

## regulation of innate immune response

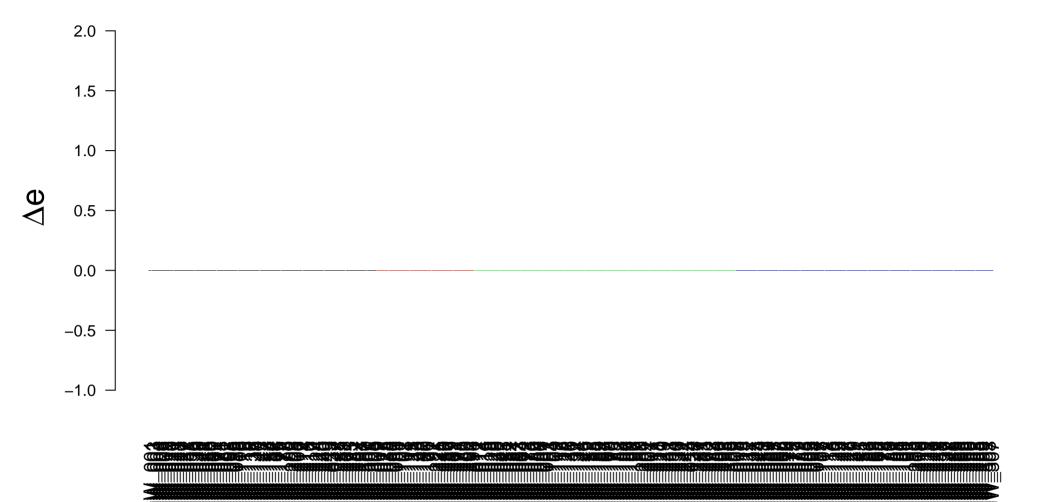

# Enrichment in spots: regulation of innate immune response

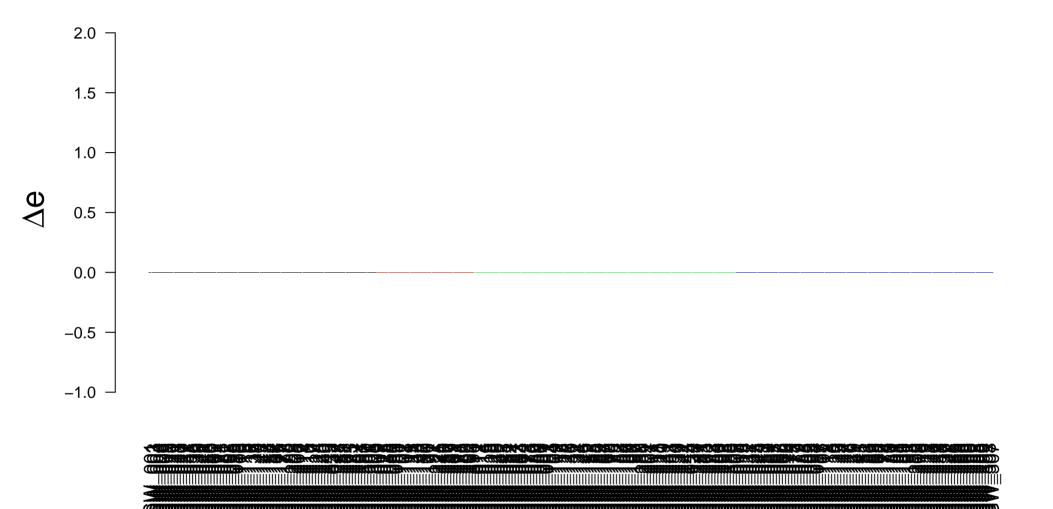

### Expression of regulation of innate immune response in Spot A

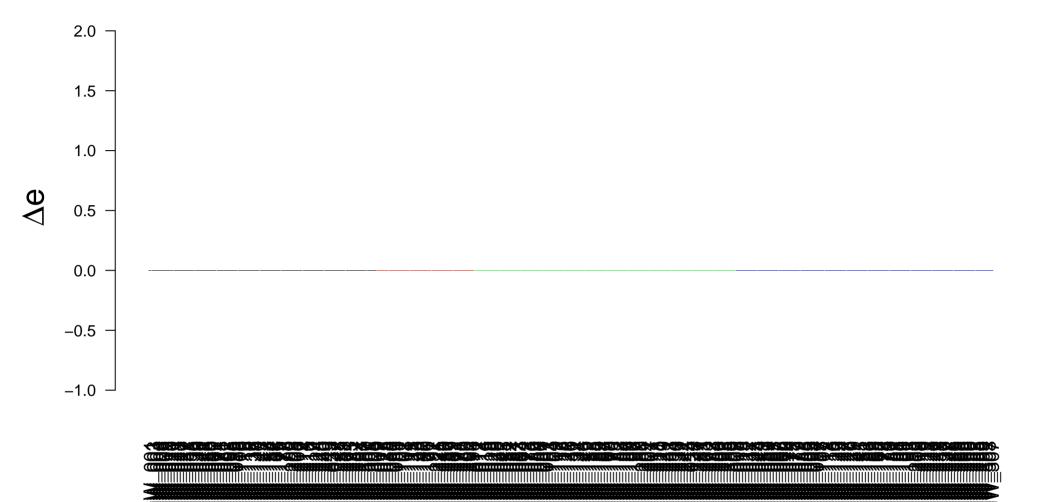

