

transcription elongation from RNA polymerase II promoter

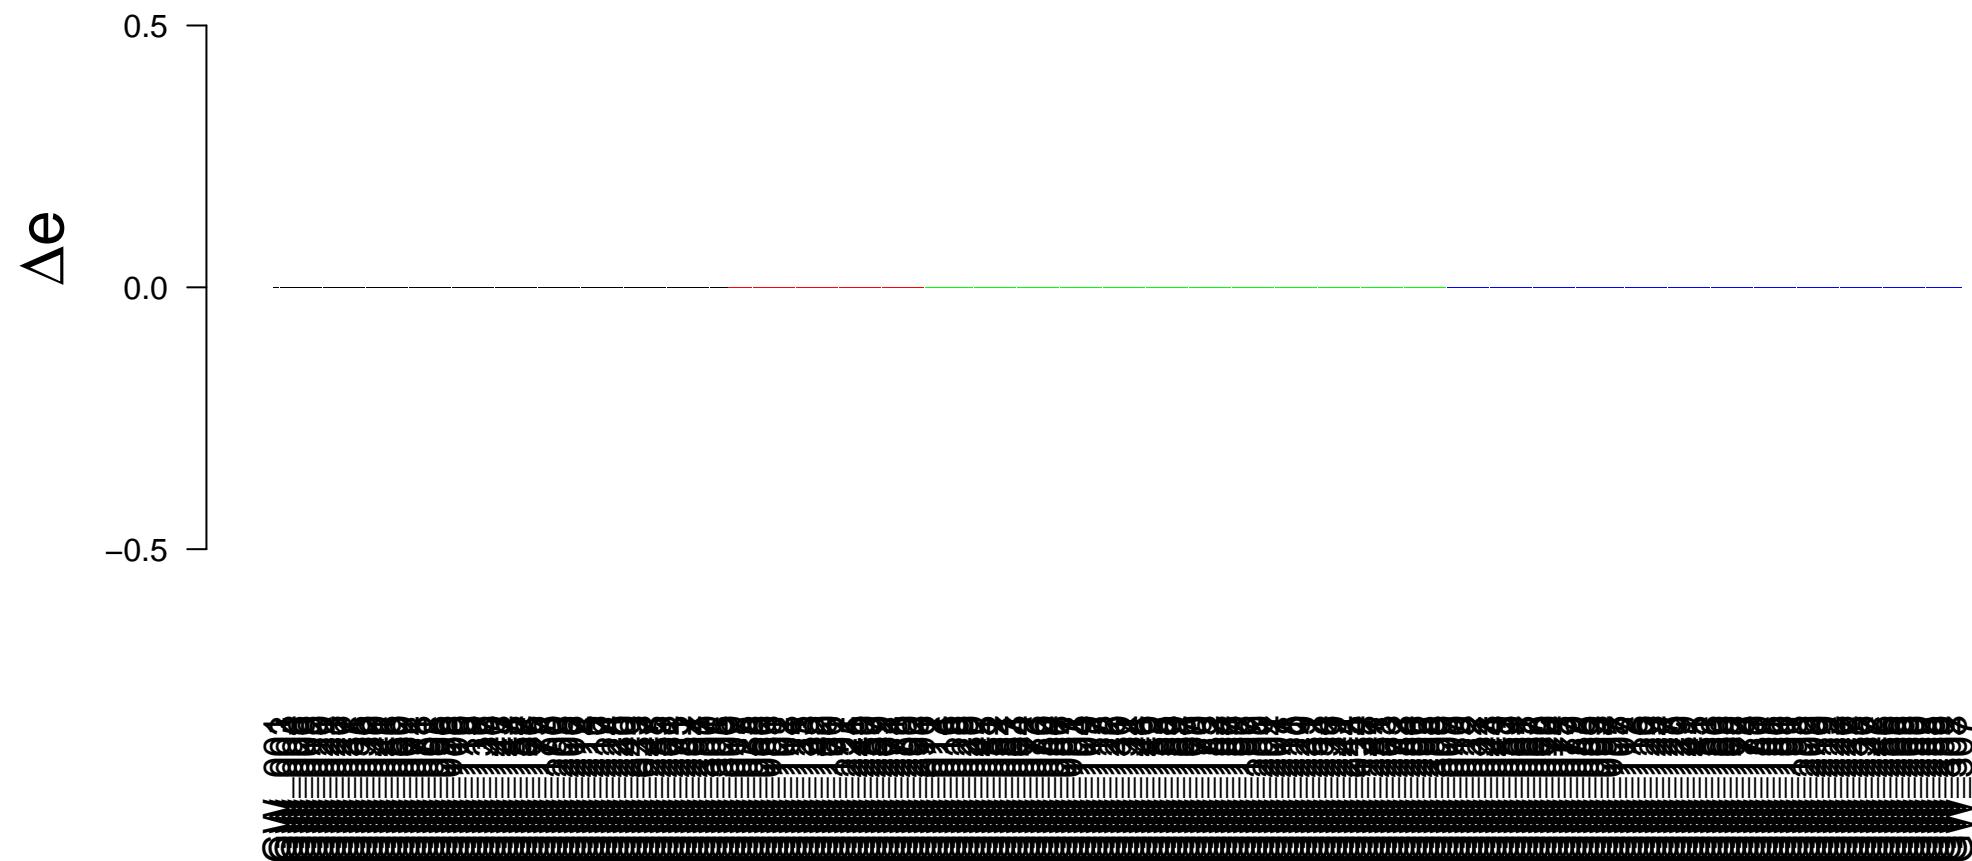

transcription elongation from RNA polymerase II promoter

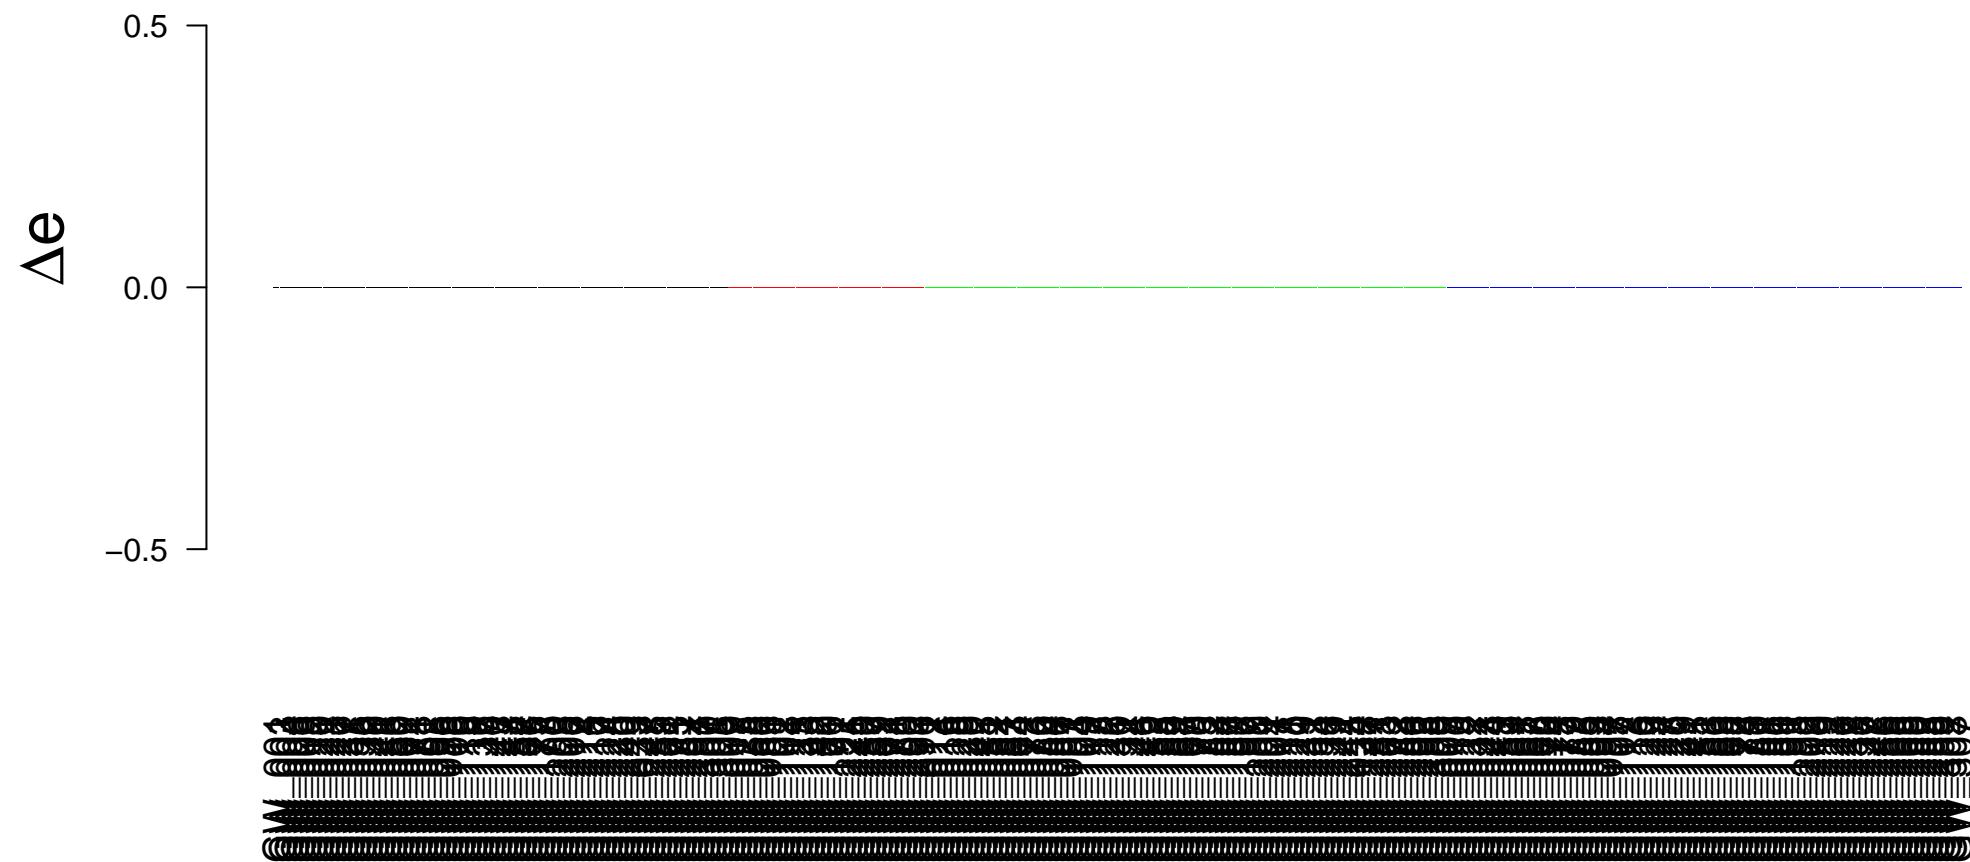

Enrichment in spots: transcription elongation from RNA polymerase II promoter

