

nucleotide-binding oligomerization domain containing signaling pathway

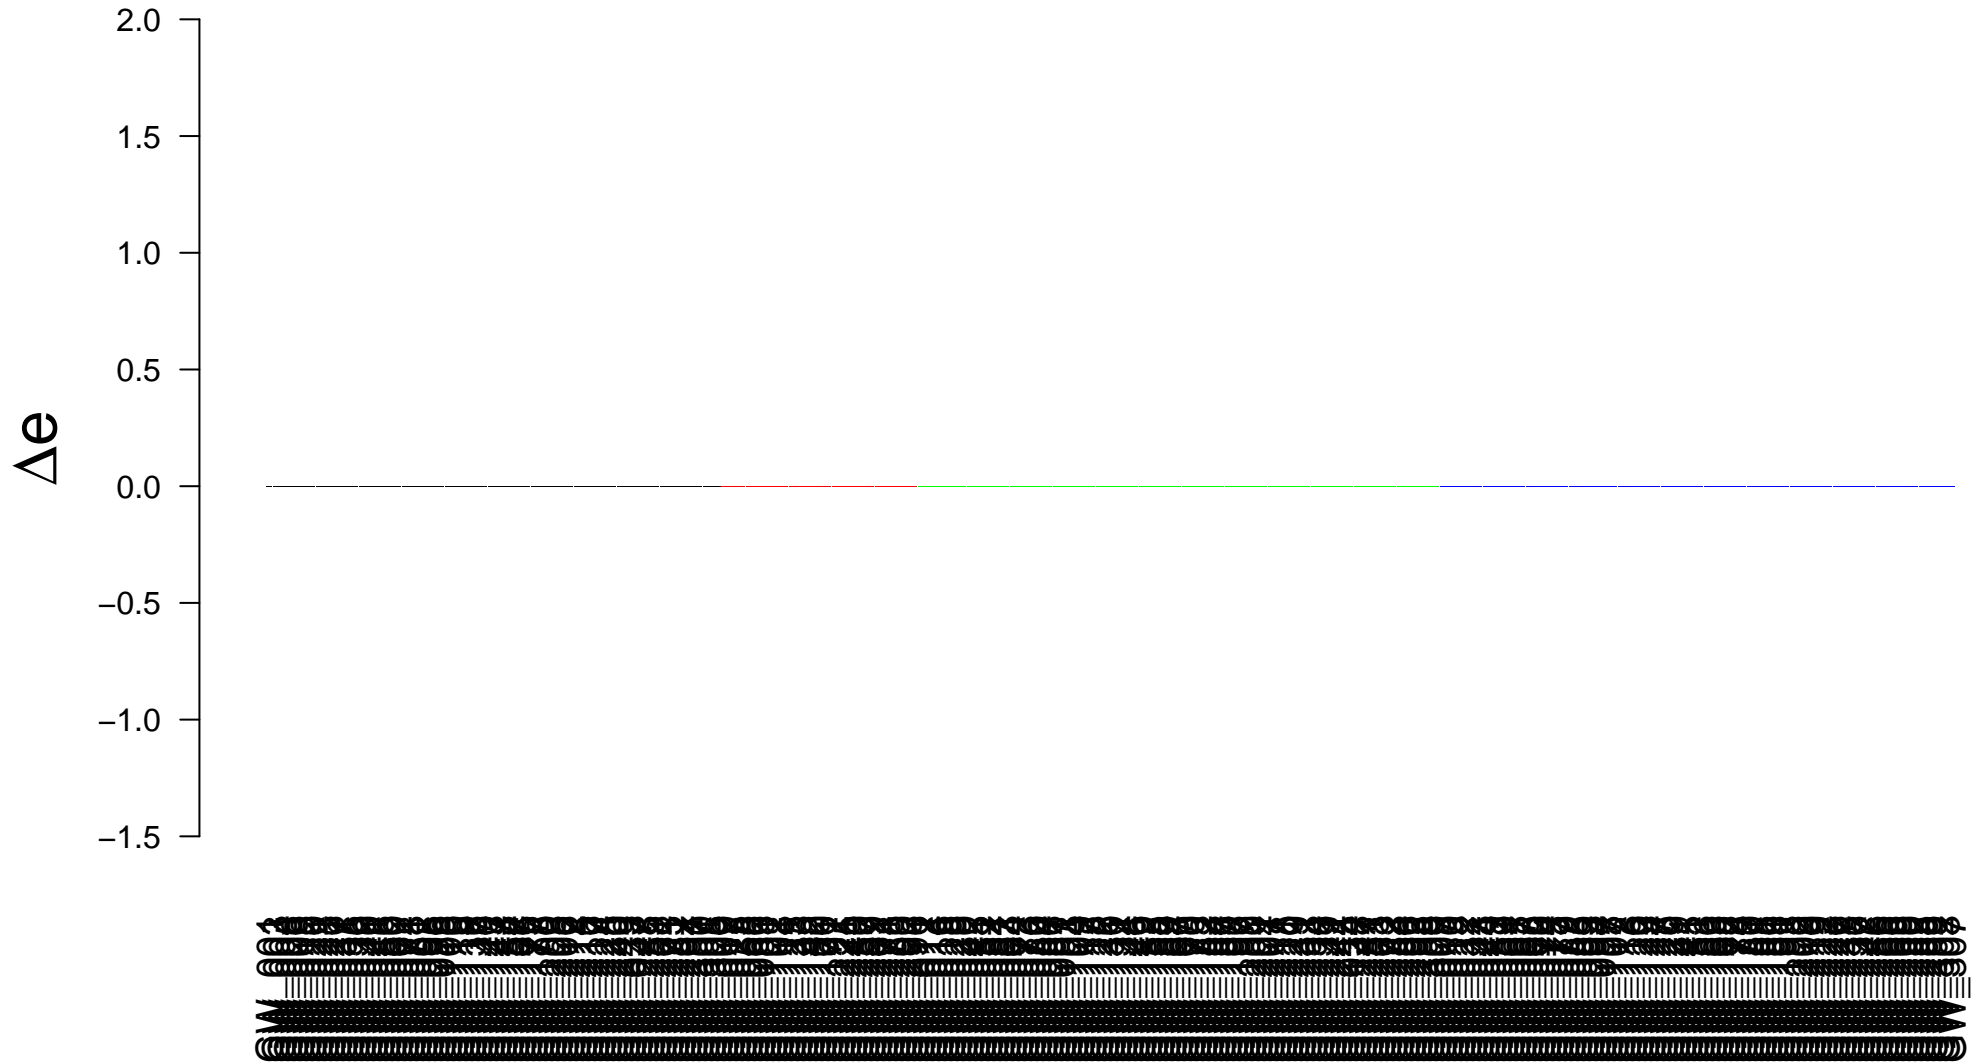

nucleotide-binding oligomerization domain containing signaling pathway

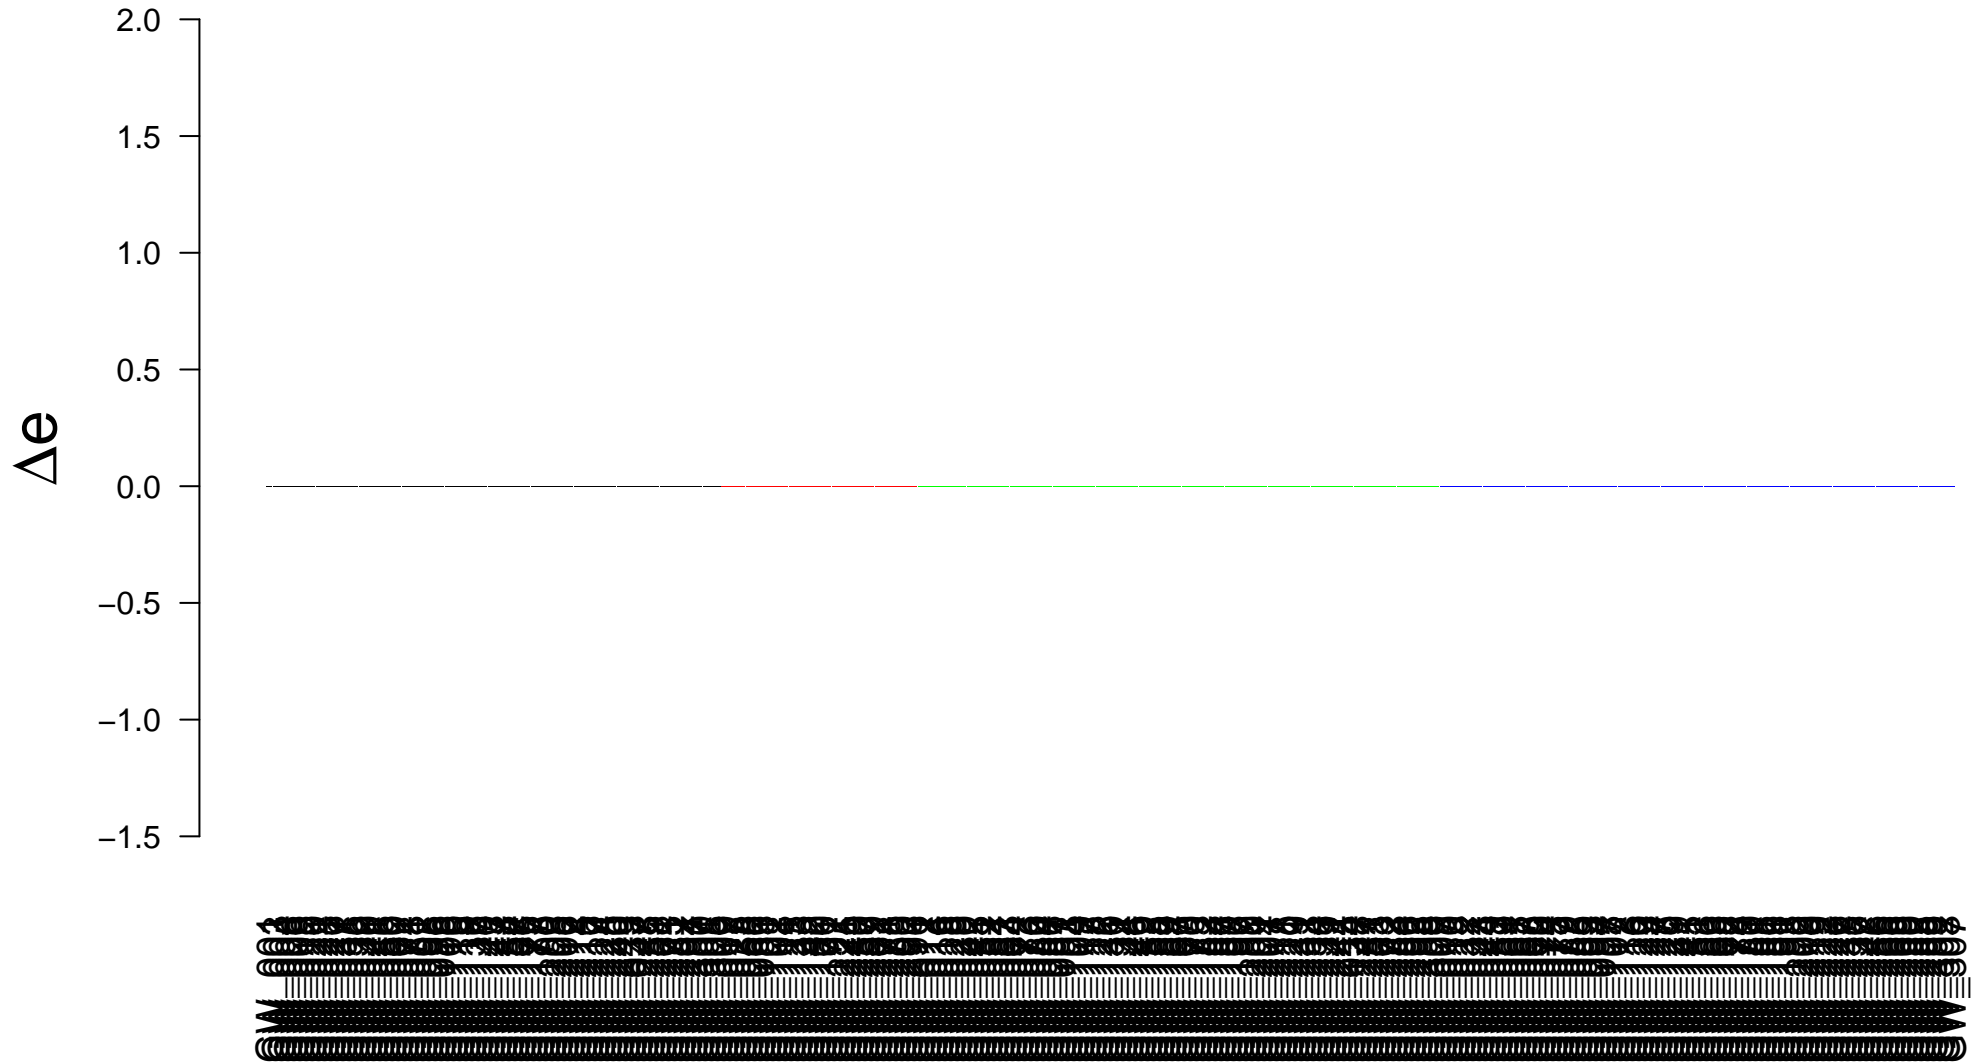

Enrichment in spots: nucleotide-binding oligomerization domain containing signaling pathway

