

negative regulation of transcription regulatory region DNA binding

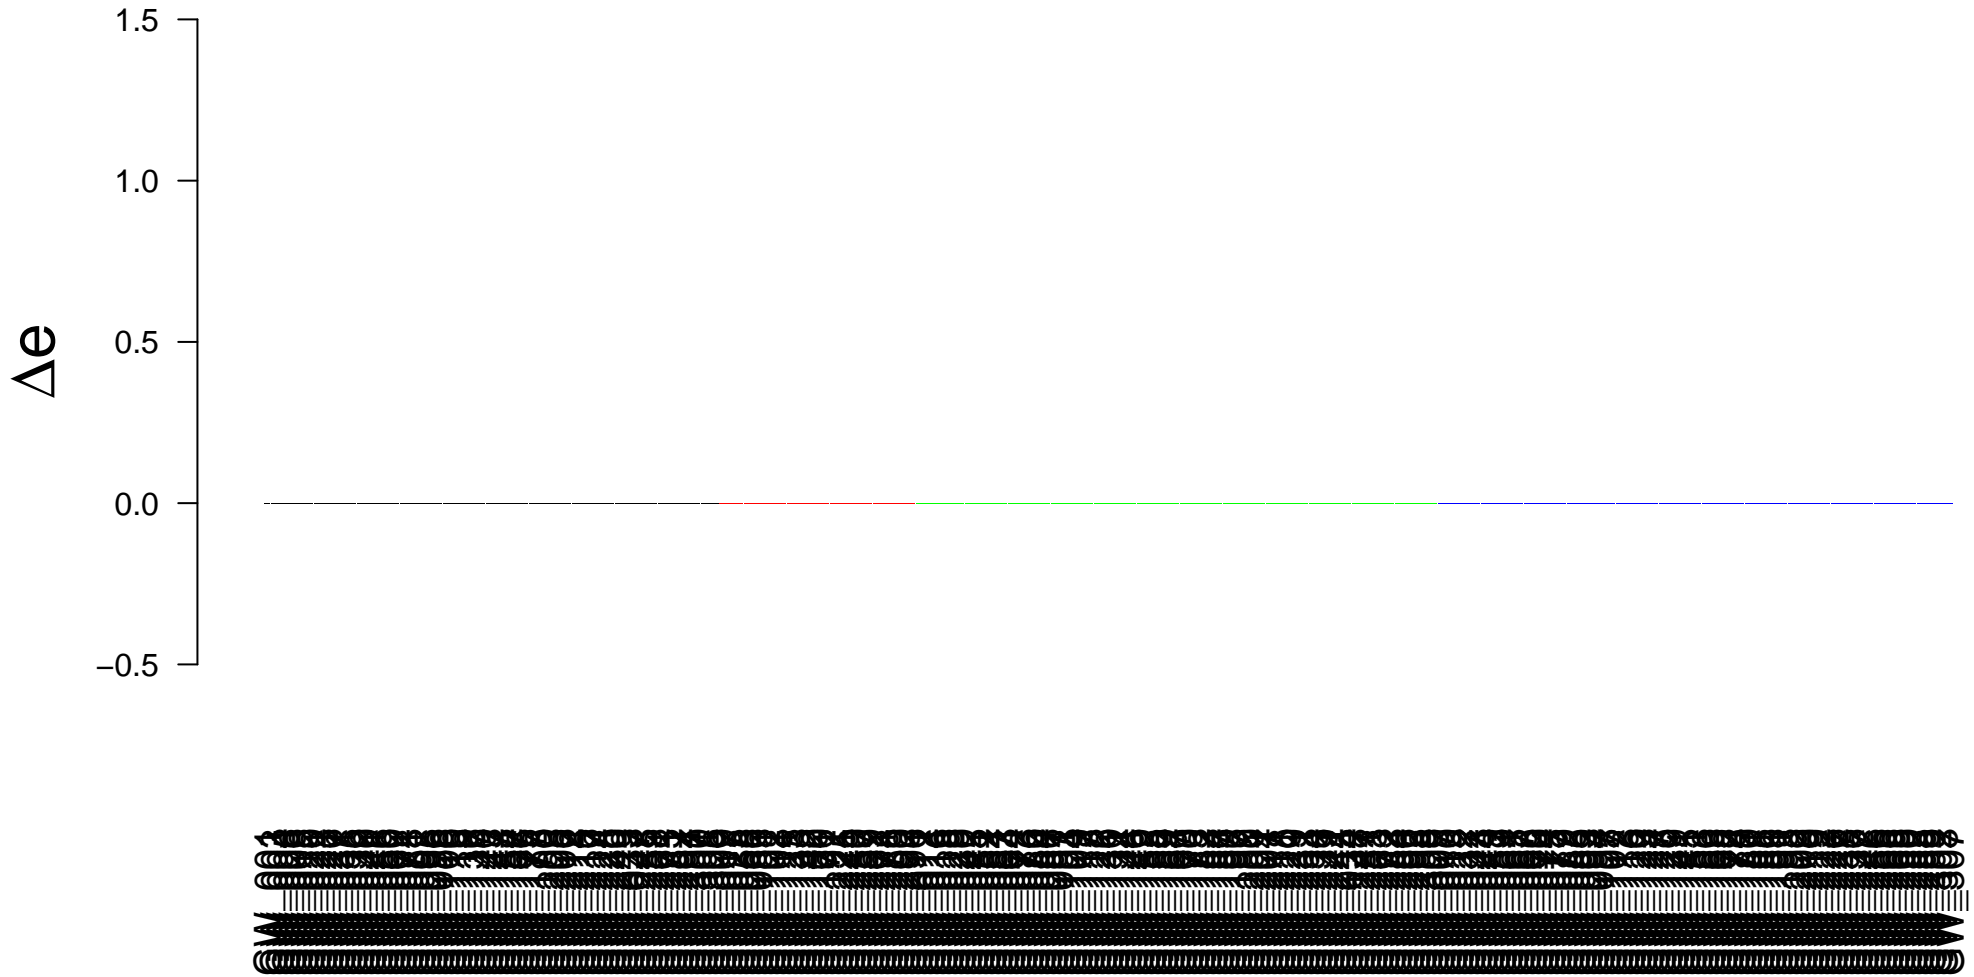

negative regulation of transcription regulatory region DNA binding

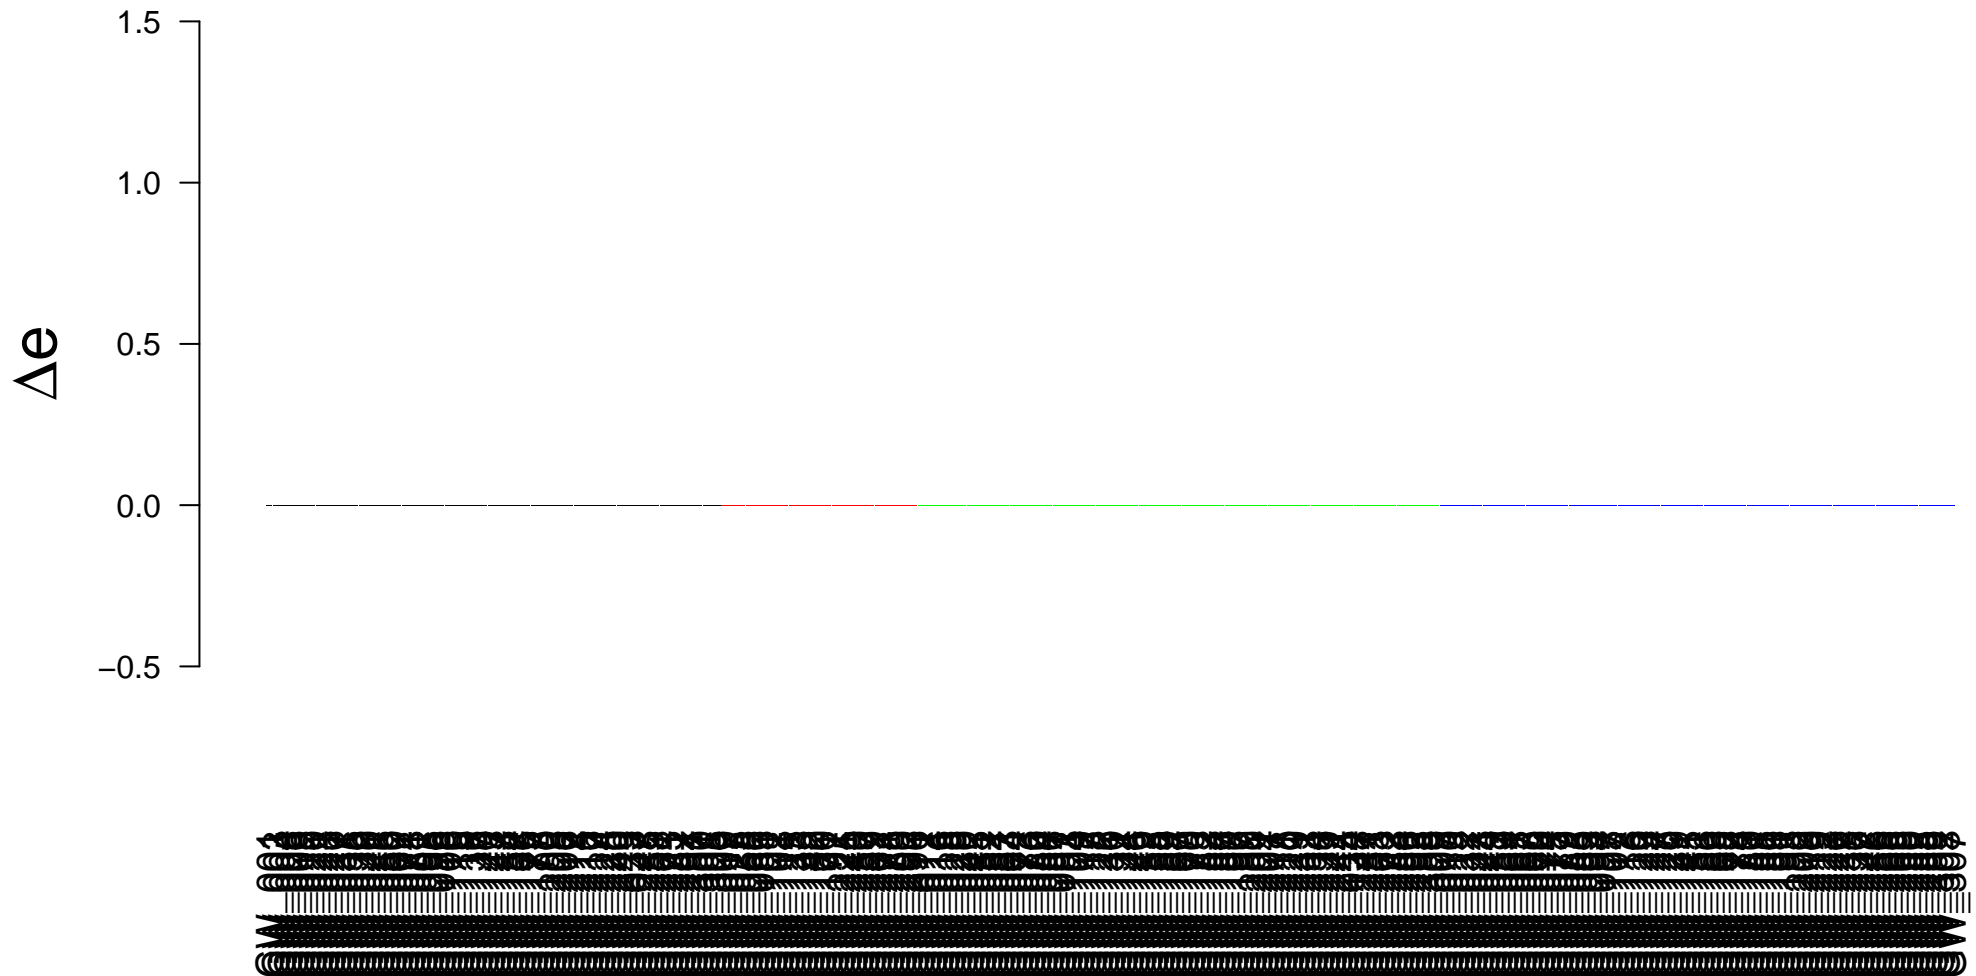

Enrichment in spots: negative regulation of transcription regulatory region DNA binding