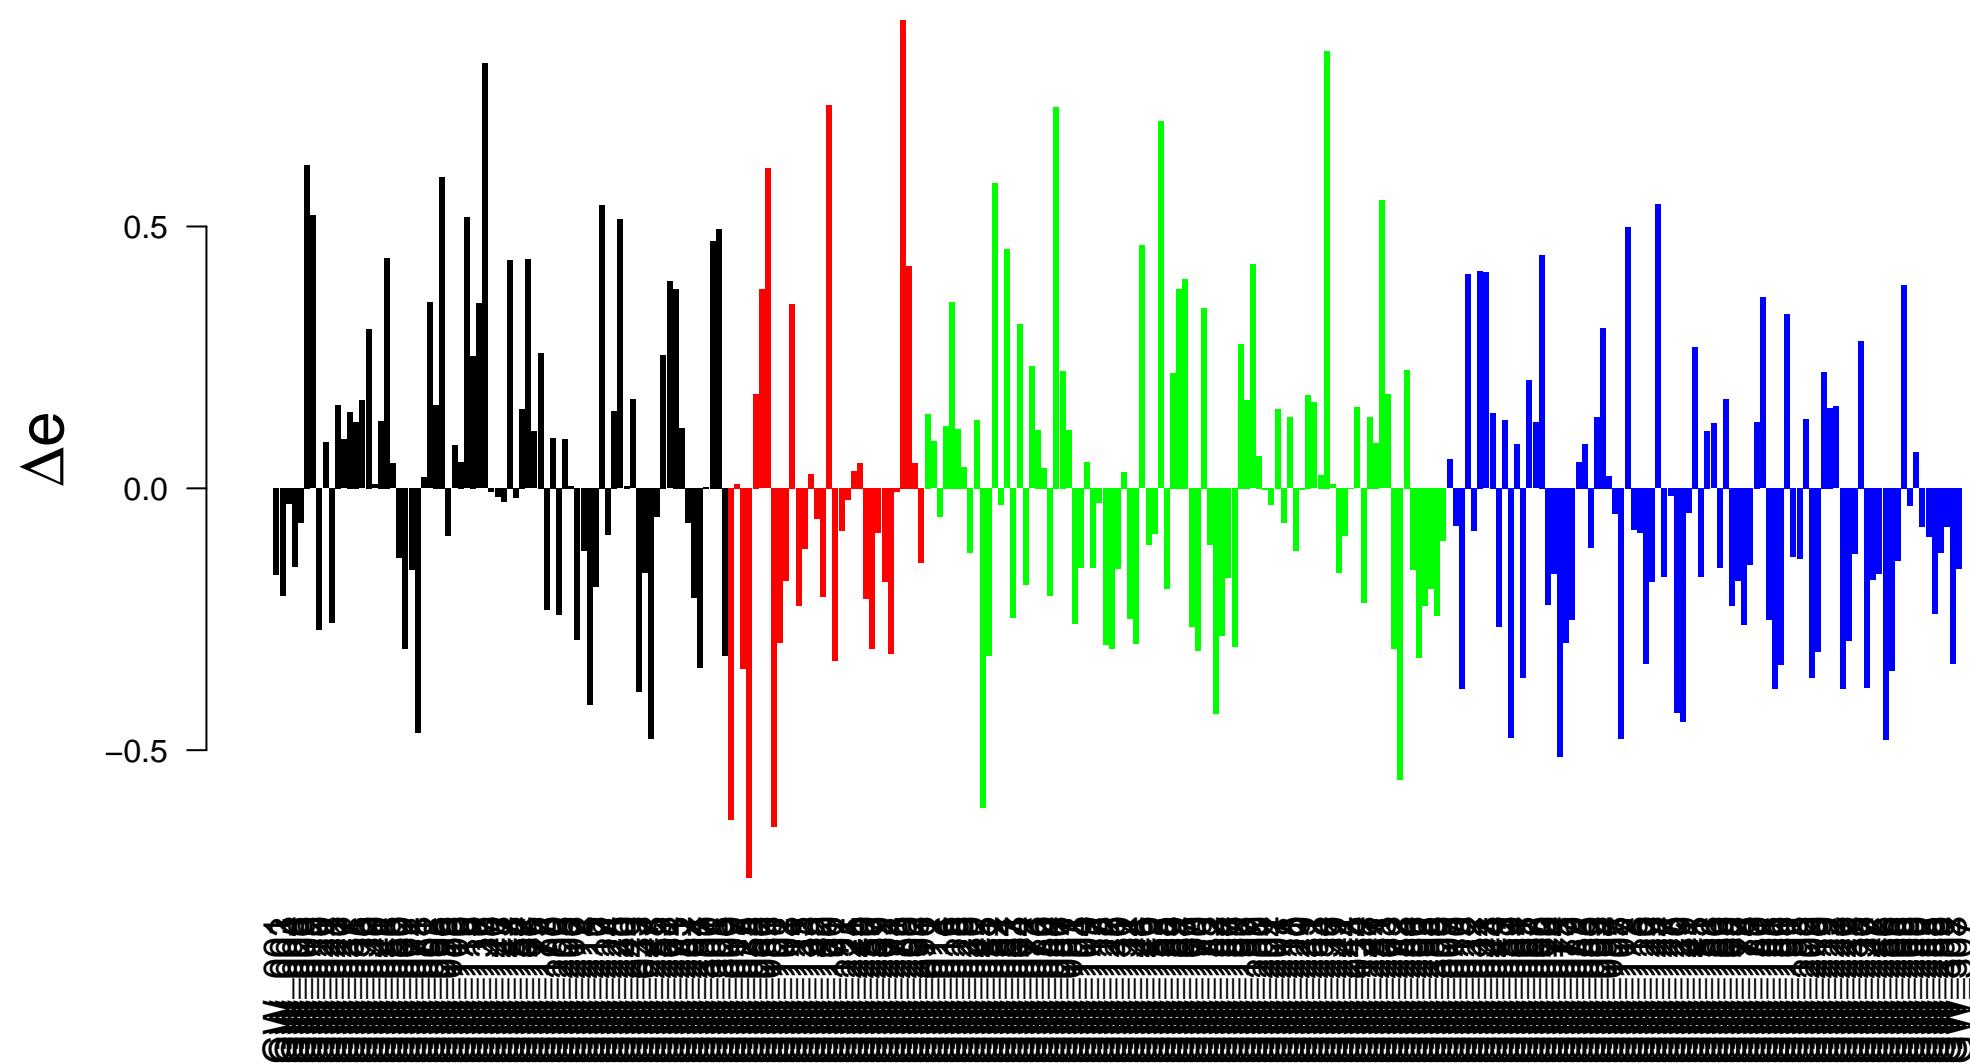

Expression of transcription elongation from RNA polymerase II promoter in Spot A

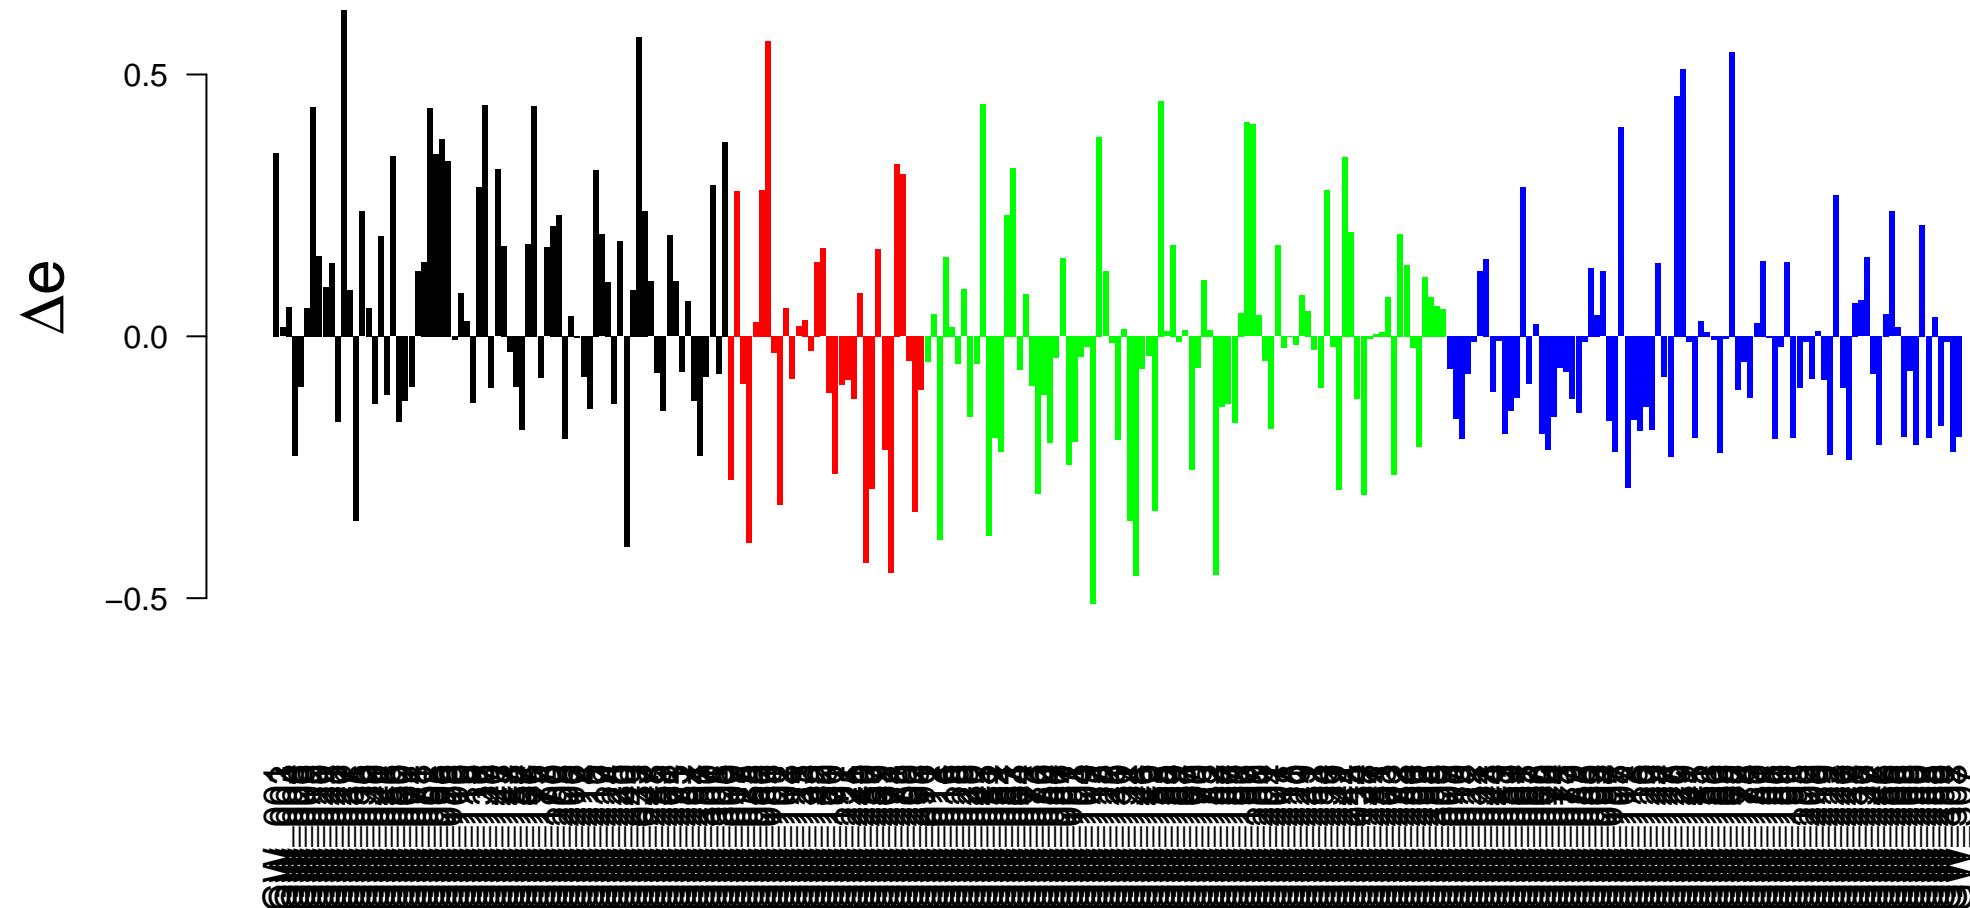

Expression of transcription elongation from RNA polymerase II promoter in Spot B

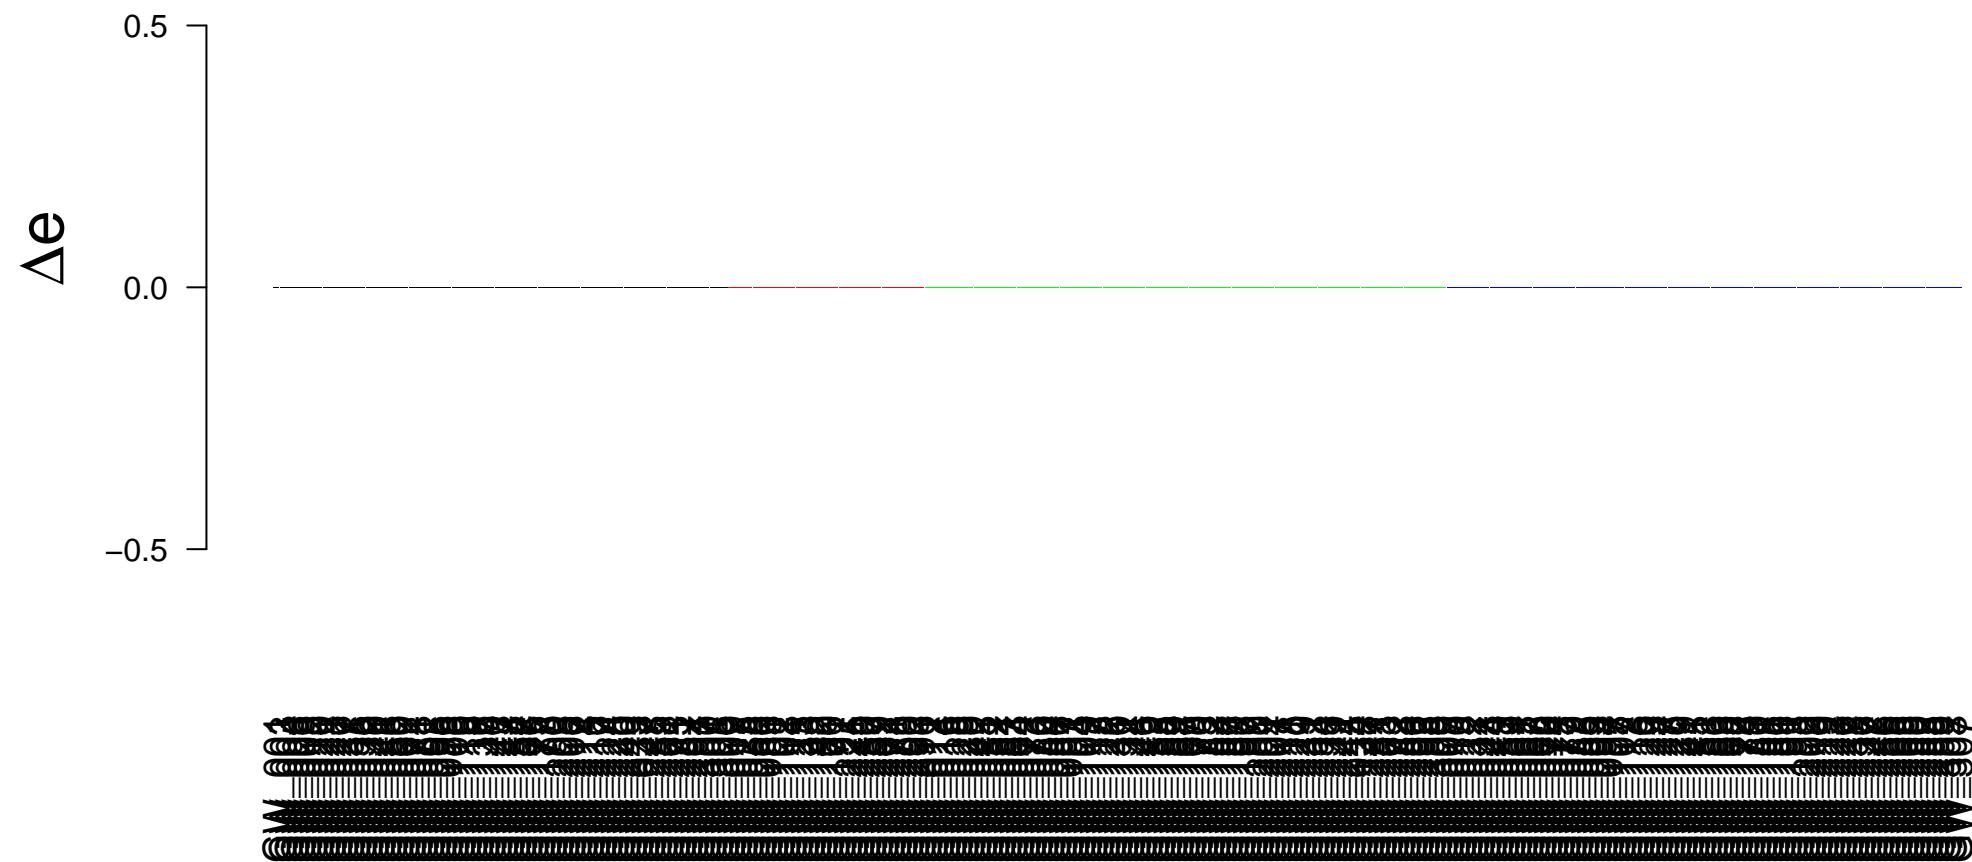

