

negative regulation of peptidyl-serine phosphorylation

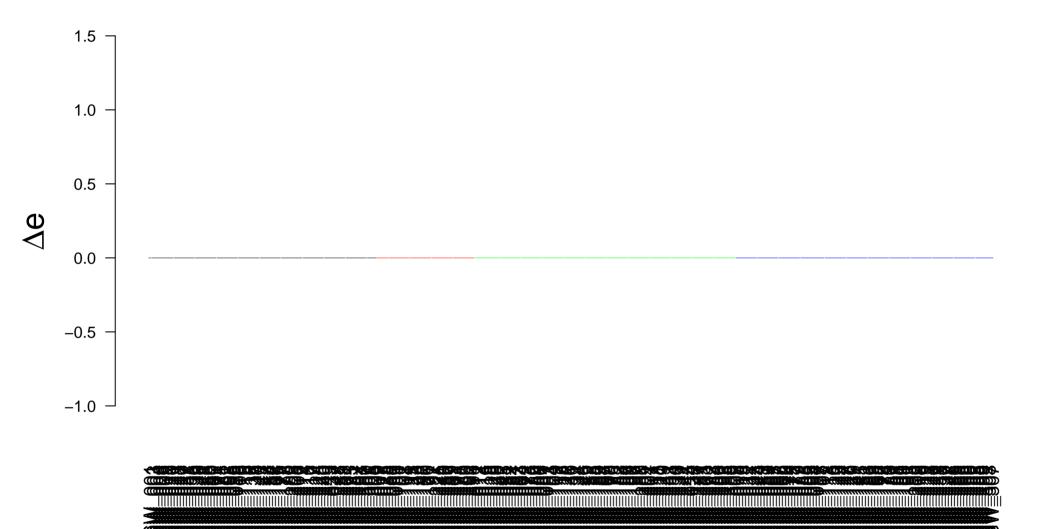

Enrichment in spots: negative regulation of peptidyl-serine phosphorylation

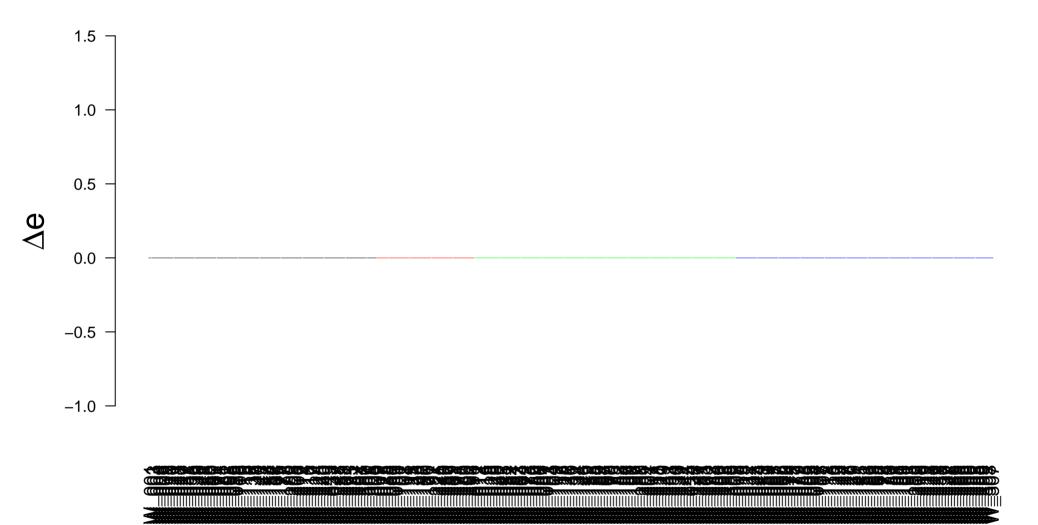

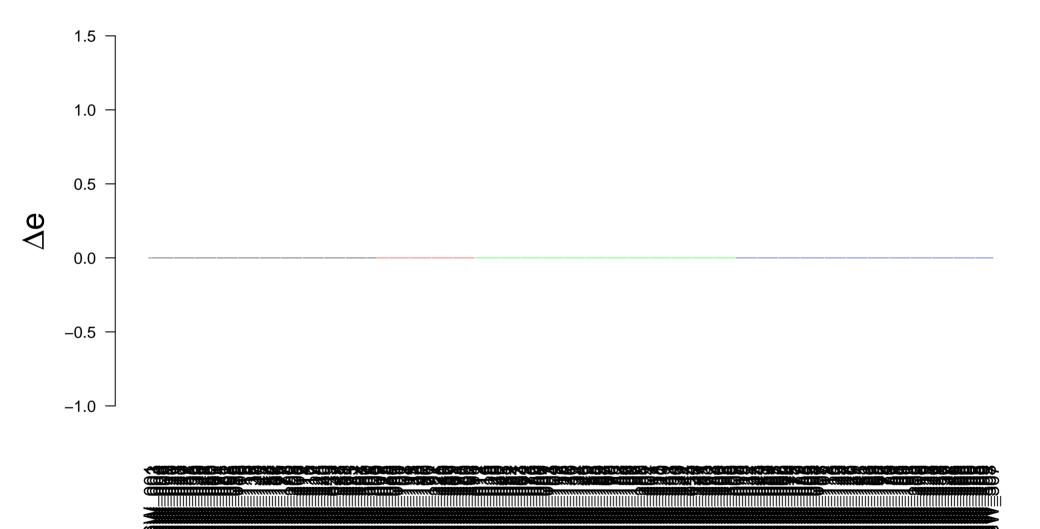

