

transcription regulatory region sequence-specific DNA binding

transcription regulatory region sequence-specific DNA binding

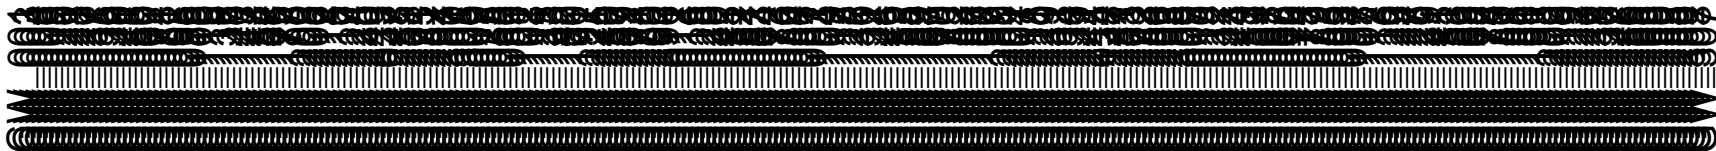

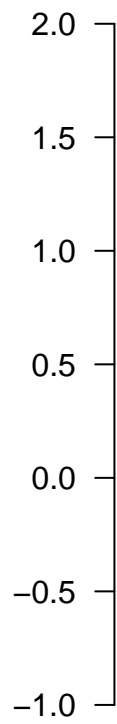

Enrichment in spots: transcription regulatory region sequence-specific DNA binding