Expression of transcription elongation from RNA polymerase II promoter in Spot C

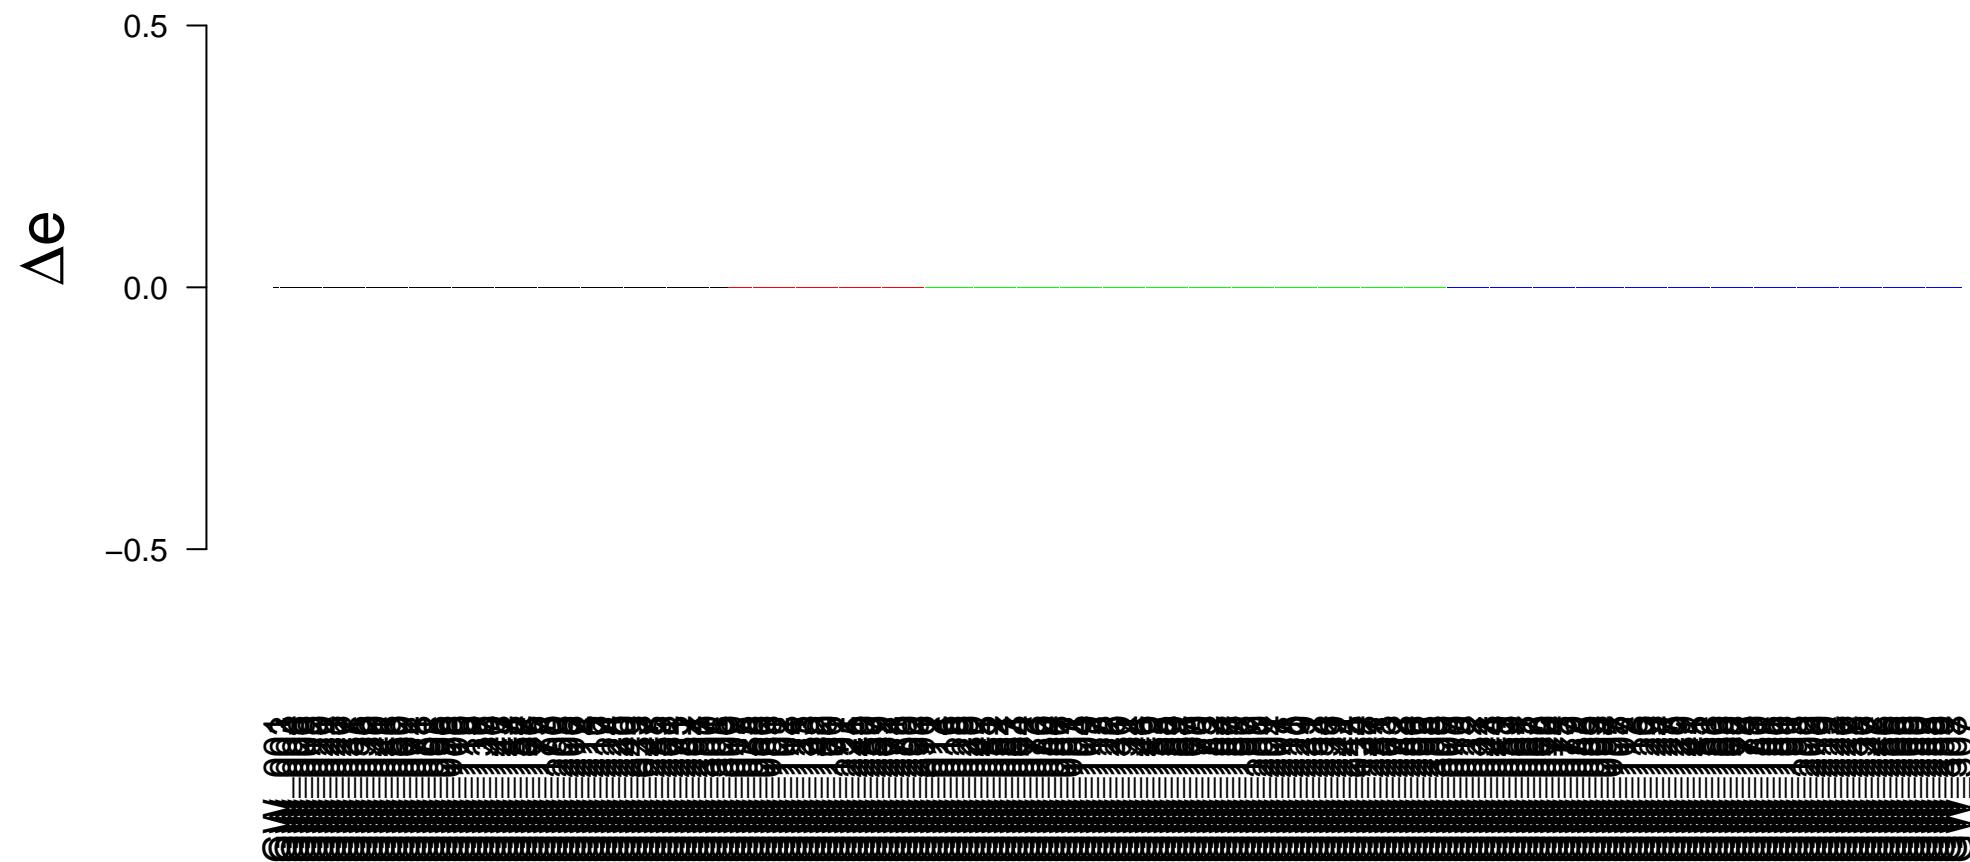

Expression of transcription elongation from RNA polymerase II promoter in Spot D

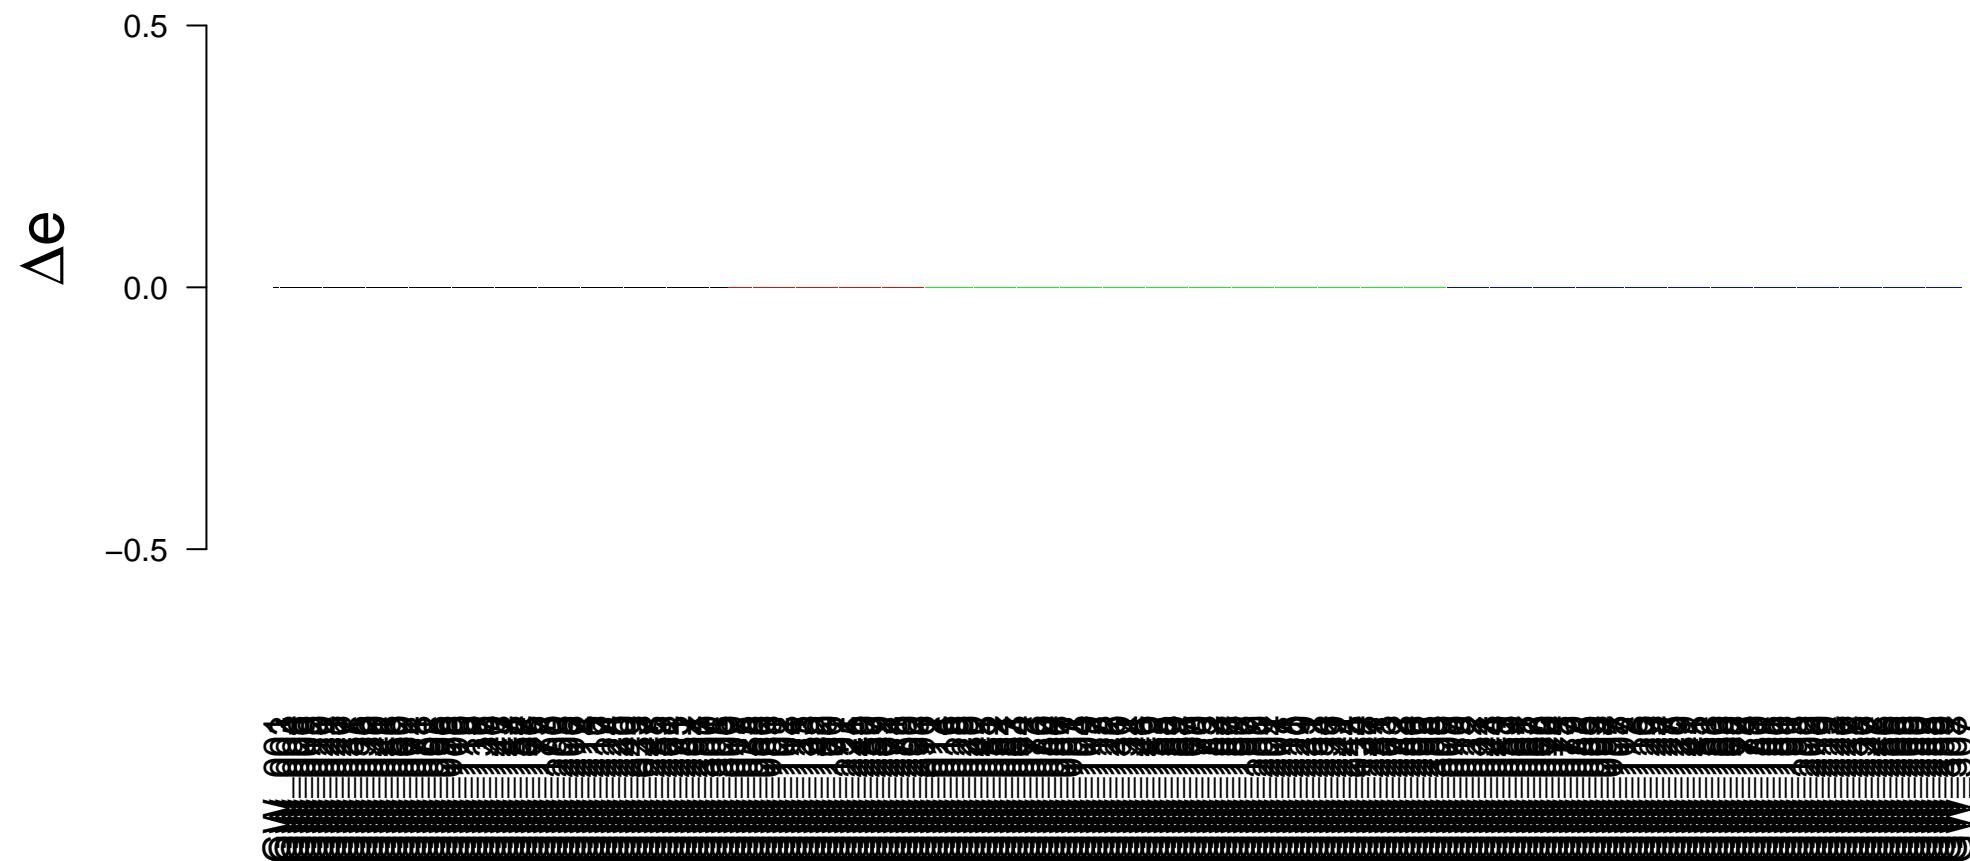

Expression of transcription elongation from RNA polymerase II promoter in Spot E

