

regulation of double-strand break repair via homologous recombination

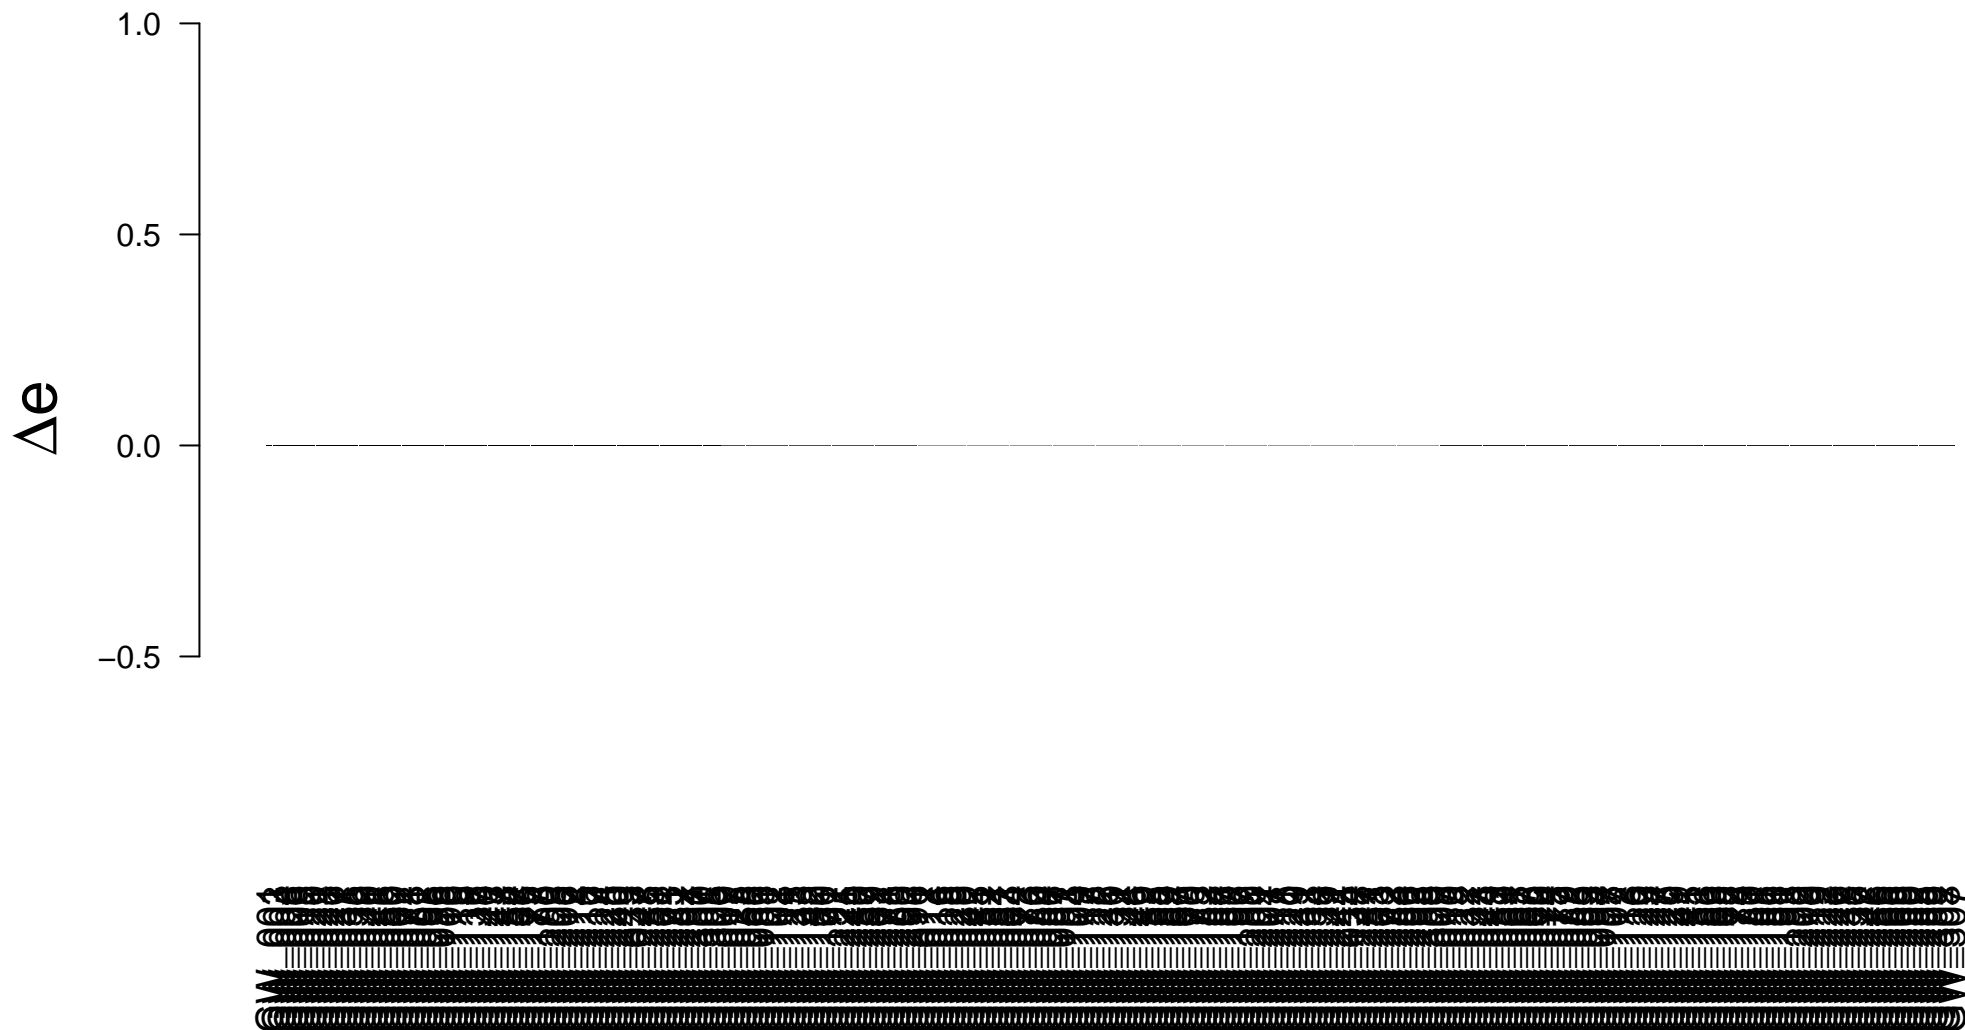

regulation of double-strand break repair via homologous recombination

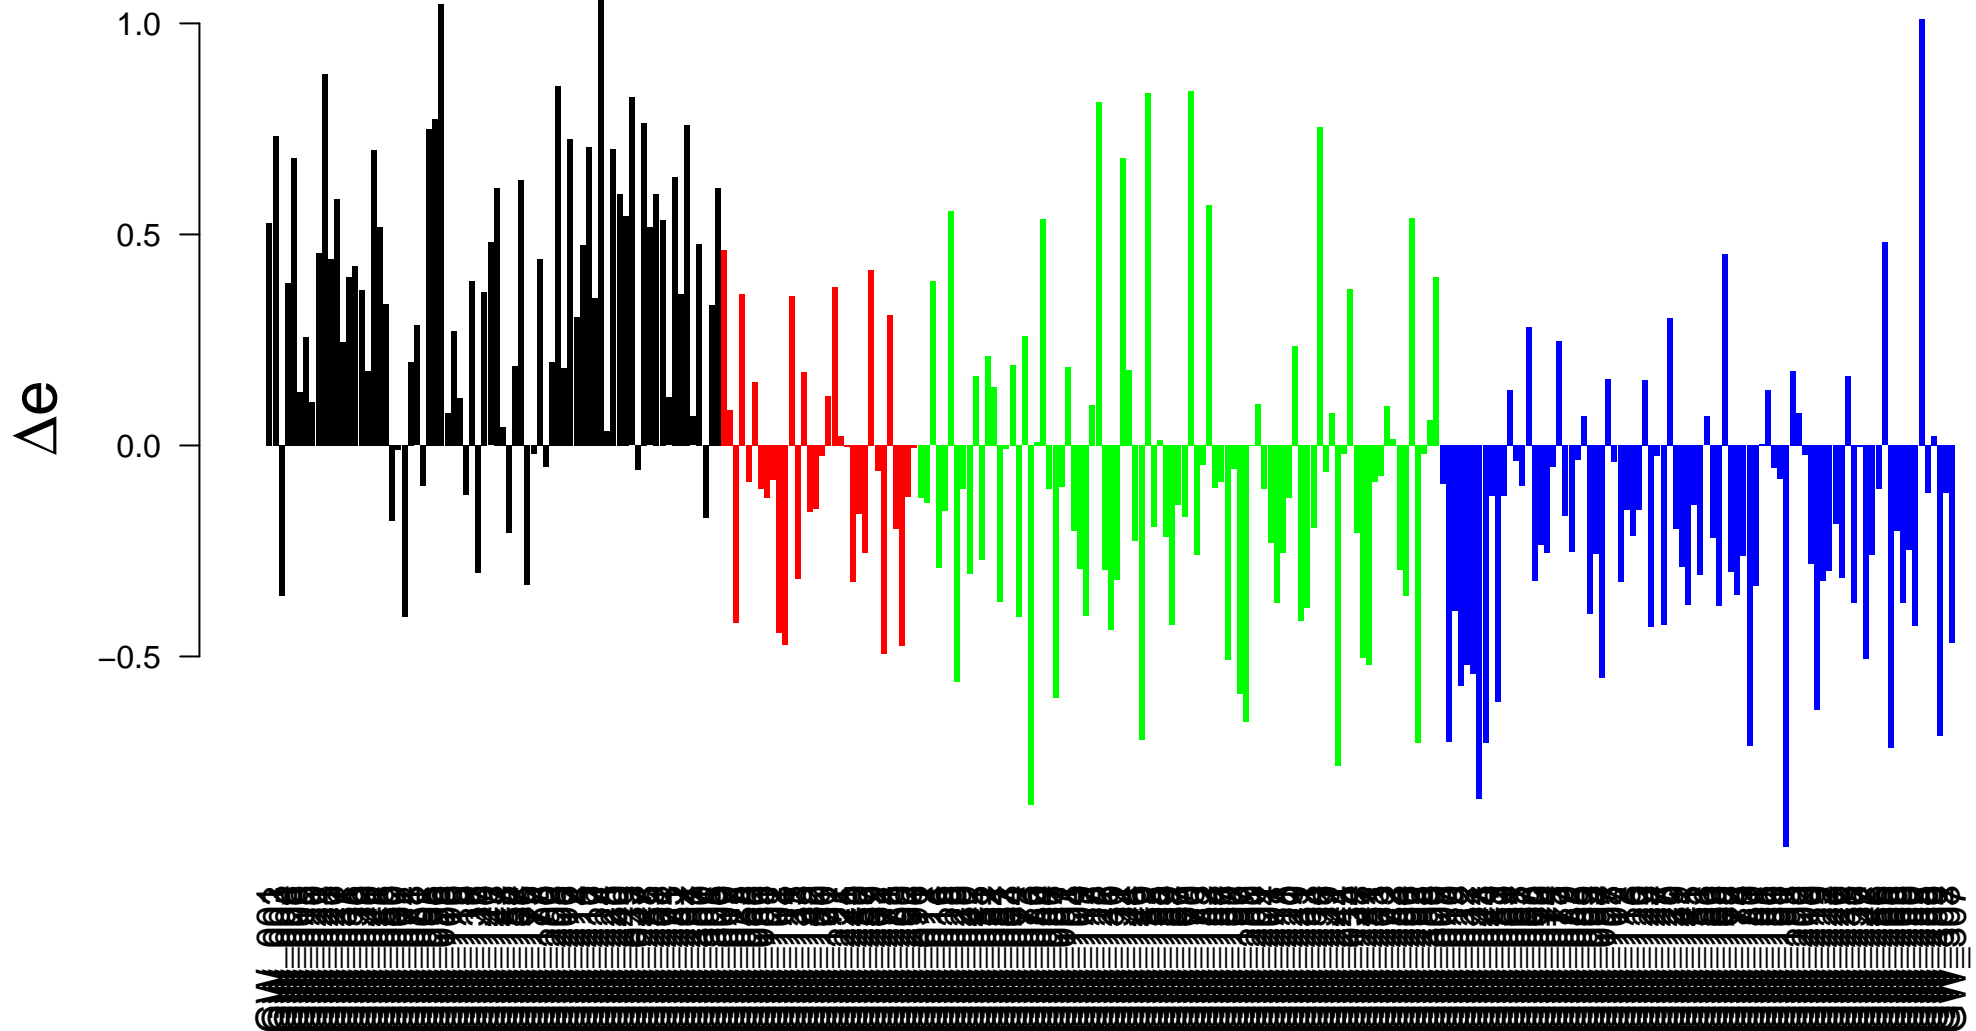

Enrichment in spots: regulation of double-strand break repair via homologous recombination