Expression of negative regulation of peptidyl-serine phosphorylation in Spot B

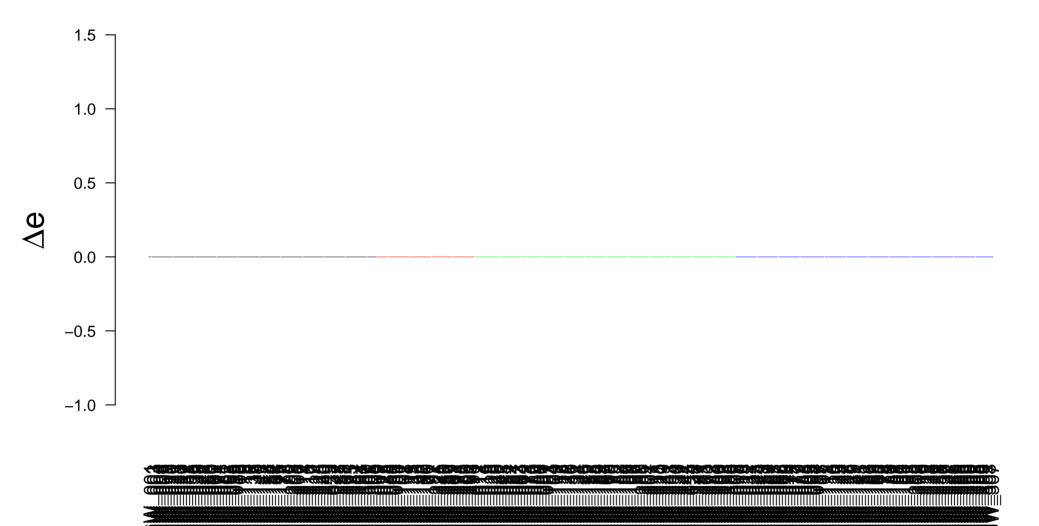

Expression of negative regulation of peptidyl-serine phosphorylation in Spot C