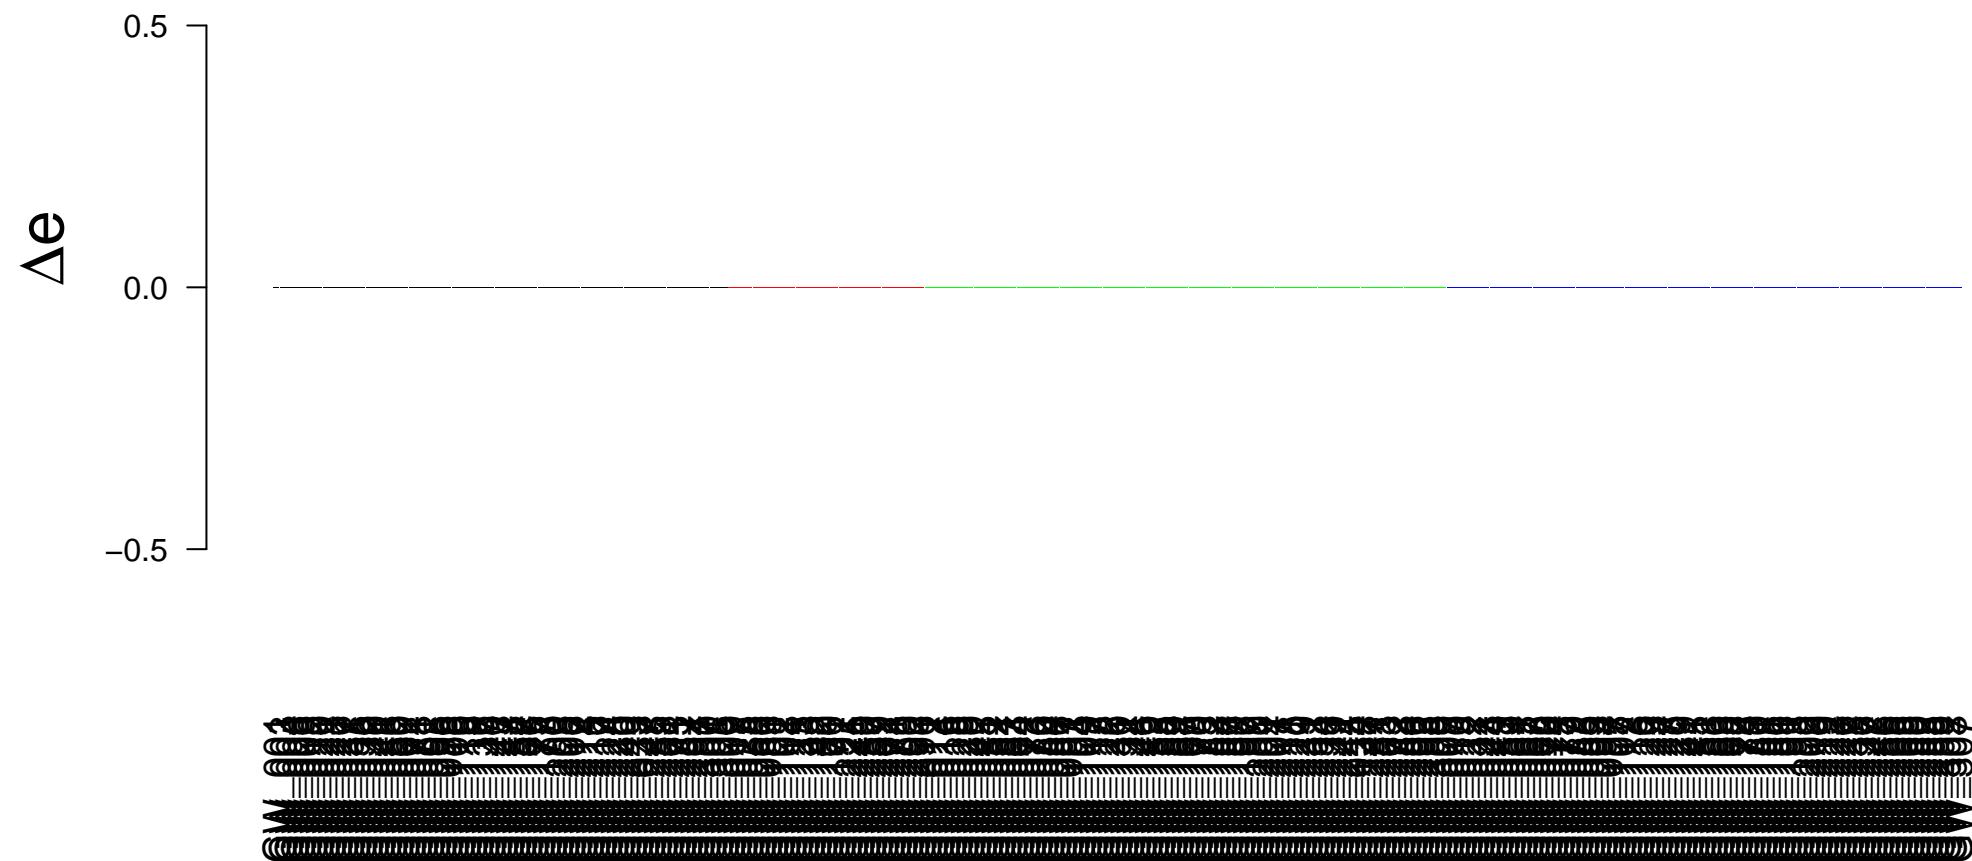

Expression of transcription elongation from RNA polymerase II promoter in Spot F

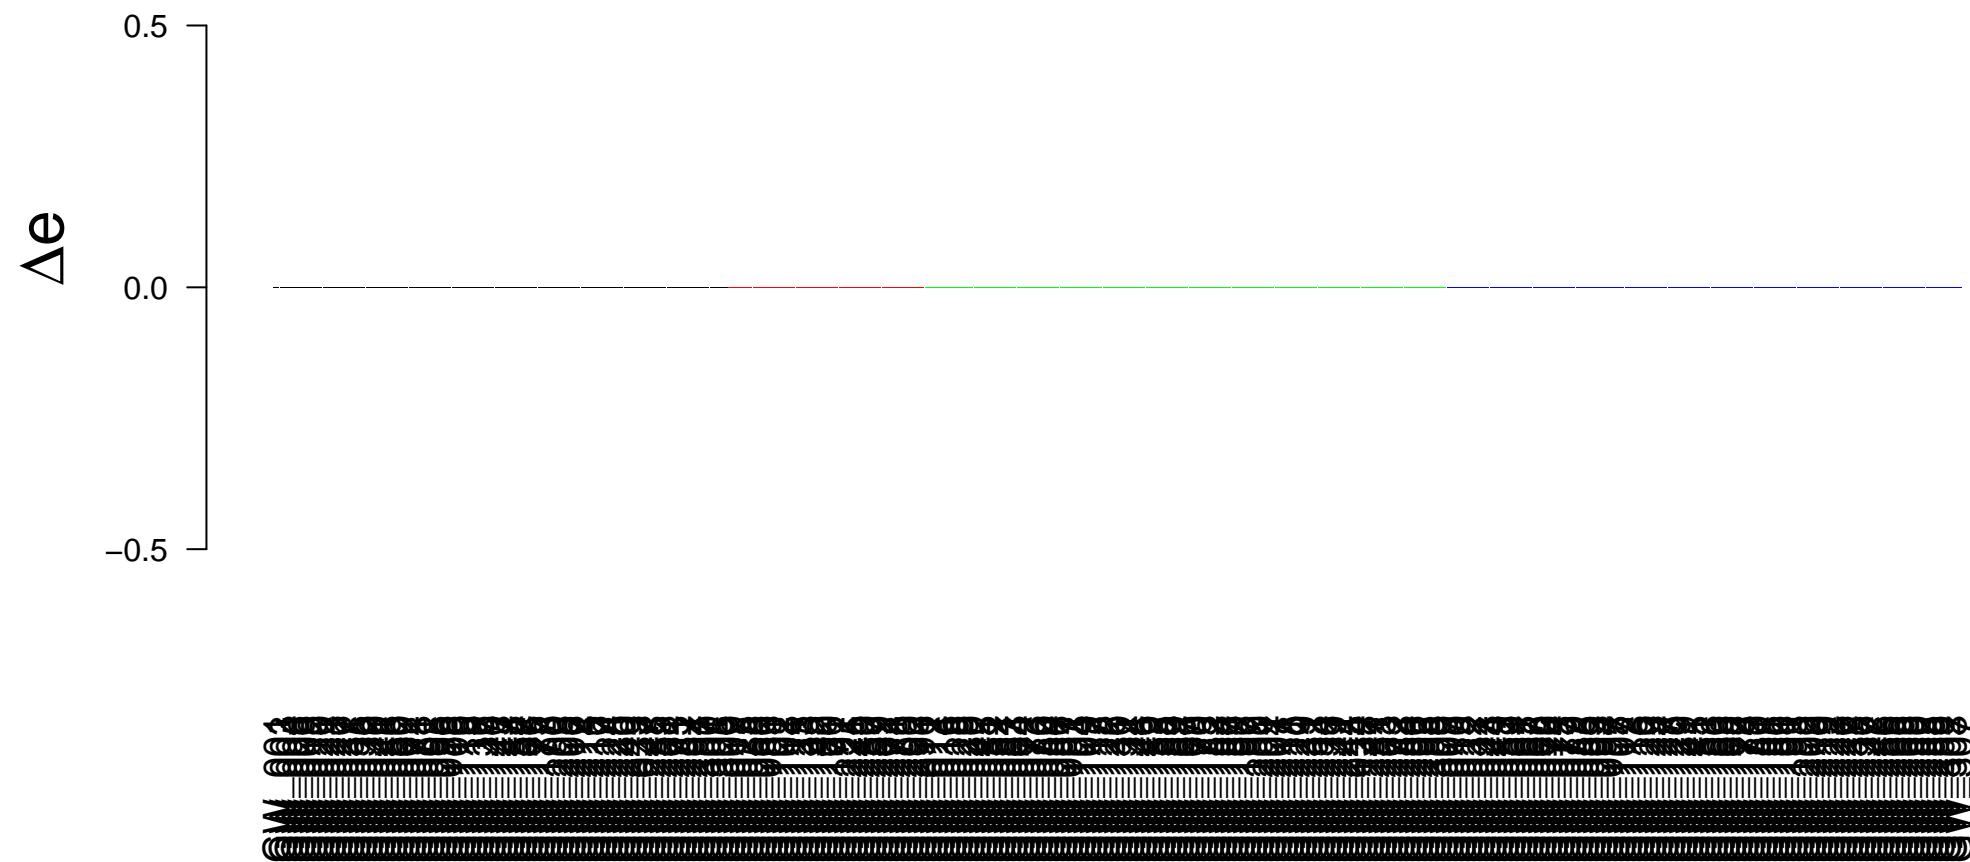

Expression of transcription elongation from RNA polymerase II promoter in Spot G

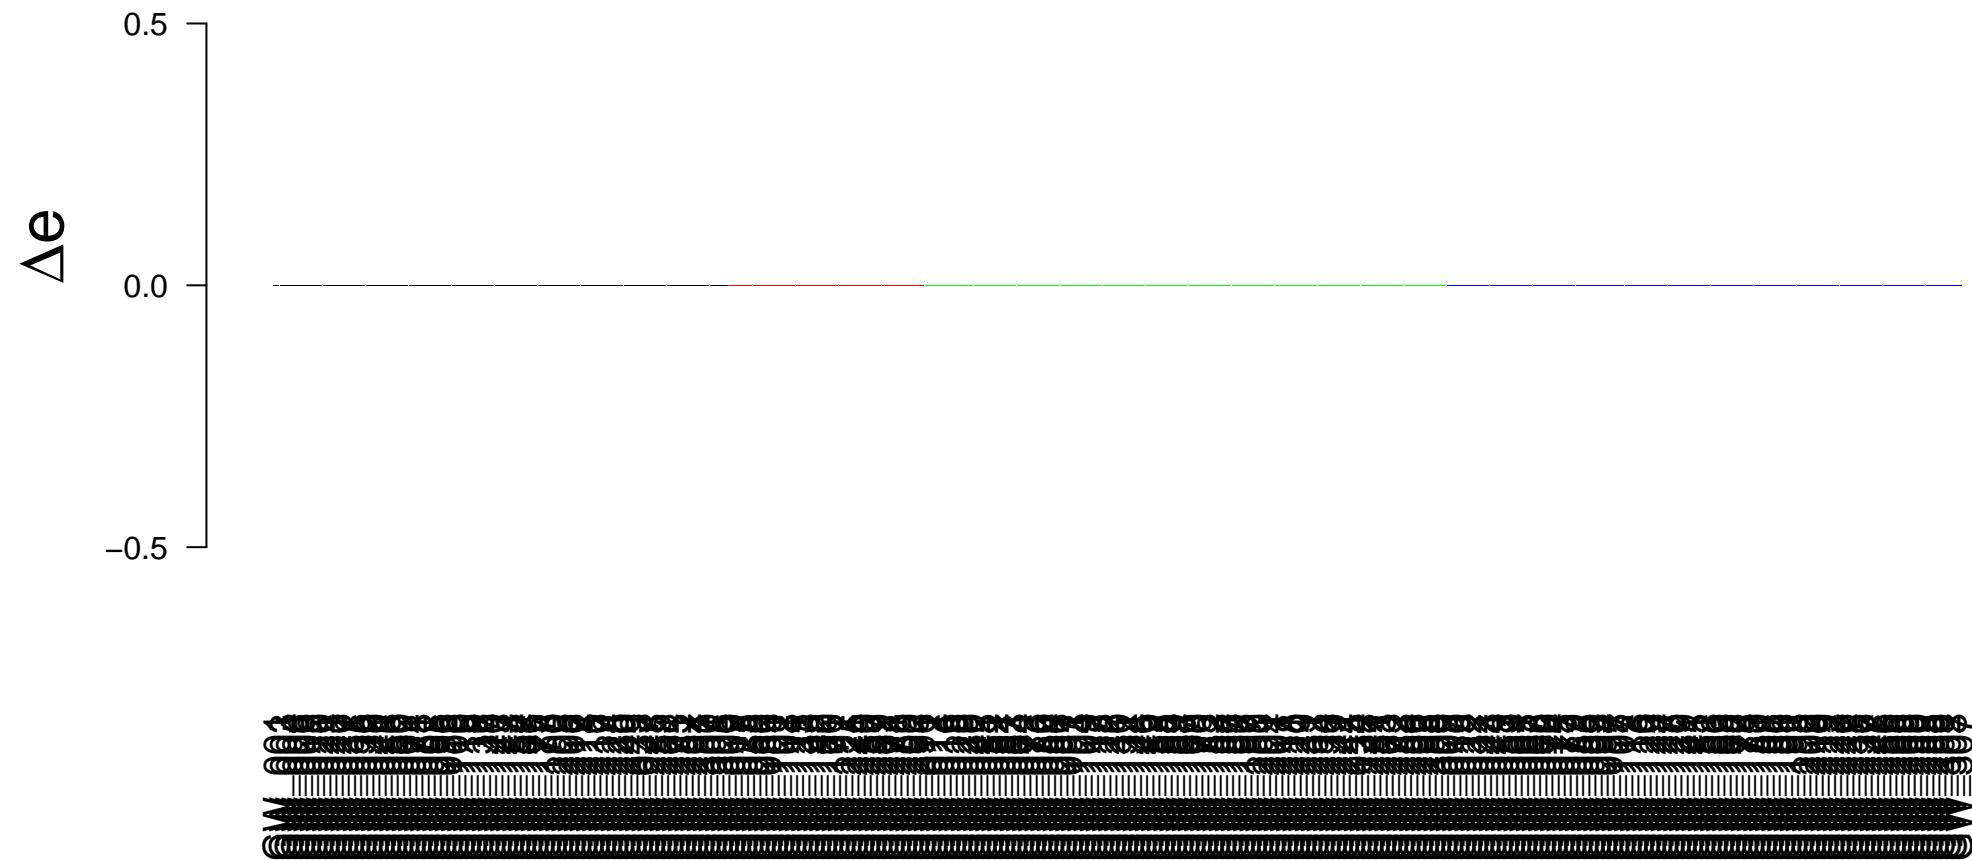