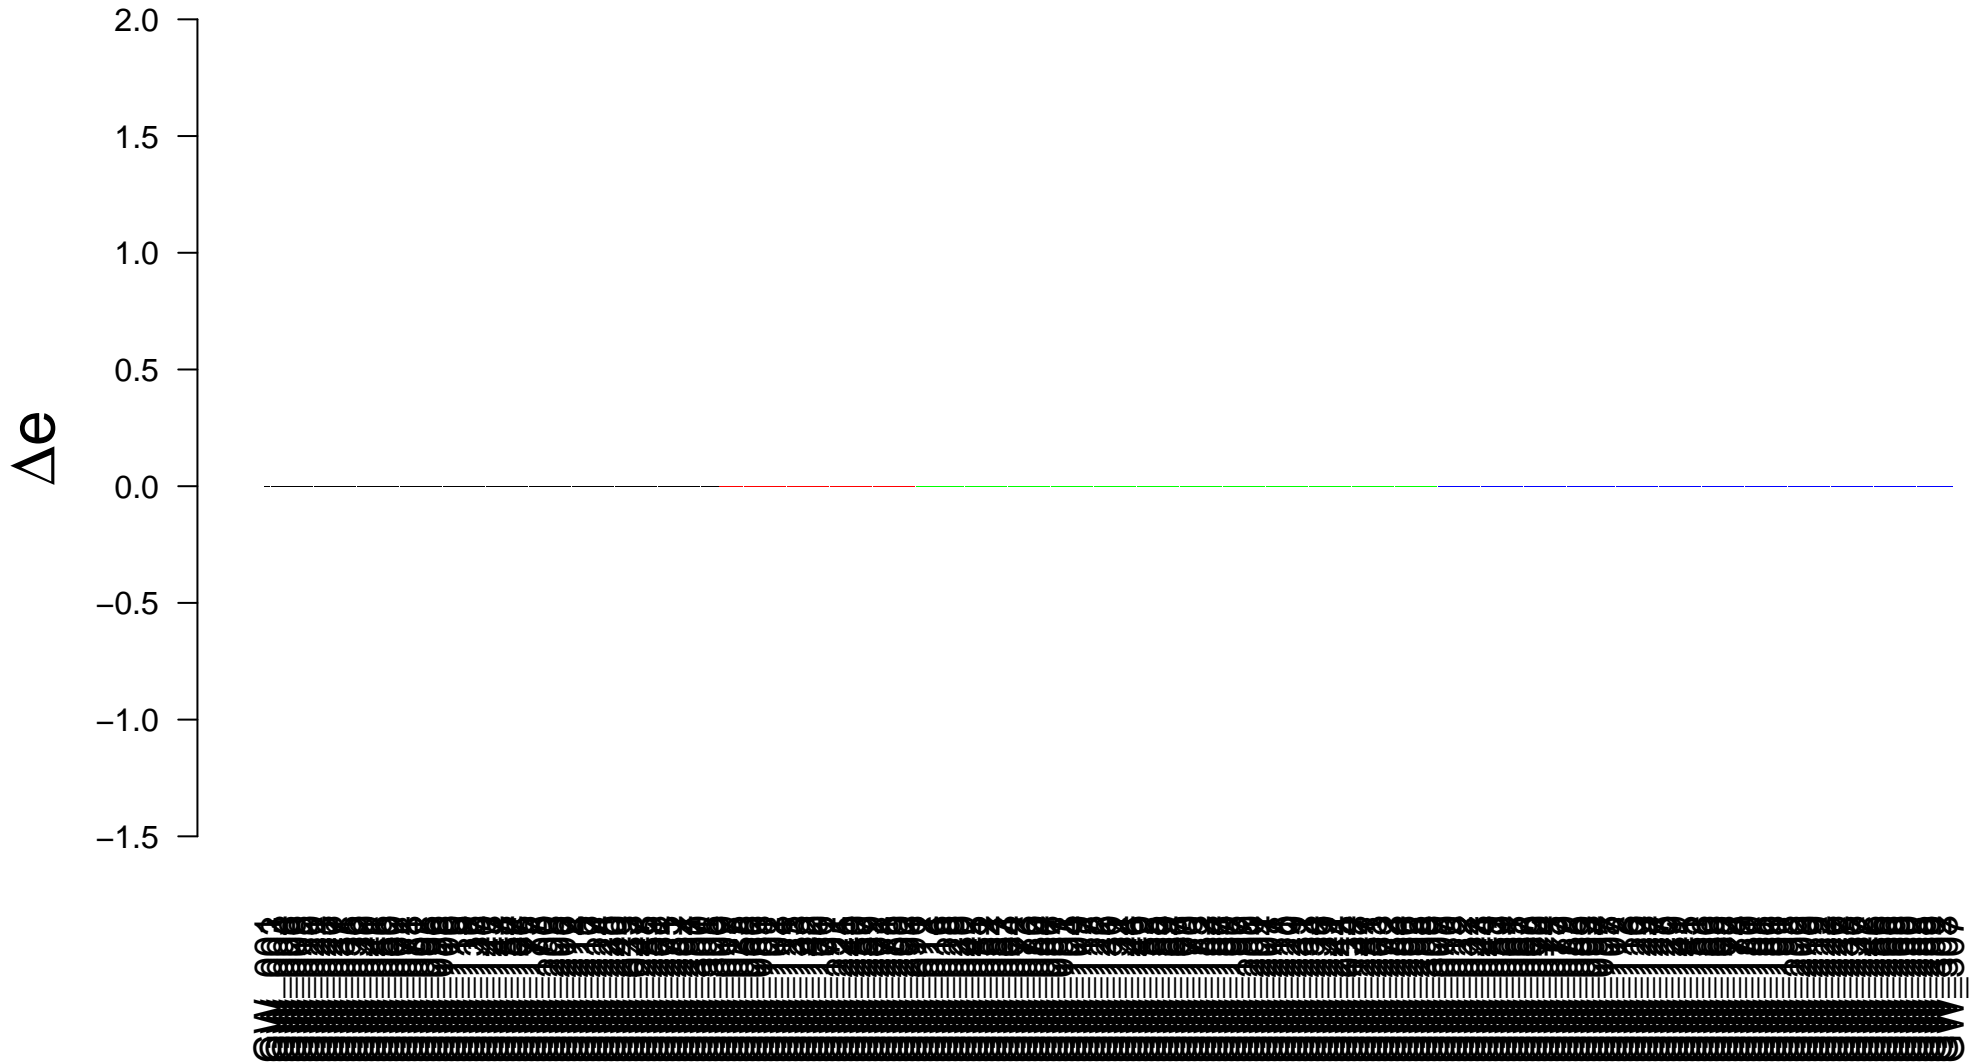

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot A

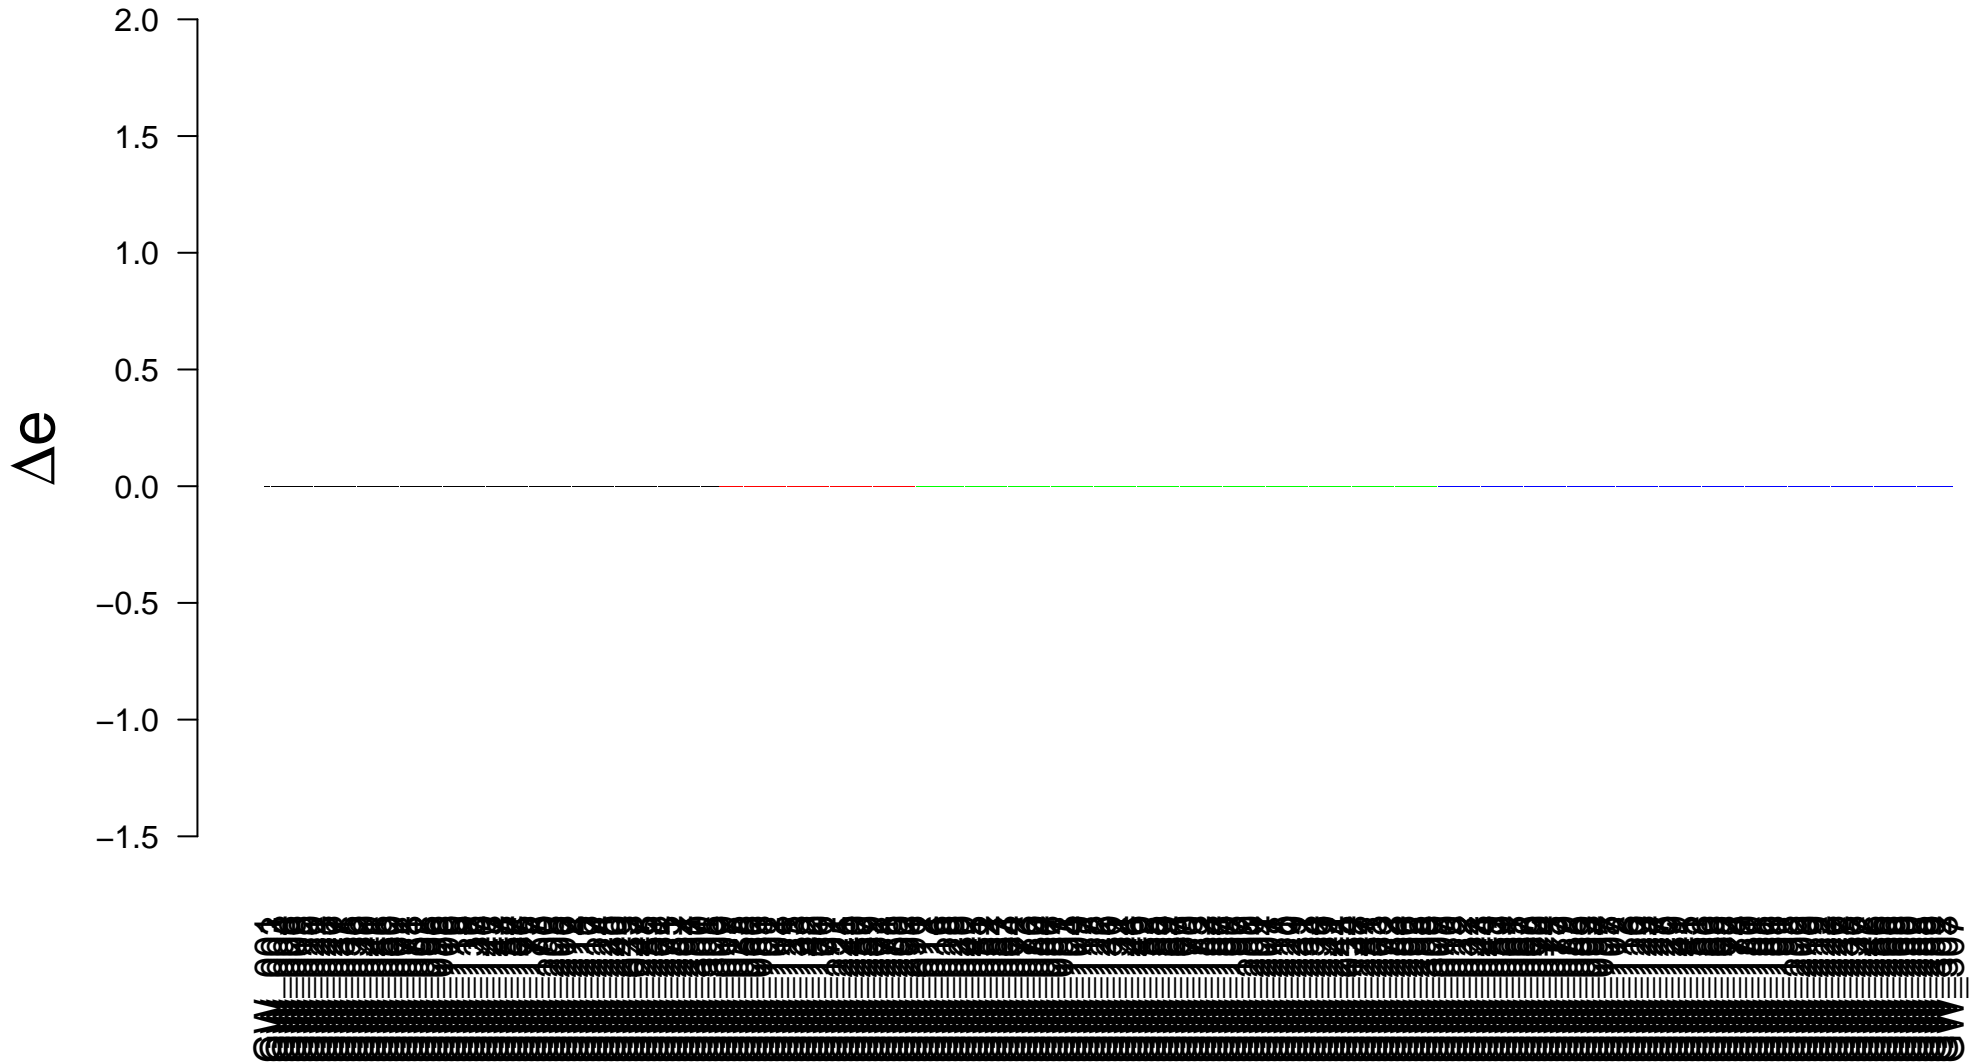

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot B

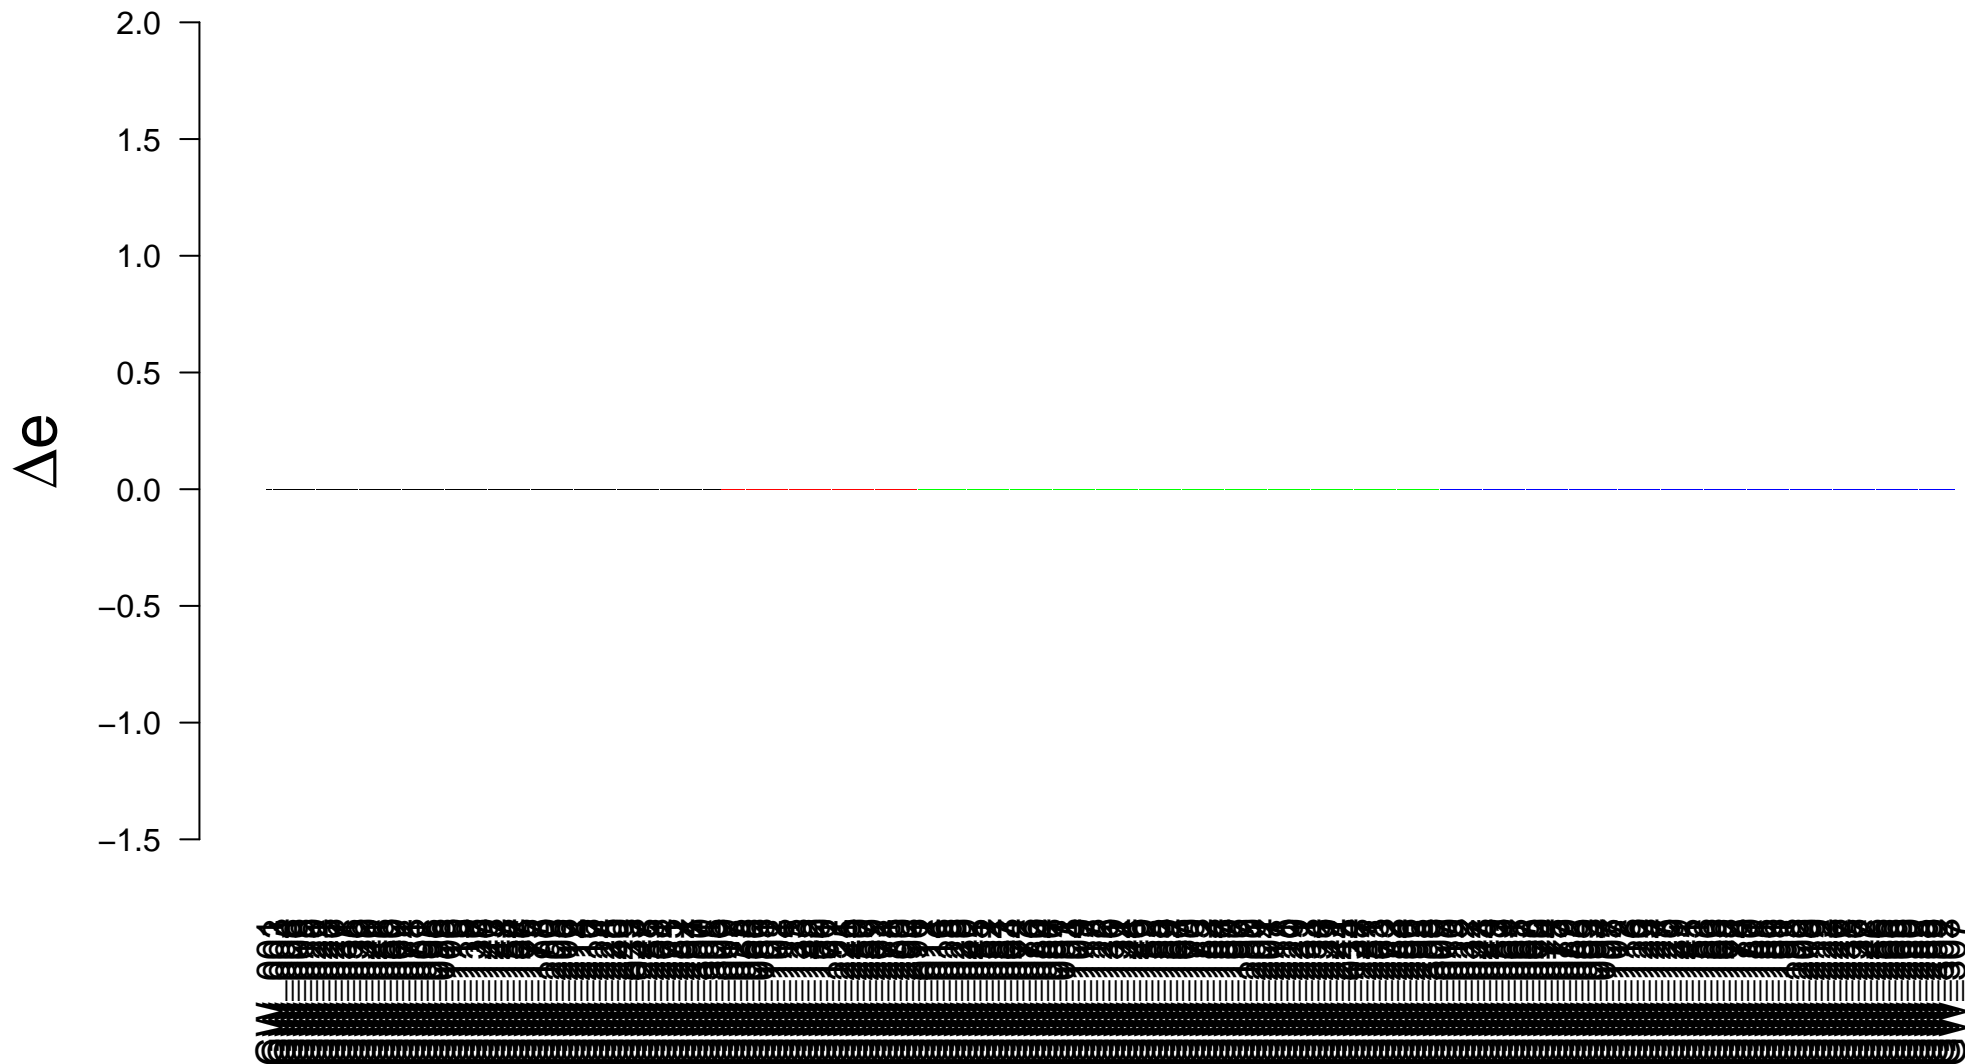