### Expression of regulation of innate immune response in Spot B

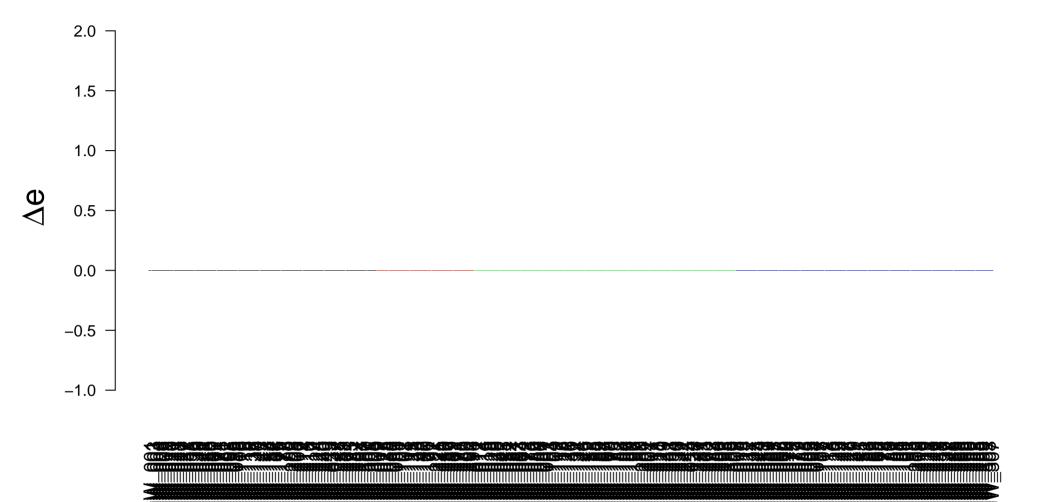

### Expression of regulation of innate immune response in Spot C

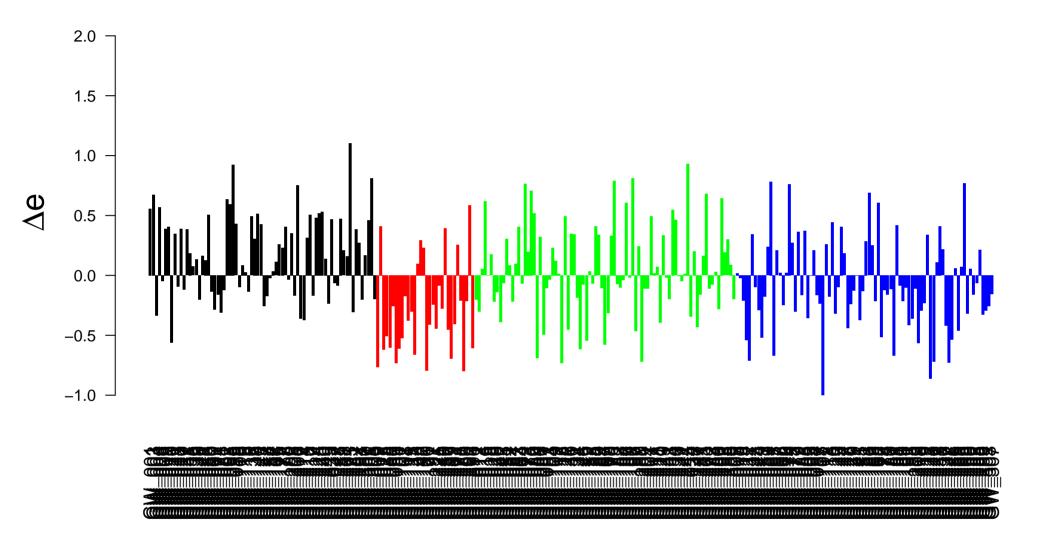