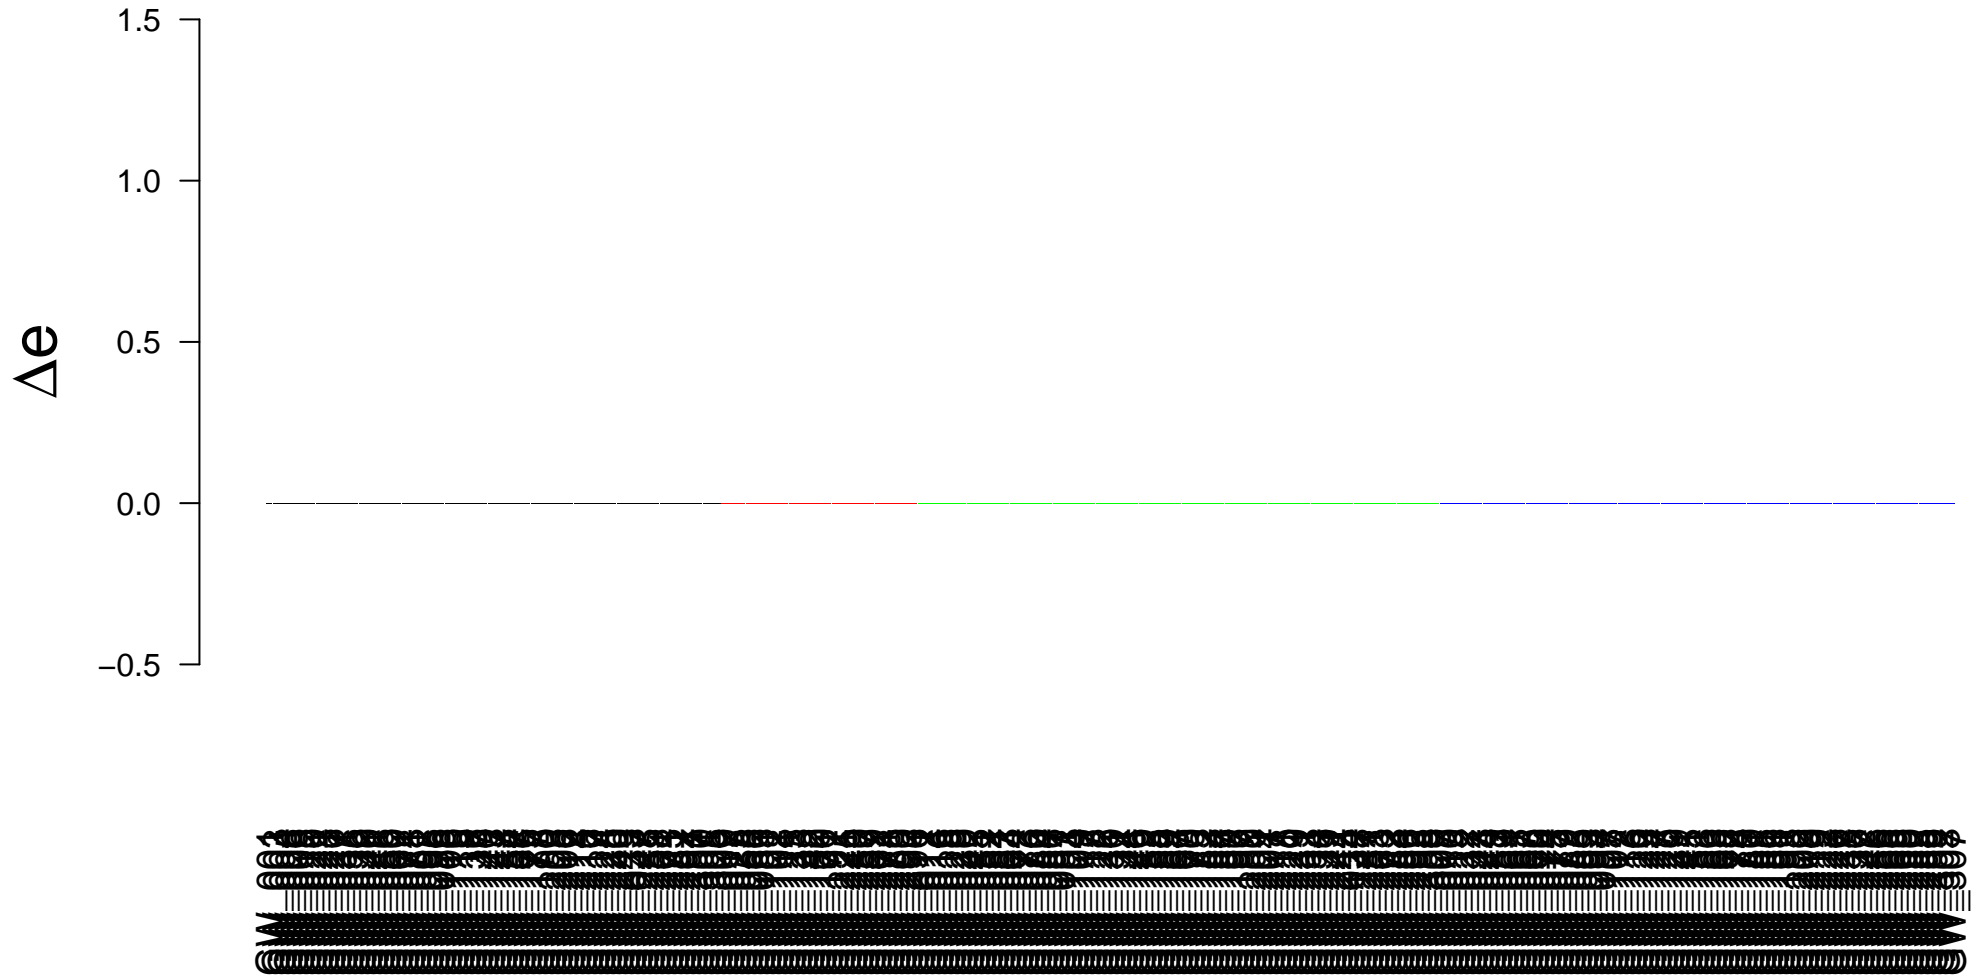

Expression of negative regulation of transcription regulatory region DNA binding in Spot A

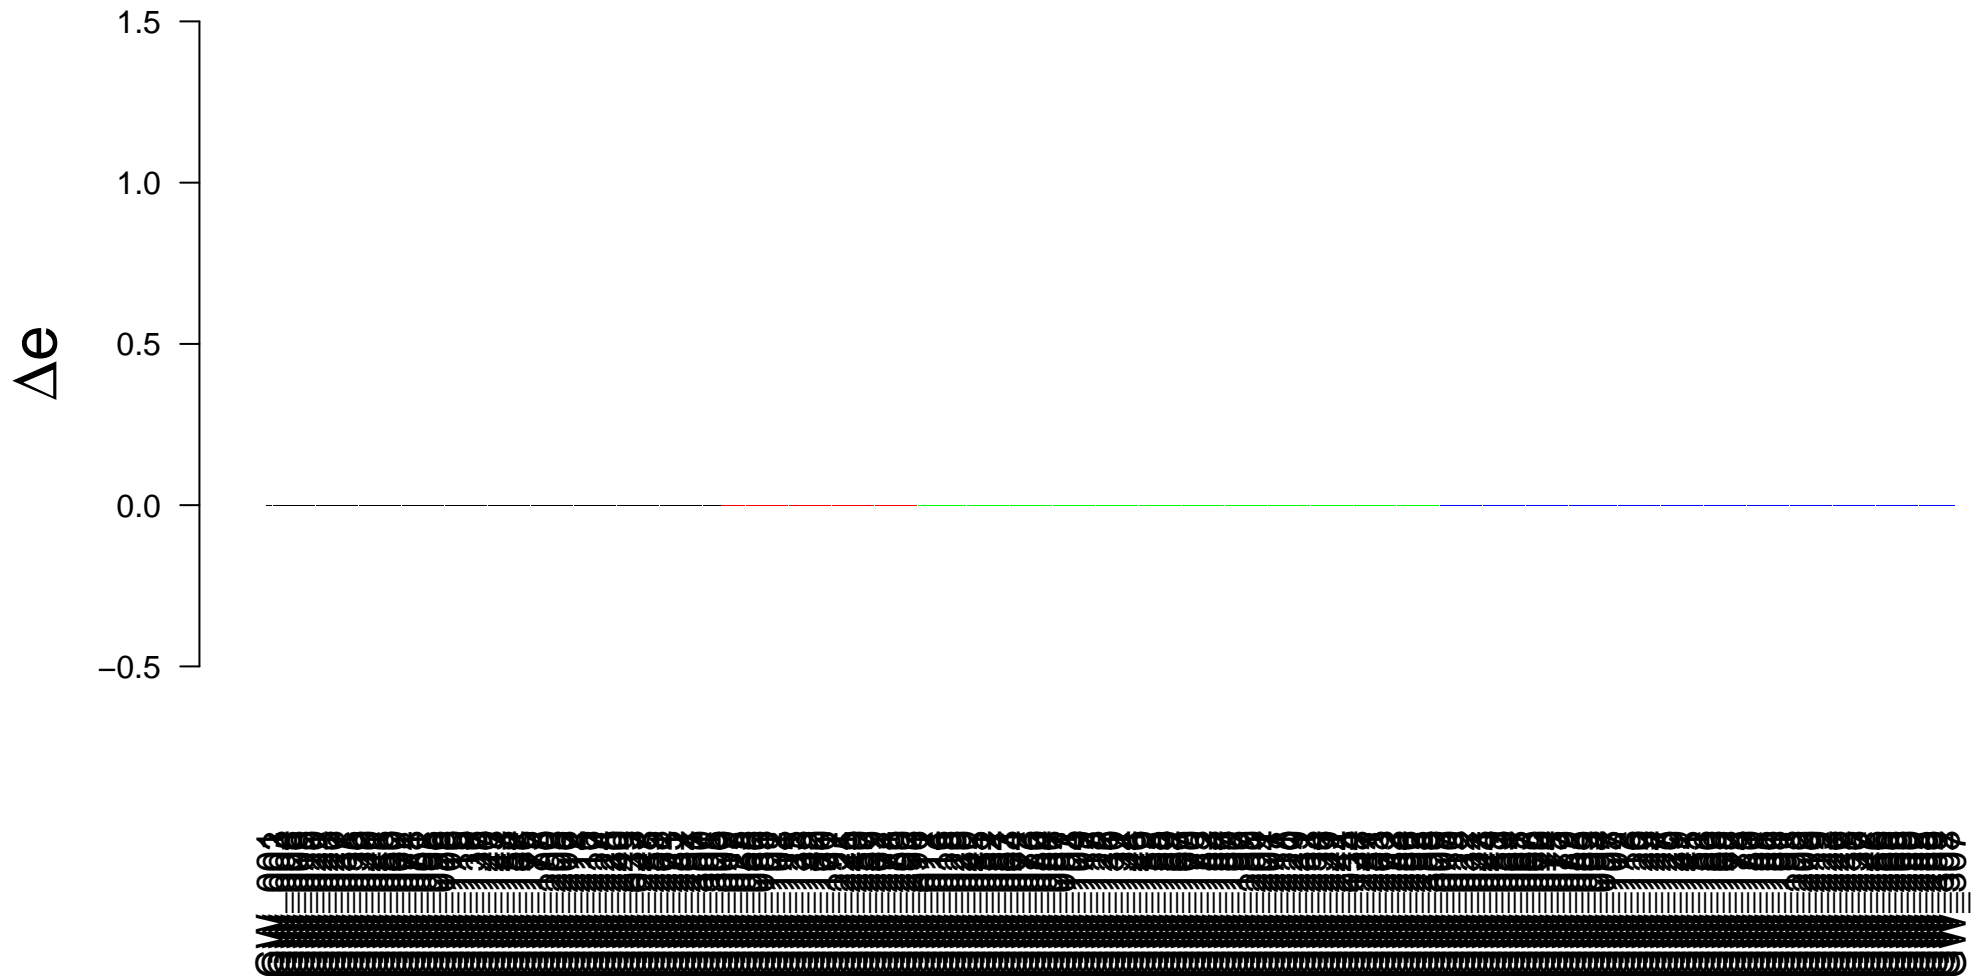

Expression of negative regulation of transcription regulatory region DNA binding in Spot B