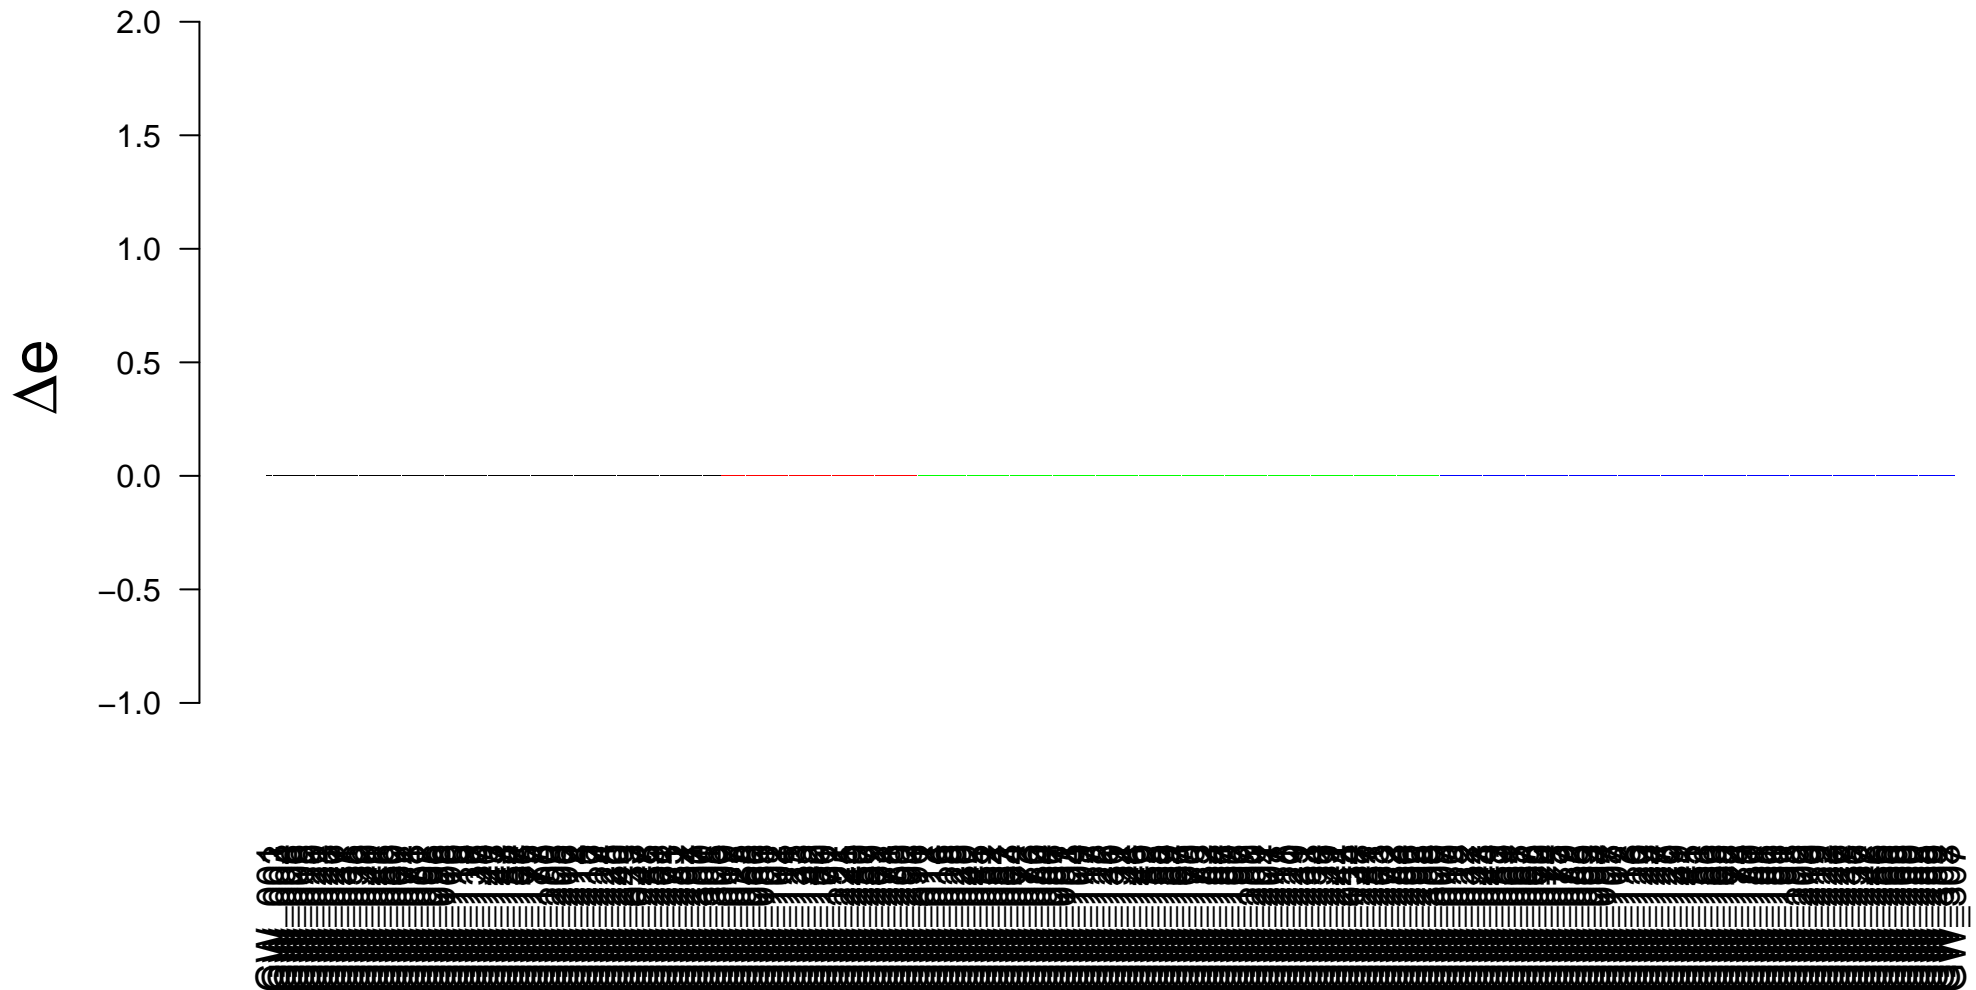

Expression of transcription regulatory region sequence-specific DNA binding in Spot A