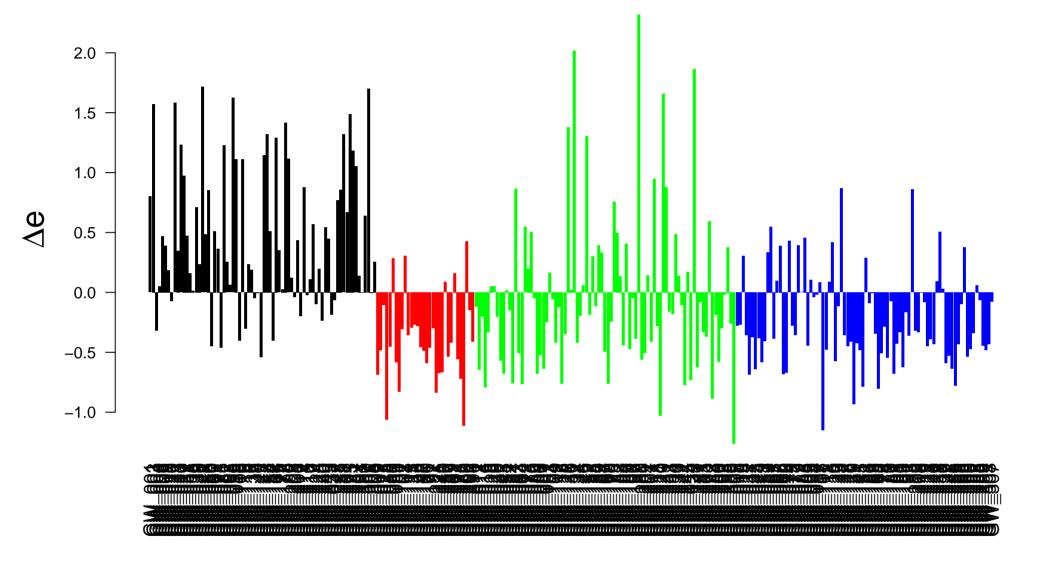

### Expression of regulation of innate immune response in Spot D

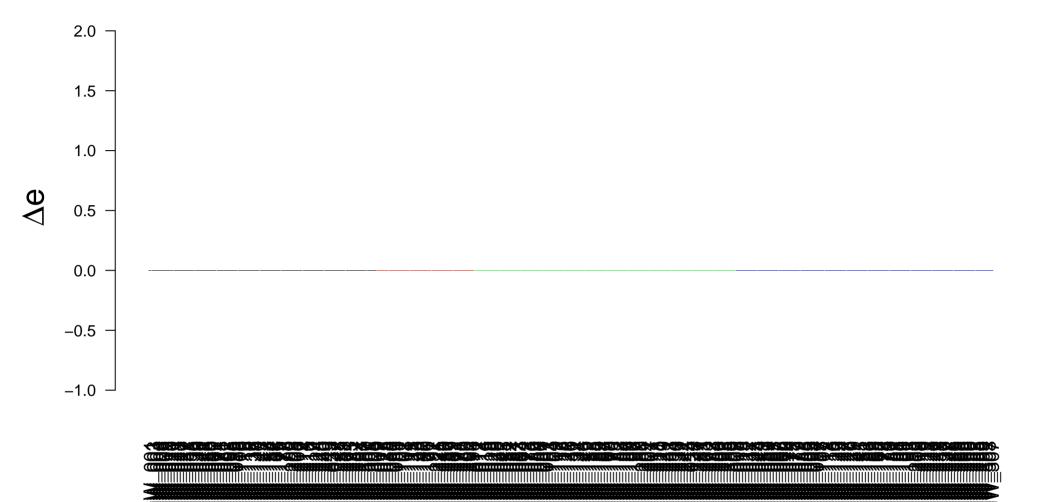

### Expression of regulation of innate immune response in Spot E

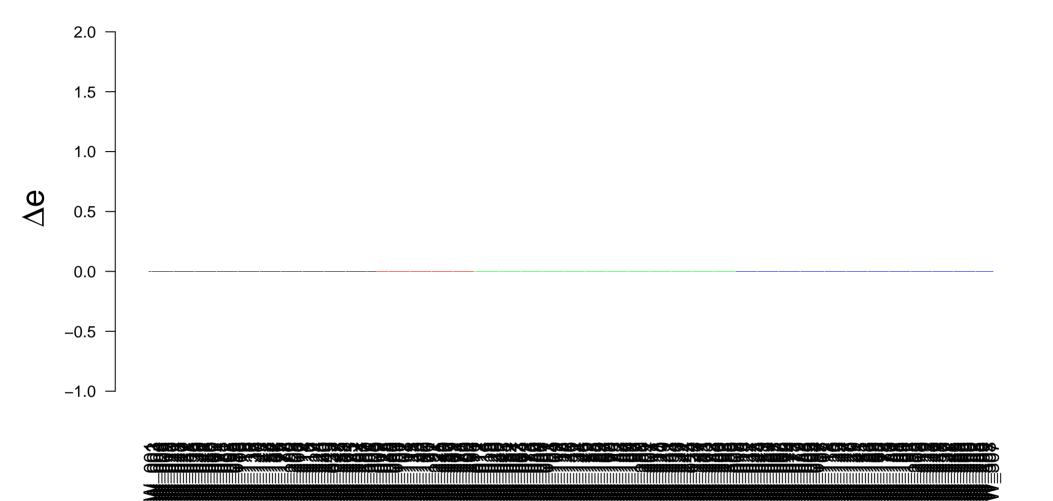