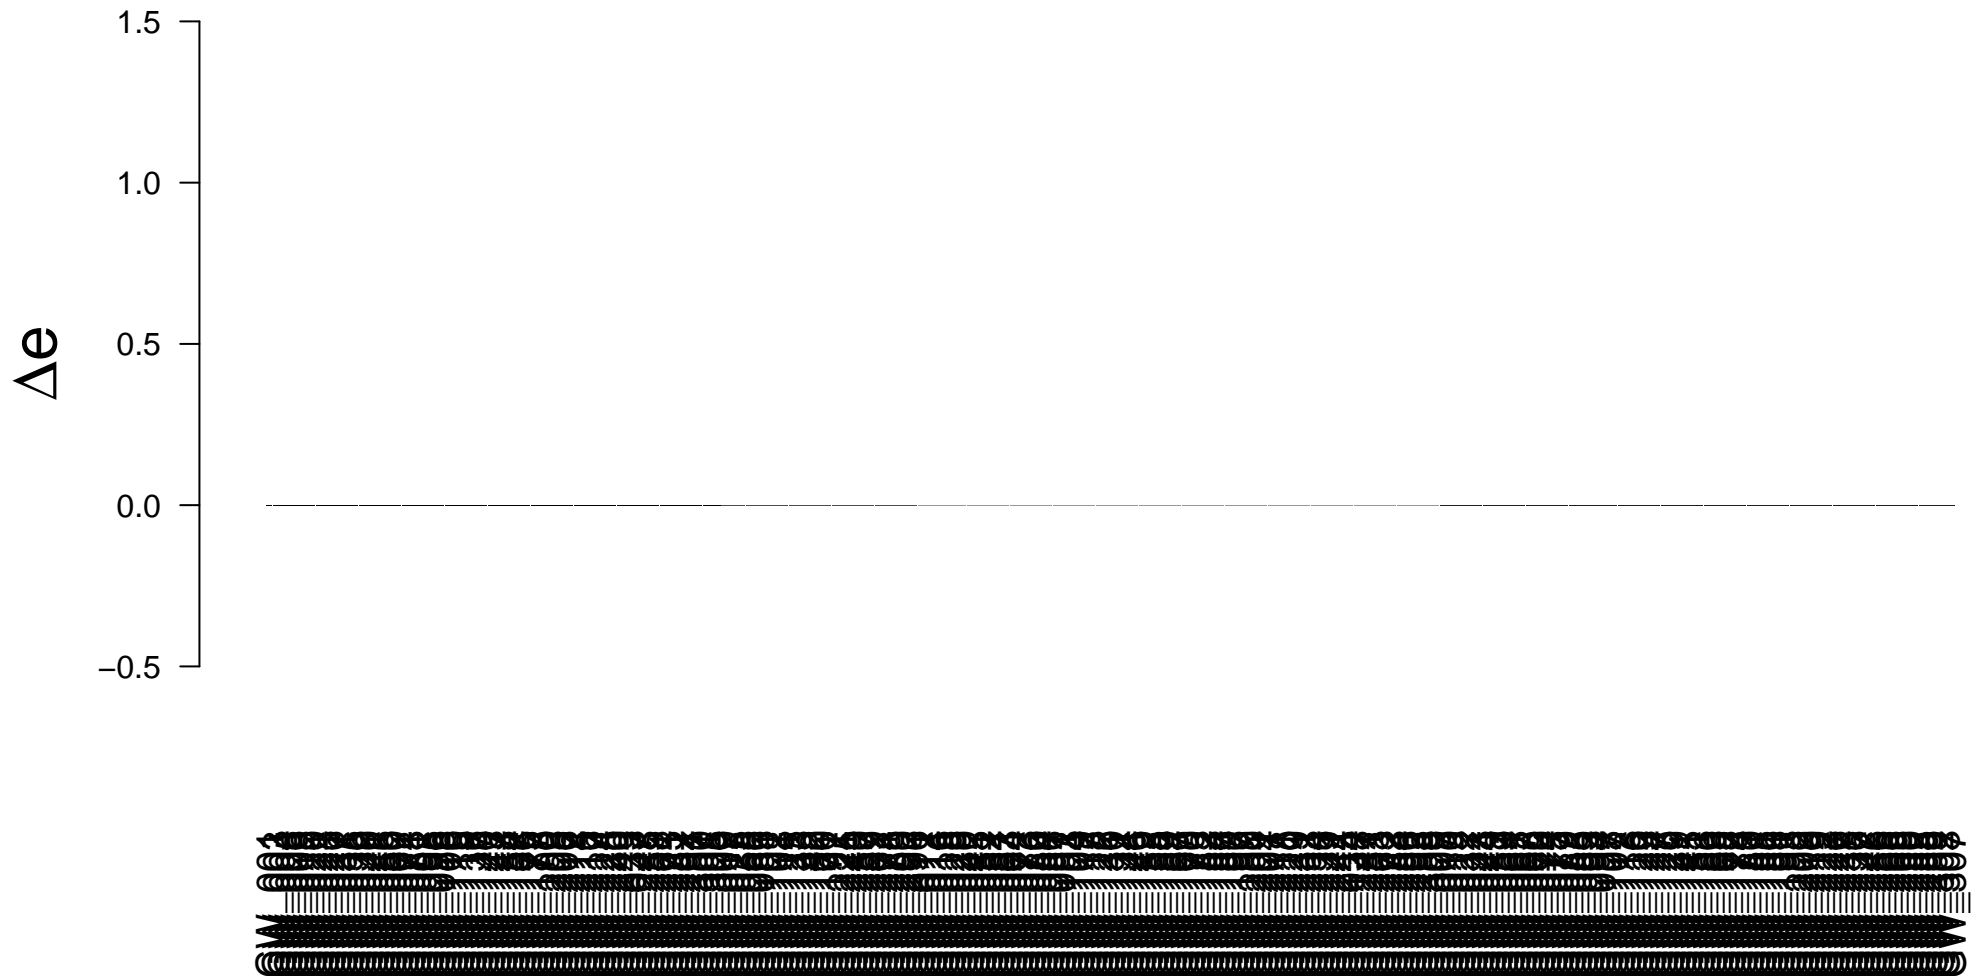

Expression of negative regulation of transcription regulatory region DNA binding in Spot C

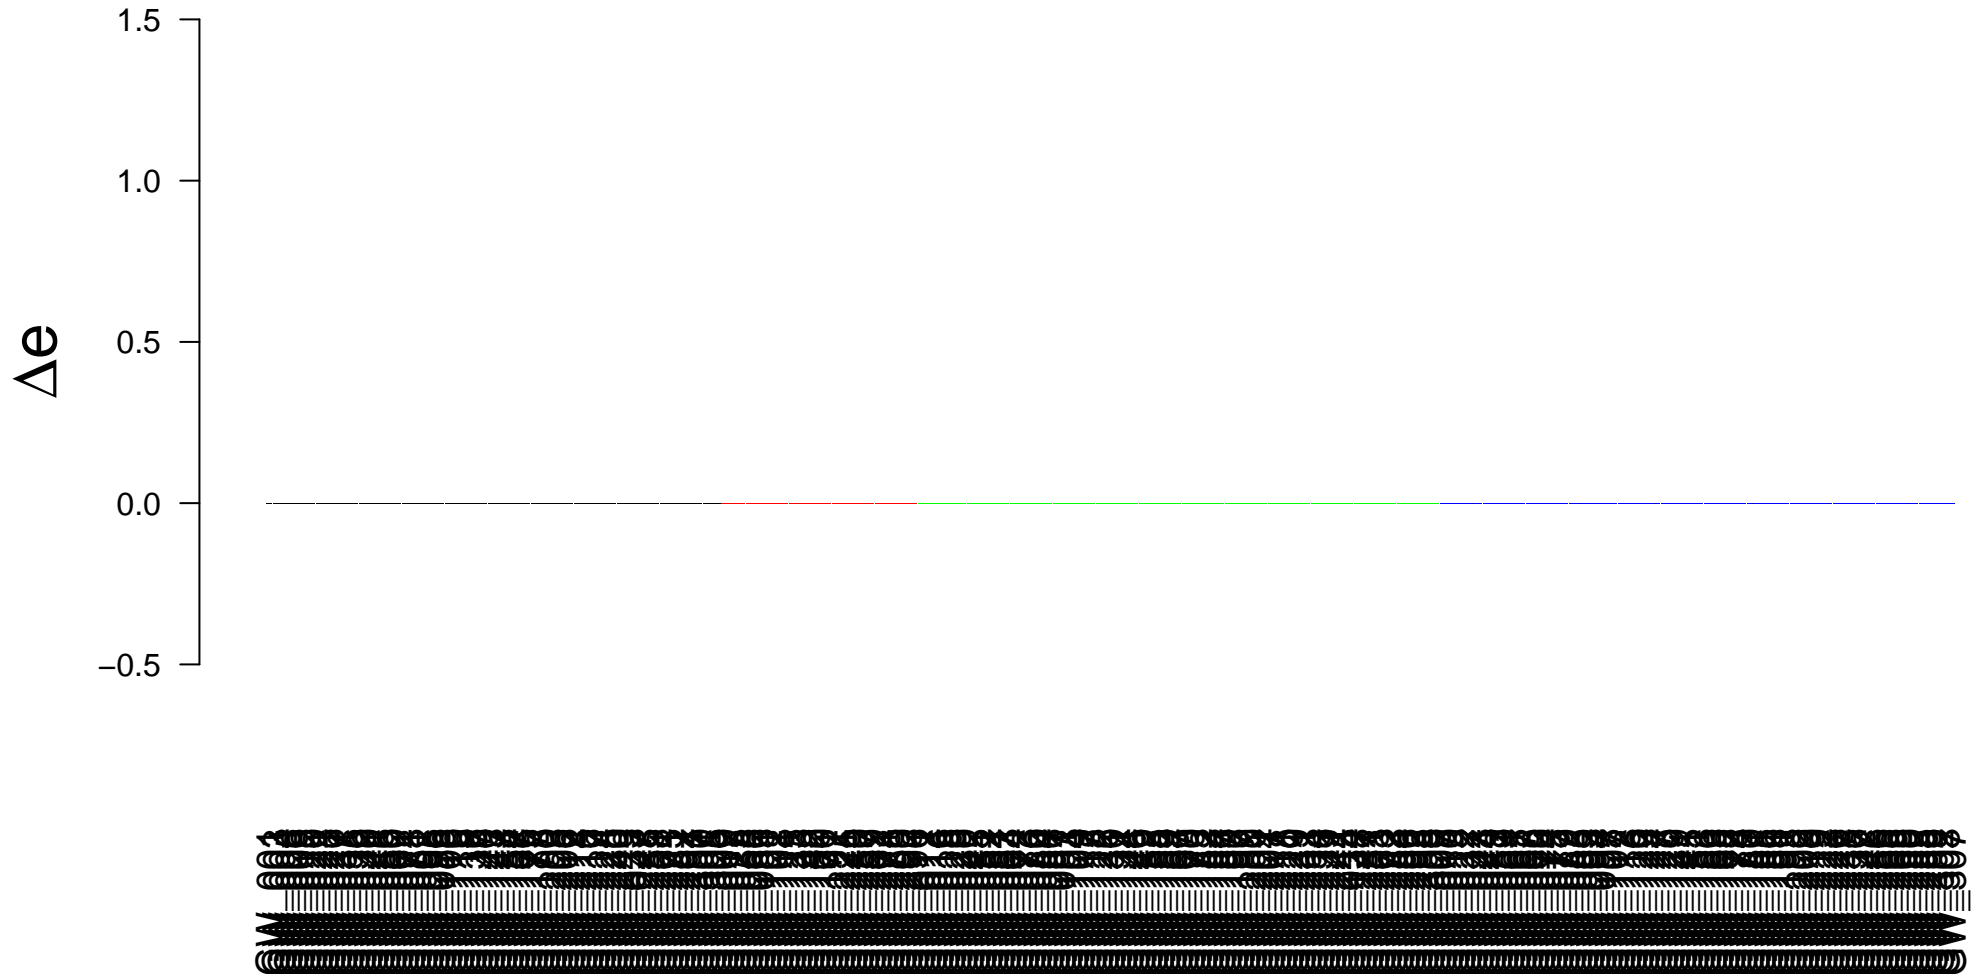

Expression of negative regulation of transcription regulatory region DNA binding in Spot D