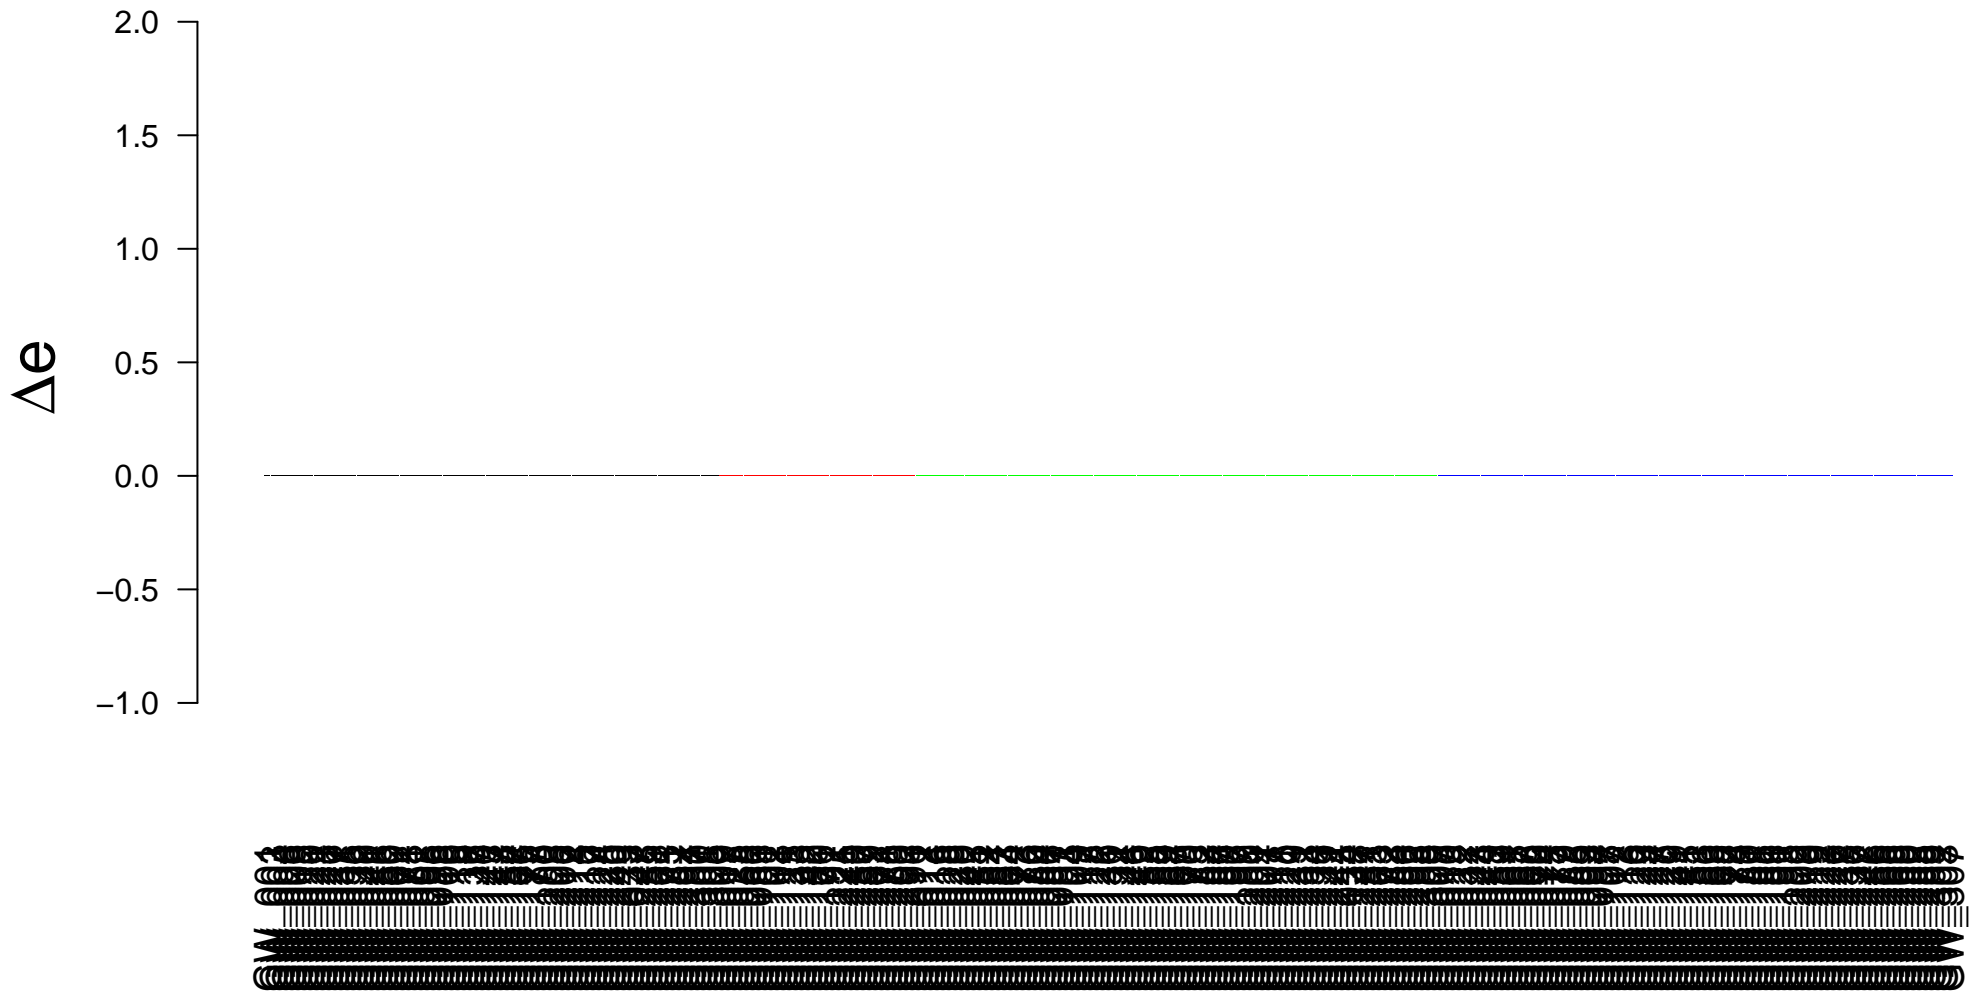

Δe

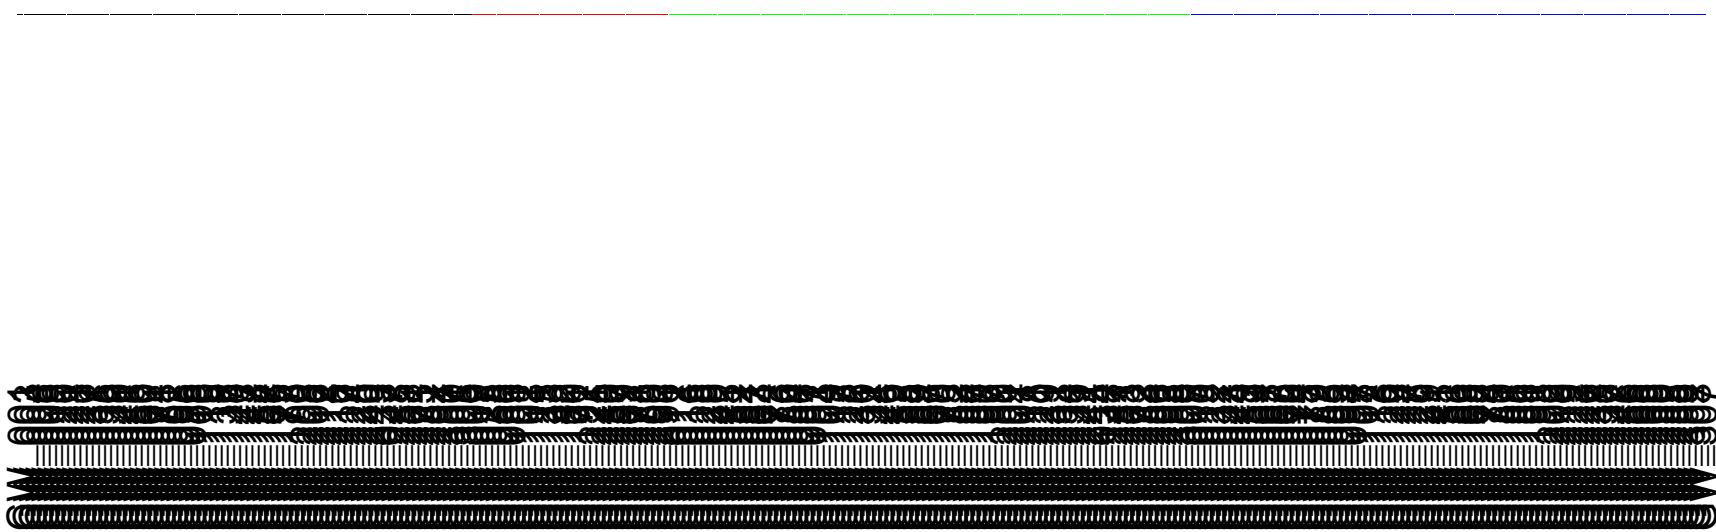

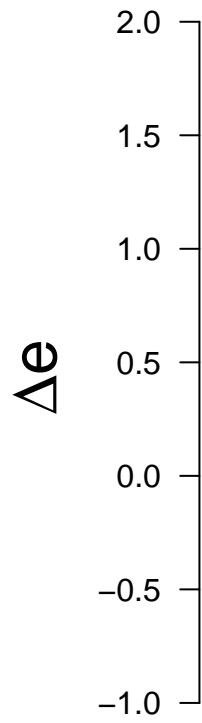

Expression of transcription regulatory region sequence-specific DNA binding in Spot B