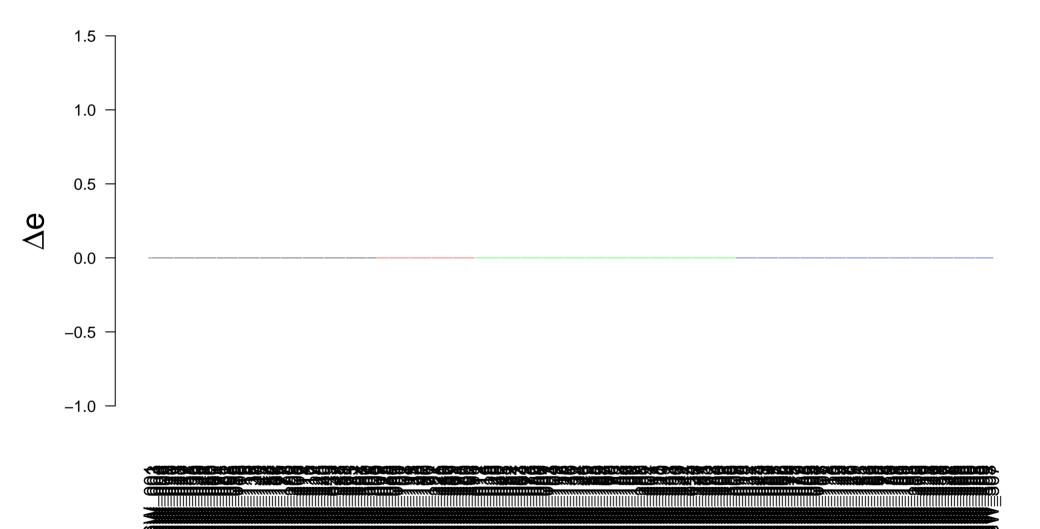

Expression of negative regulation of peptidyl-serine phosphorylation in Spot D

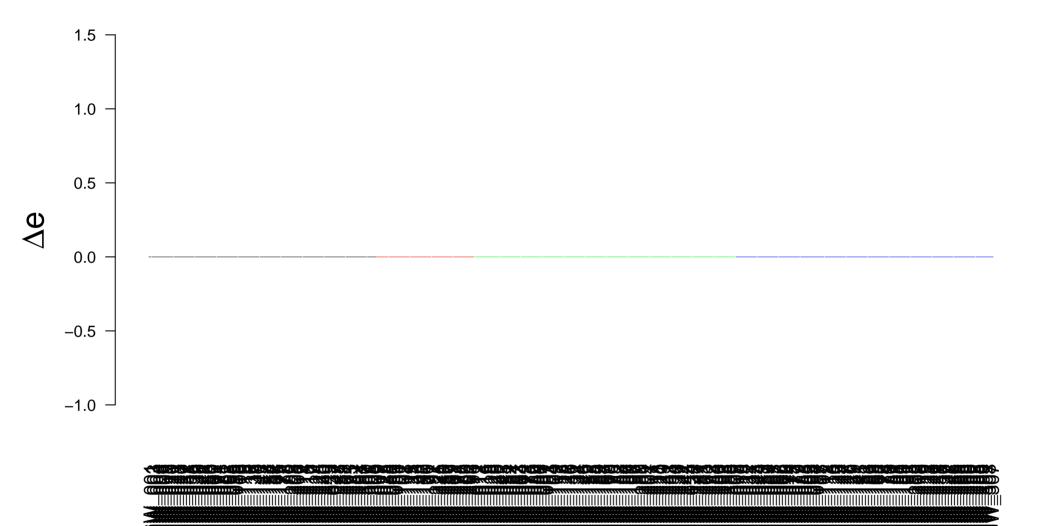

Expression of negative regulation of peptidyl-serine phosphorylation in Spot E