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot C

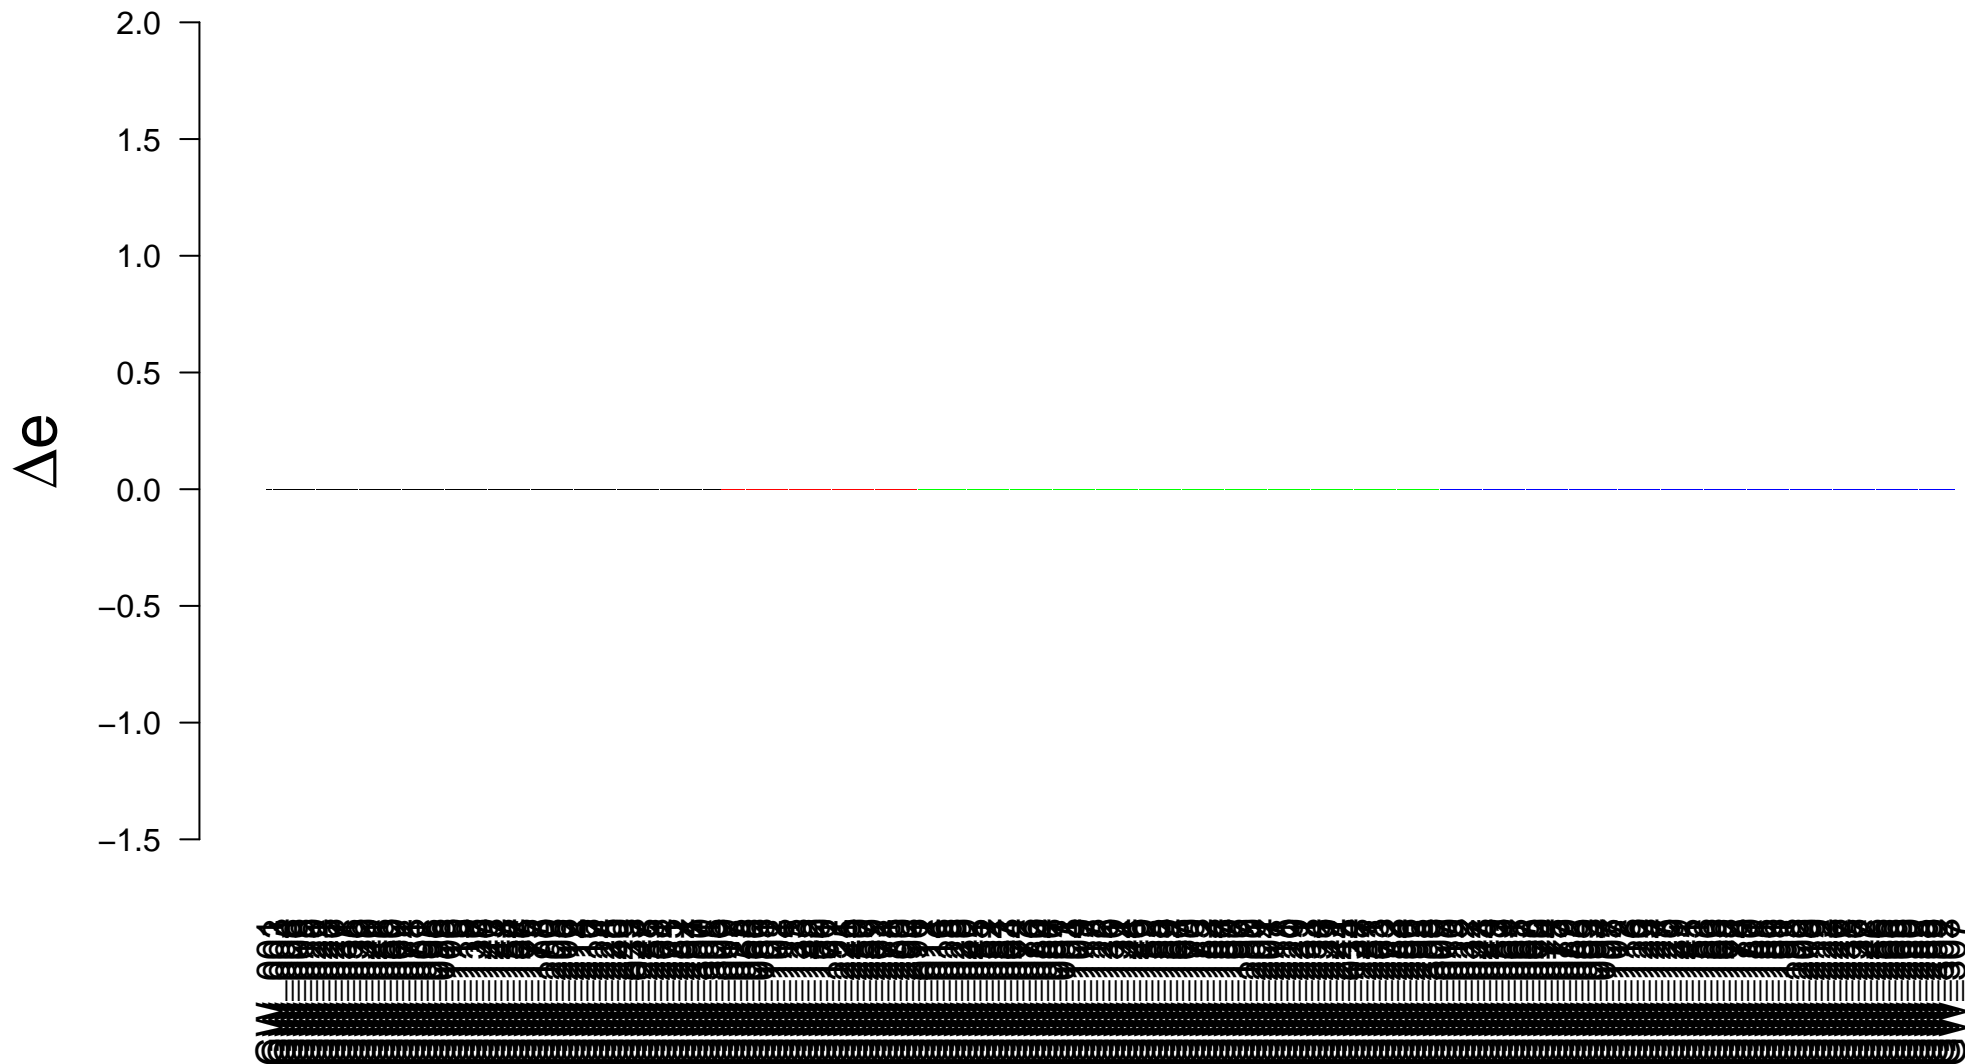

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot D

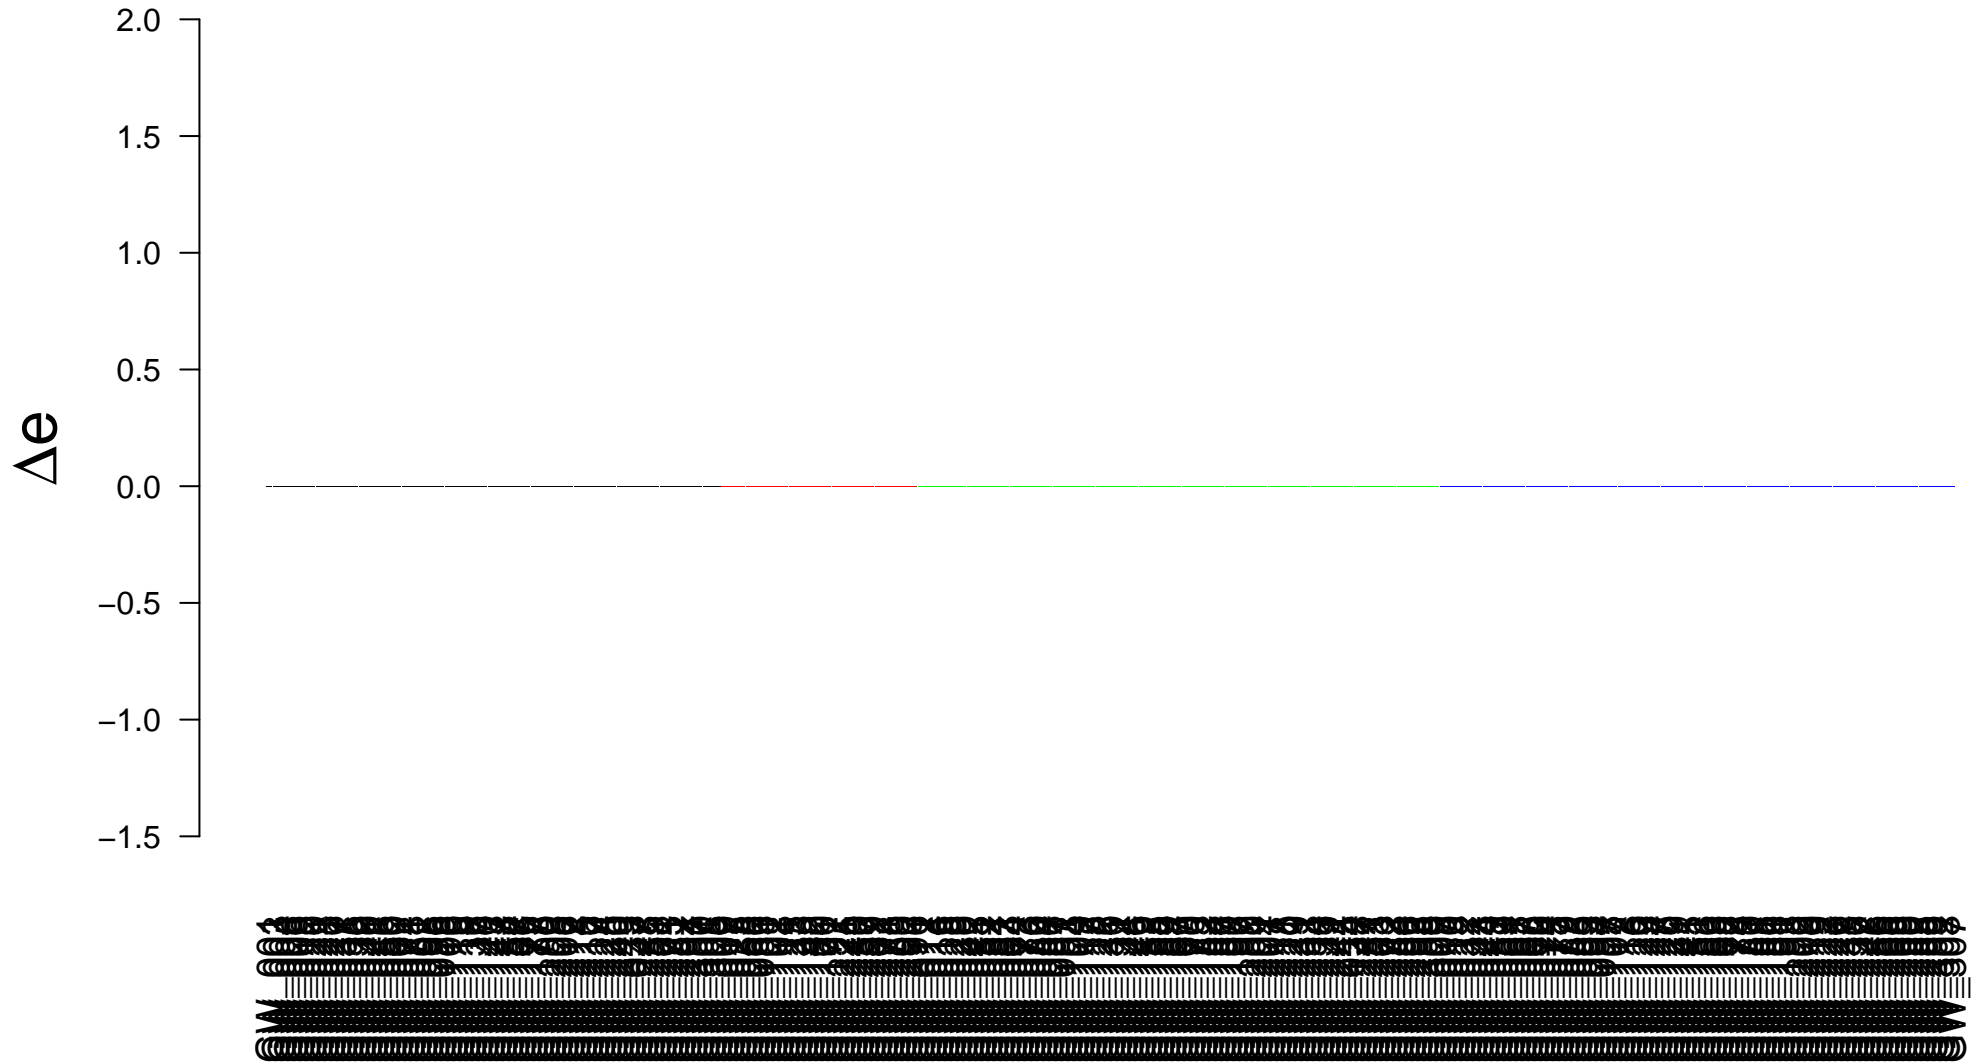

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot E