Expression of transcription elongation from RNA polymerase II promoter in Spot H

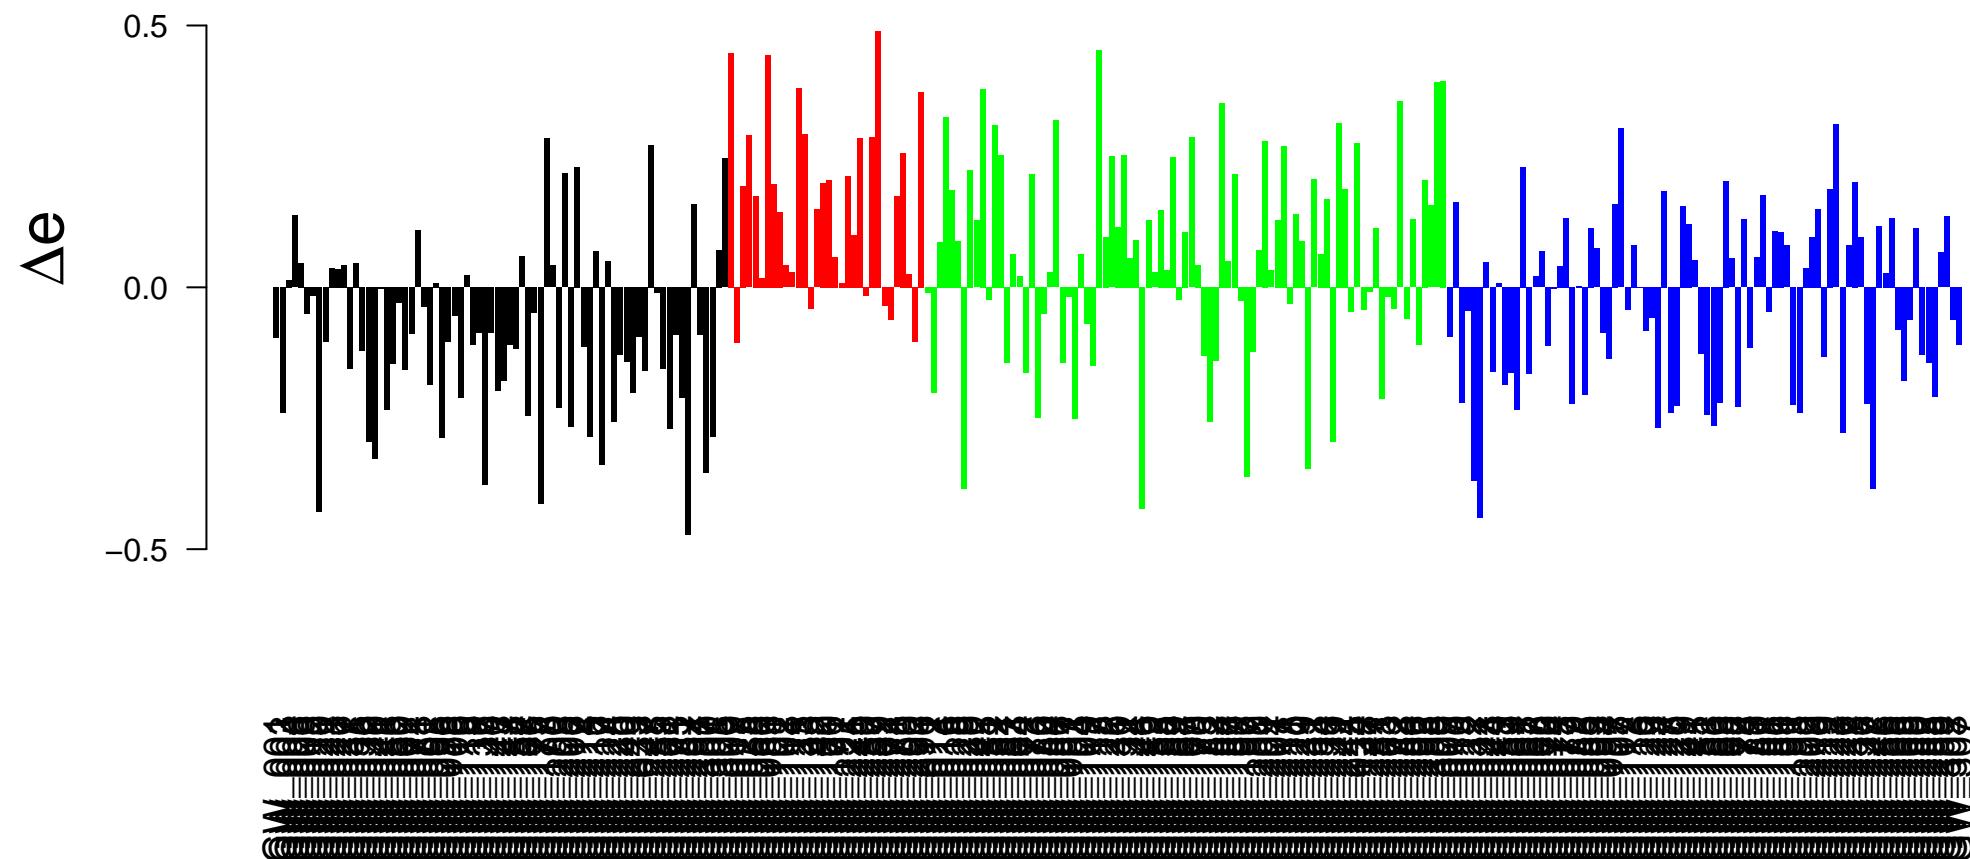

Expression of transcription elongation from RNA polymerase II promoter in Spot I

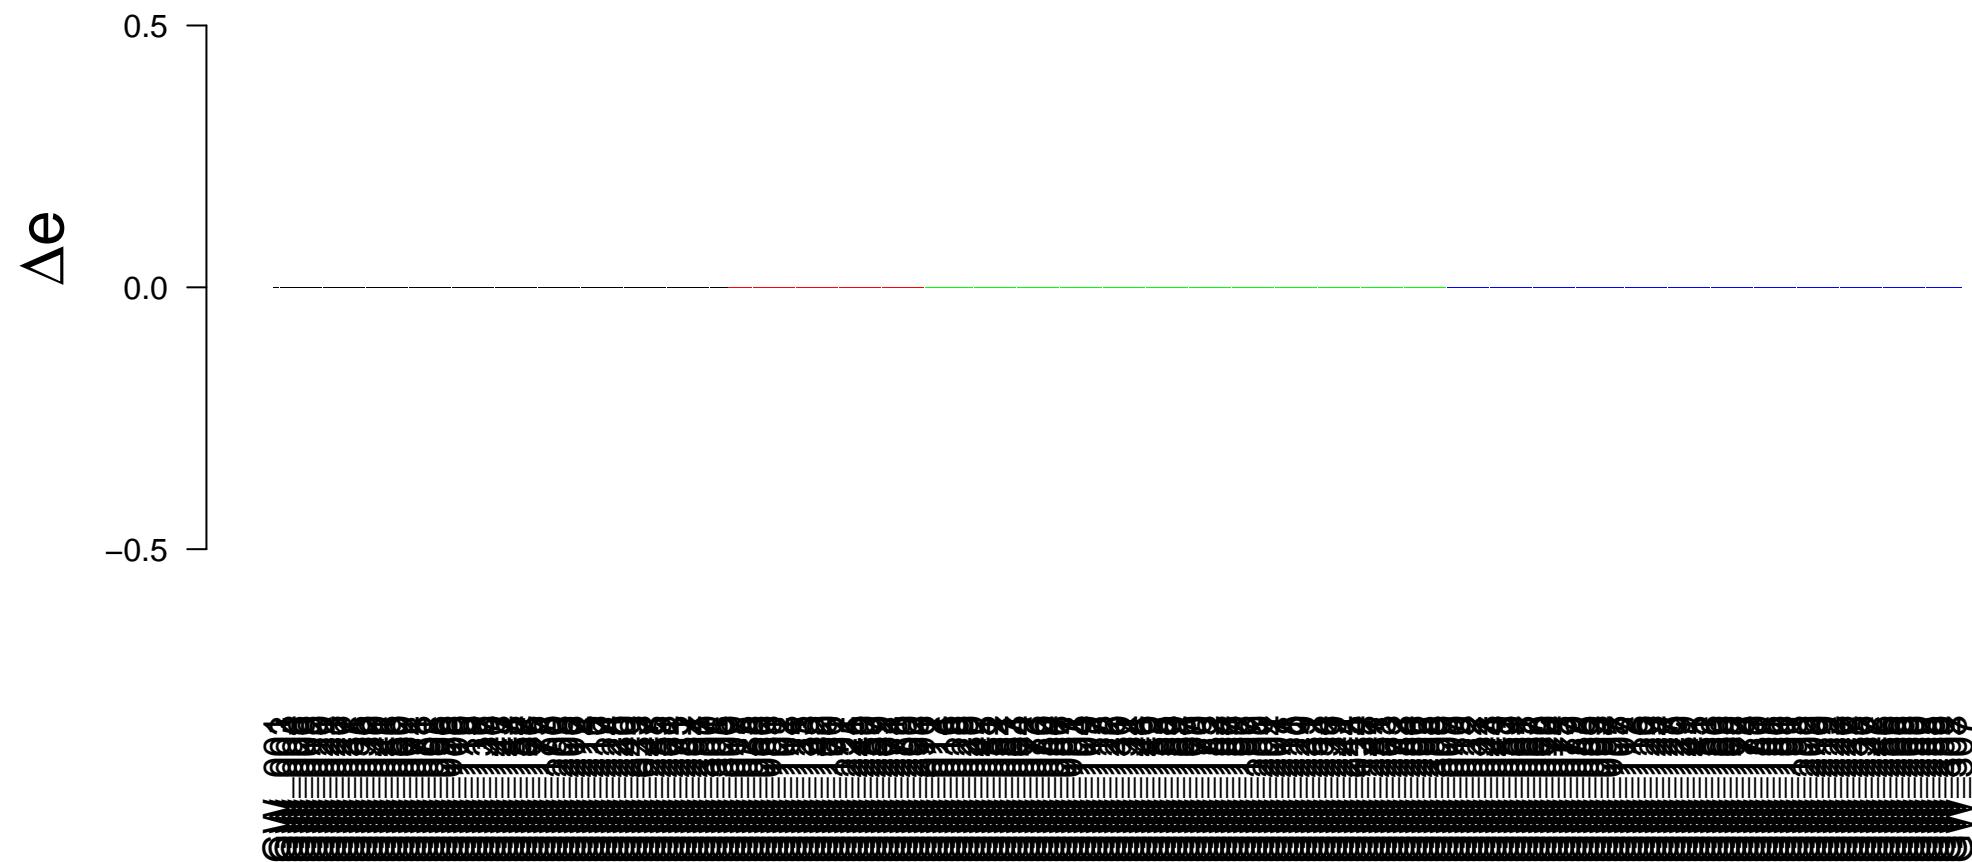

Expression of transcription elongation from RNA polymerase II promoter in Spot J