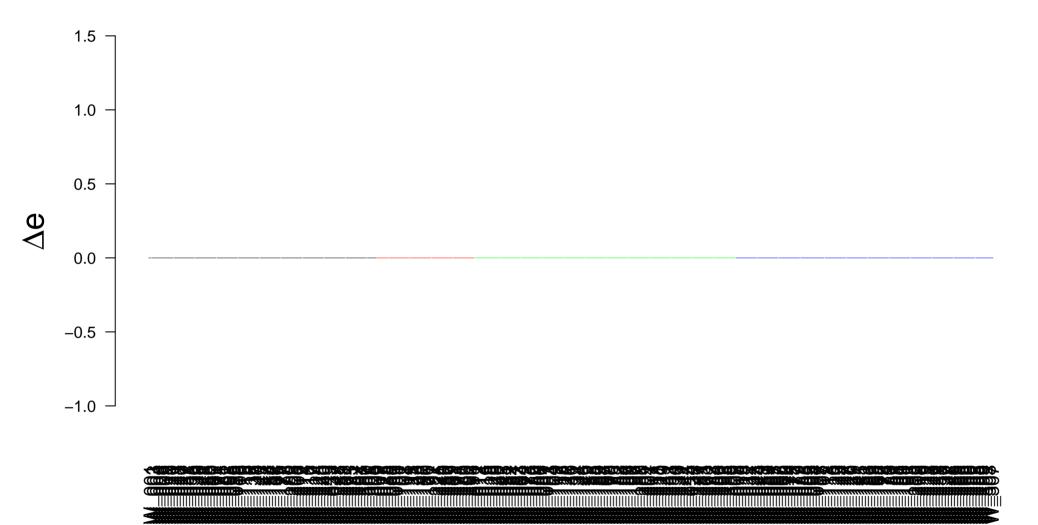

Expression of negative regulation of peptidyl-serine phosphorylation in Spot F

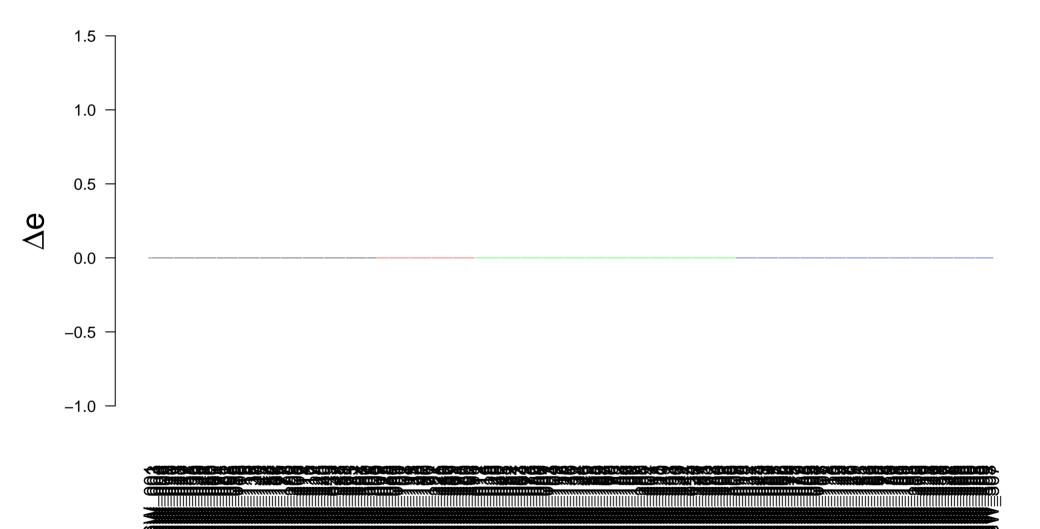

Expression of negative regulation of peptidyl-serine phosphorylation in Spot G