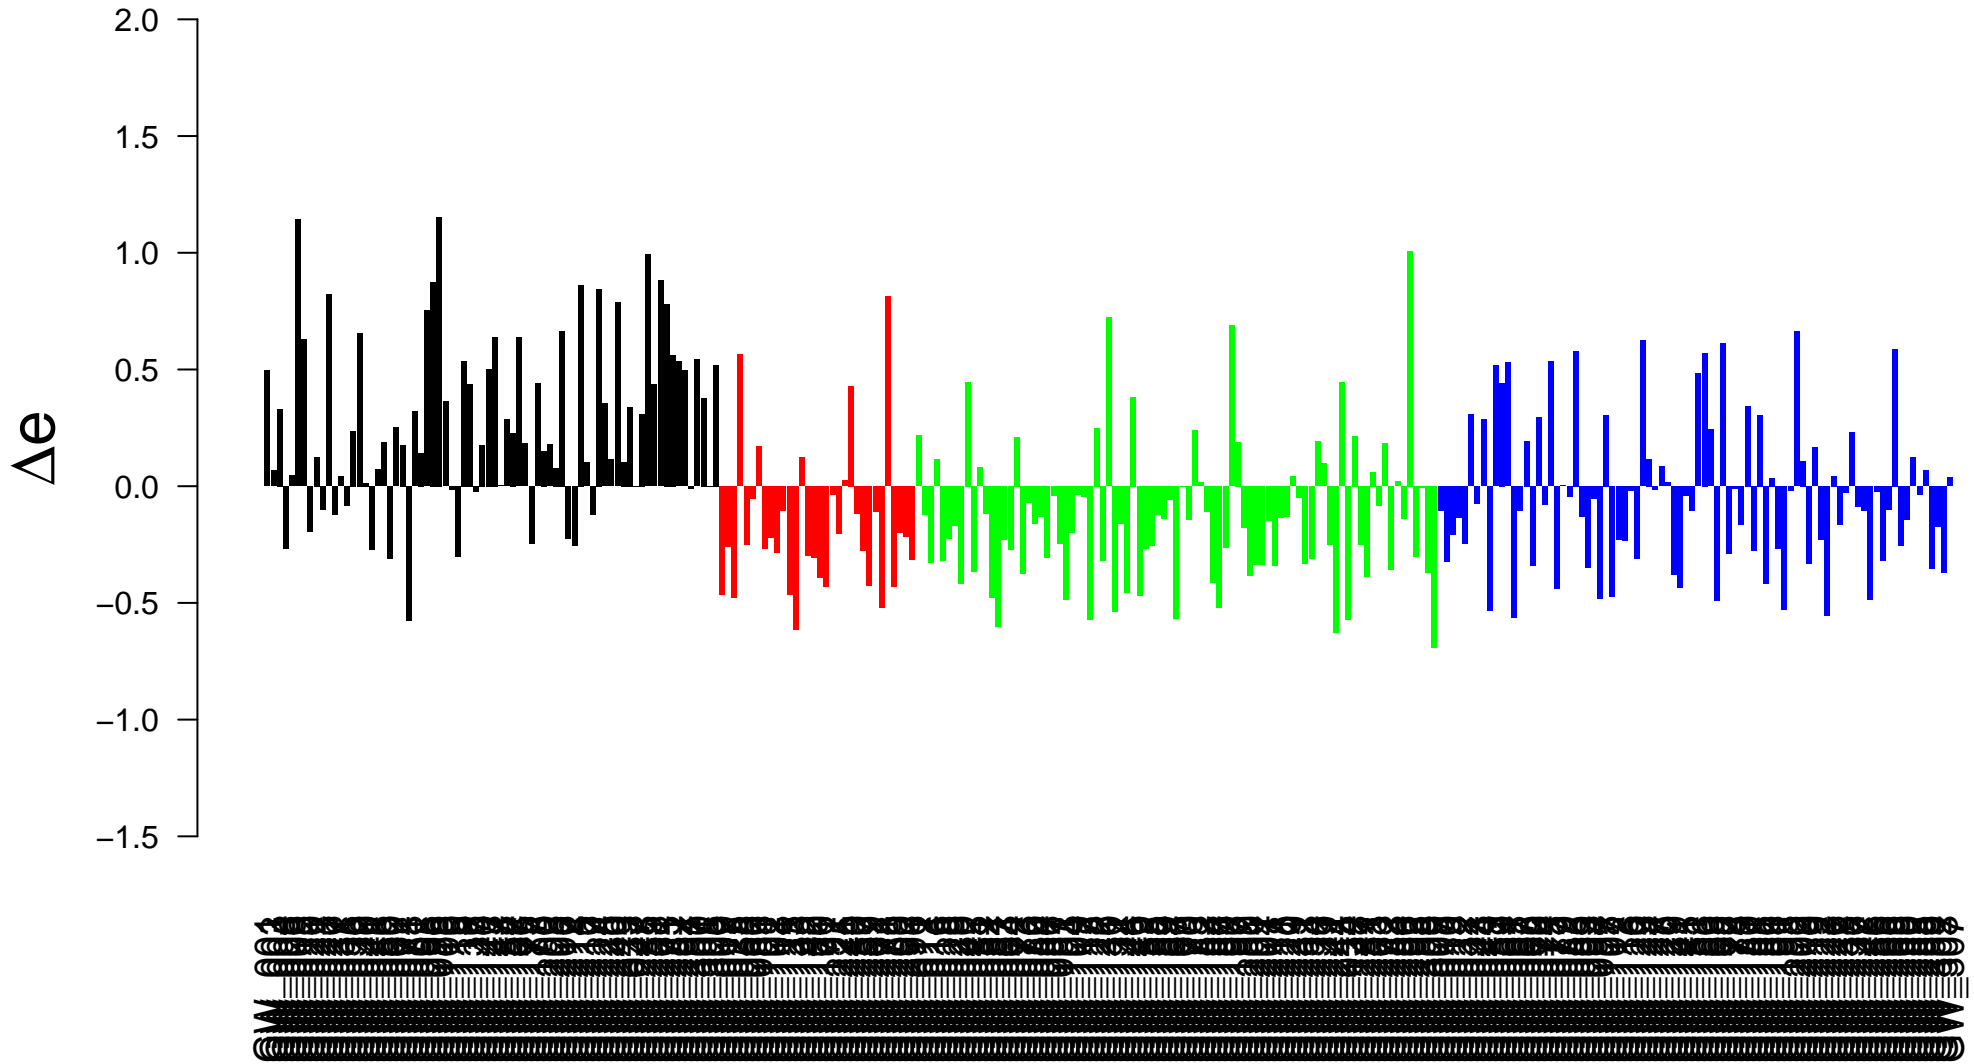

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot F

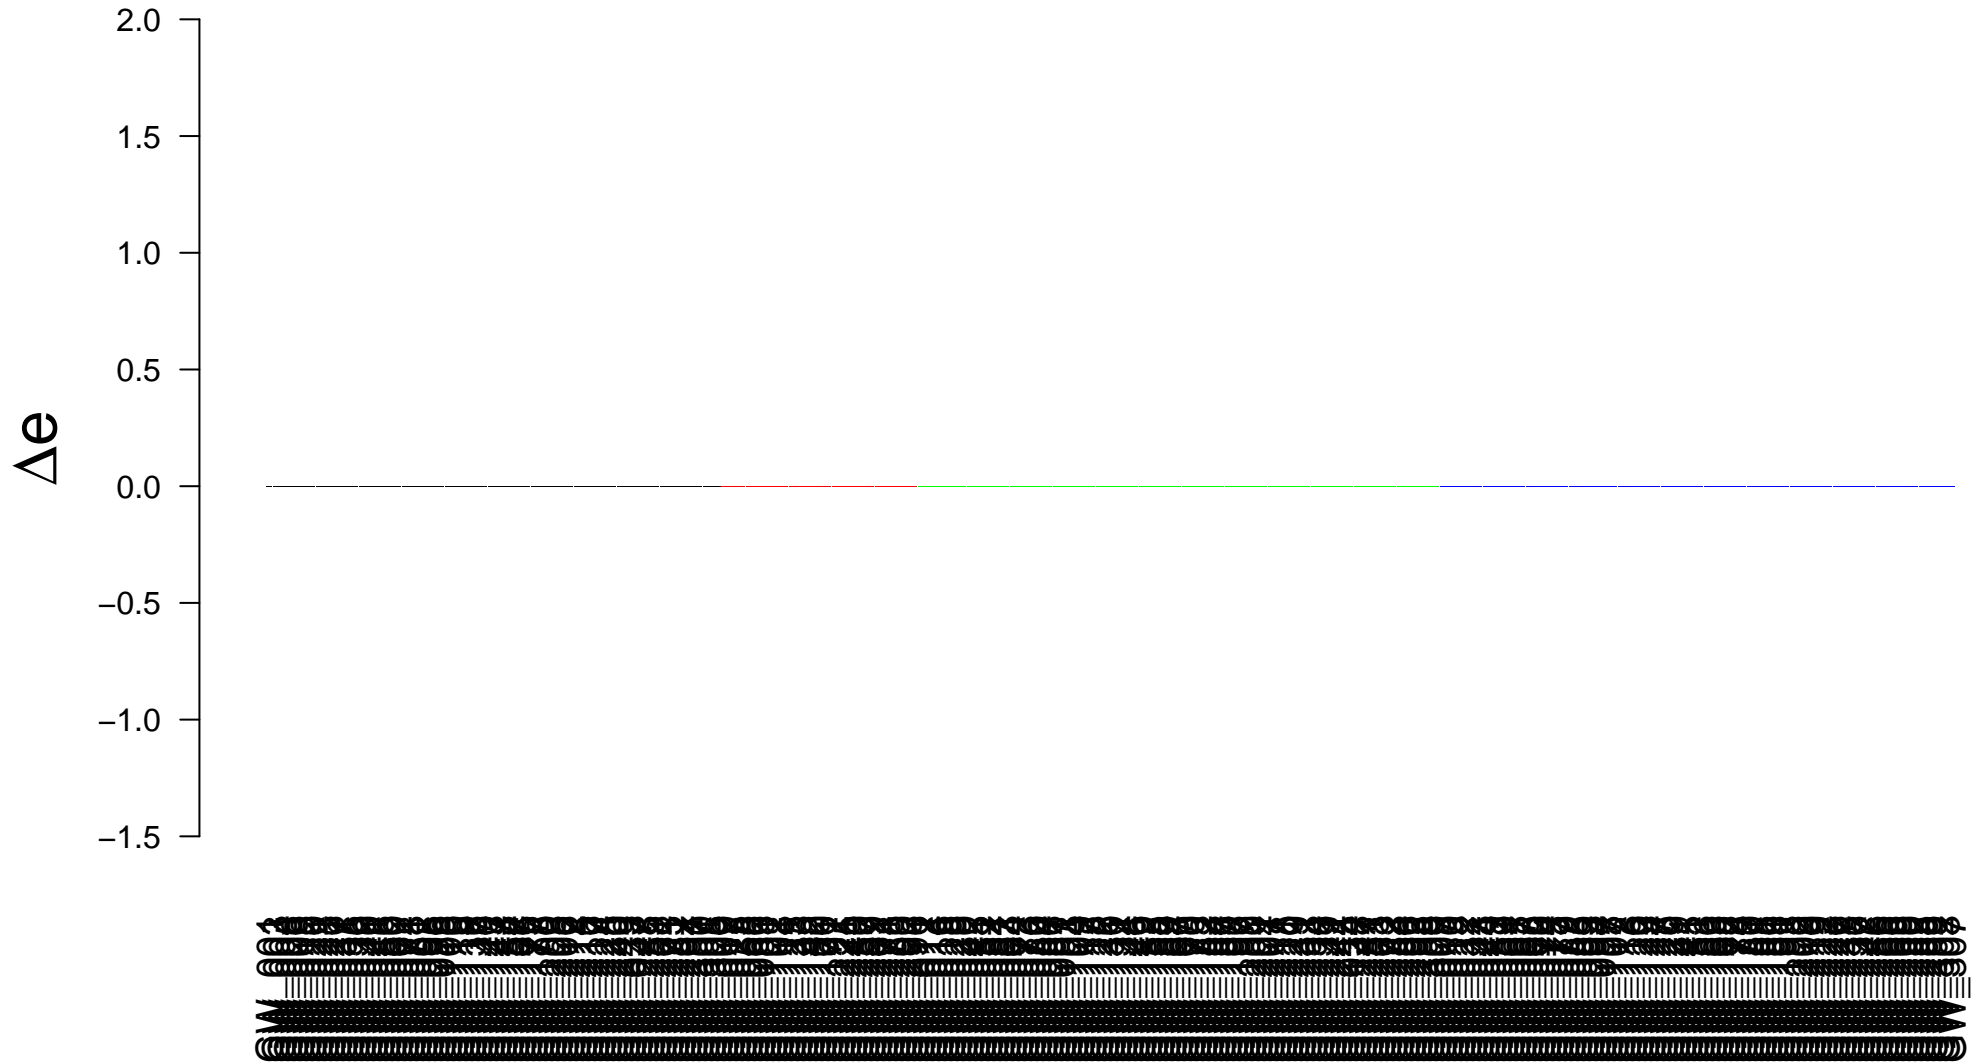

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot G

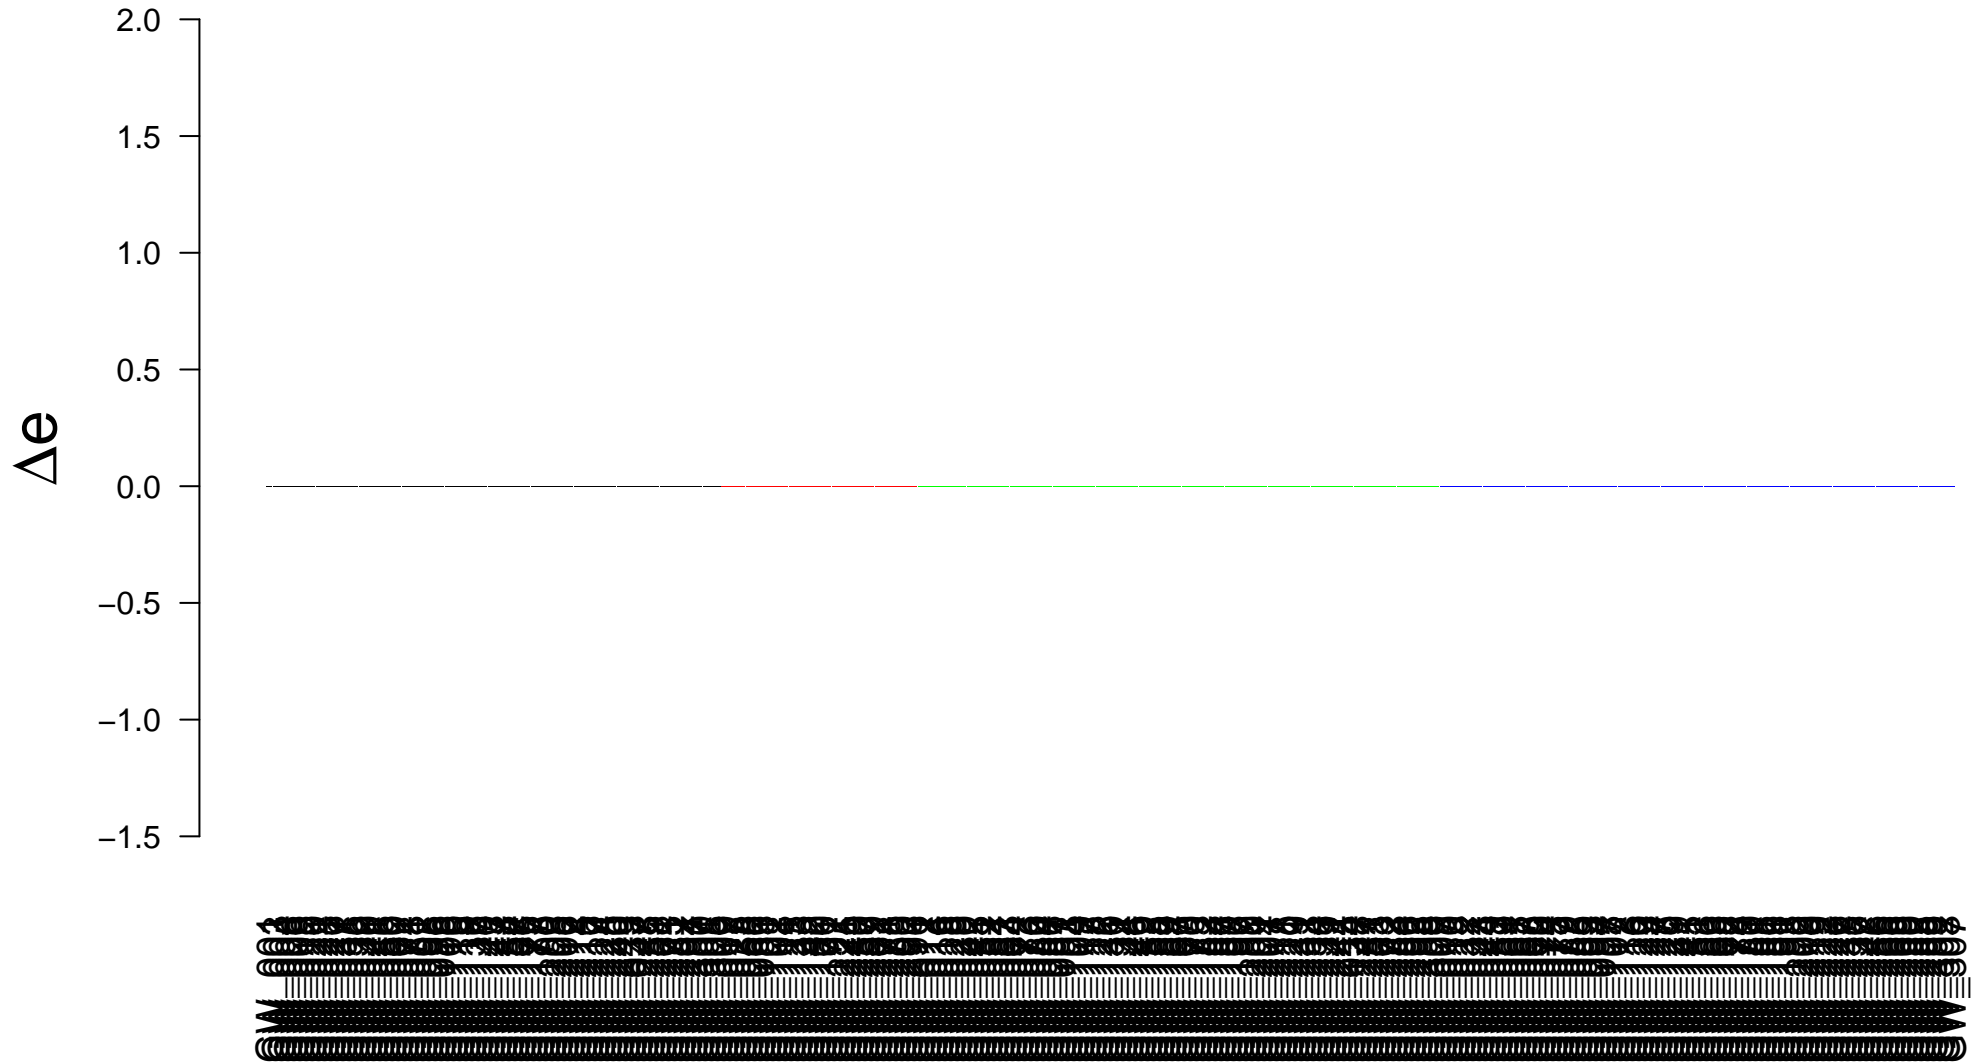