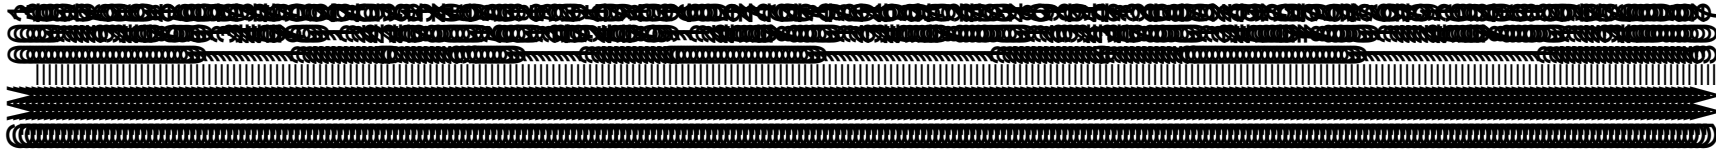

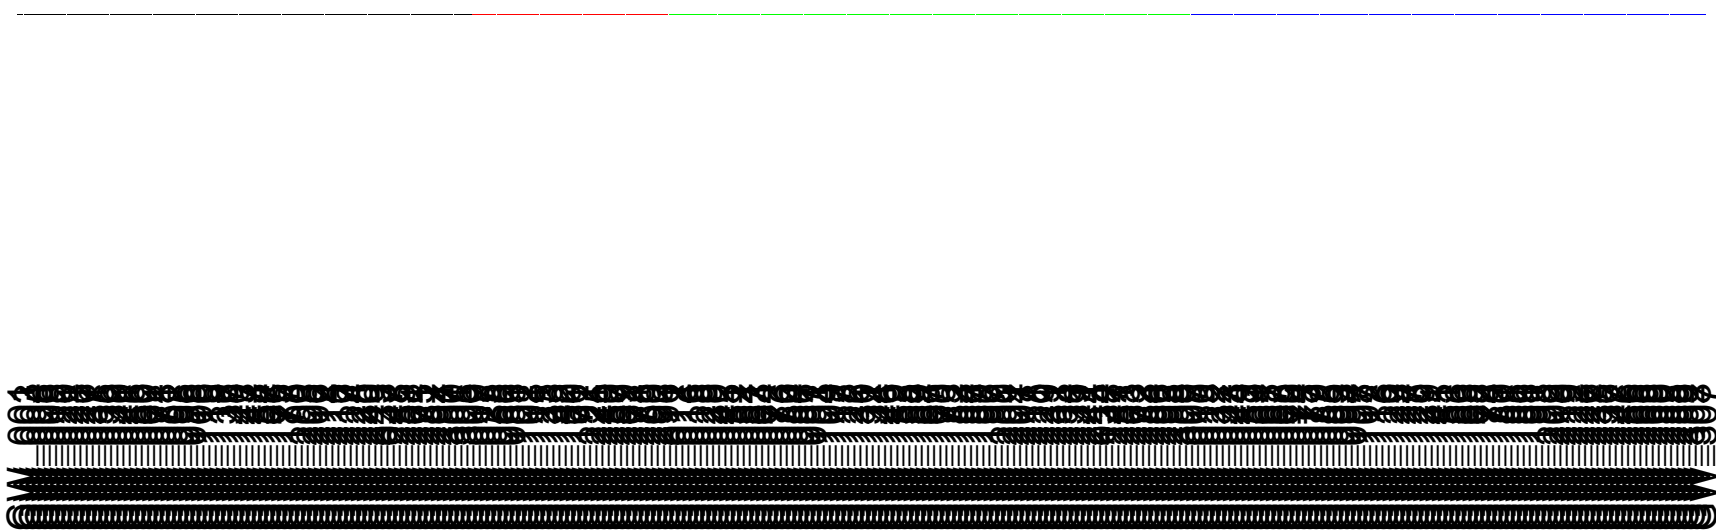

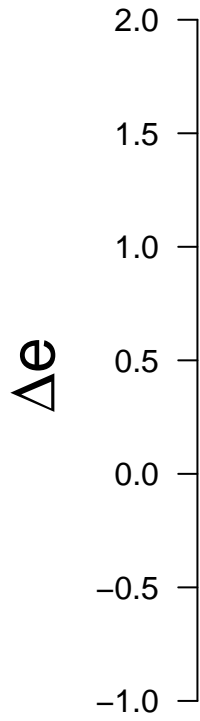

Expression of transcription regulatory region sequence-specific DNA binding in Spot C