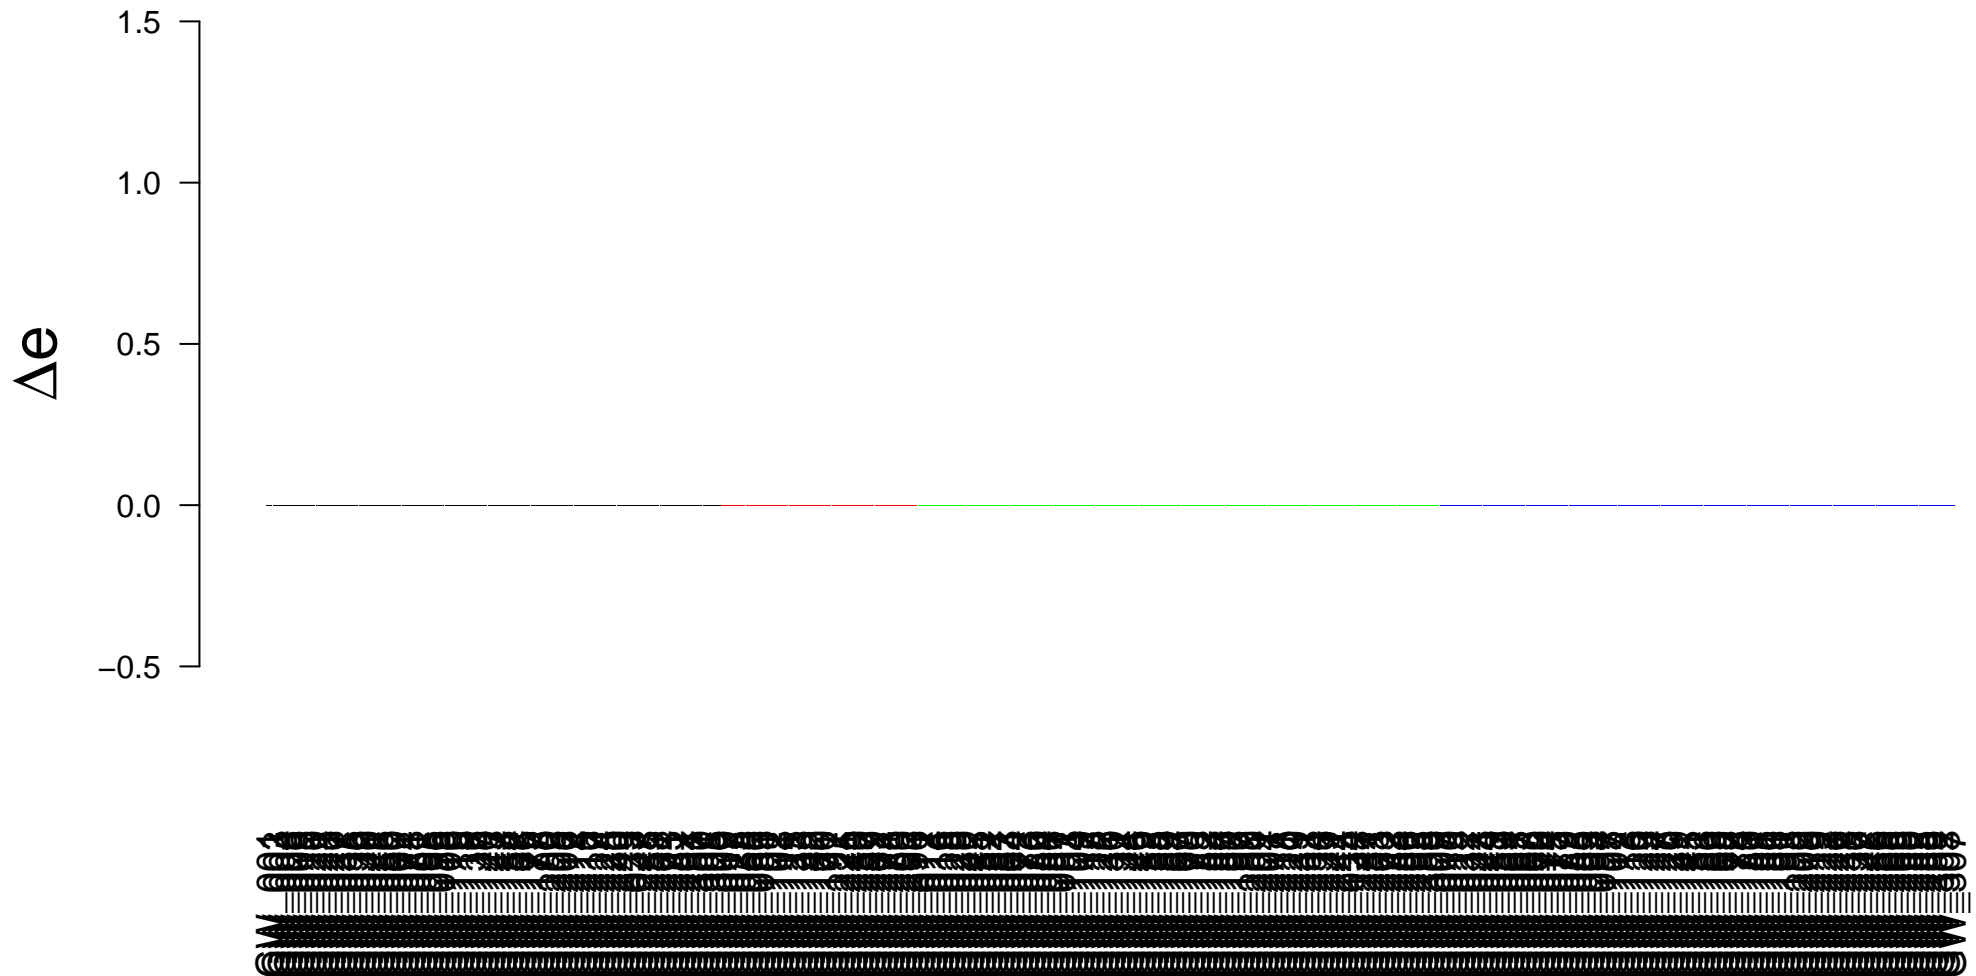

Expression of negative regulation of transcription regulatory region DNA binding in Spot E

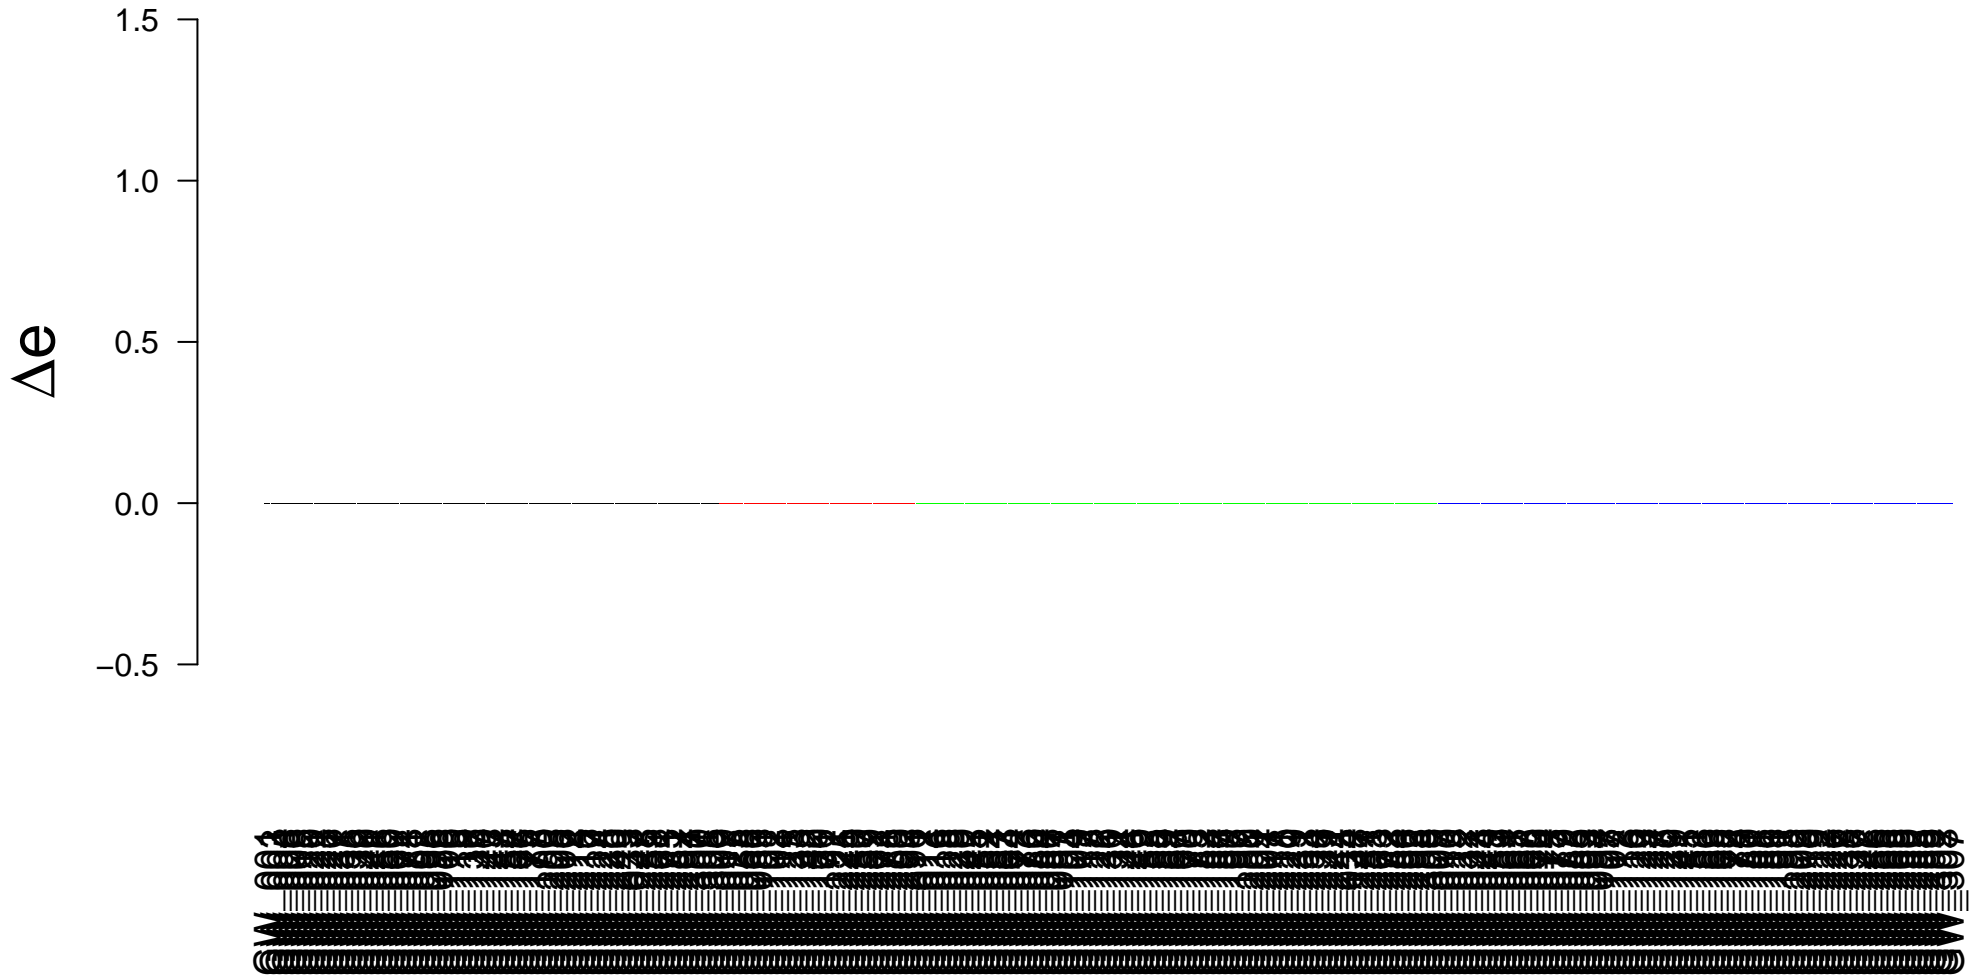

Expression of negative regulation of transcription regulatory region DNA binding in Spot F