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot H

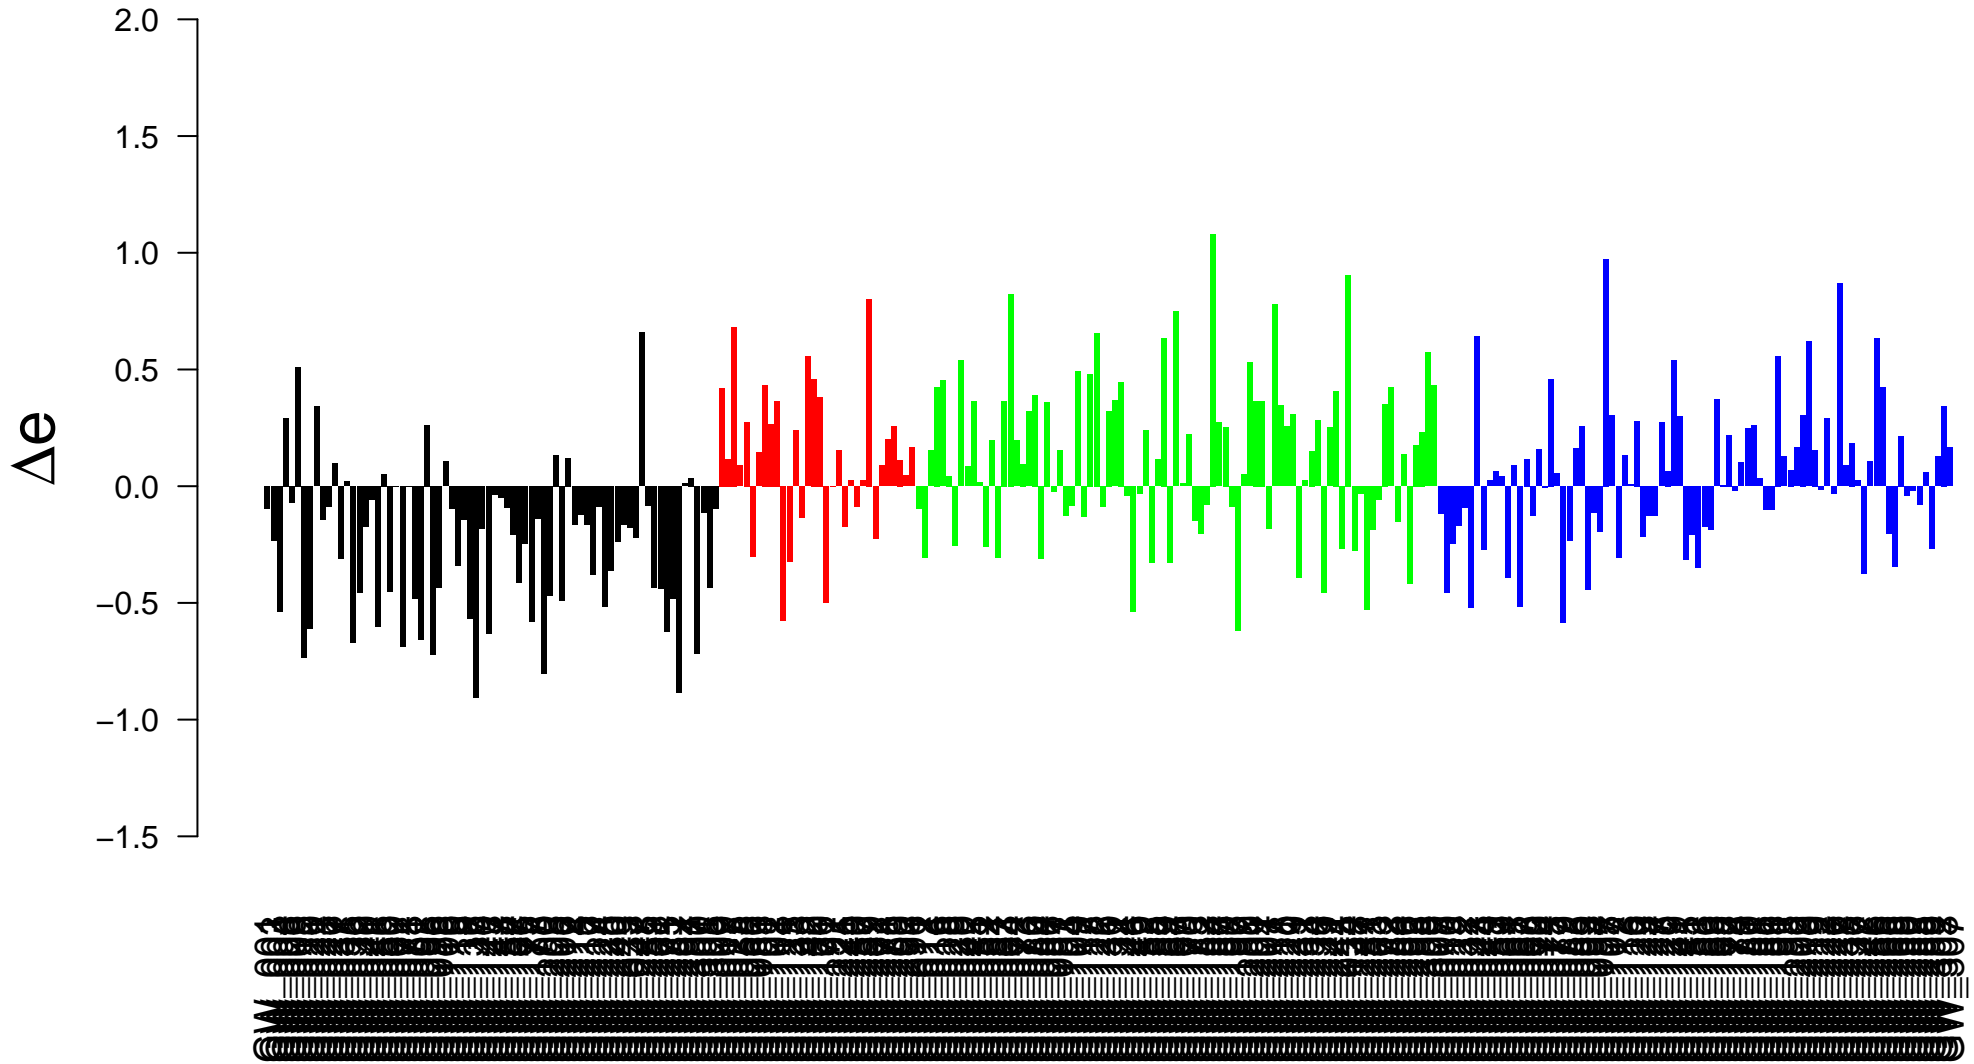

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot I

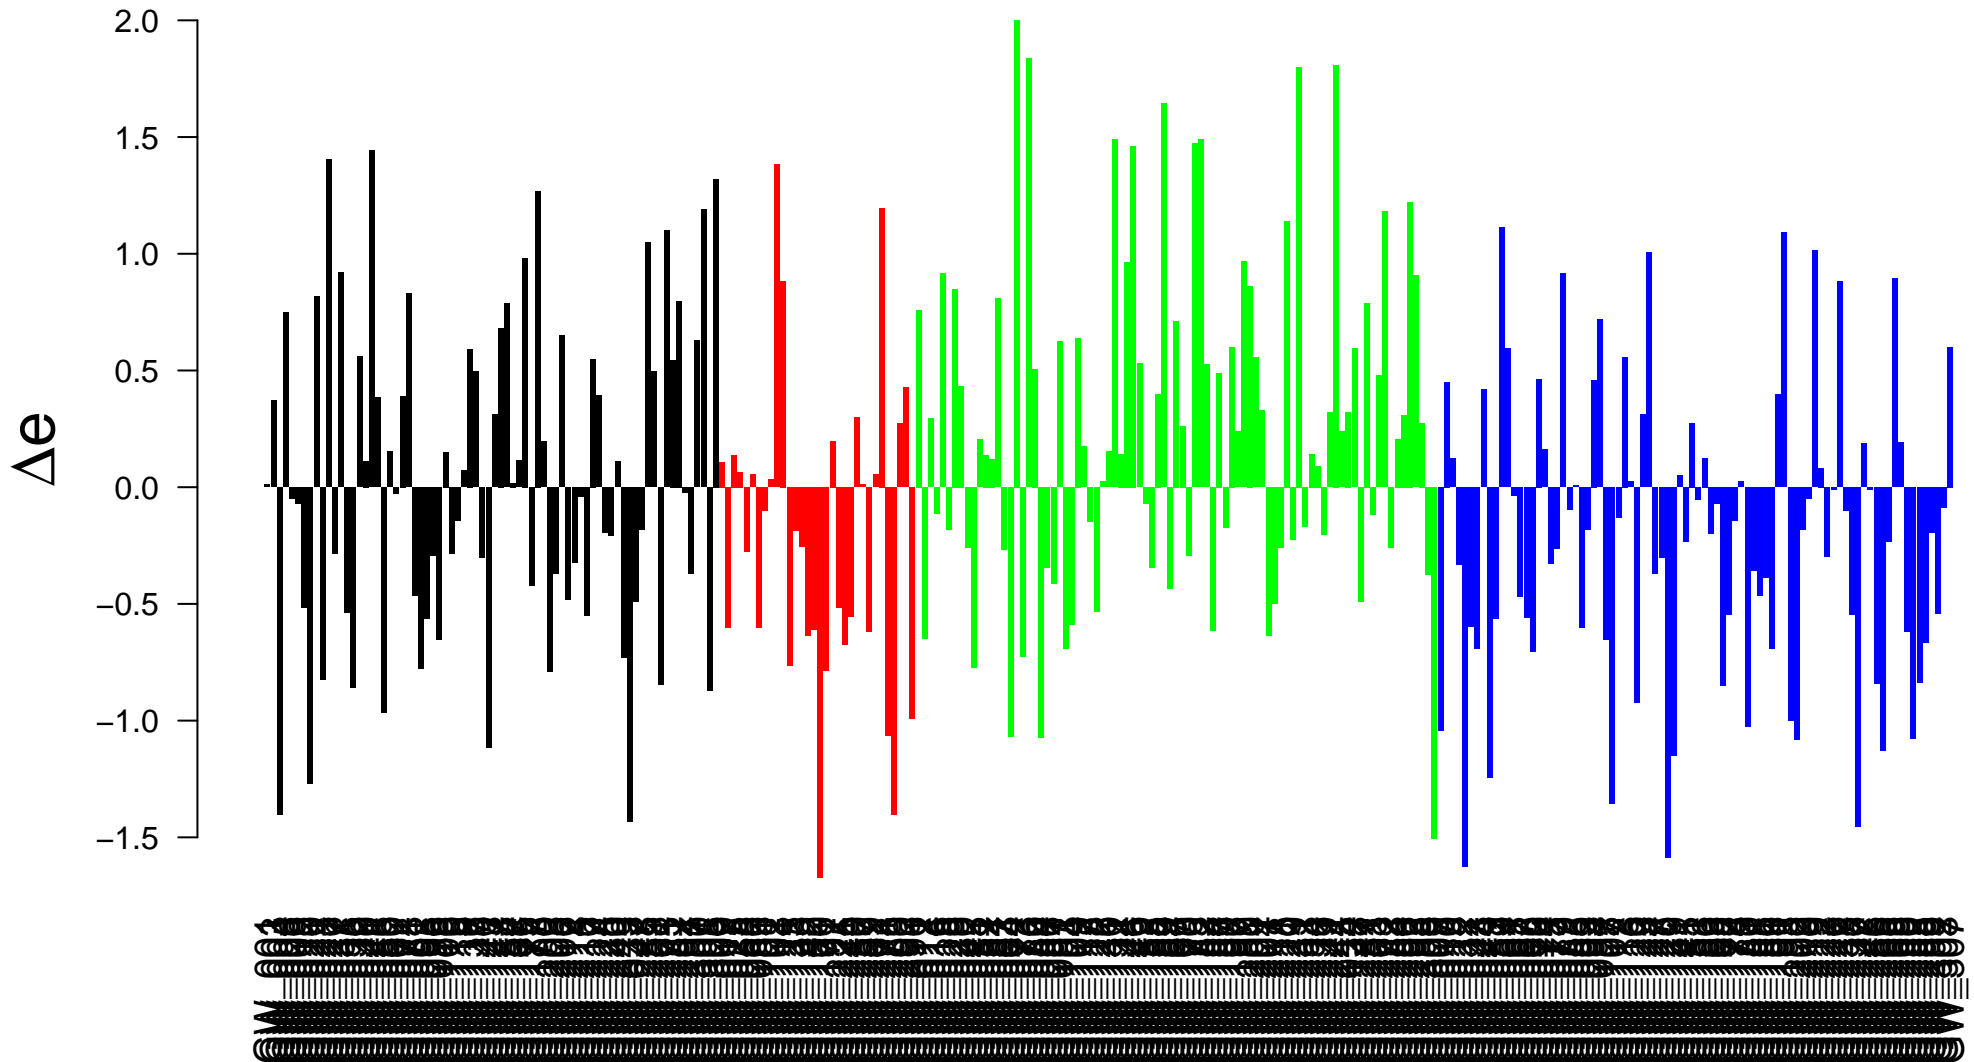

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot J