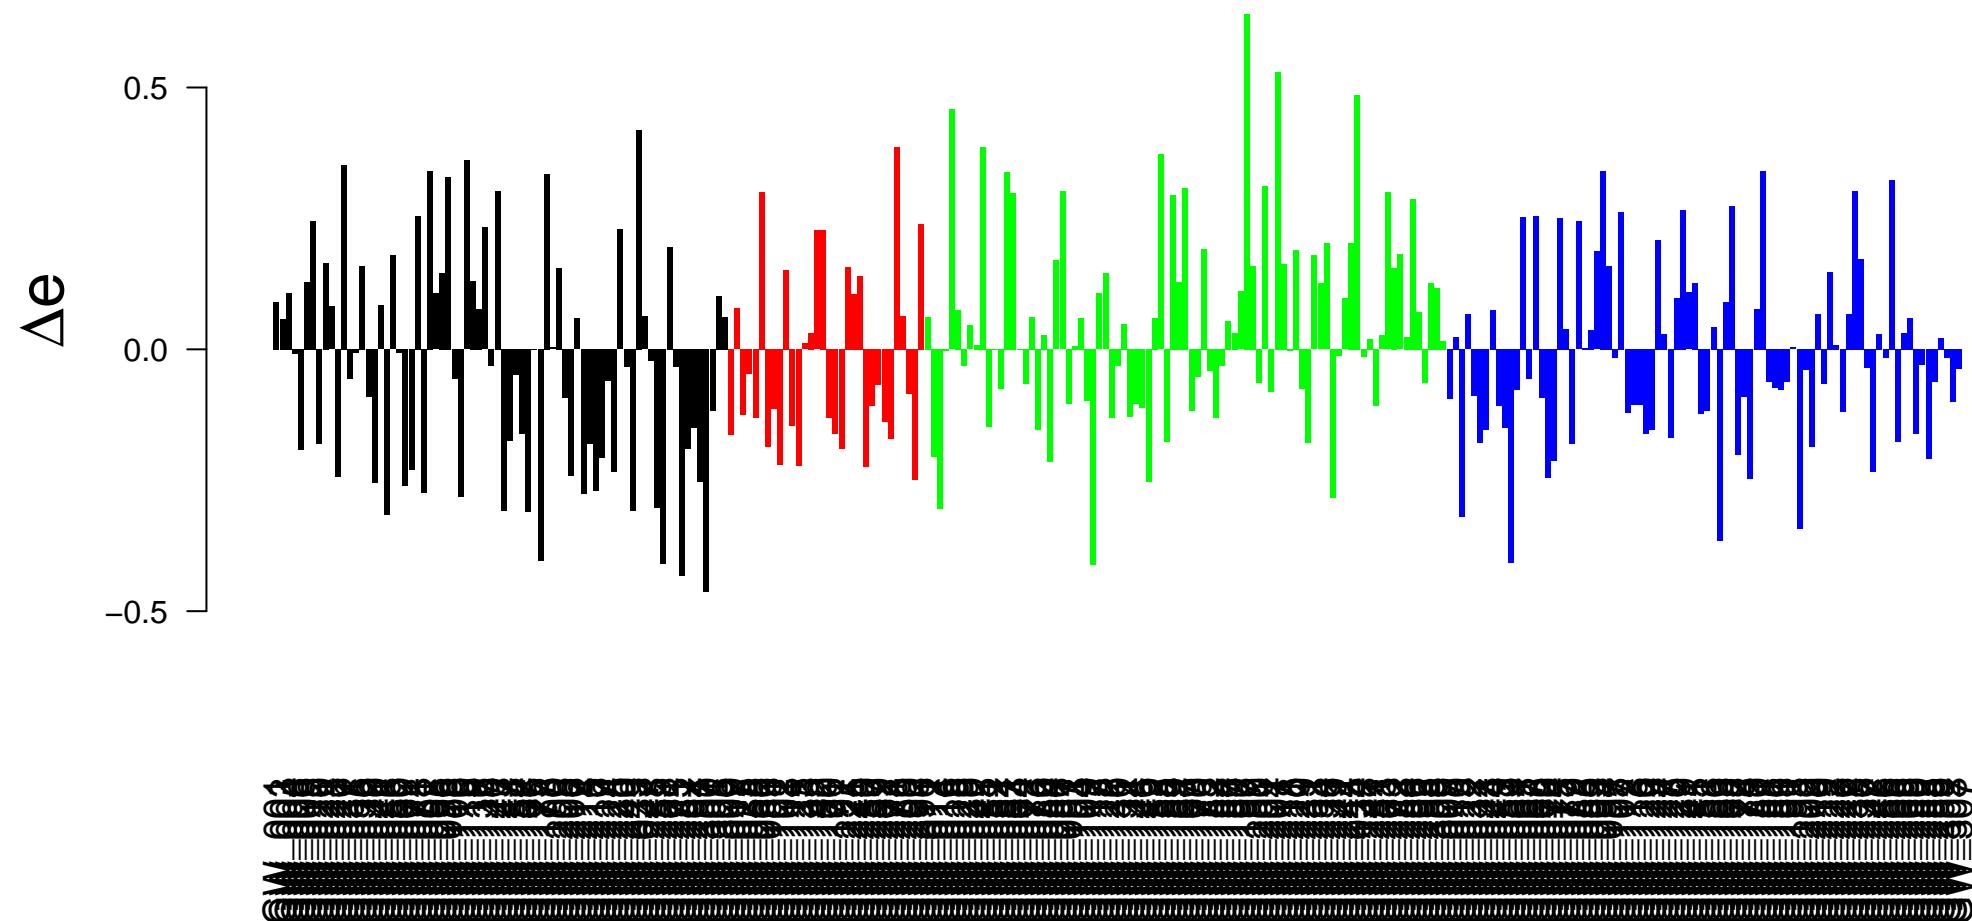

Expression of transcription elongation from RNA polymerase II promoter in Spot K

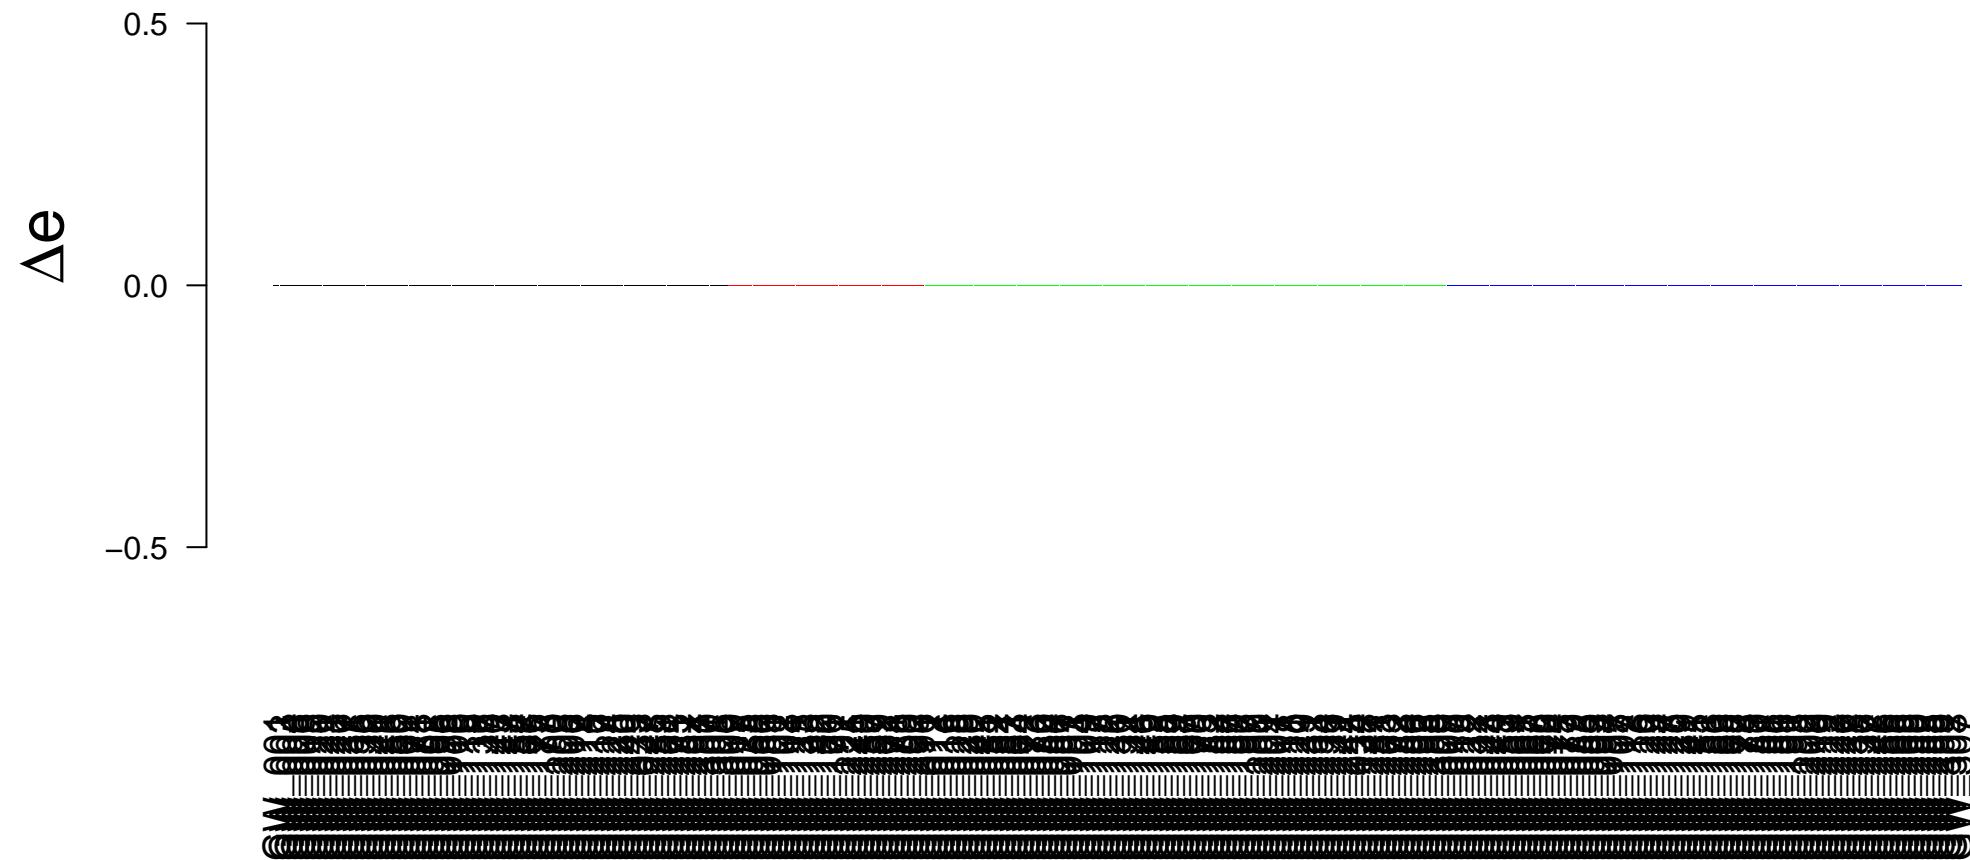

Expression of transcription elongation from RNA polymerase II promoter in Spot L