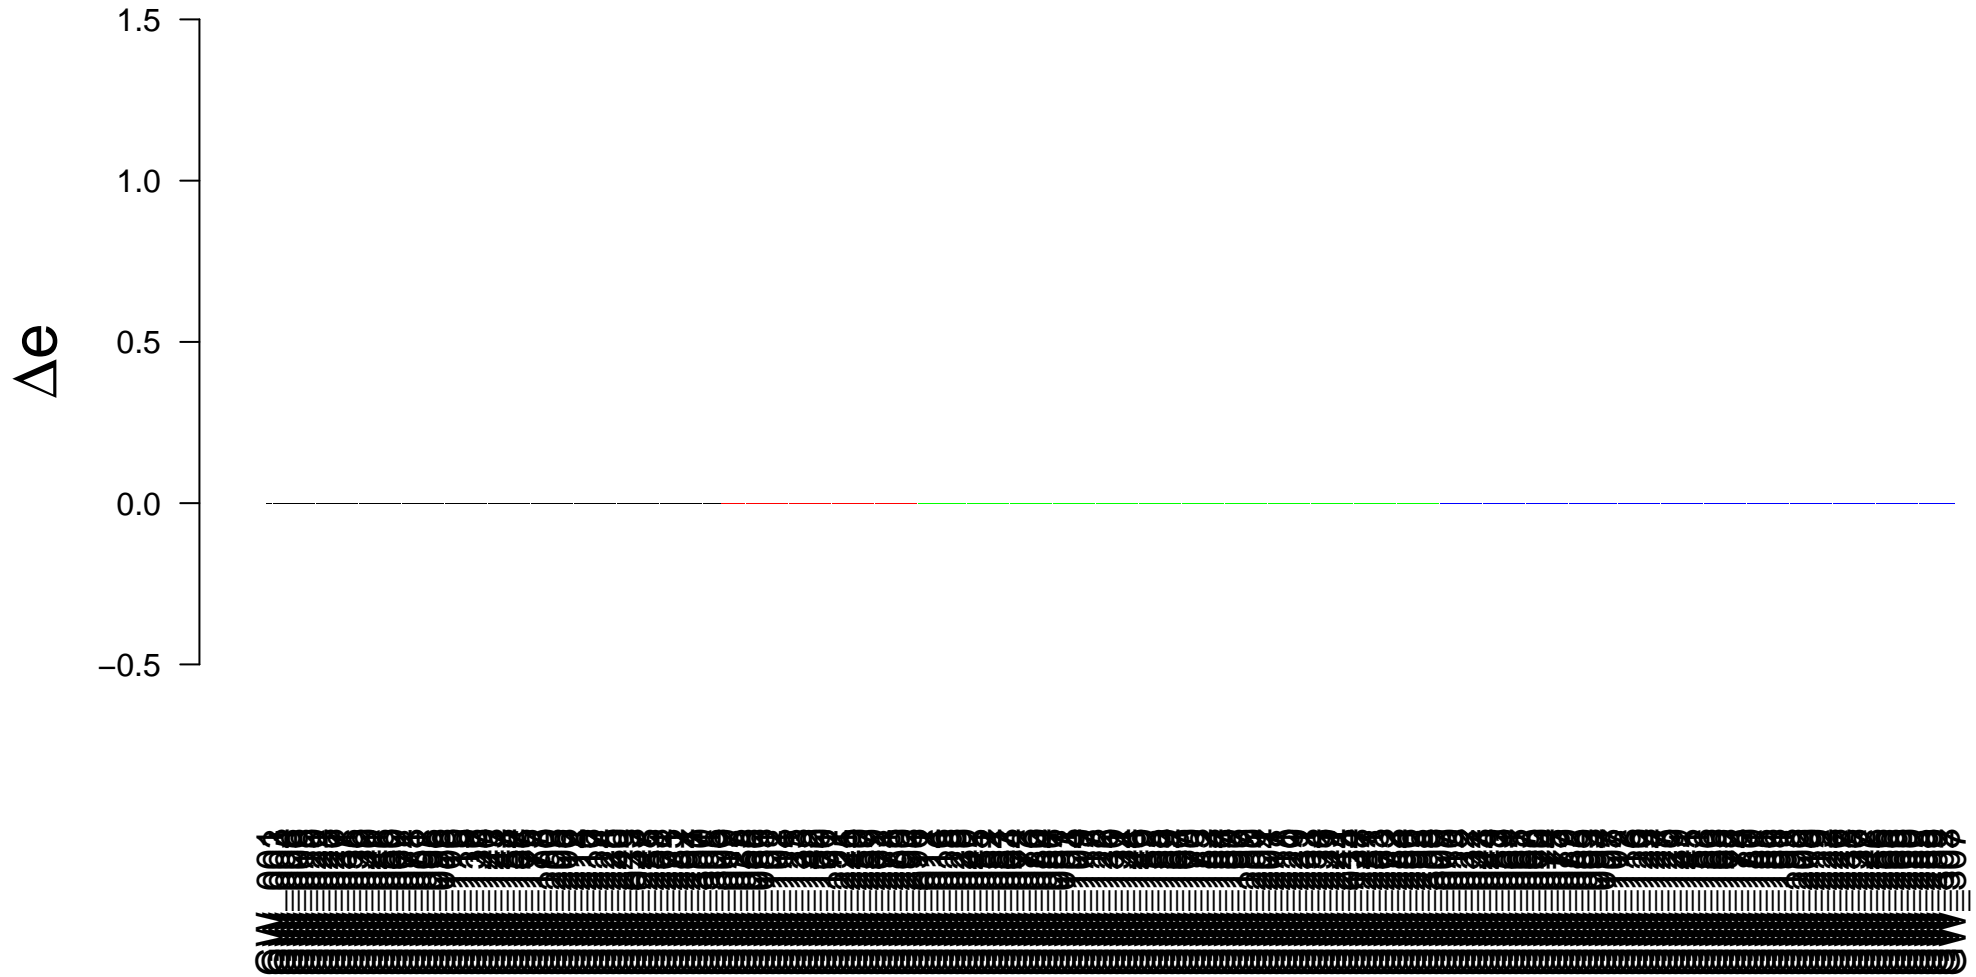

Expression of negative regulation of transcription regulatory region DNA binding in Spot G

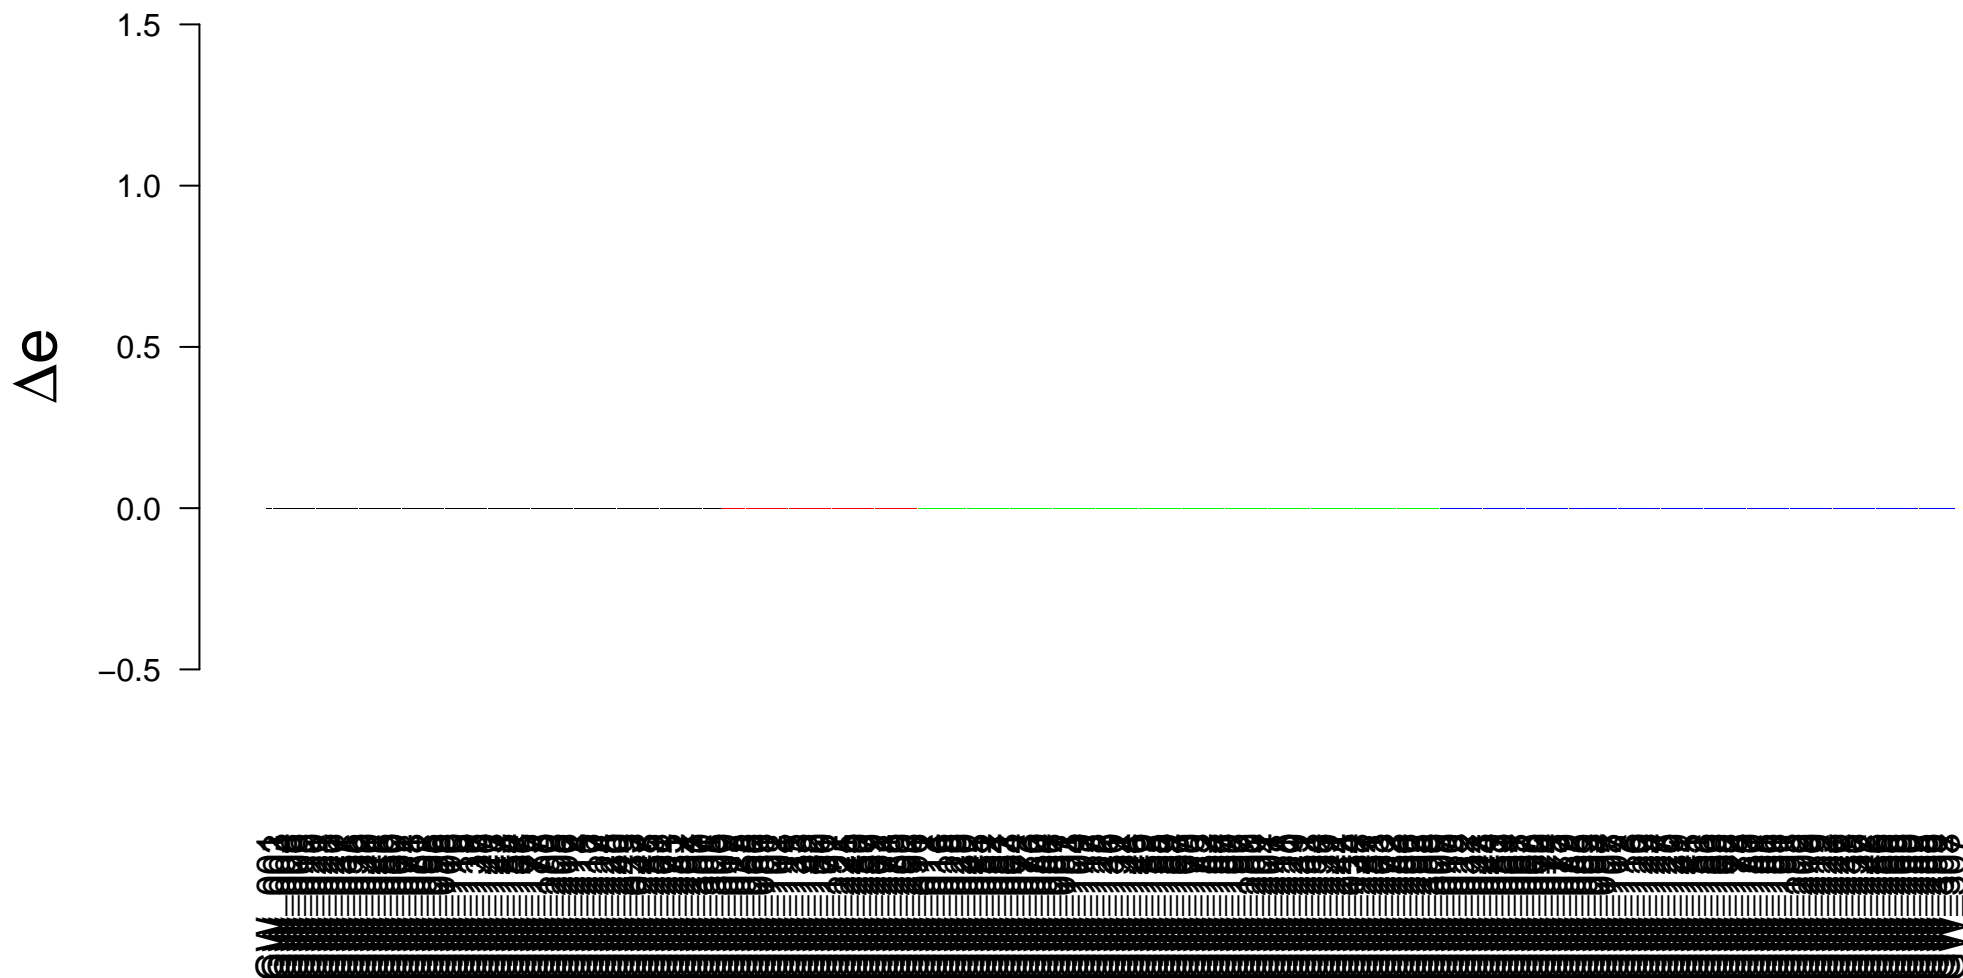

Expression of negative regulation of transcription regulatory region DNA binding in Spot H