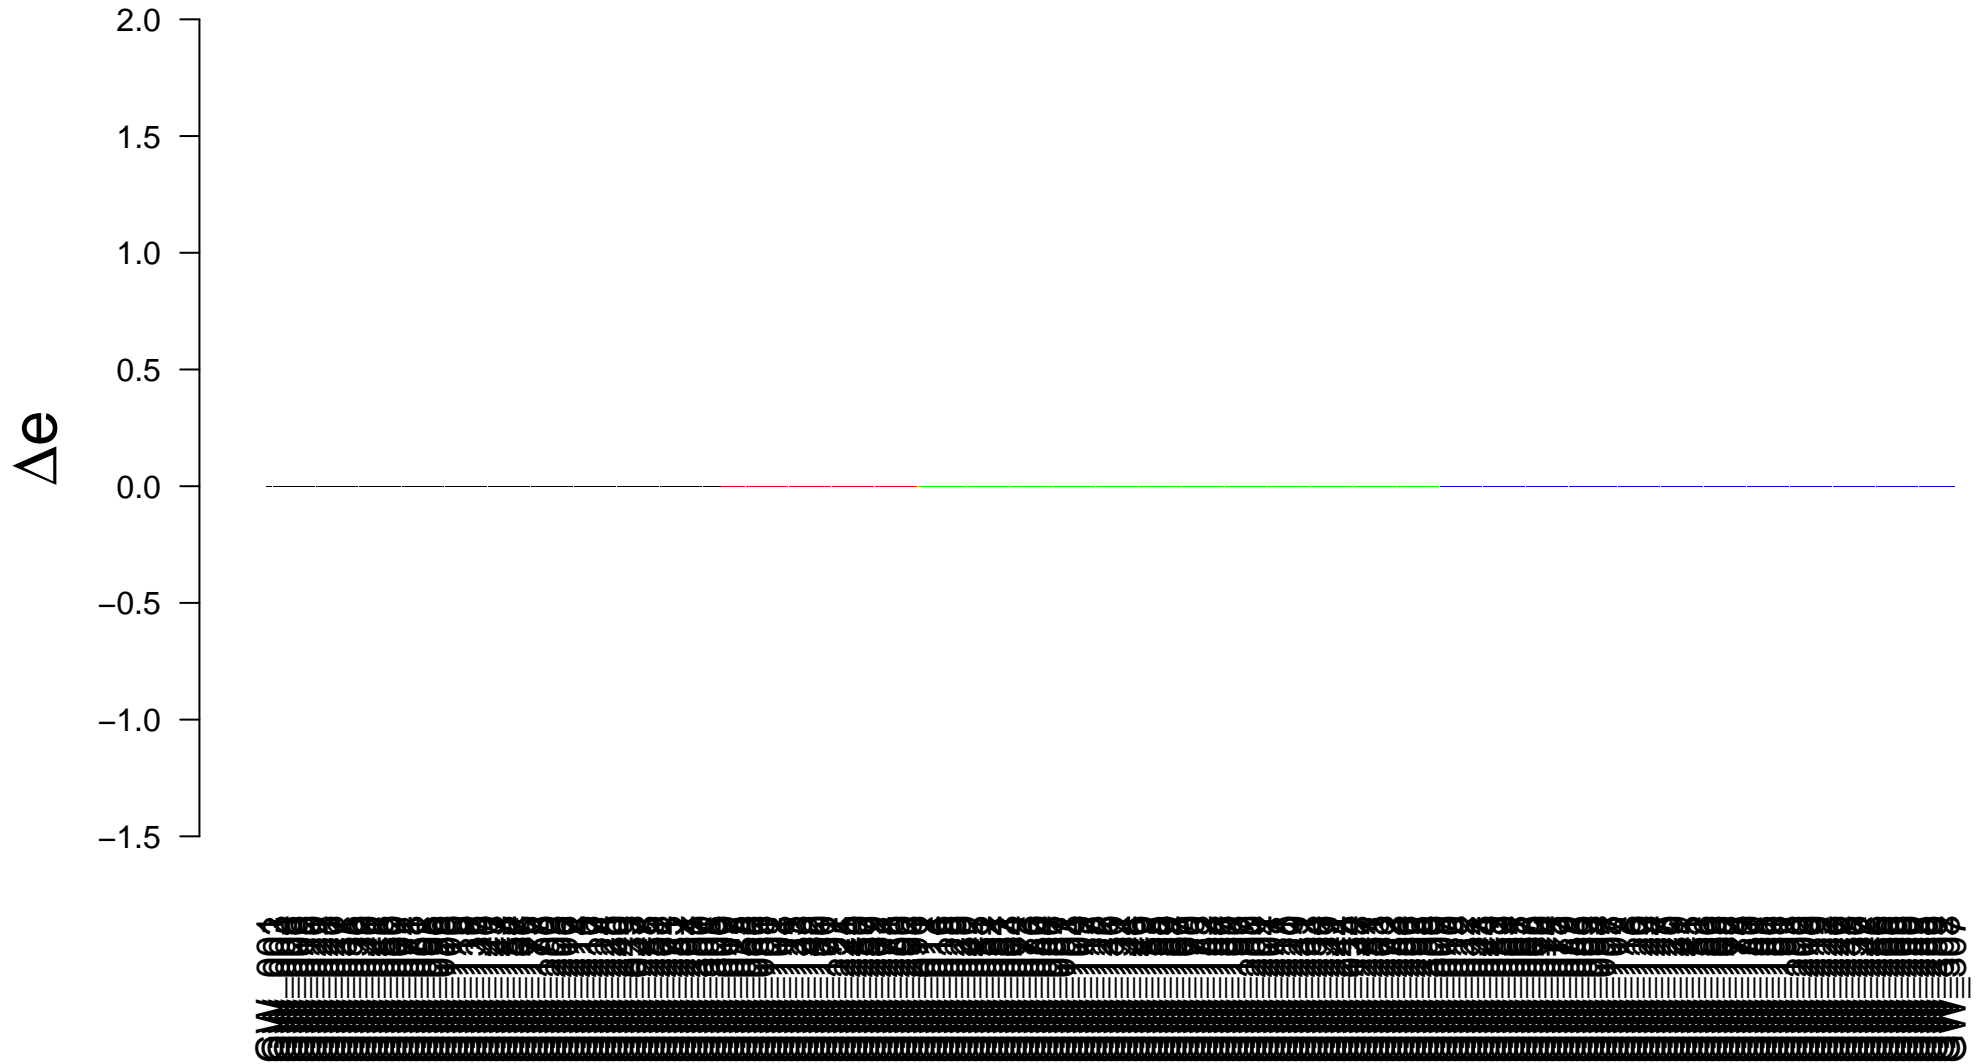

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot K

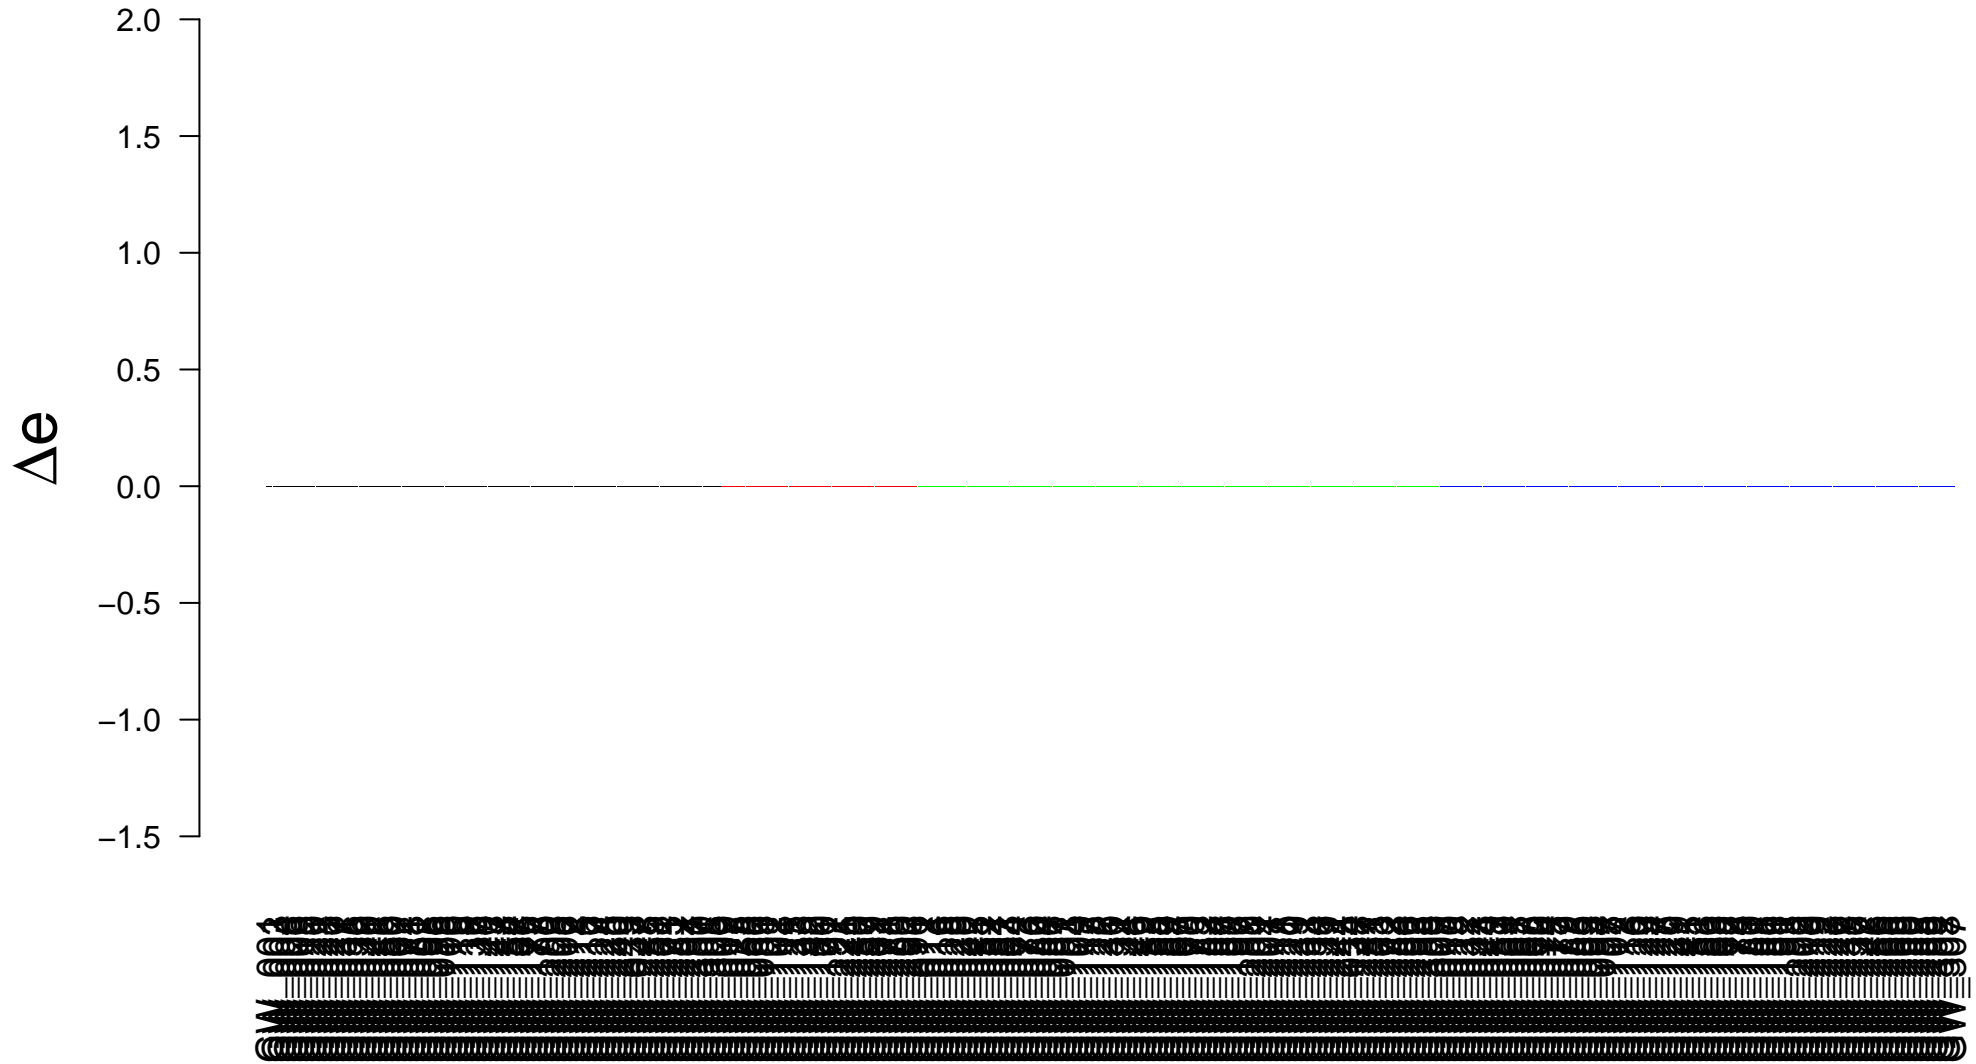

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot L

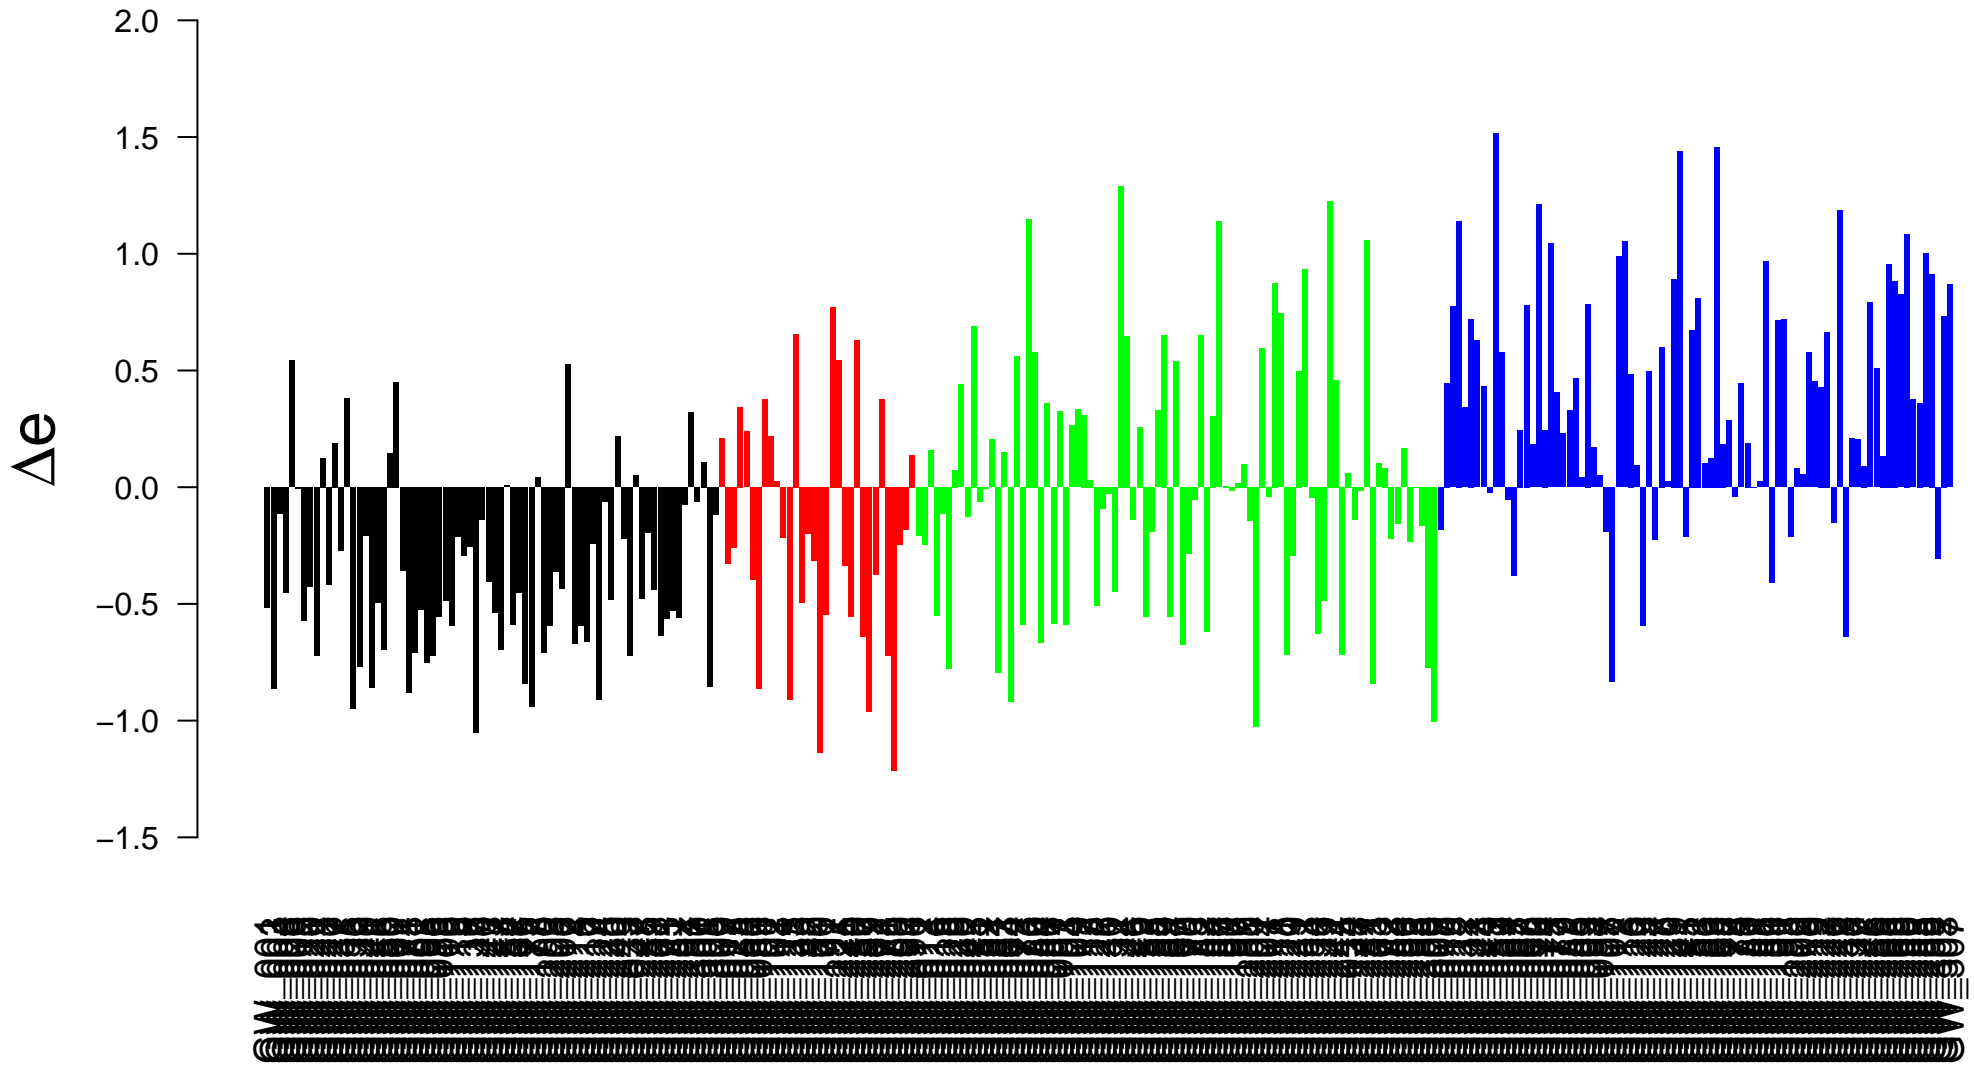