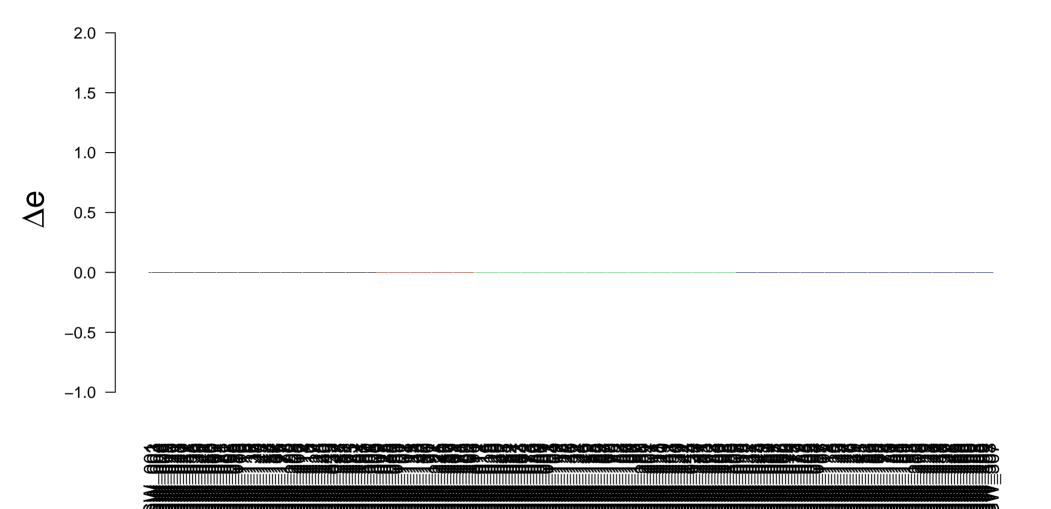

### Expression of regulation of innate immune response in Spot H

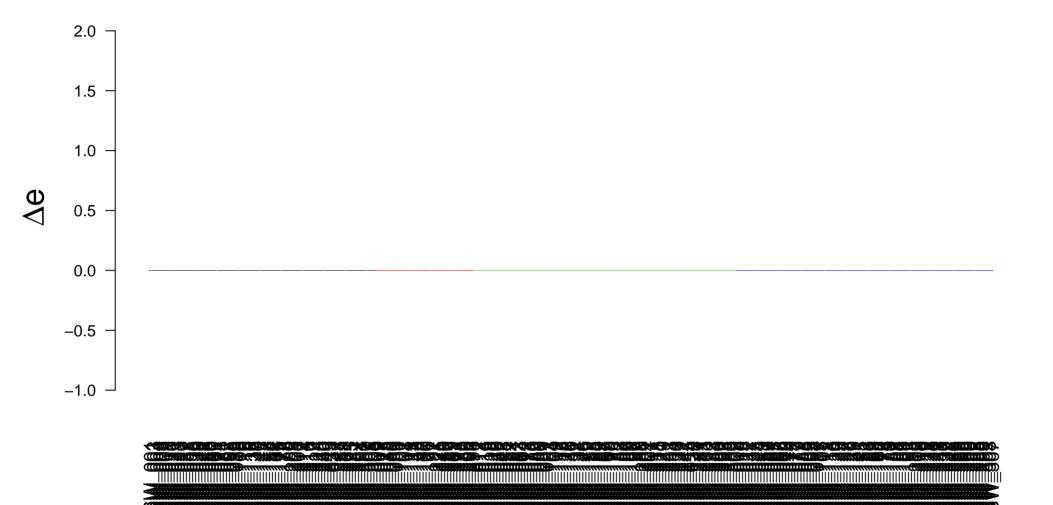

### Expression of regulation of innate immune response in Spot I

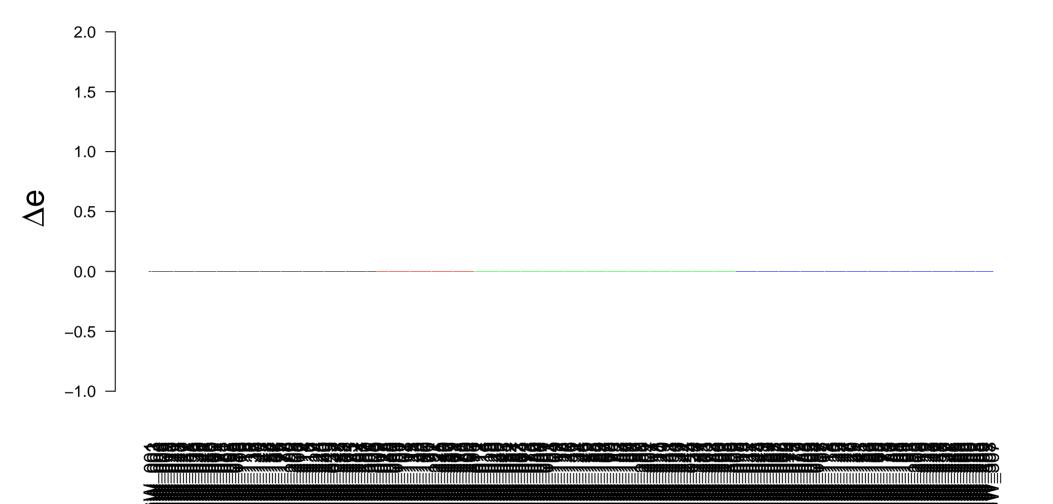