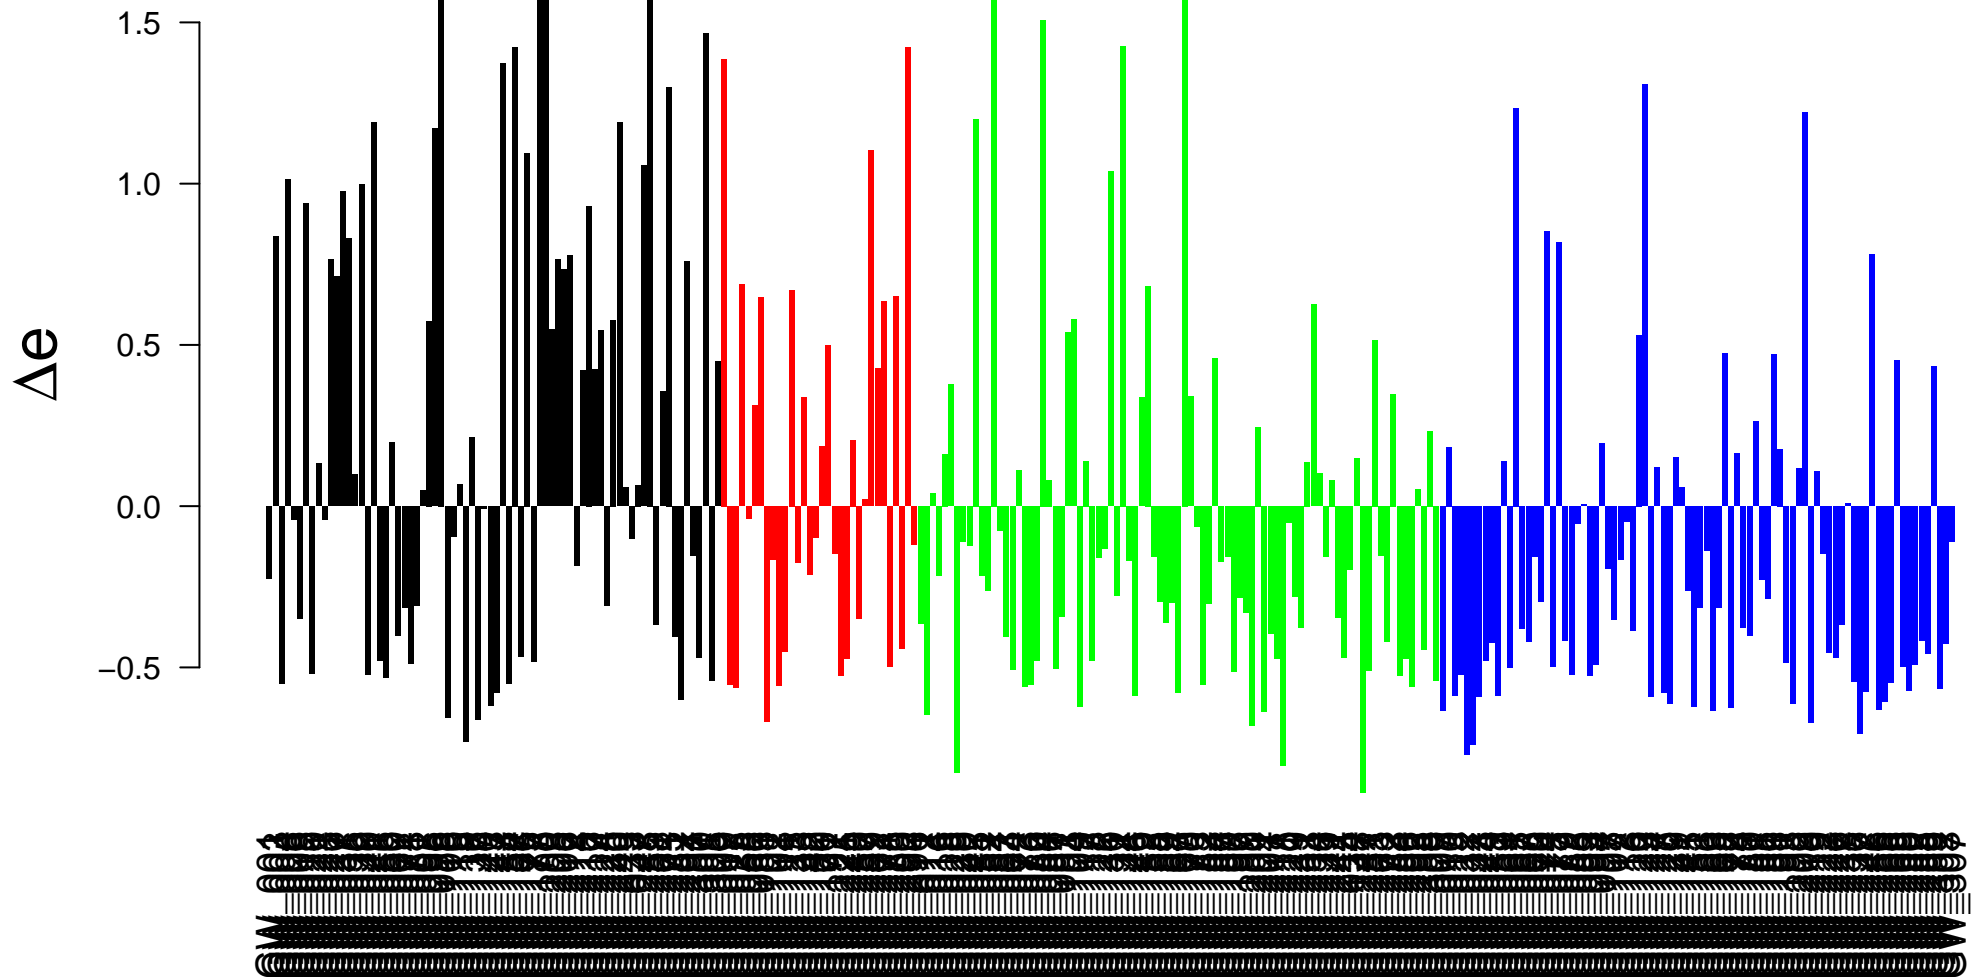

Expression of negative regulation of transcription regulatory region DNA binding in Spot I

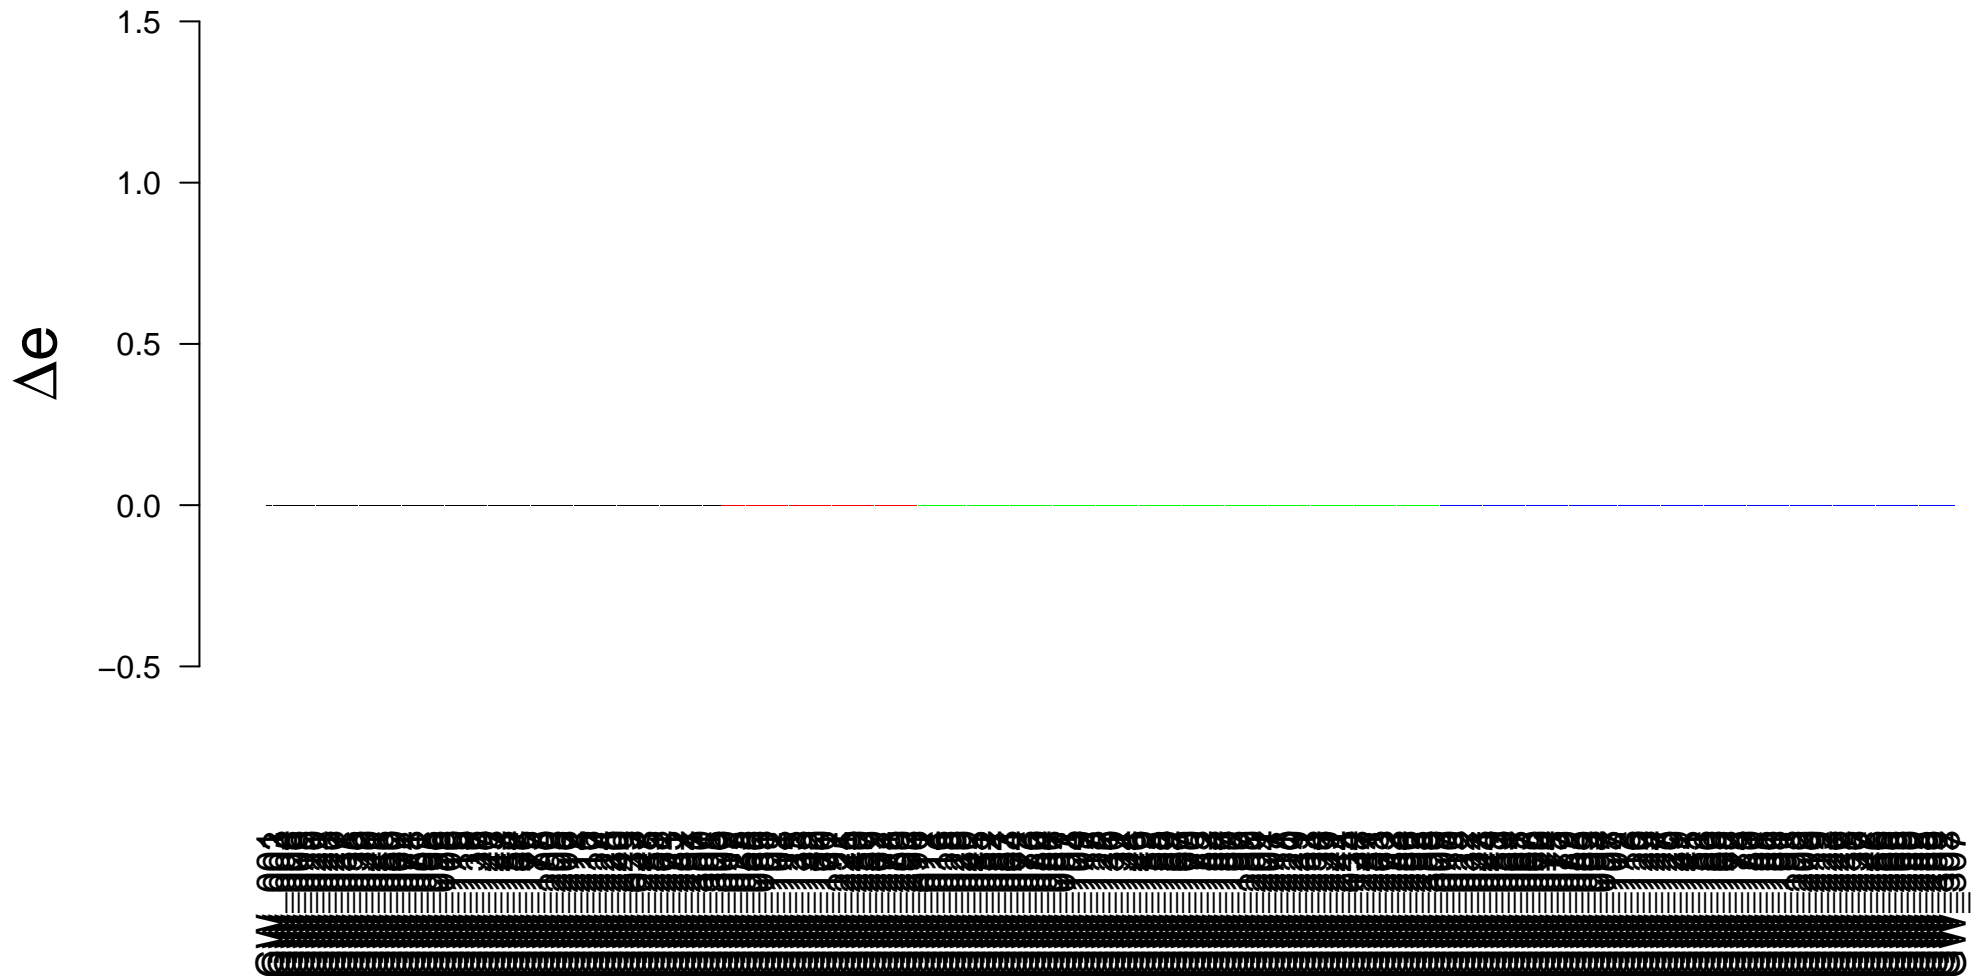

Expression of negative regulation of transcription regulatory region DNA binding in Spot J

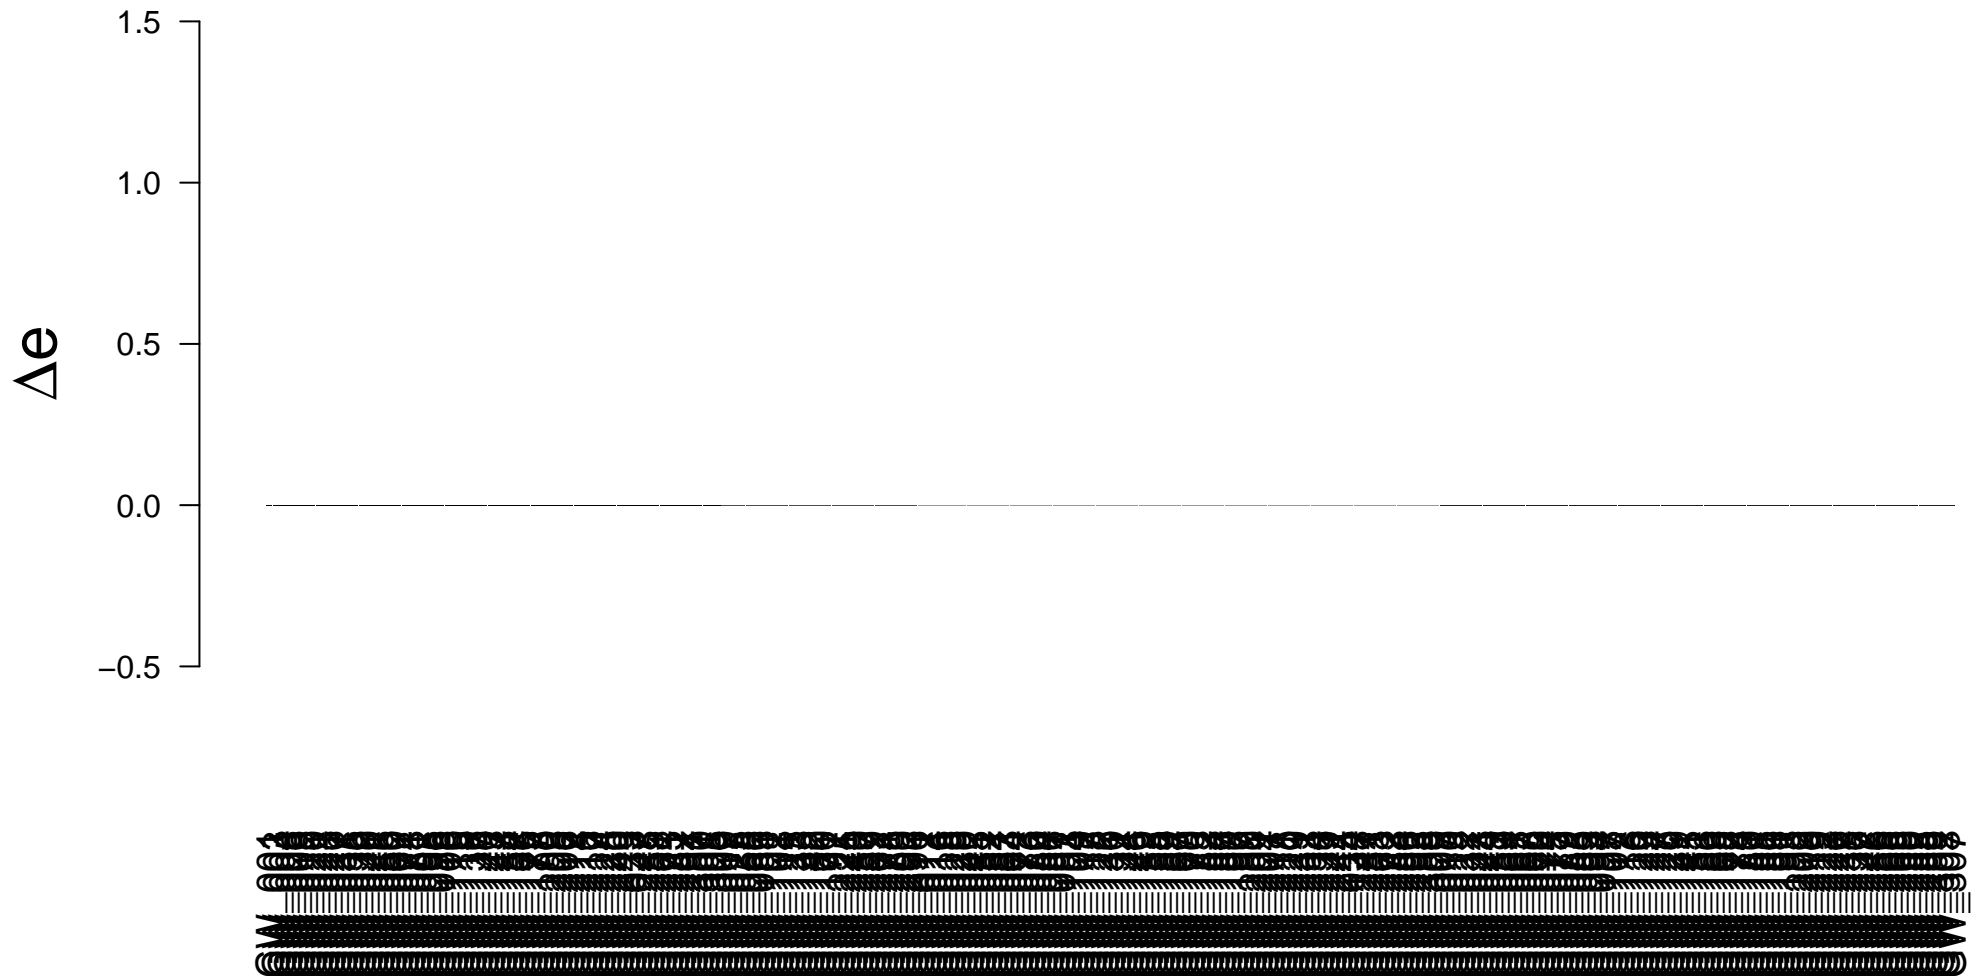

Expression of negative regulation of transcription regulatory region DNA binding in Spot K