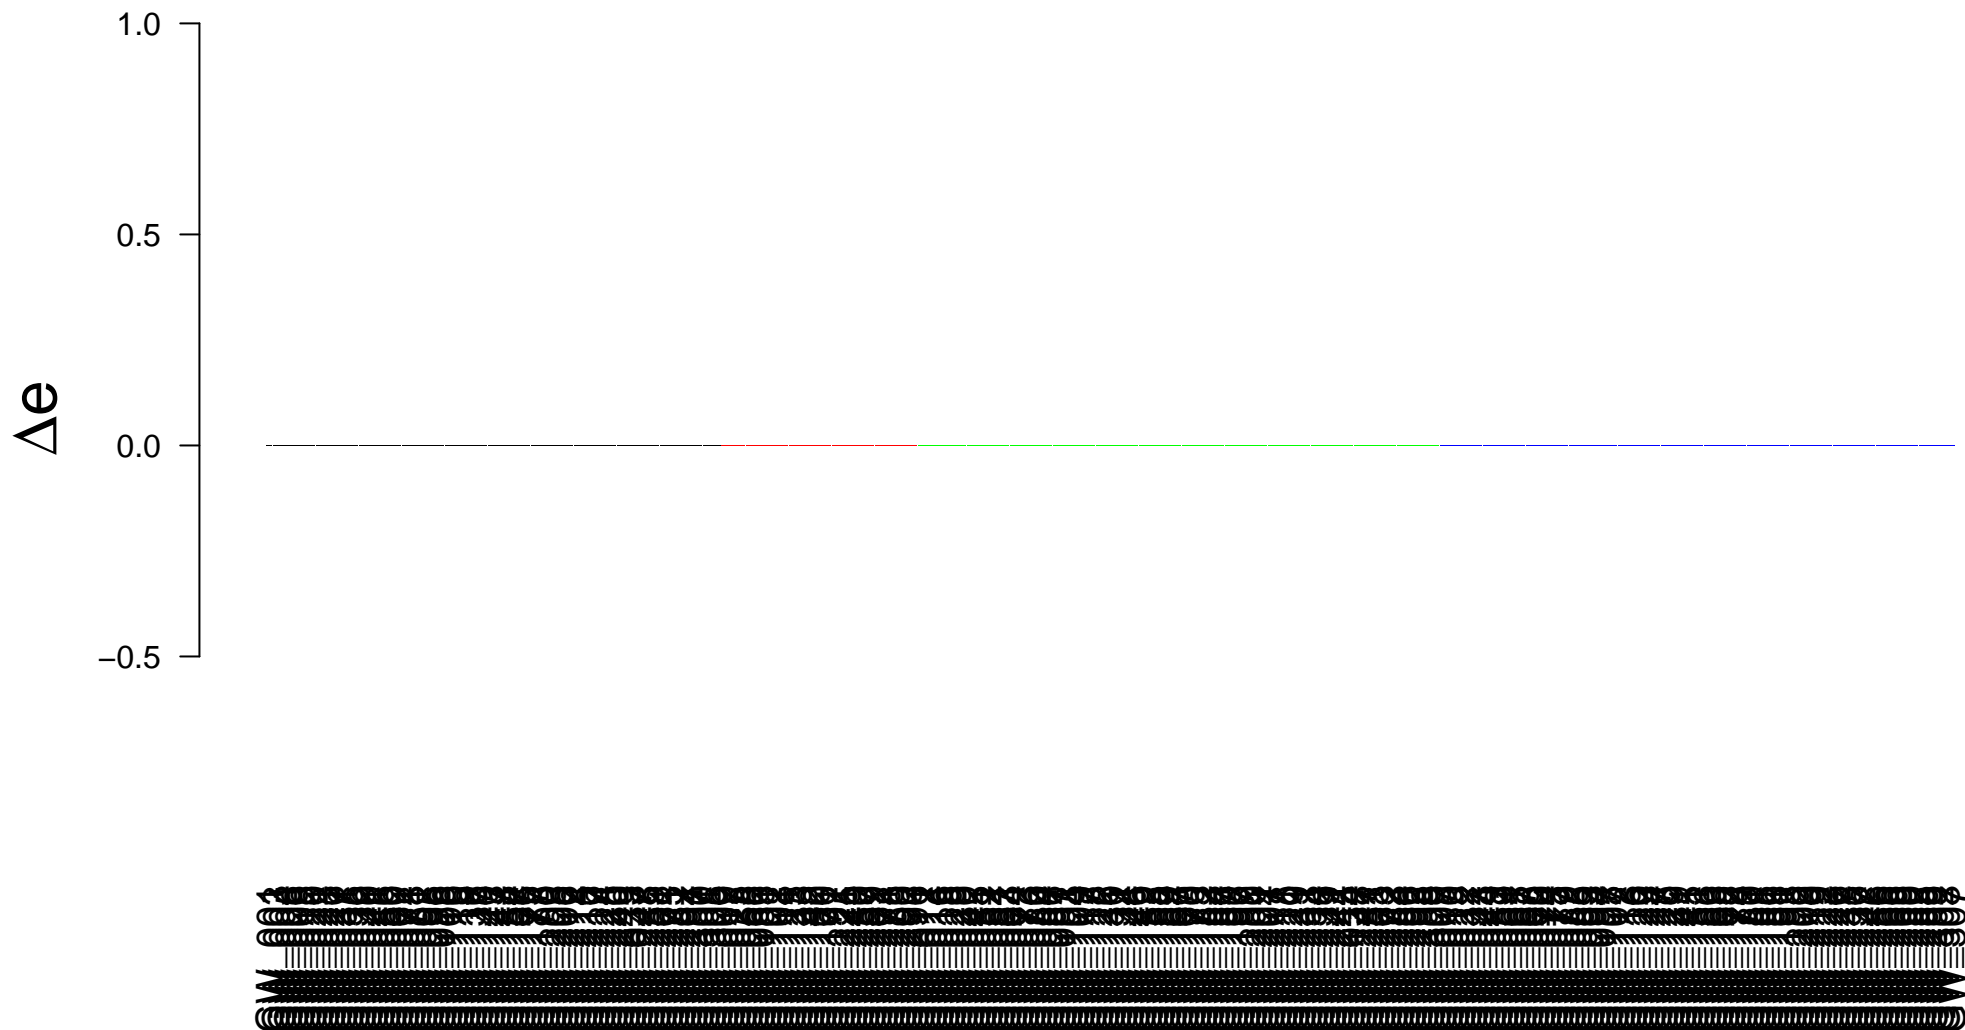

Expression of regulation of double-strand break repair via homologous recombination in Spot A