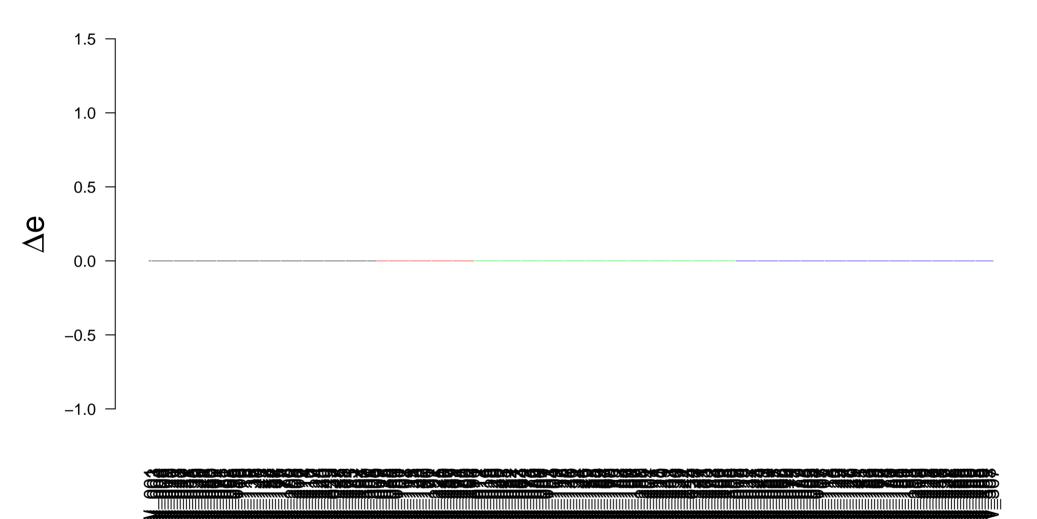

Expression of negative regulation of peptidyl-serine phosphorylation in Spot H

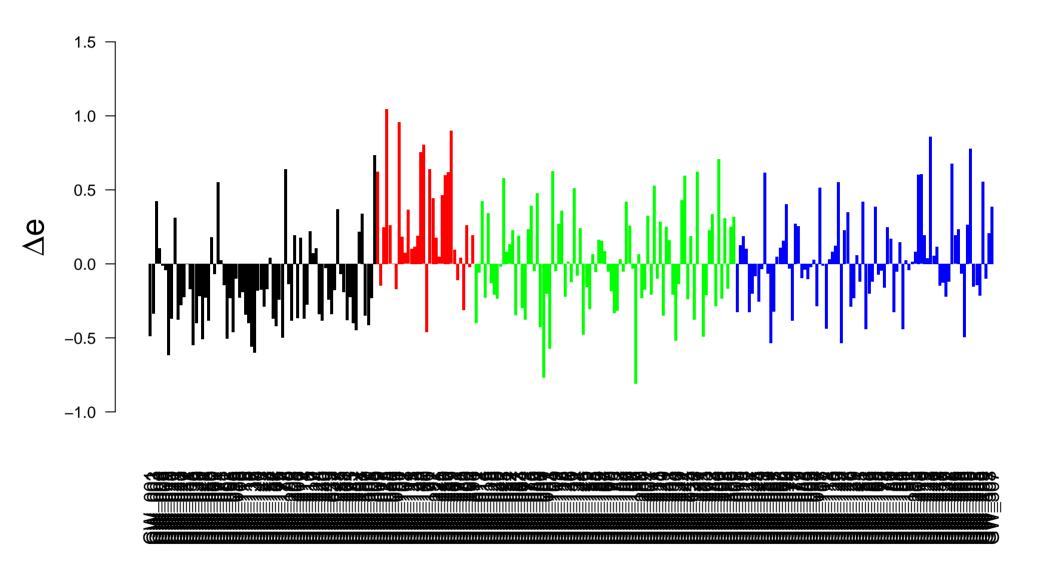

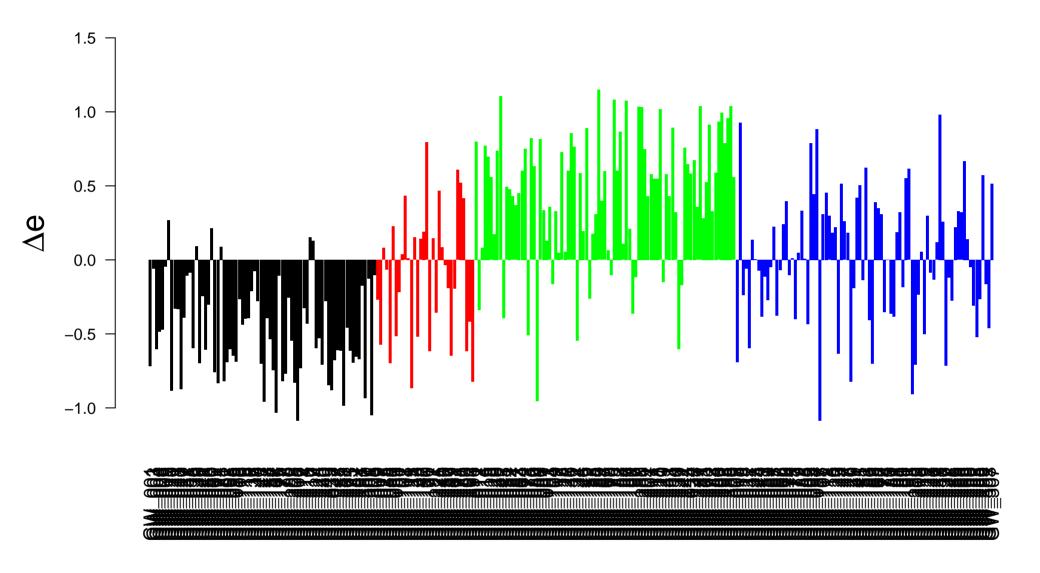

Expression of negative regulation of peptidyl-serine phosphorylation in Spot I