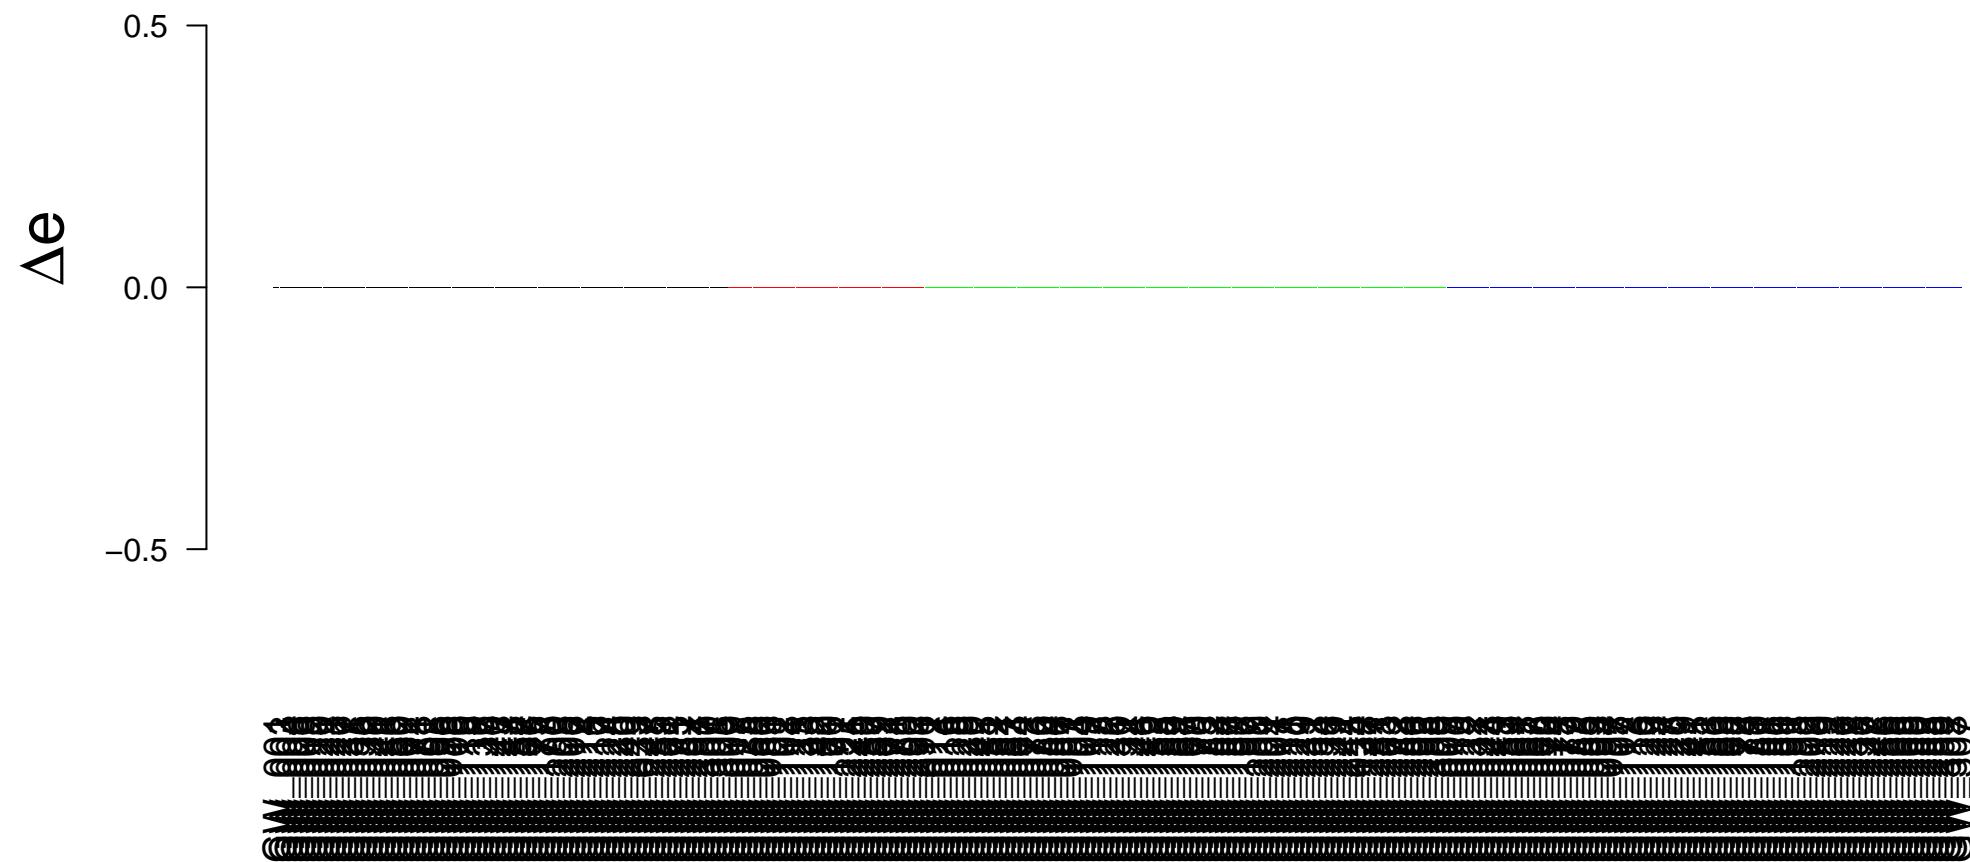

Expression of transcription elongation from RNA polymerase II promoter in Spot M

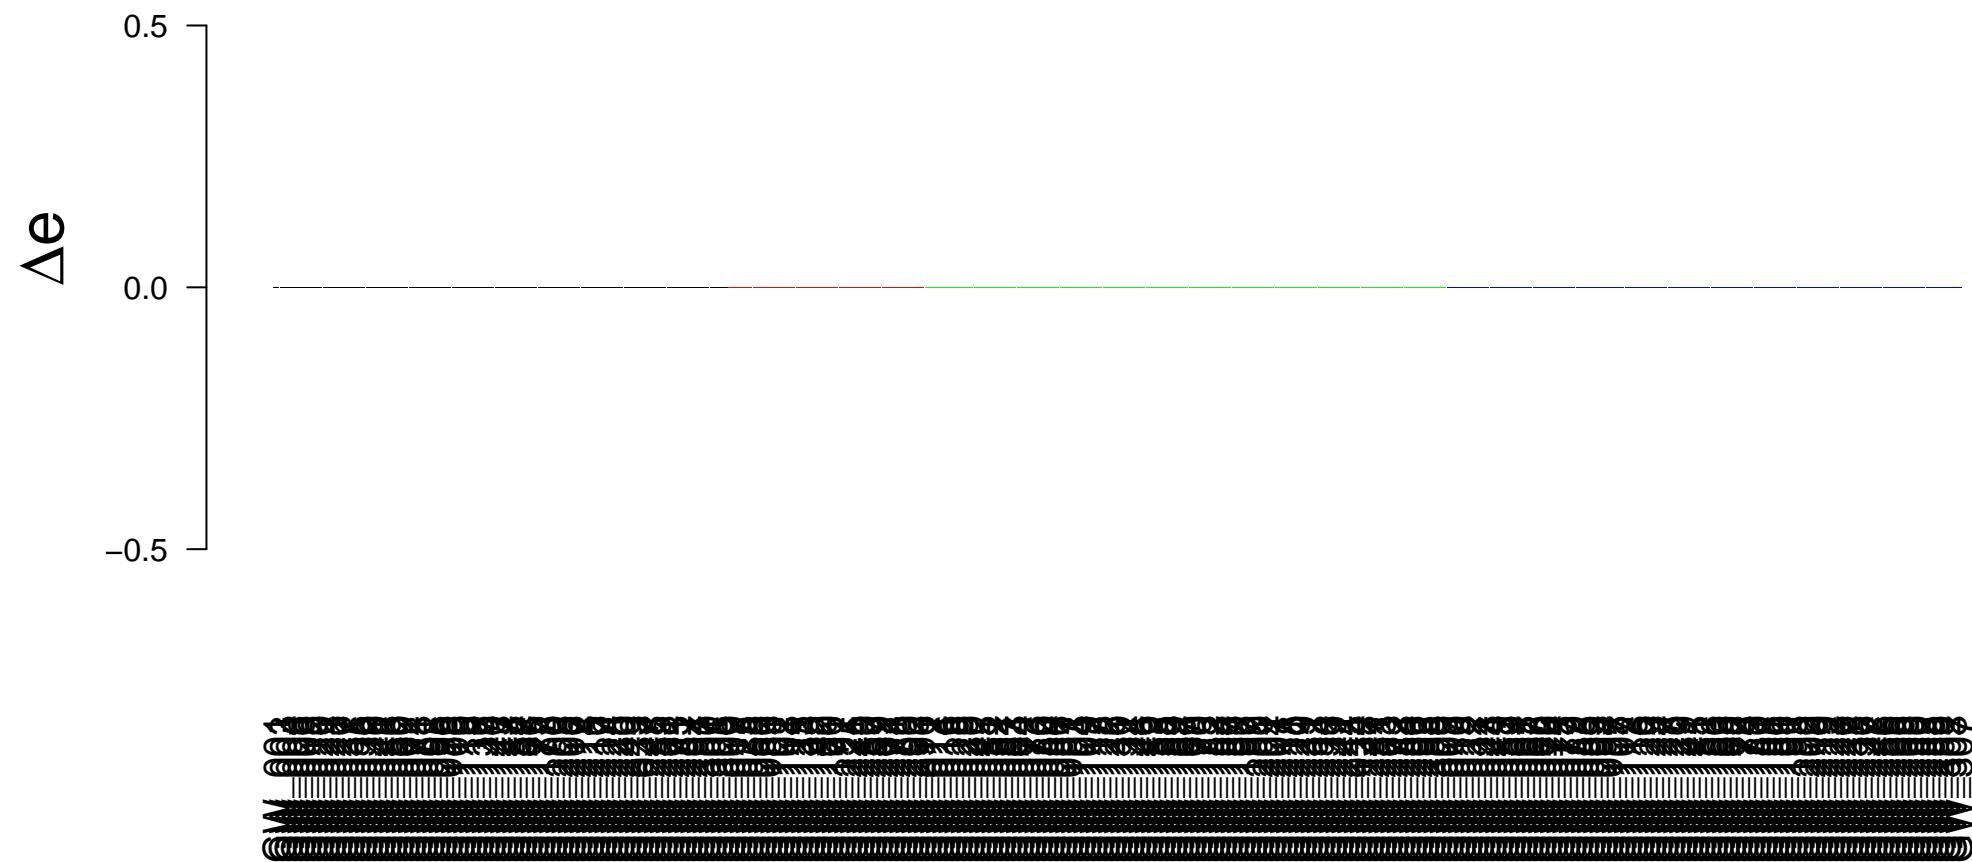

Expression of transcription elongation from RNA polymerase II promoter in Spot N

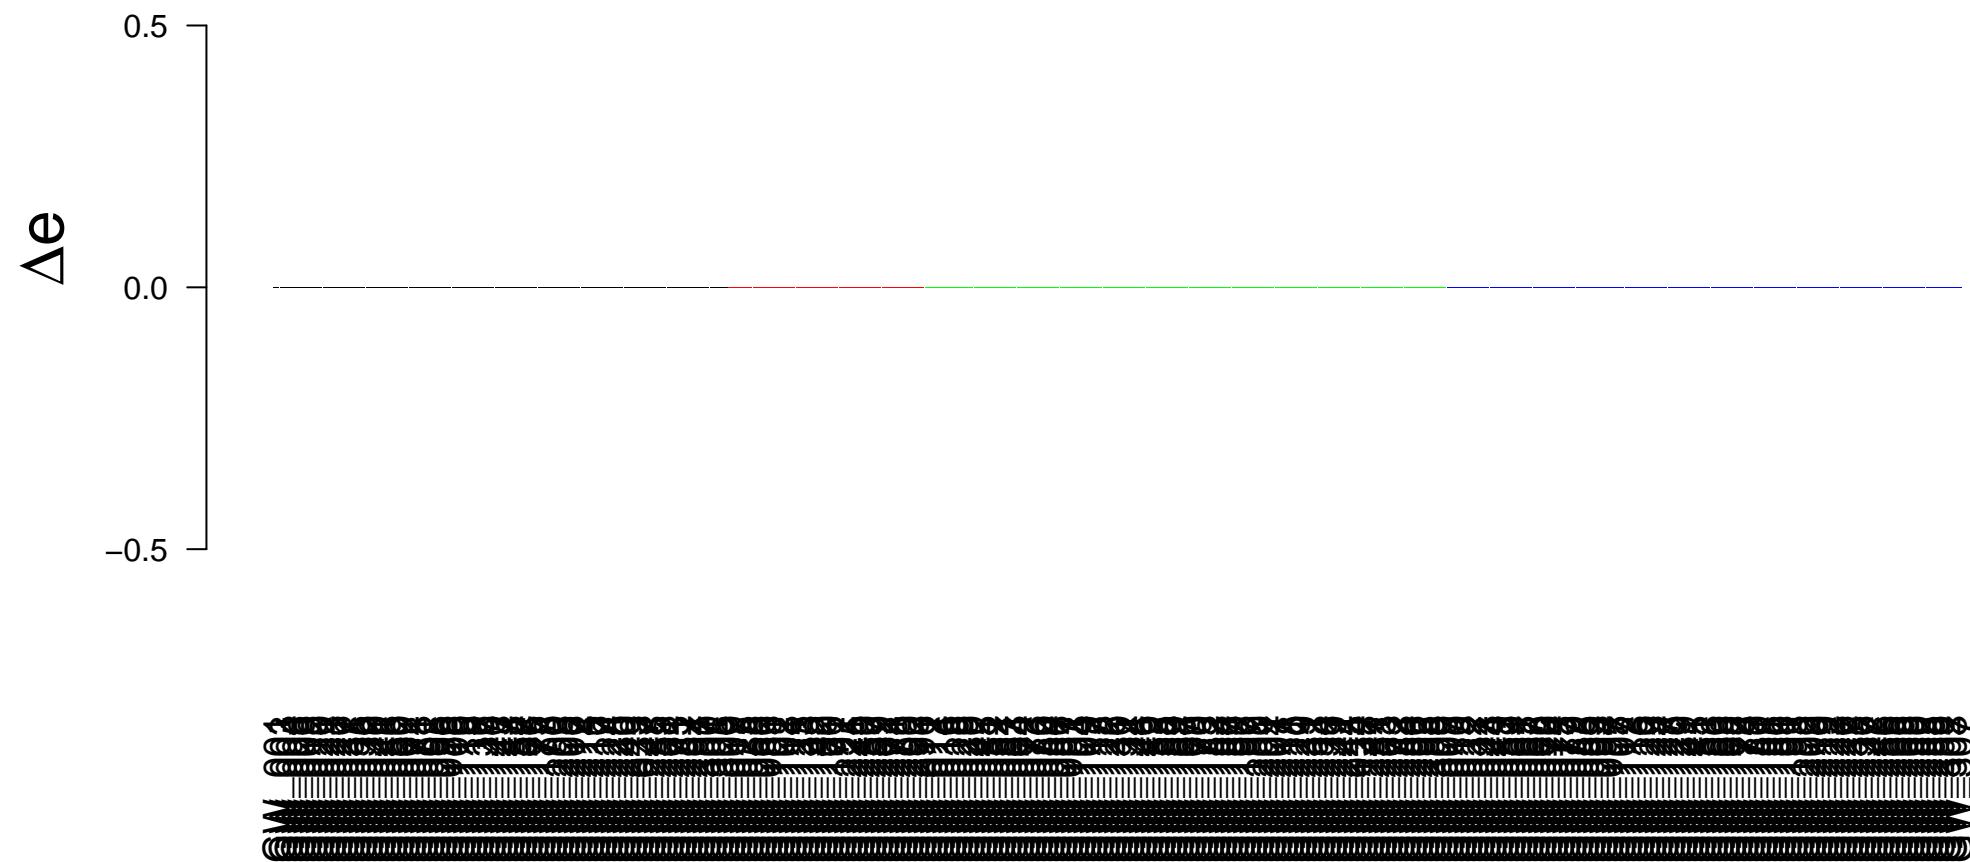

Expression of transcription elongation from RNA polymerase II promoter in Spot O

Expression of transcription elongation from RNA polymerase II promoter in Spot P

Expression of transcription elongation from RNA polymerase II promoter in Spot Q

Expression of transcription elongation from RNA polymerase II promoter in Spot R