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot M

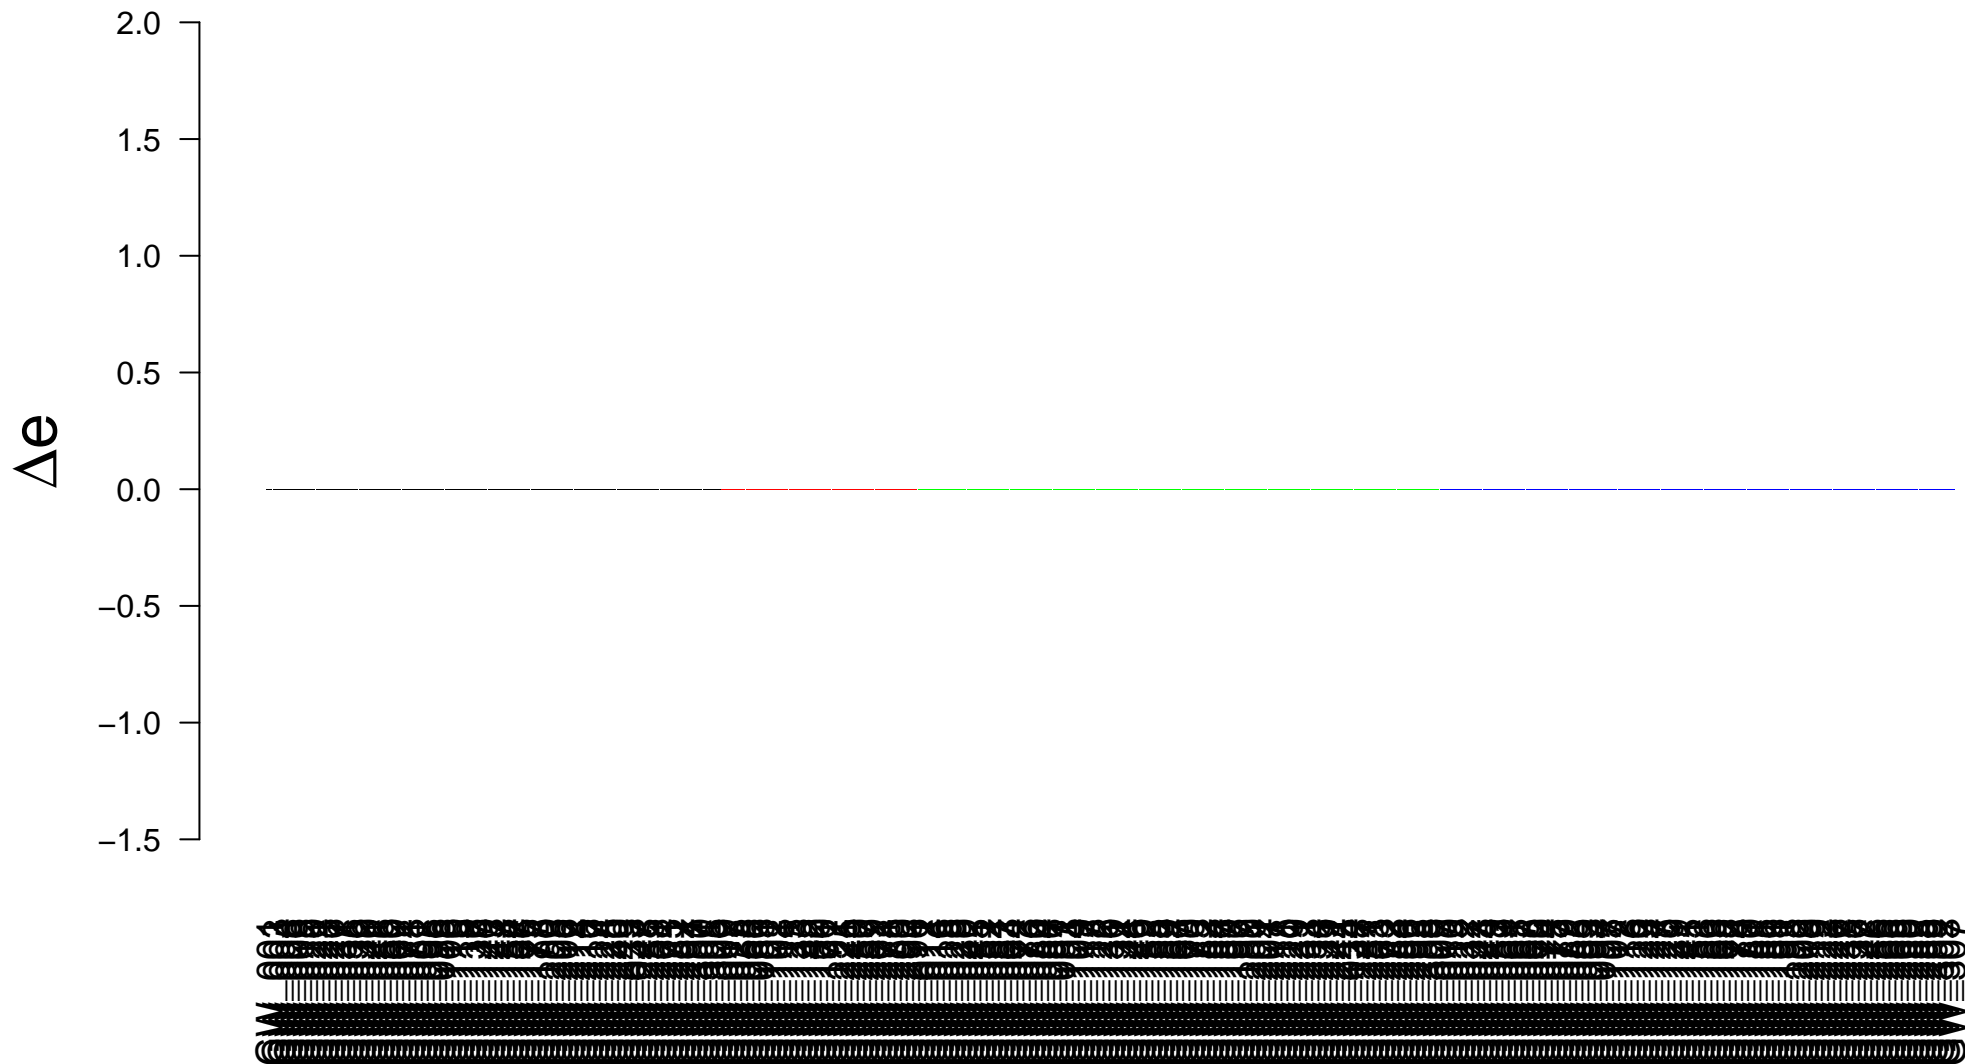

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot N

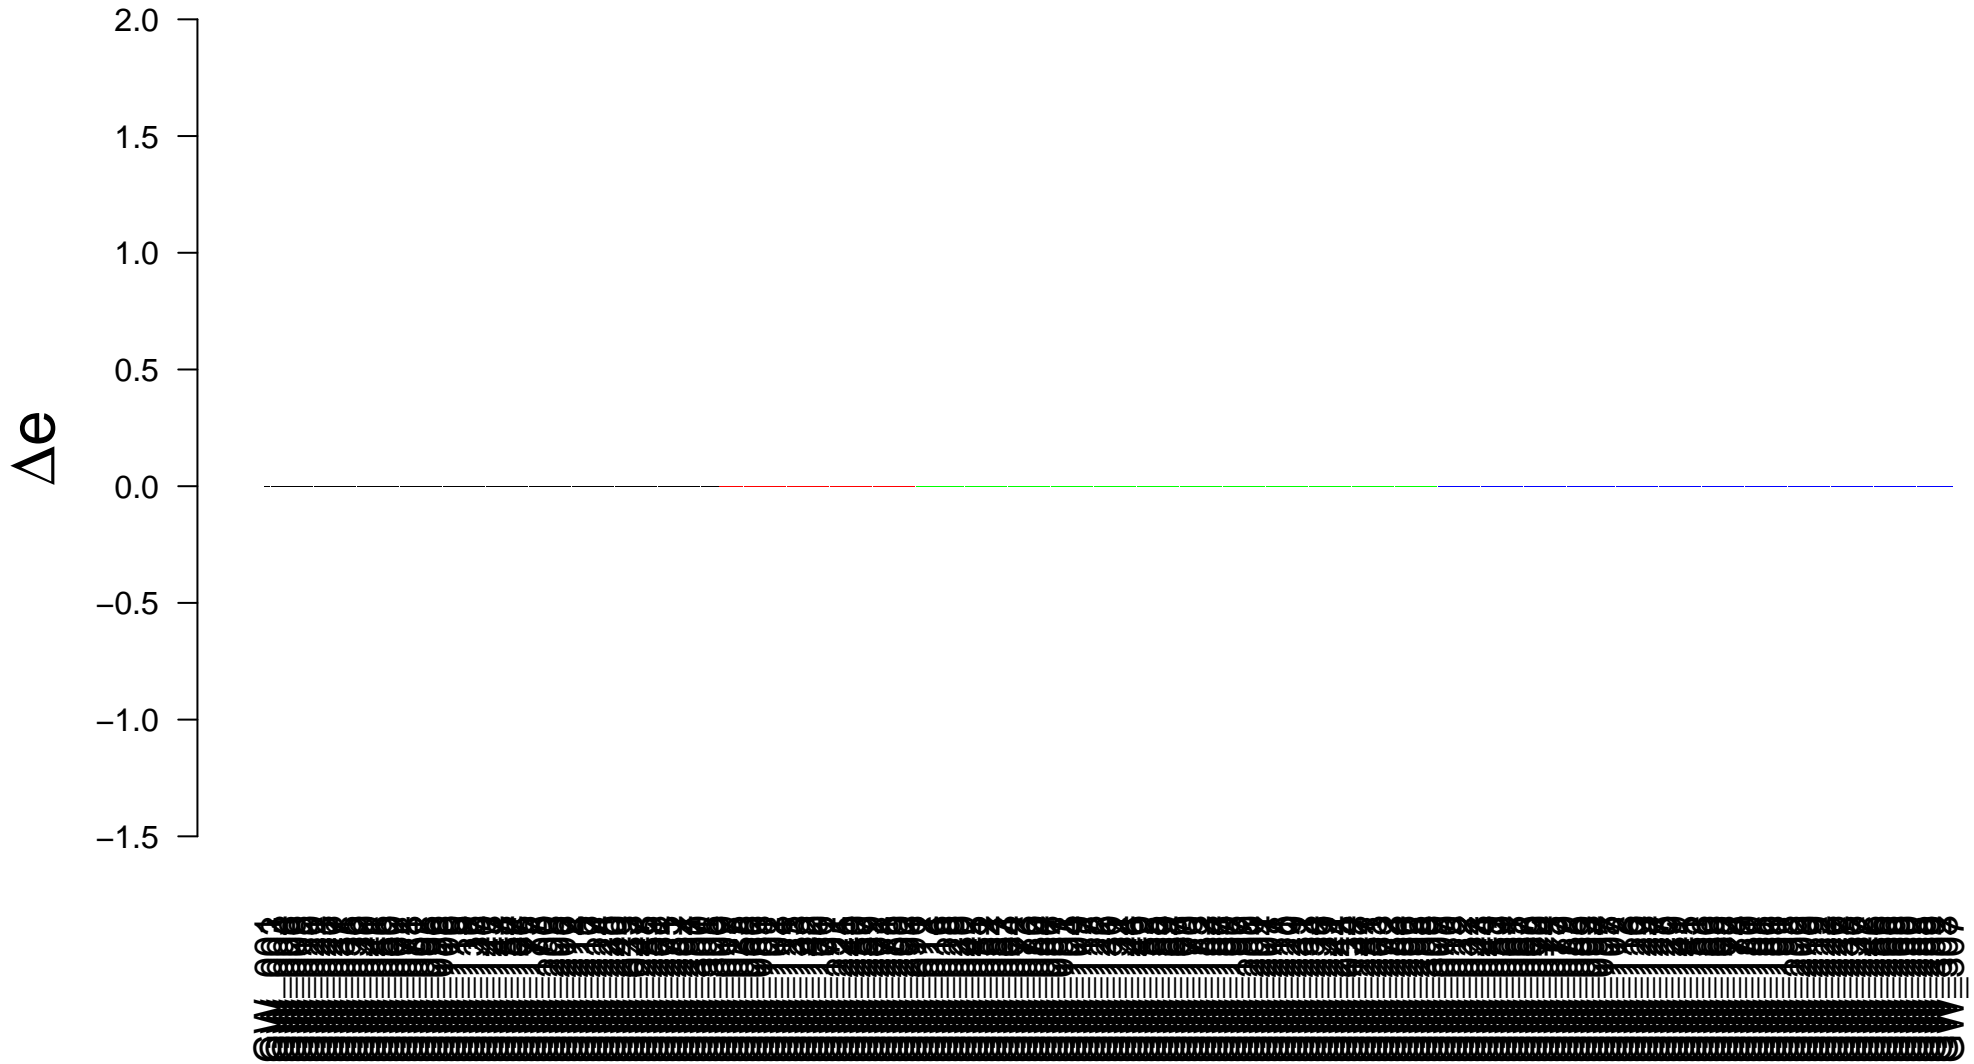

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot O

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot P

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot Q

Expression of nucleotide-binding oligomerization domain containing signaling pathway in Spot R