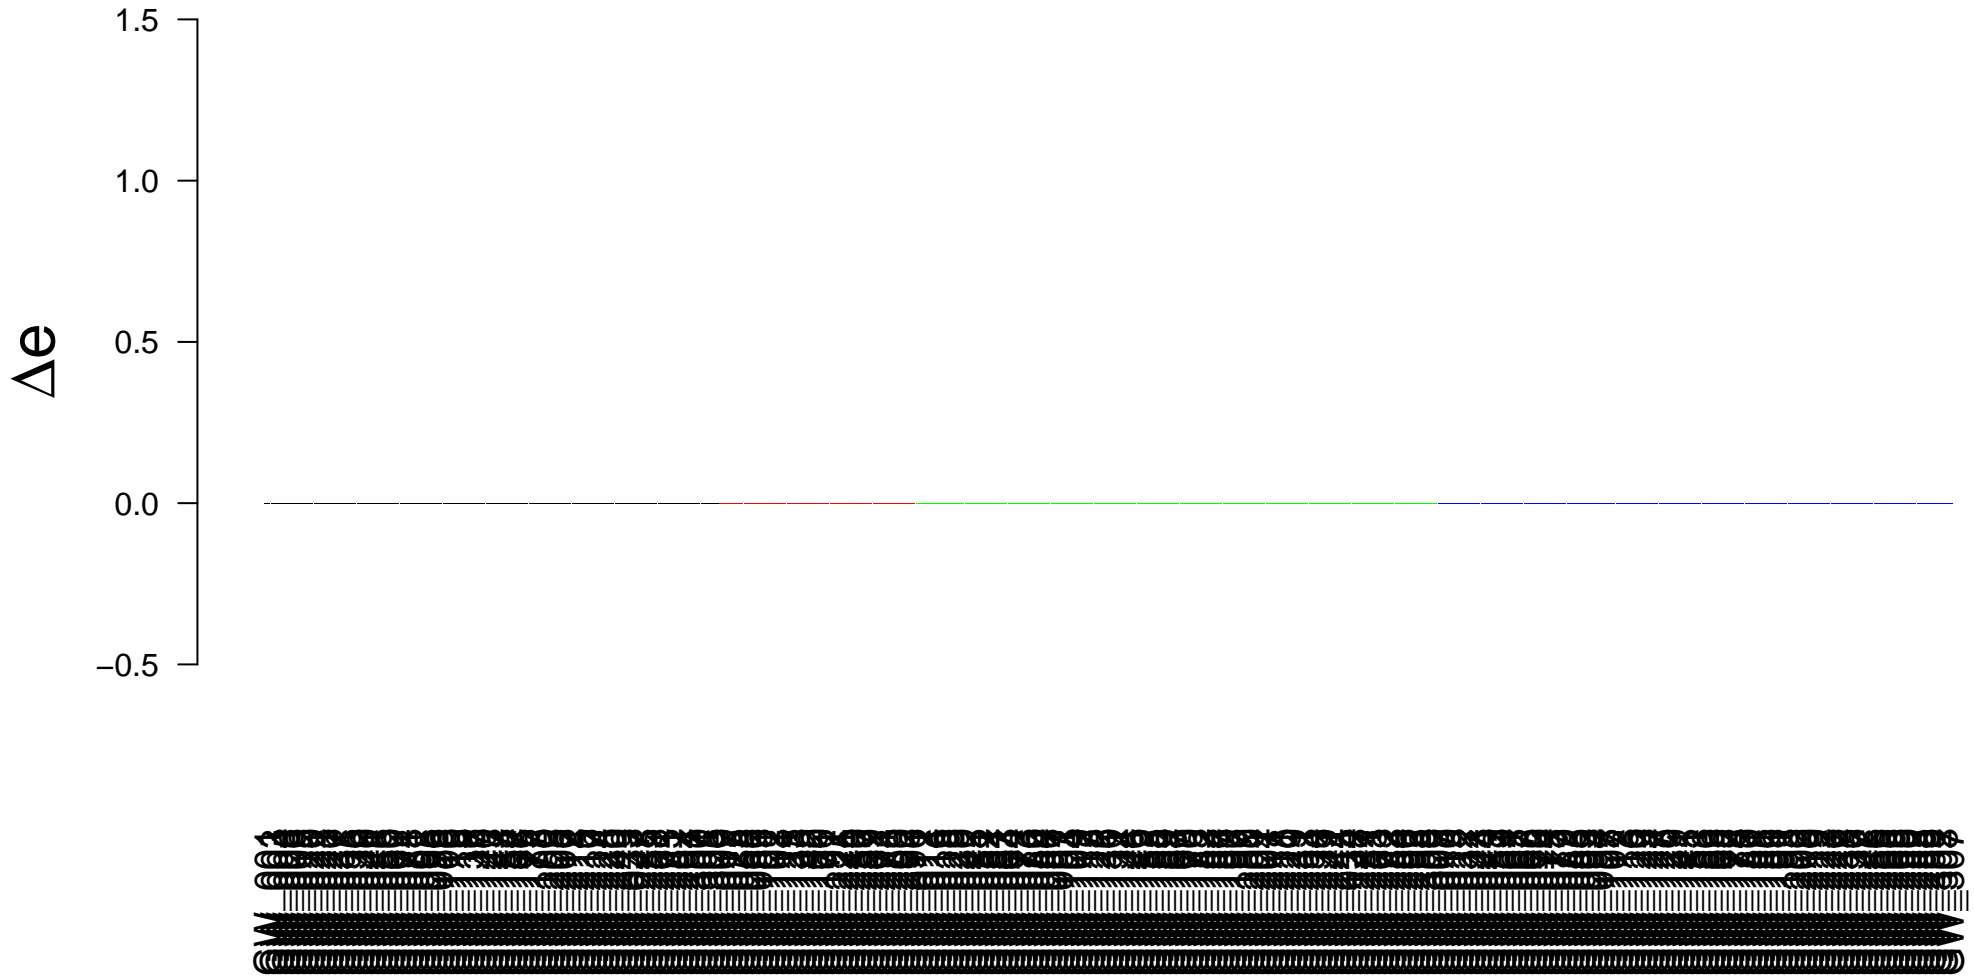

Expression of negative regulation of transcription regulatory region DNA binding in Spot L

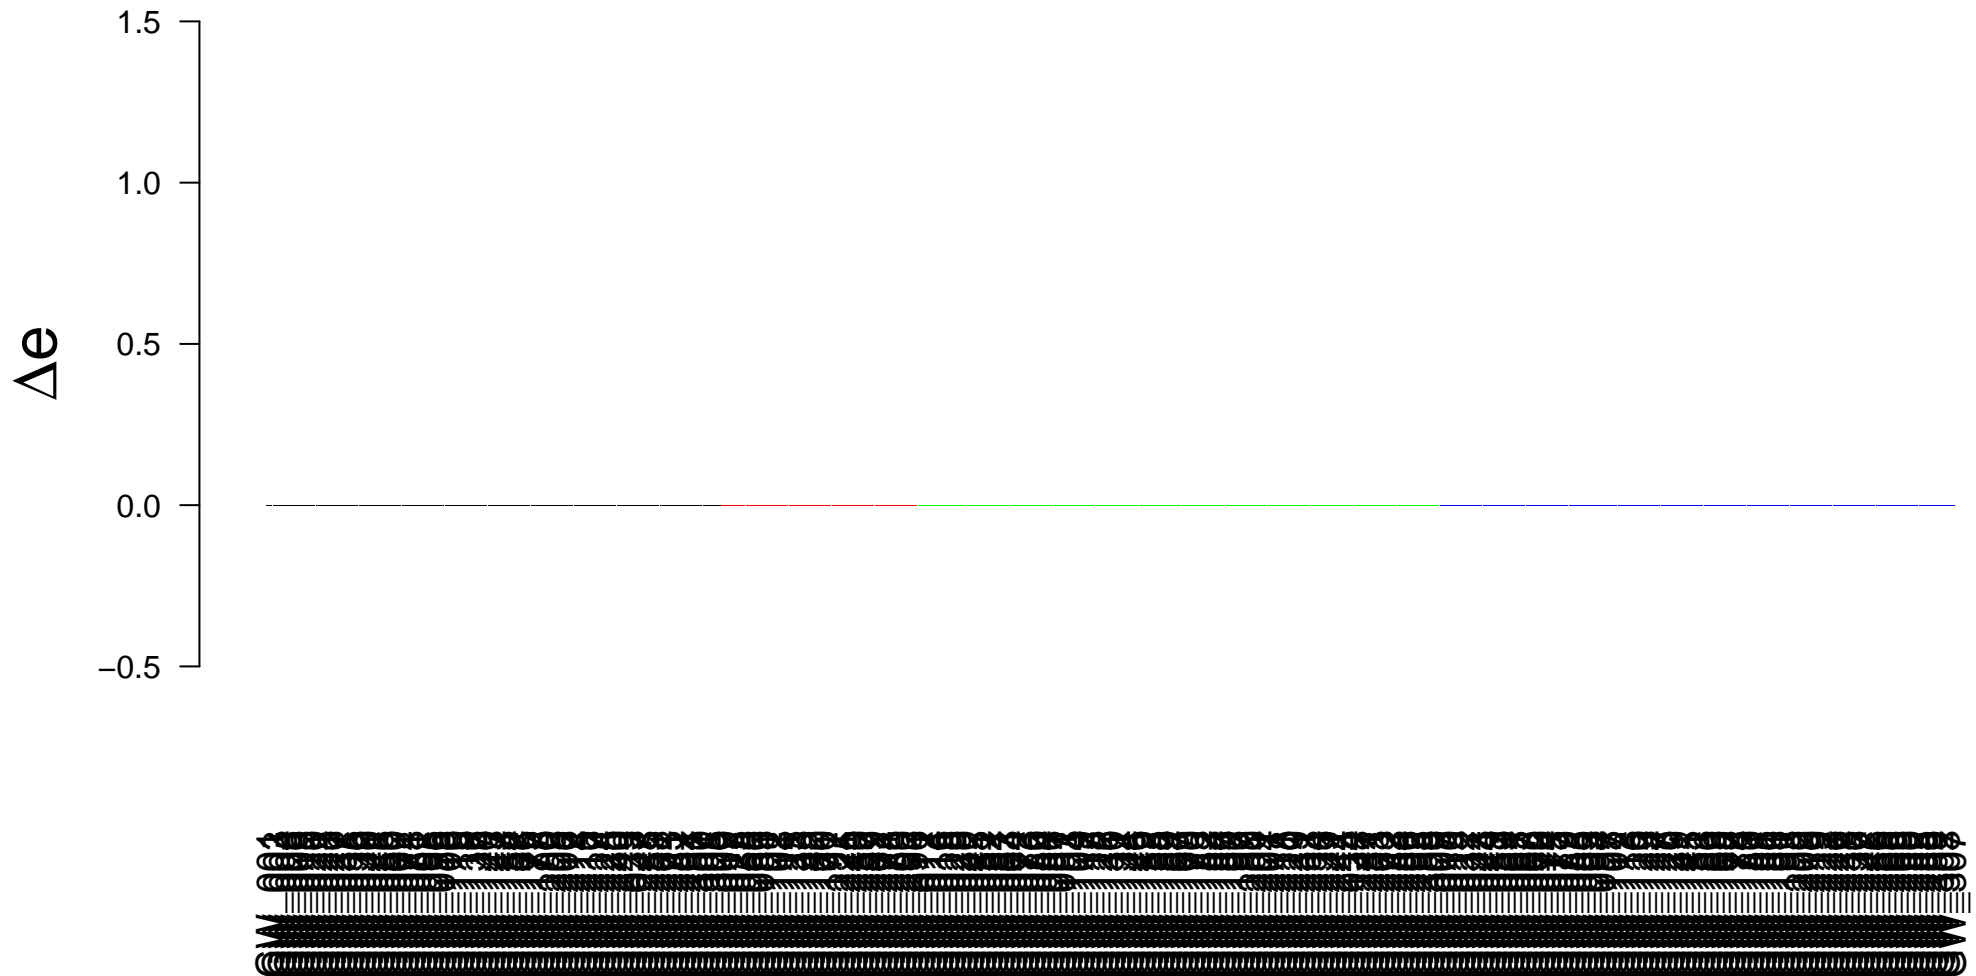

Expression of negative regulation of transcription regulatory region DNA binding in Spot M