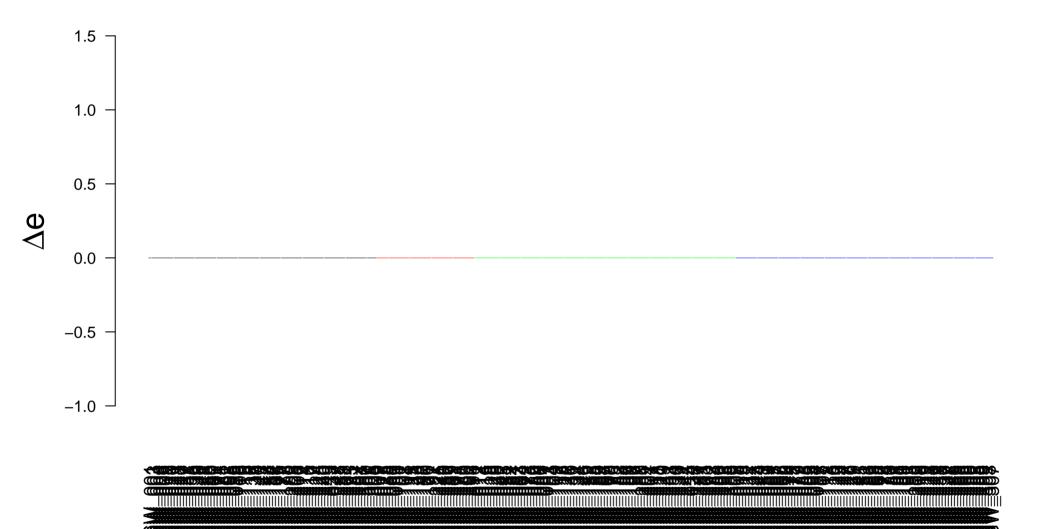

Expression of negative regulation of peptidyl-serine phosphorylation in Spot J

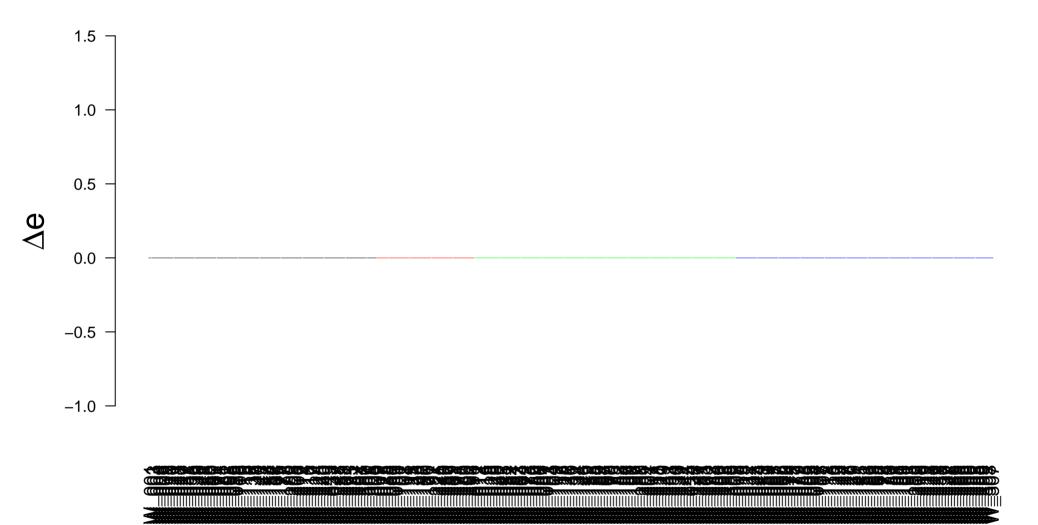

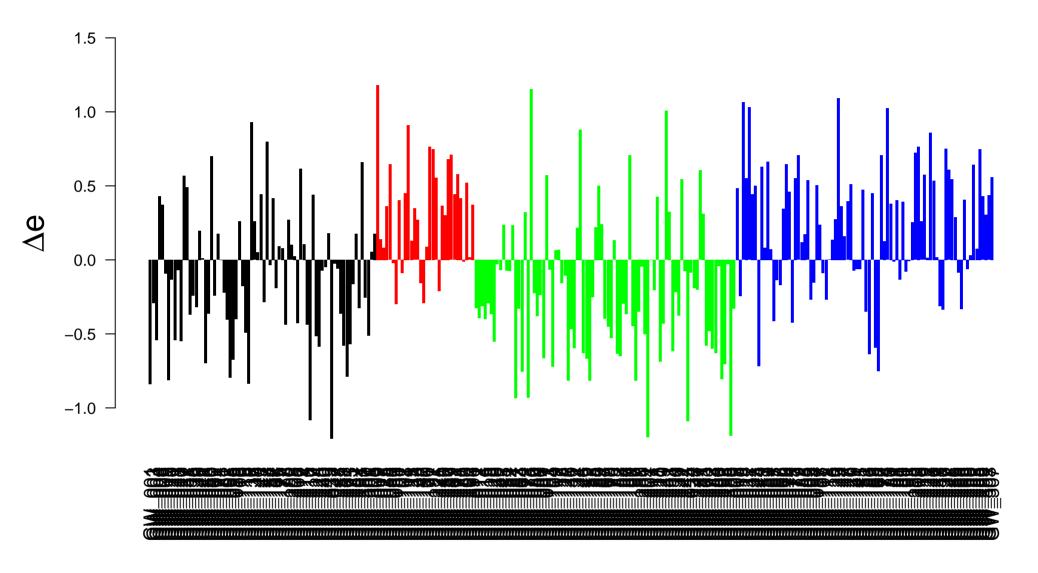