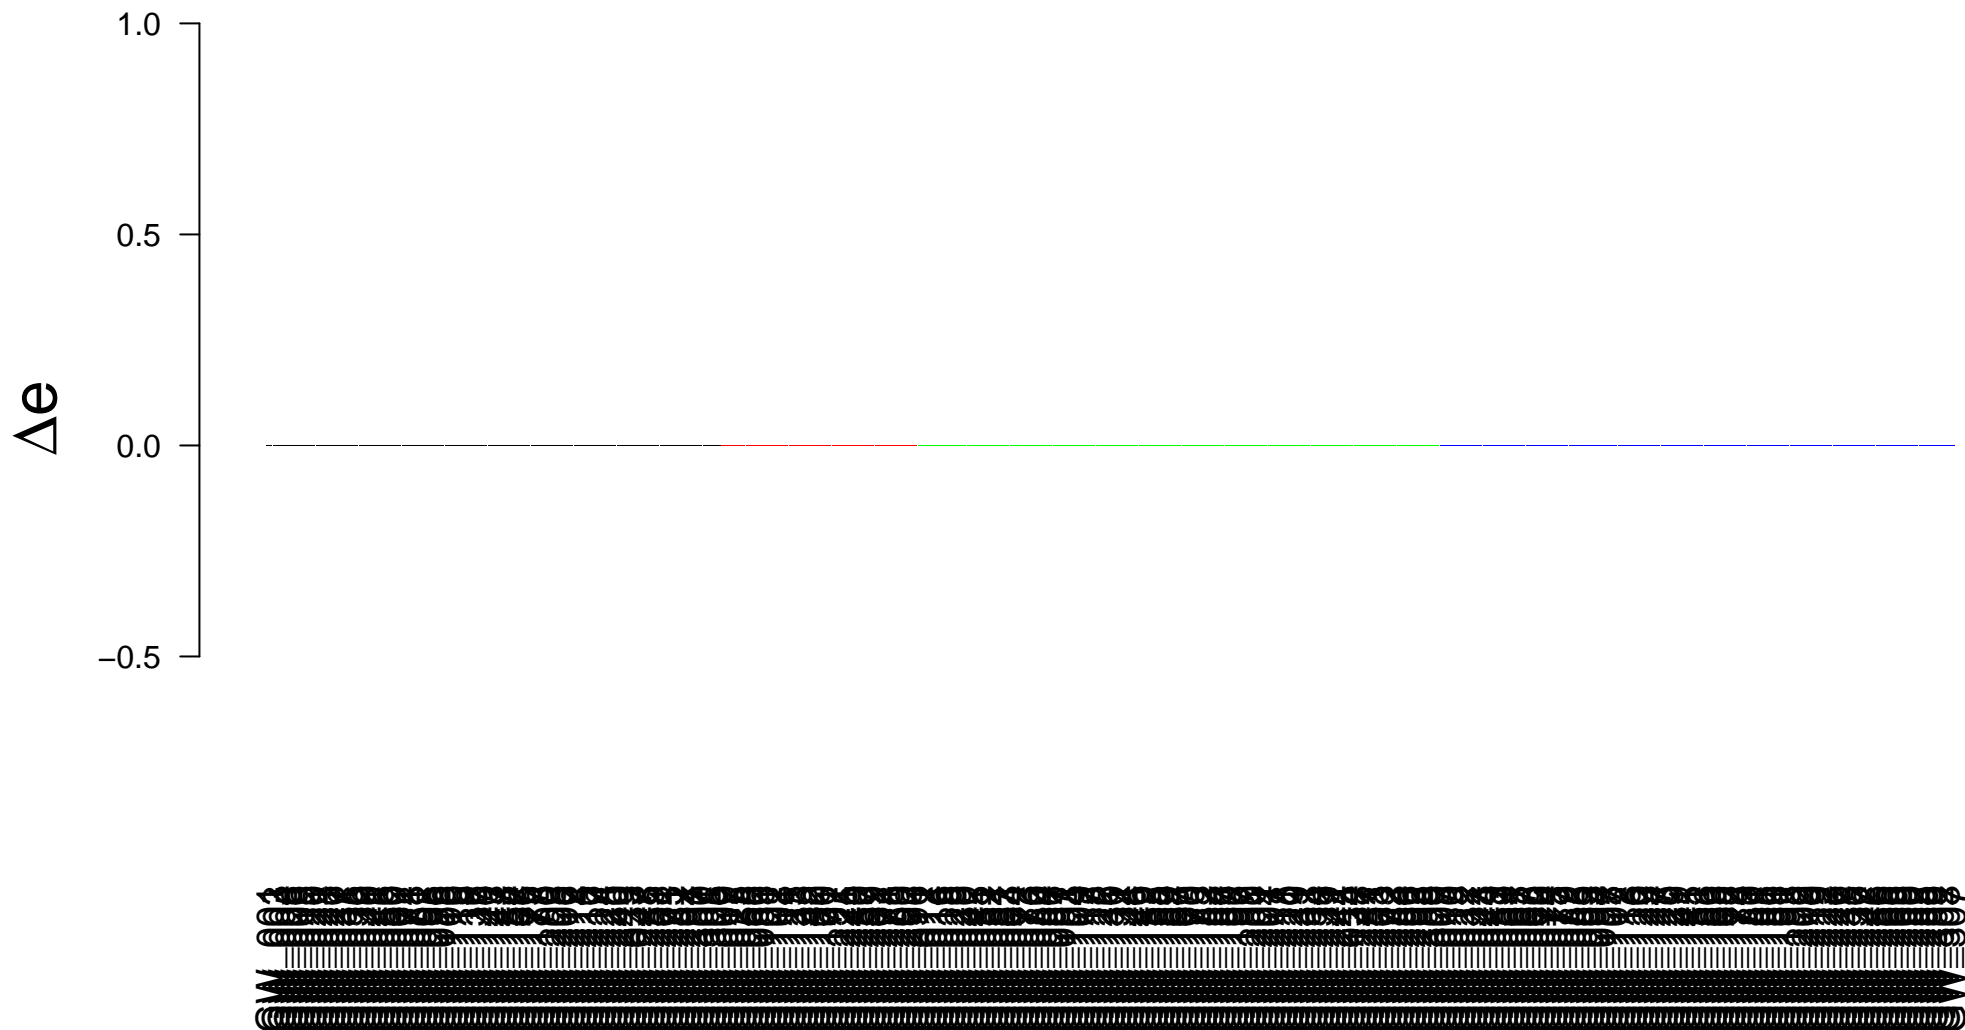

Expression of regulation of double-strand break repair via homologous recombination in Spot B

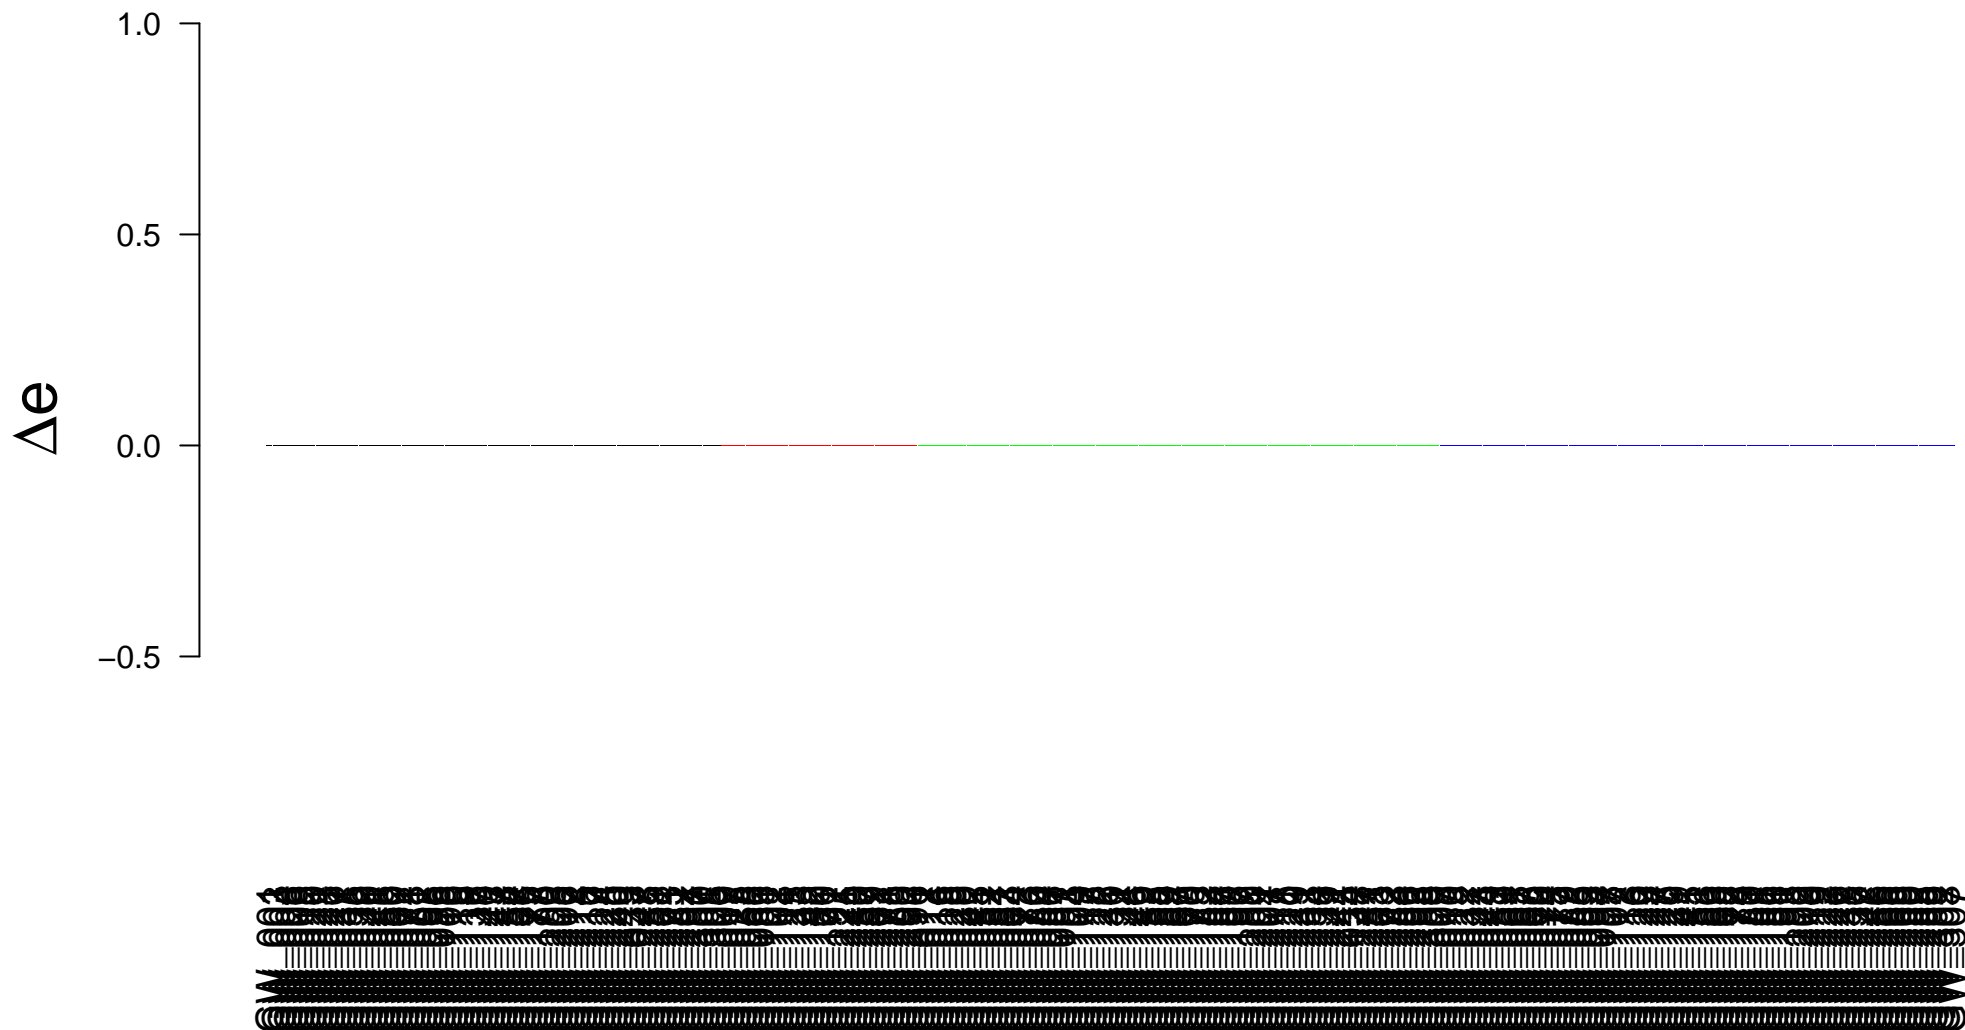

Expression of regulation of double-strand break repair via homologous recombination in Spot C