### Expression of regulation of innate immune response in Spot J

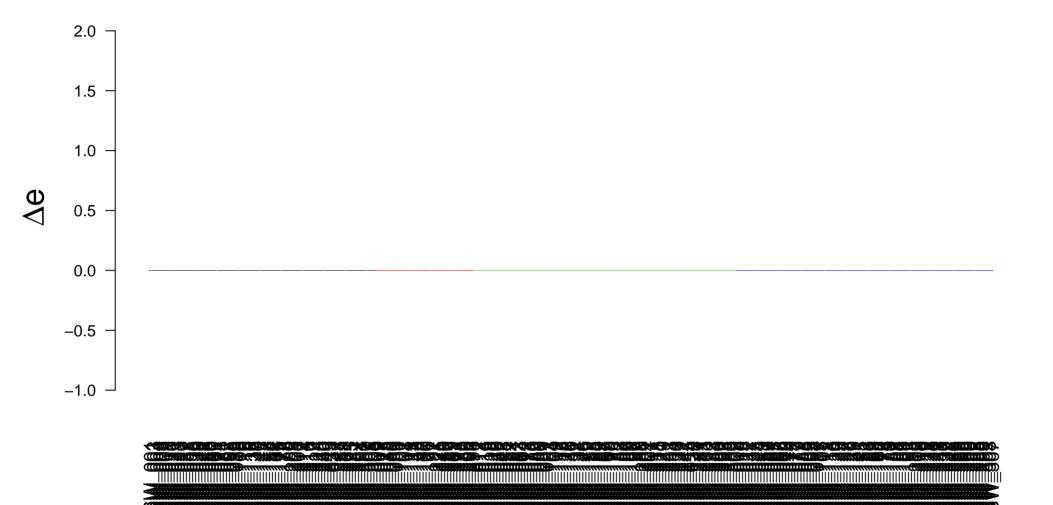

### **Expression of regulation of innate immune response in Spot K**

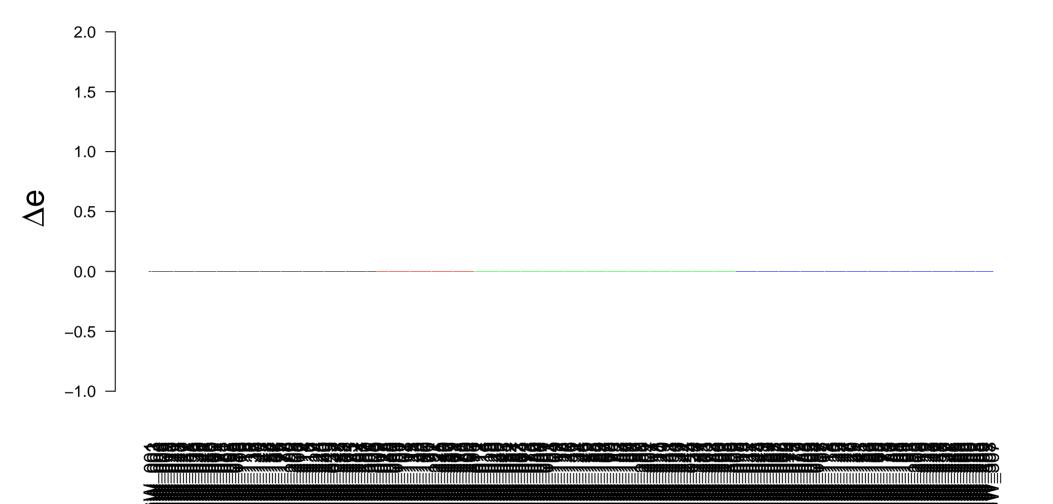

### Expression of regulation of innate immune response in Spot L