Expression of negative regulation of peptidyl-serine phosphorylation in Spot M

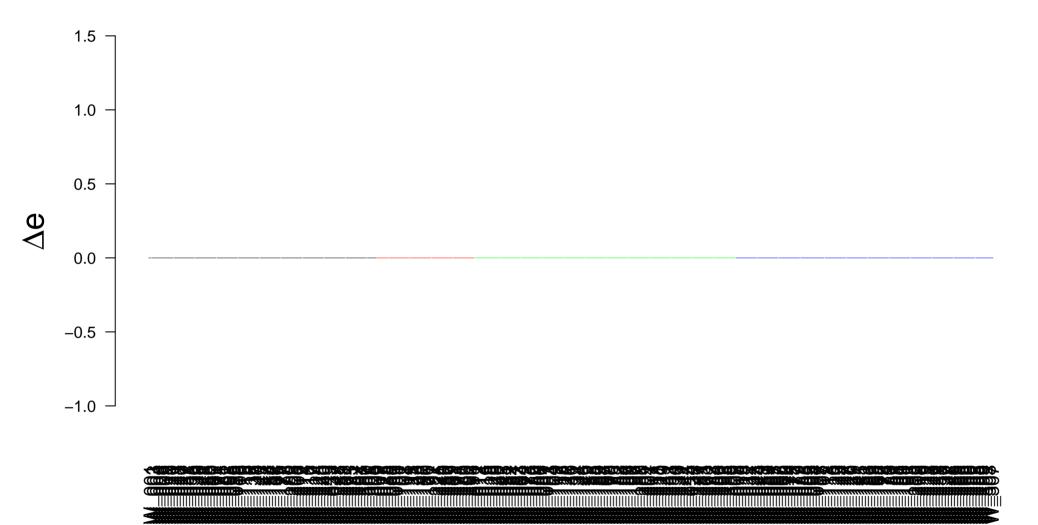

Expression of negative regulation of peptidyl-serine phosphorylation in Spot N

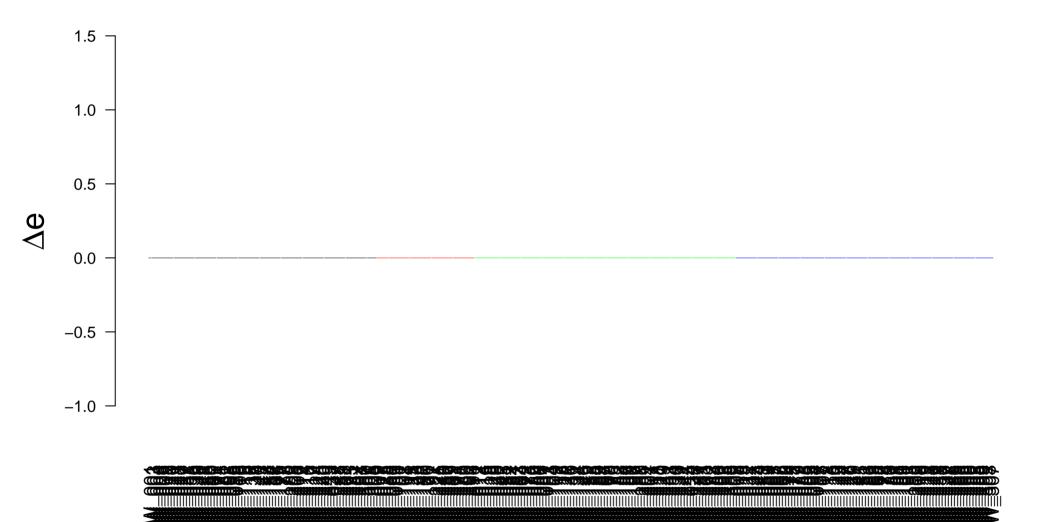

Expression of negative regulation of peptidyl-serine phosphorylation in Spot P

Expression of negative regulation of peptidyl-serine phosphorylation in Spot Q

Expression of negative regulation of peptidyl-serine phosphorylation in Spot R