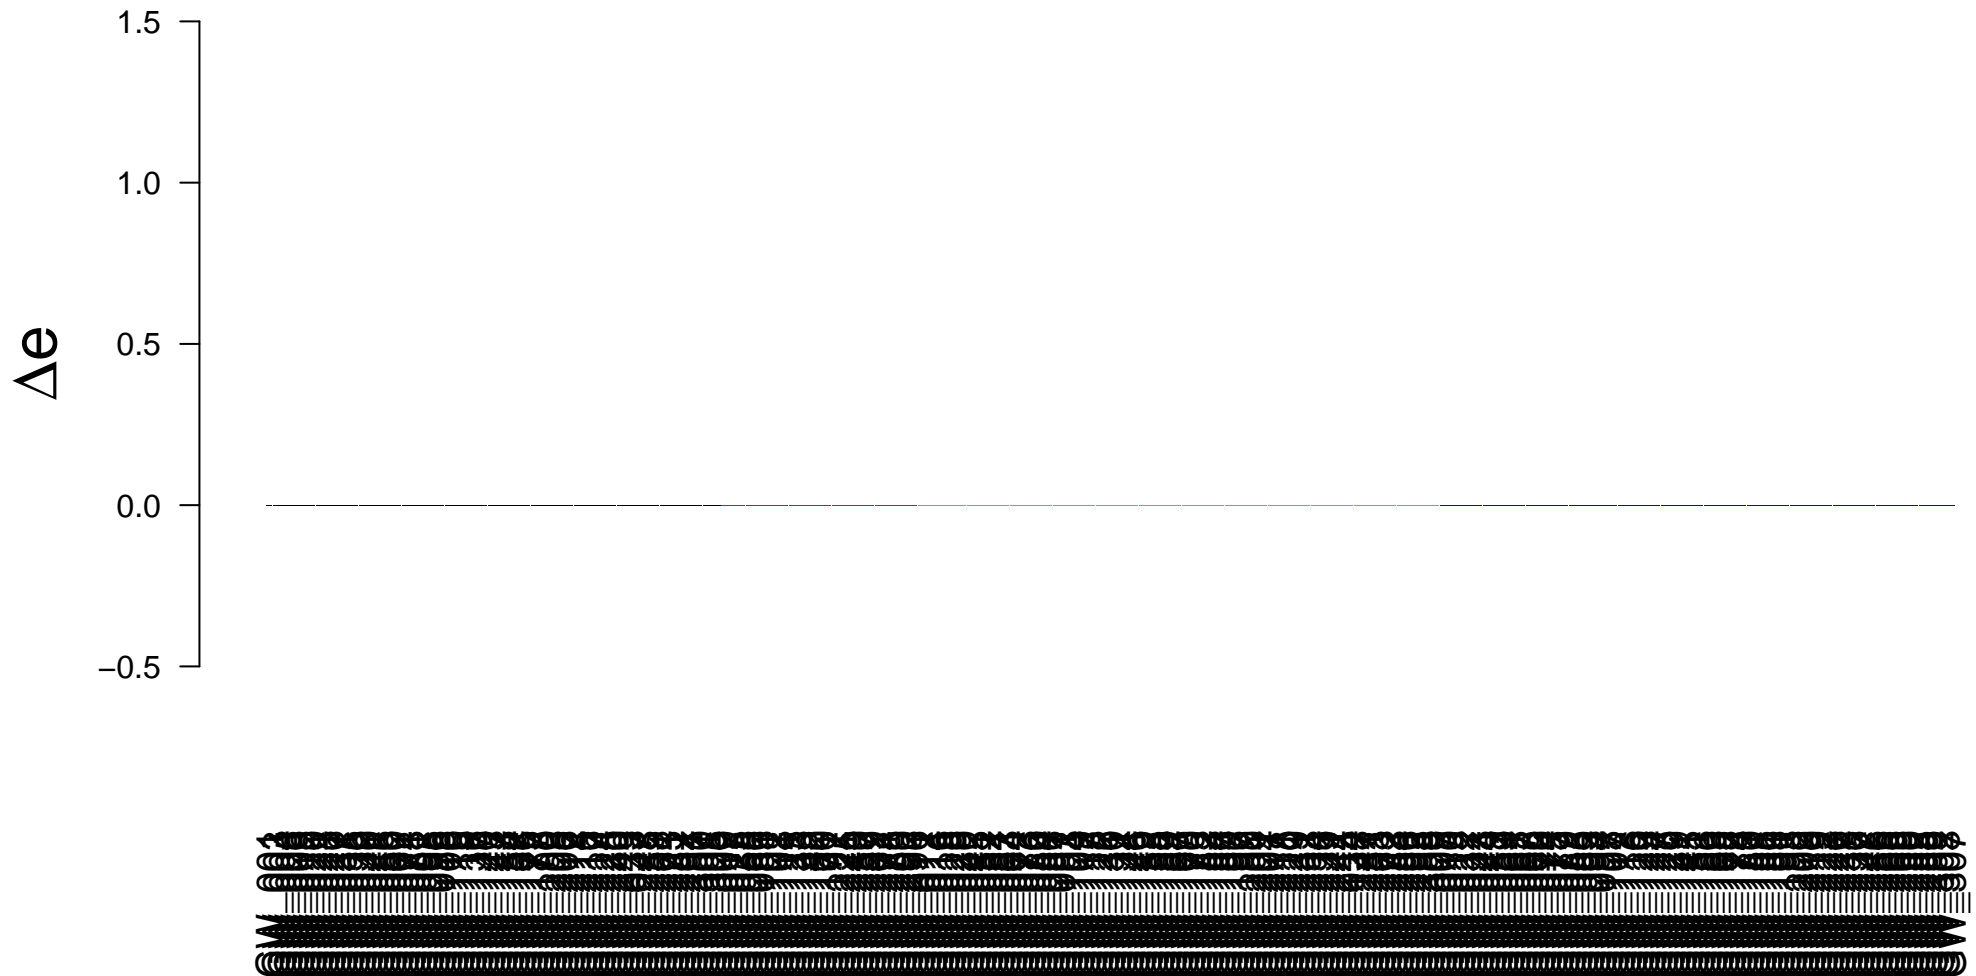

Expression of negative regulation of transcription regulatory region DNA binding in Spot N

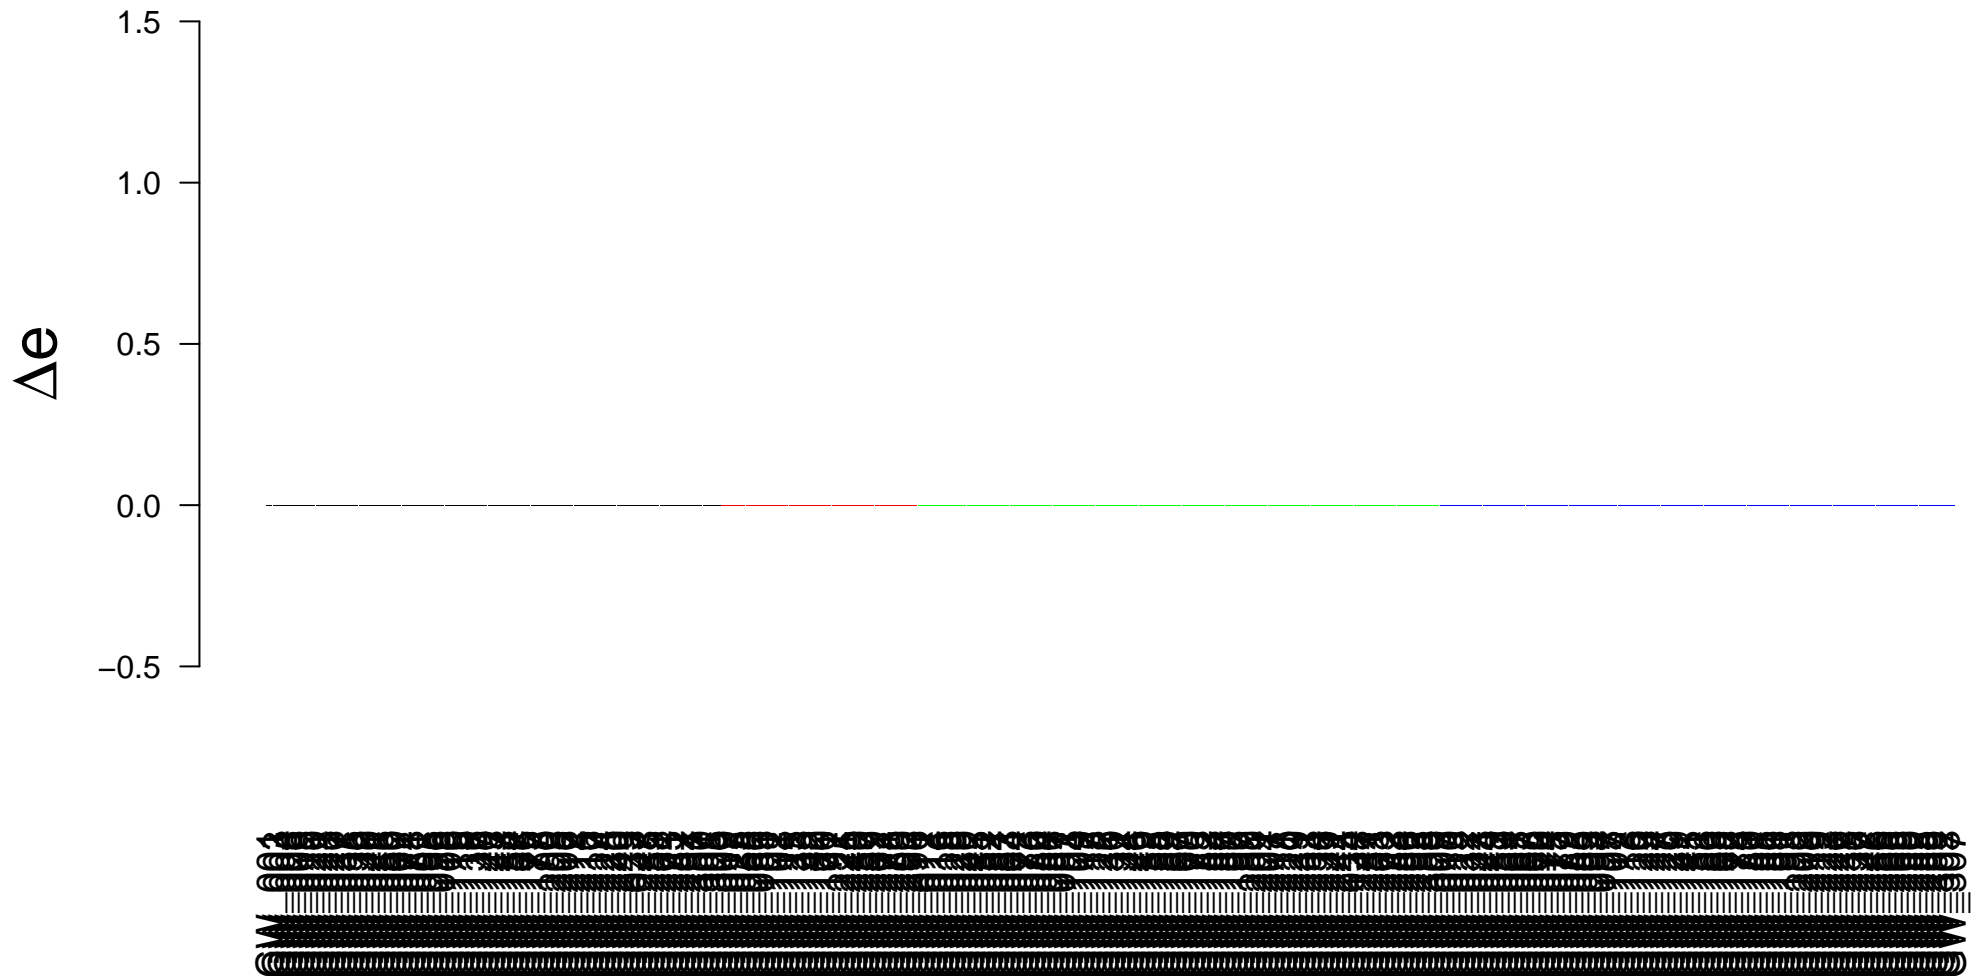

Expression of negative regulation of transcription regulatory region DNA binding in Spot O

Expression of negative regulation of transcription regulatory region DNA binding in Spot P

Expression of negative regulation of transcription regulatory region DNA binding in Spot Q

Expression of negative regulation of transcription regulatory region DNA binding in Spot R