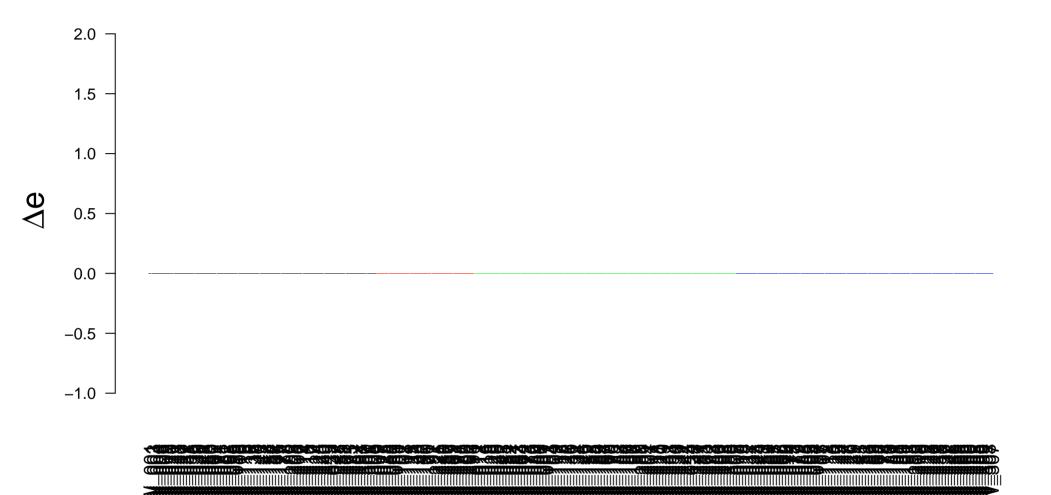

### **Expression of regulation of innate immune response in Spot M**

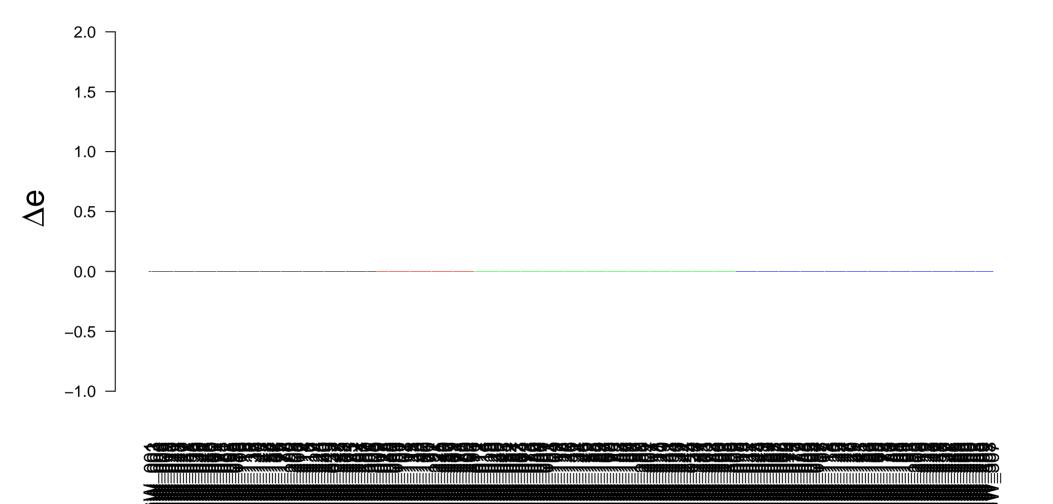

### Expression of regulation of innate immune response in Spot N

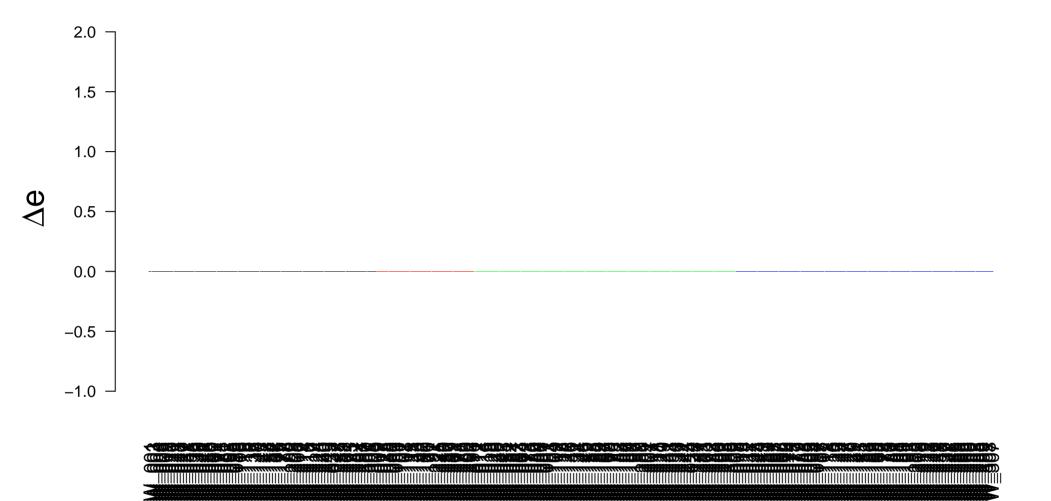

### Expression of regulation of innate immune response in Spot O

### Expression of regulation of innate immune response in Spot P

### Expression of regulation of innate immune response in Spot Q

### Expression of regulation of innate immune response in Spot R