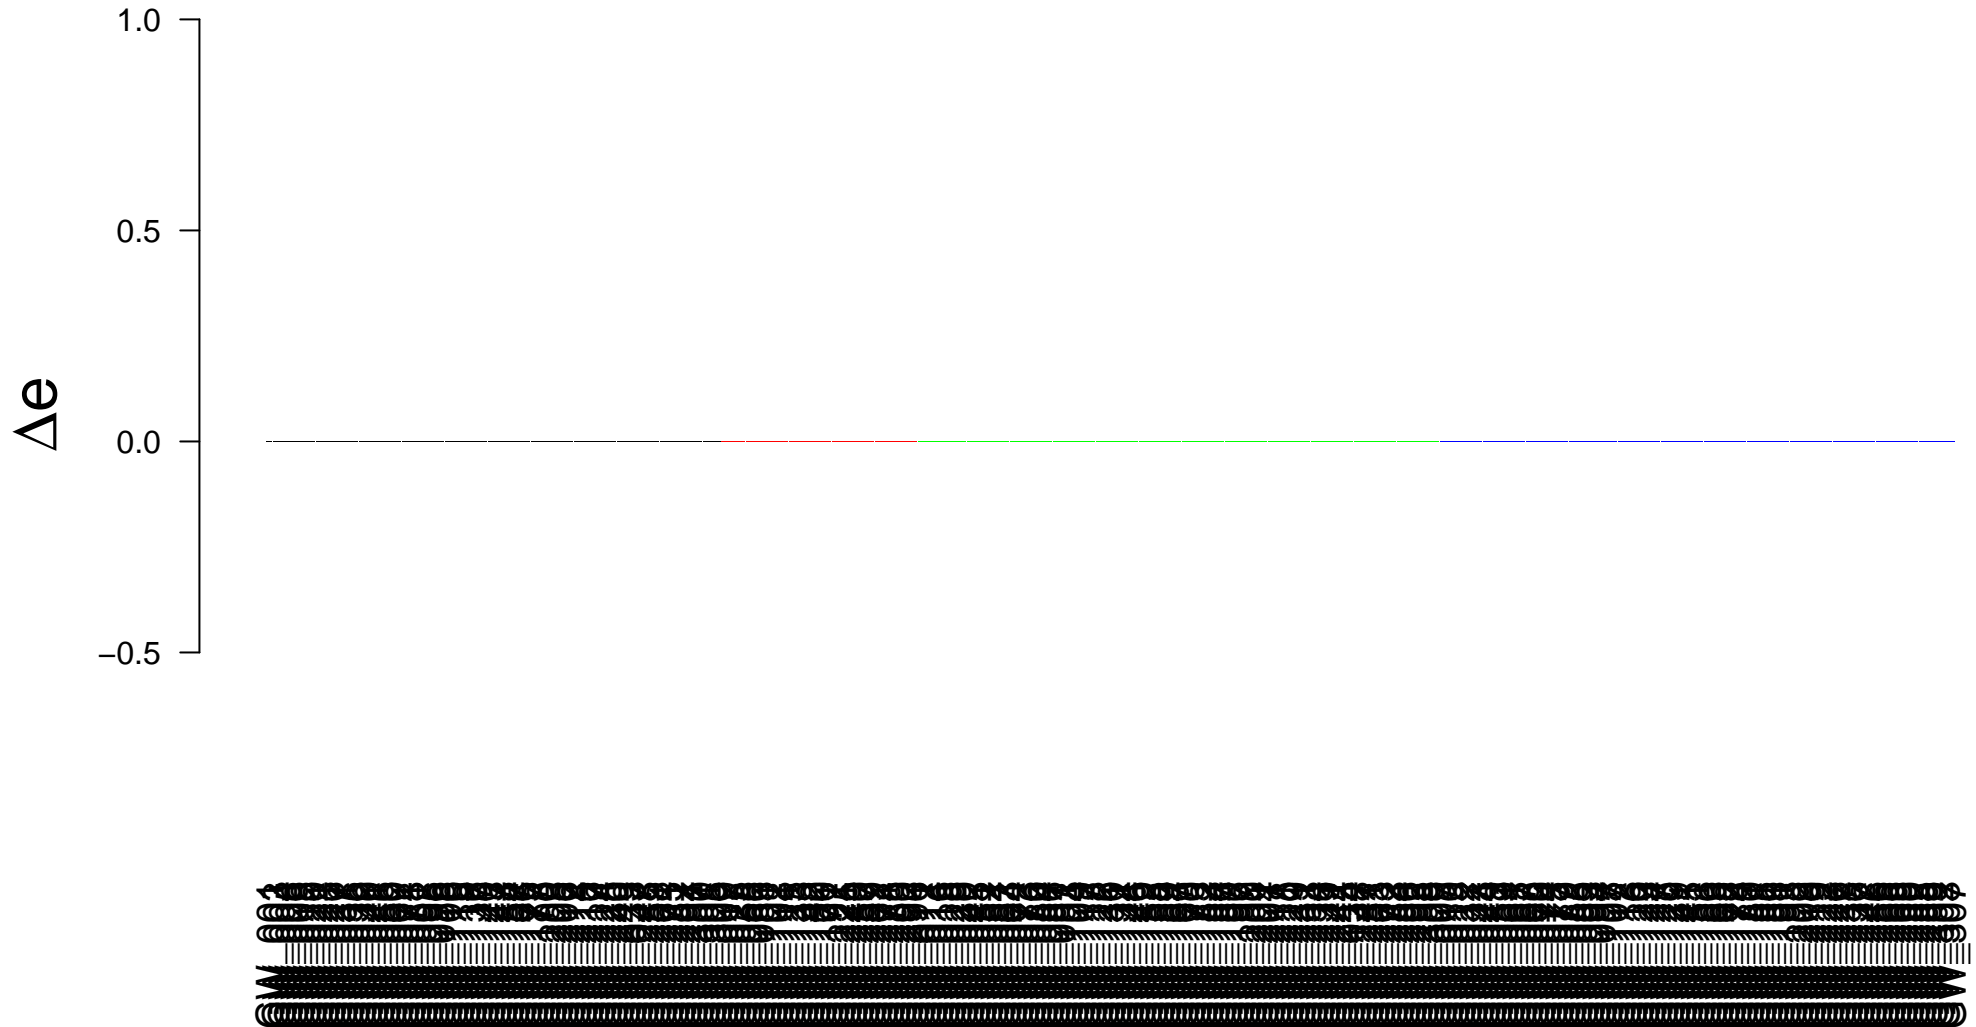

Expression of regulation of double-strand break repair via homologous recombination in Spot D

Expression of regulation of double-strand break repair via homologous recombination in Spot E

Expression of regulation of double-strand break repair via homologous recombination in Spot F

Expression of regulation of double-strand break repair via homologous recombination in Spot G

Expression of regulation of double-strand break repair via homologous recombination in Spot H

