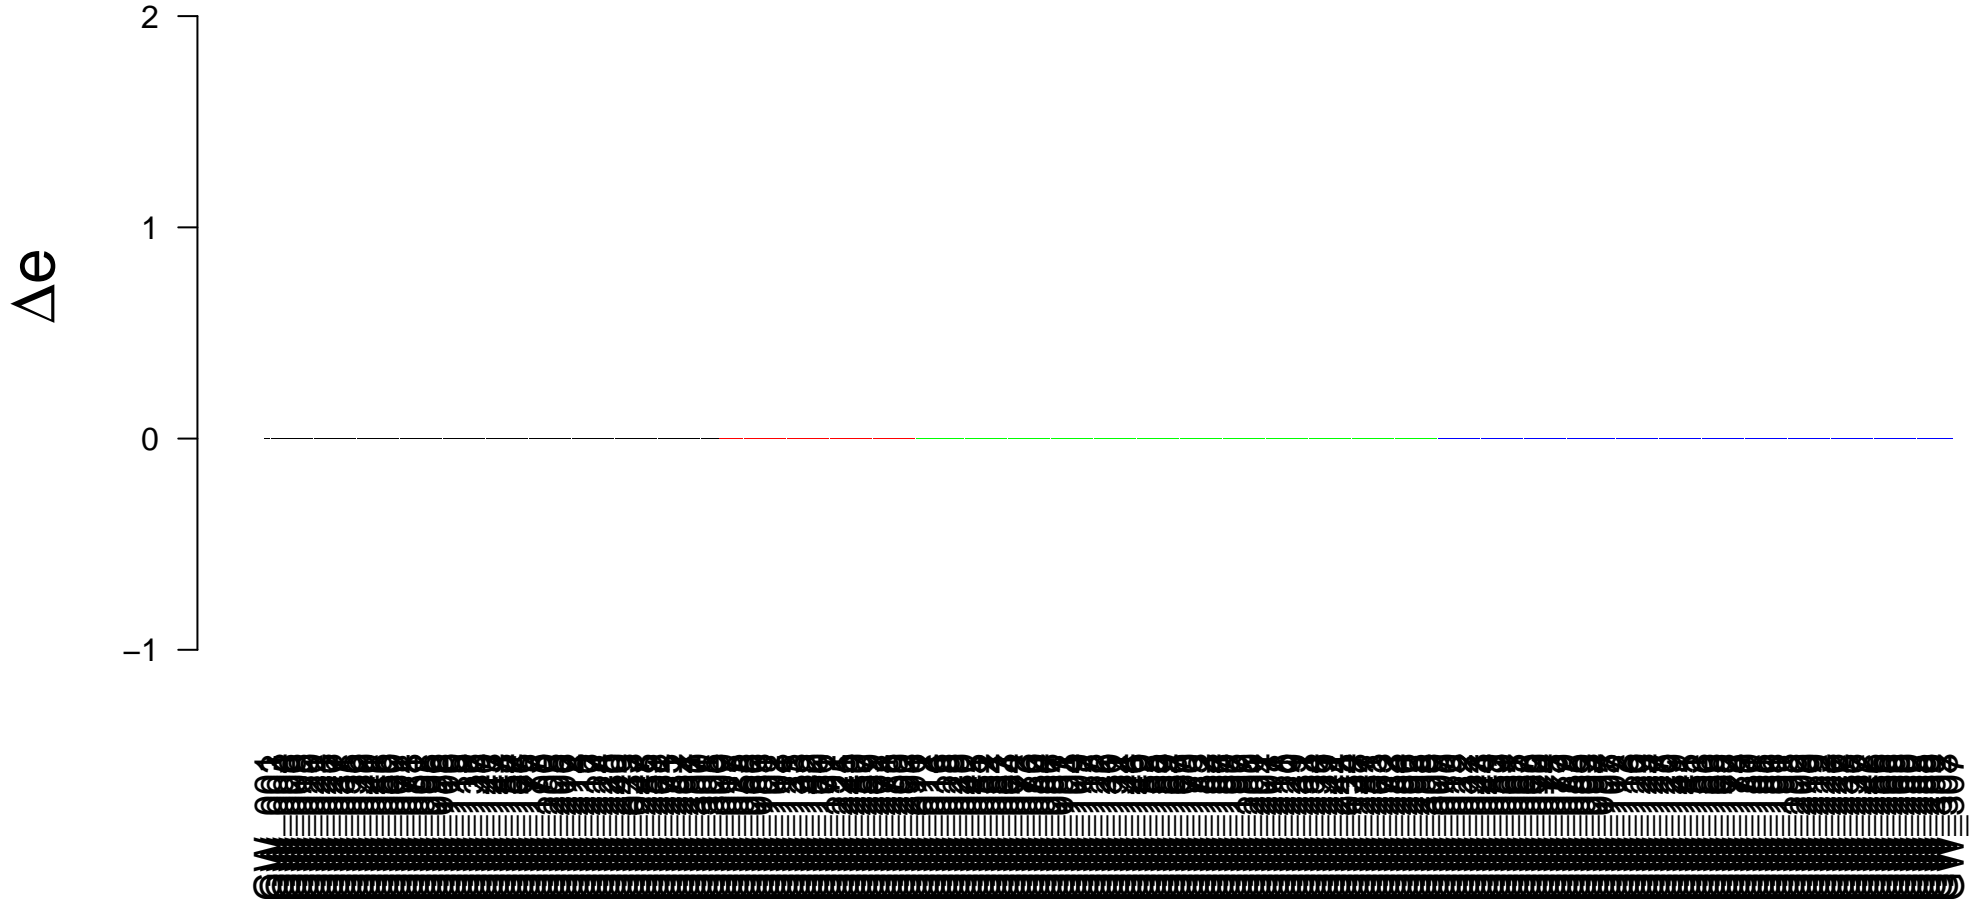

Expression of negative regulation of interferon-gamma production in Spot O

Expression of negative regulation of interferon-gamma production in Spot P

Expression of negative regulation of interferon-gamma production in Spot Q

Expression of negative regulation of interferon-gamma production in Spot R