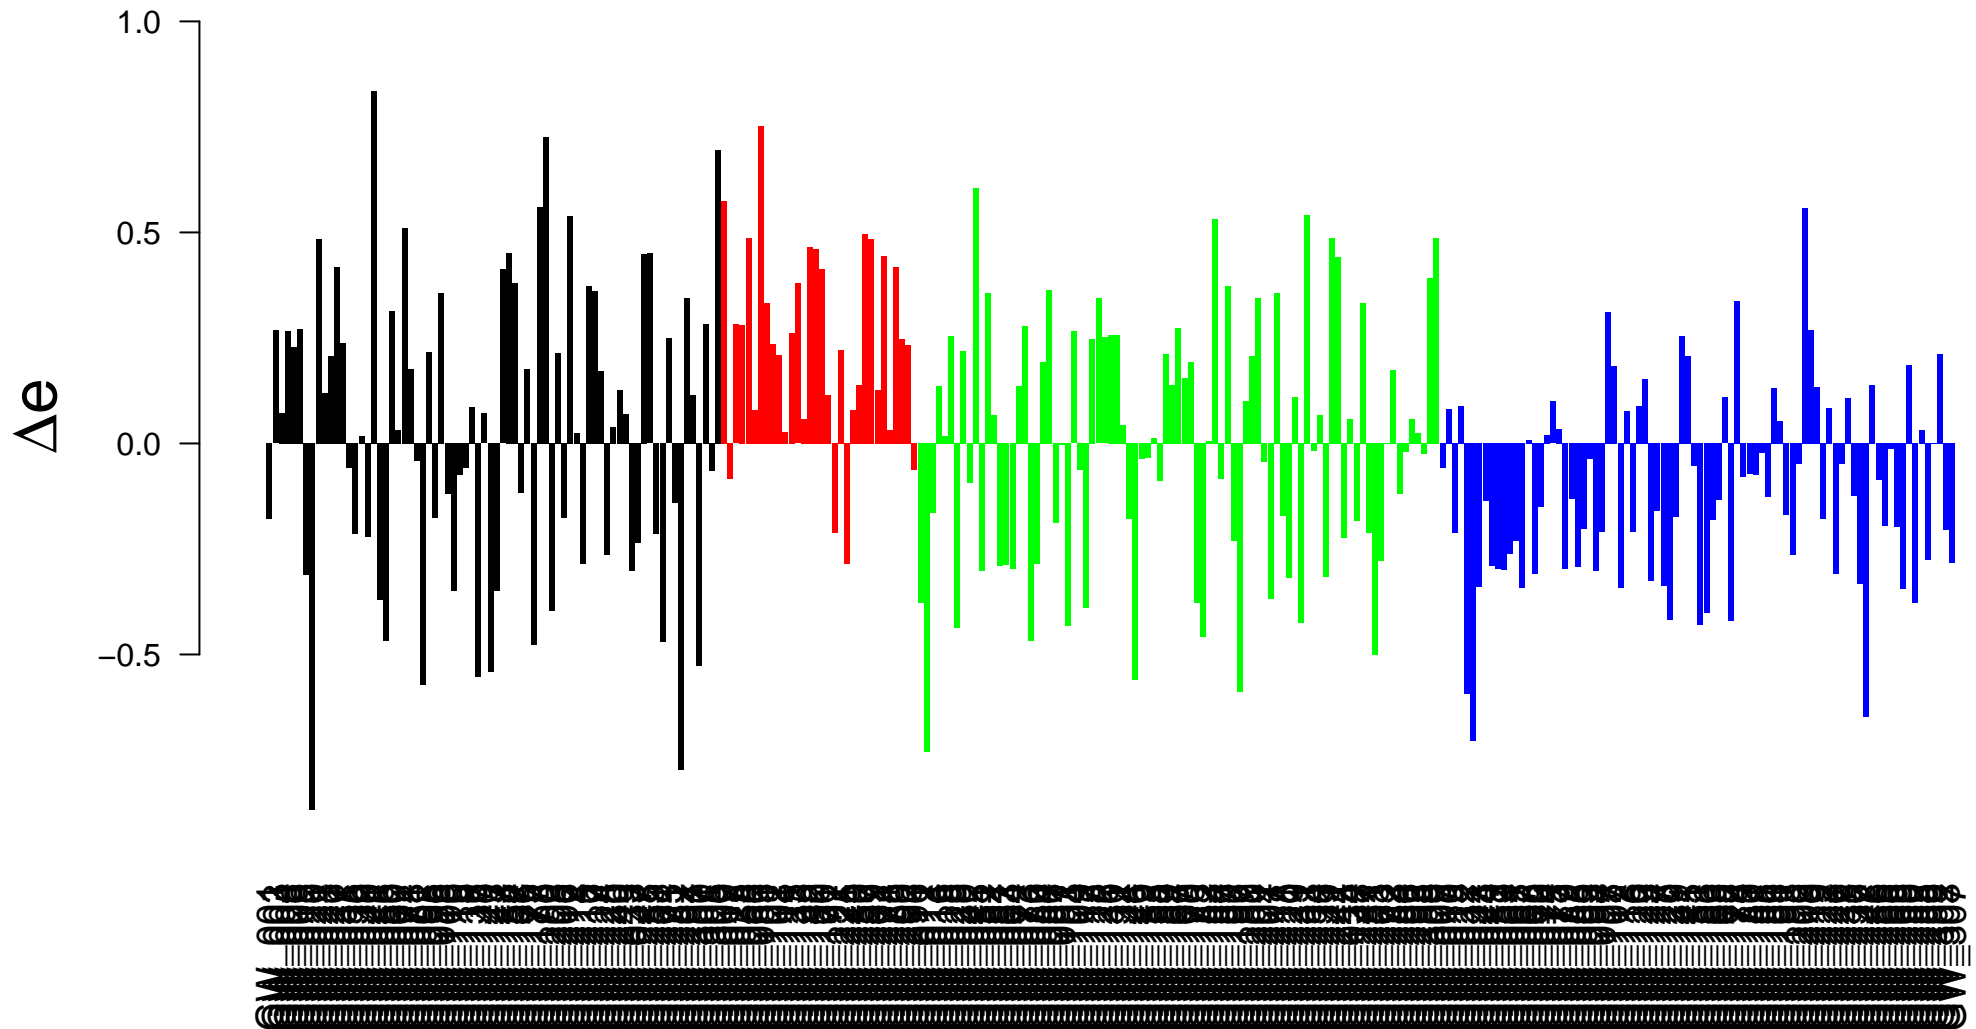

Expression of regulation of double-strand break repair via homologous recombination in Spot I

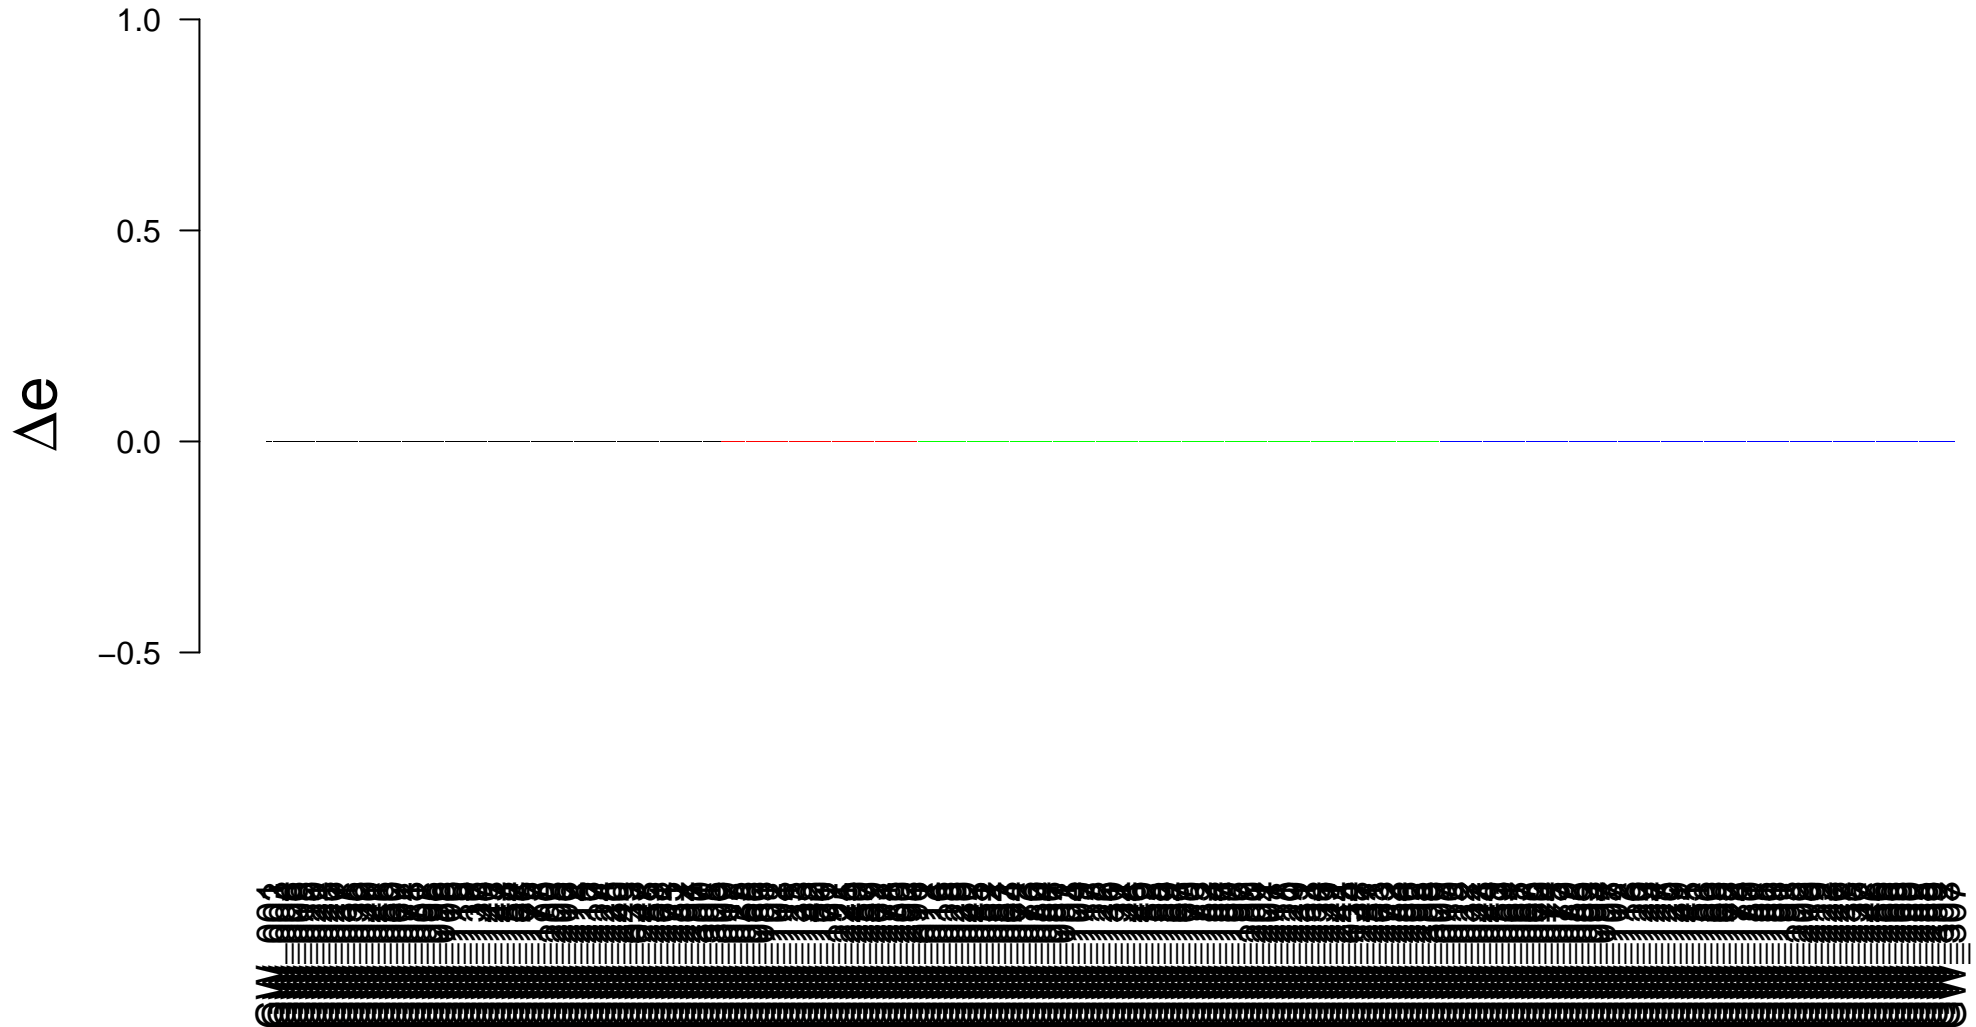

Expression of regulation of double-strand break repair via homologous recombination in Spot J

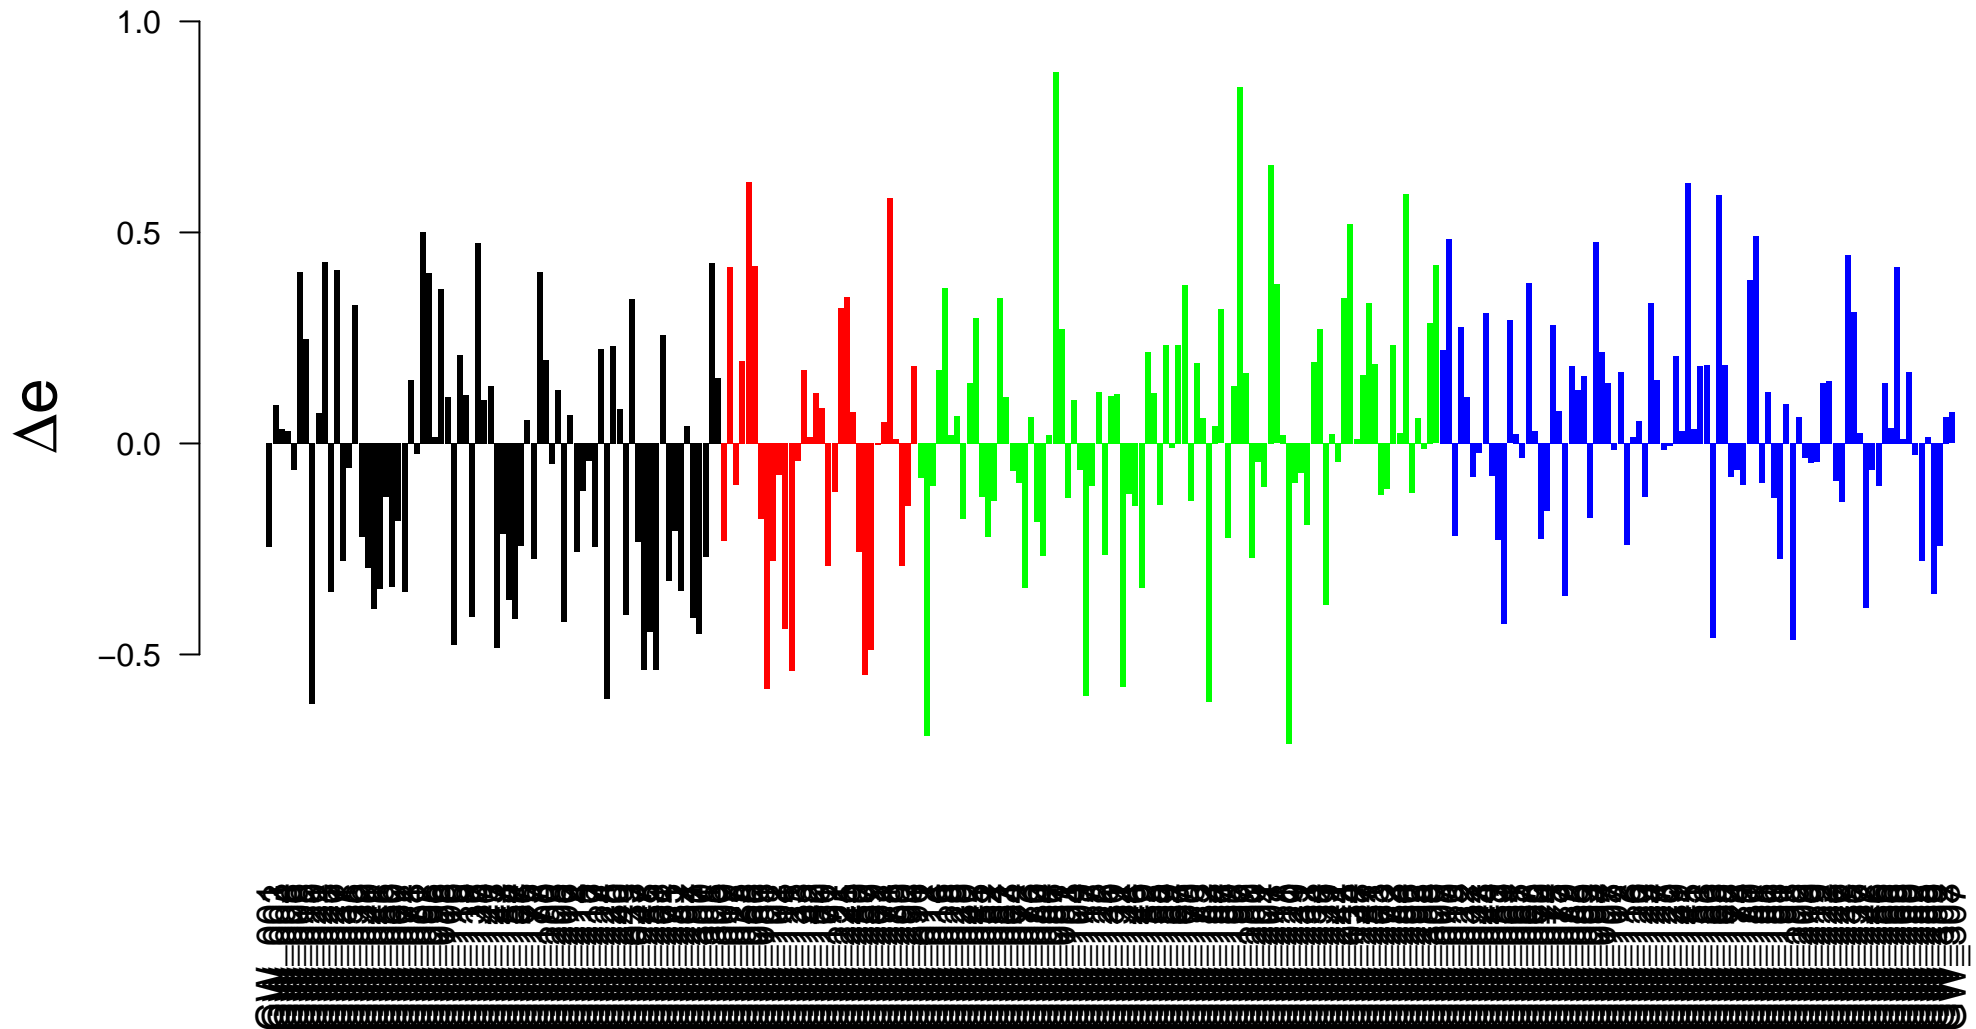

Expression of regulation of double-strand break repair via homologous recombination in Spot K

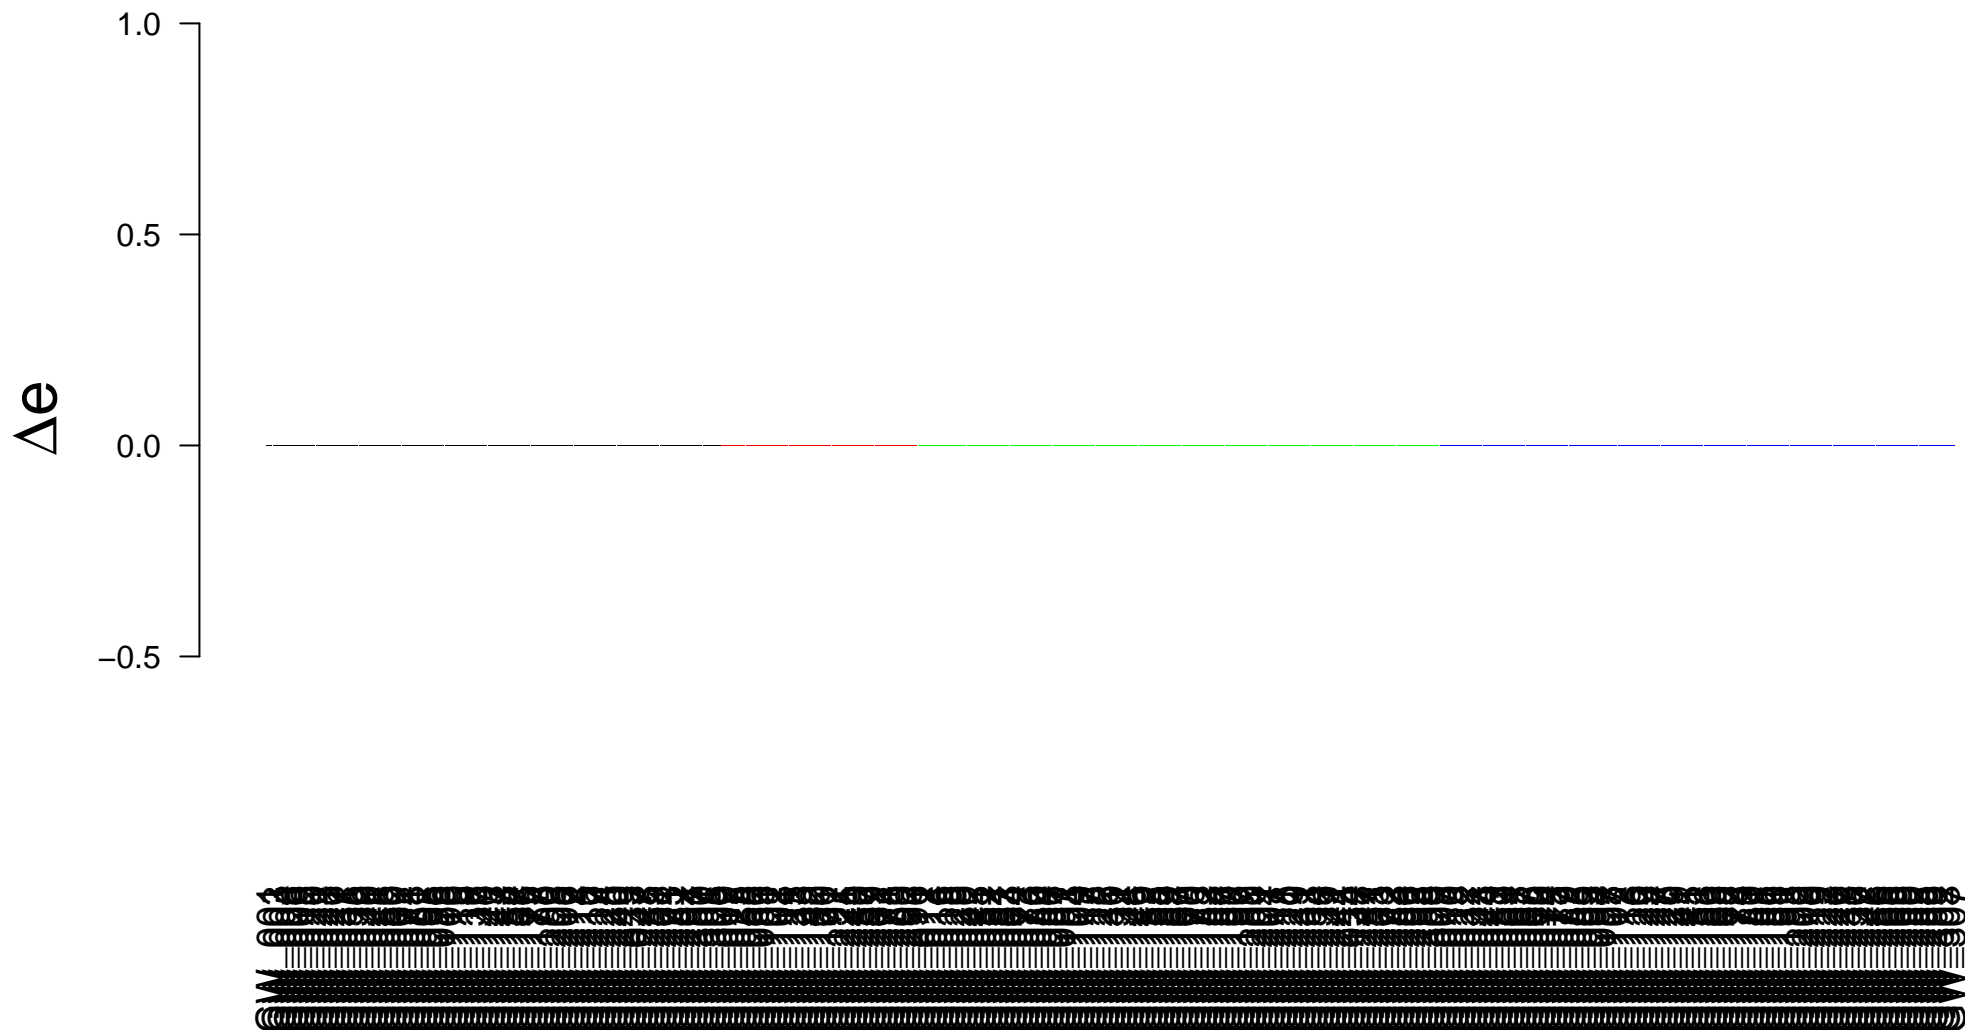

Expression of regulation of double-strand break repair via homologous recombination in Spot L

Expression of regulation of double-strand break repair via homologous recombination in Spot M

Expression of regulation of double-strand break repair via homologous recombination in Spot N

Expression of regulation of double-strand break repair via homologous recombination in Spot O