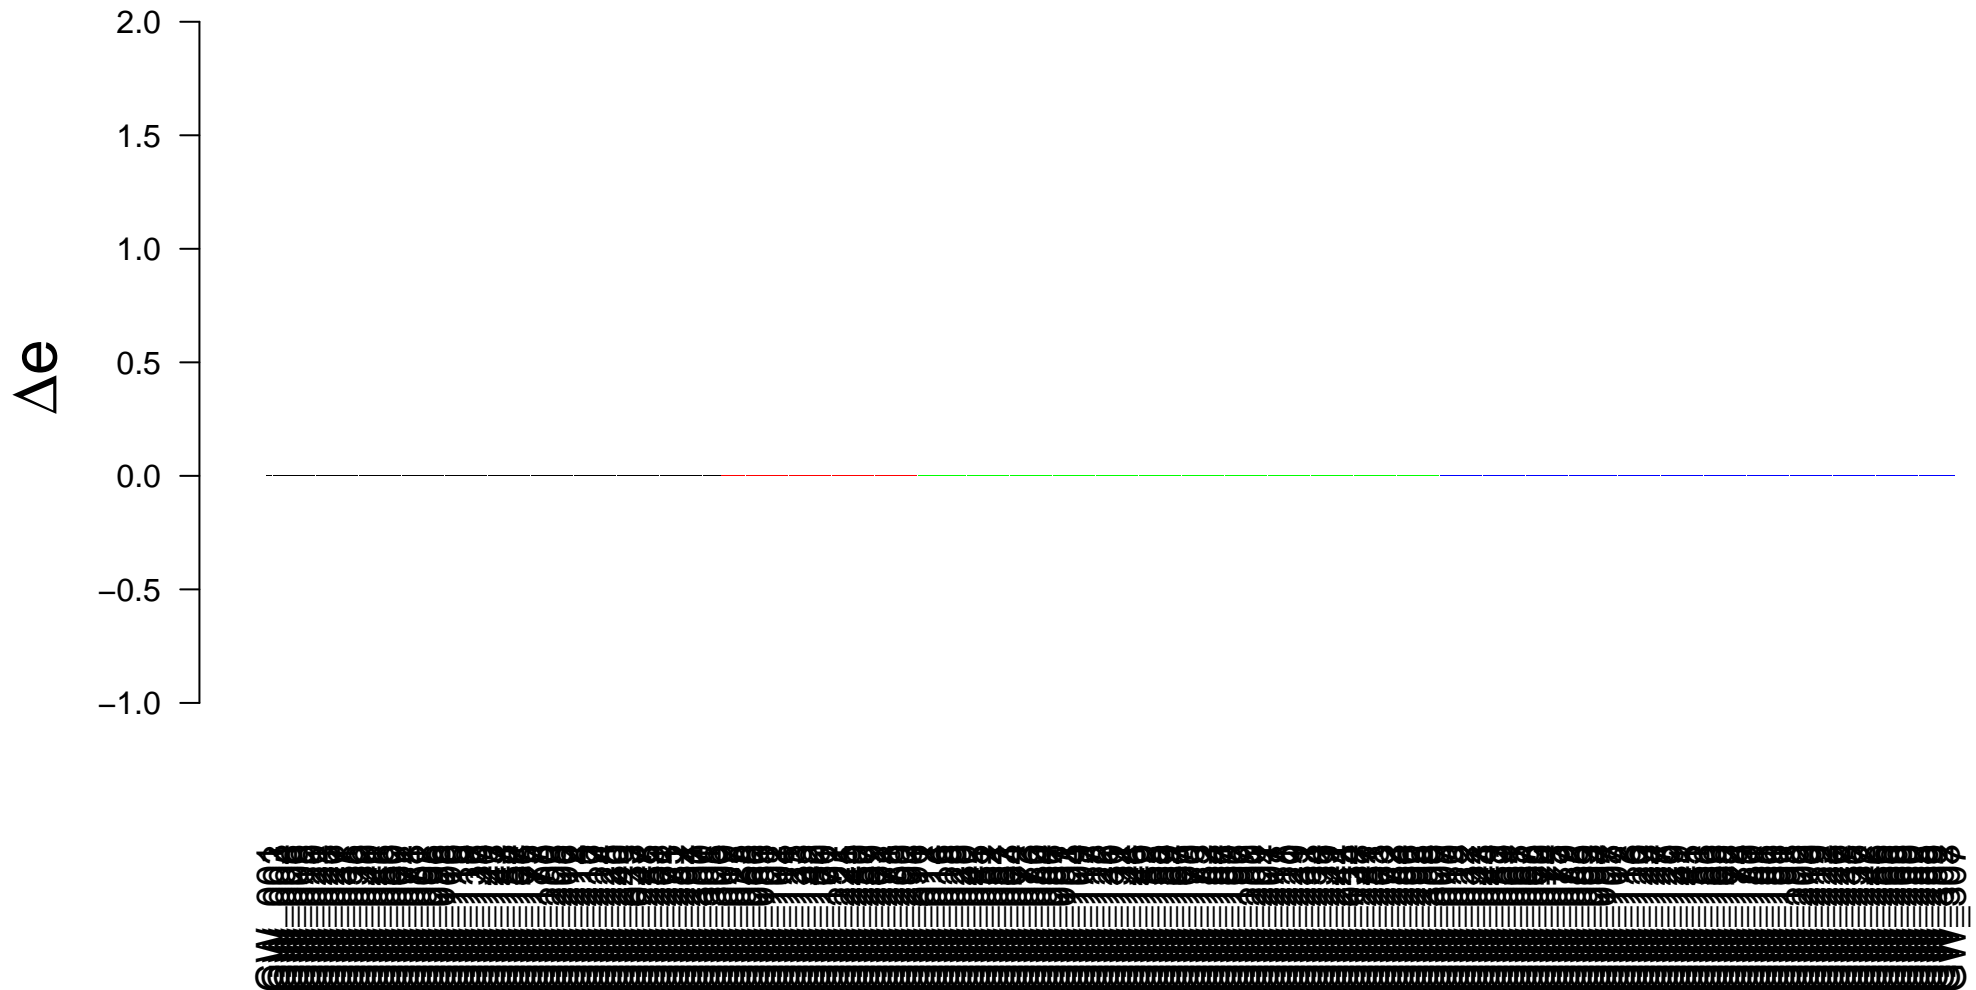

Expression of transcription regulatory region sequence-specific DNA binding in Spot D

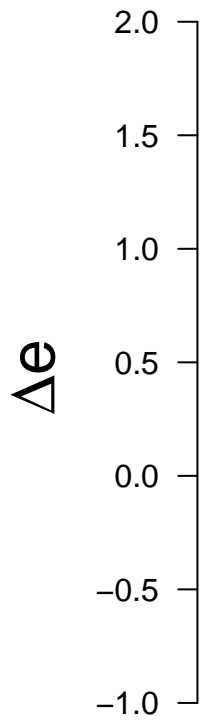

Expression of transcription regulatory region sequence-specific DNA binding in Spot E

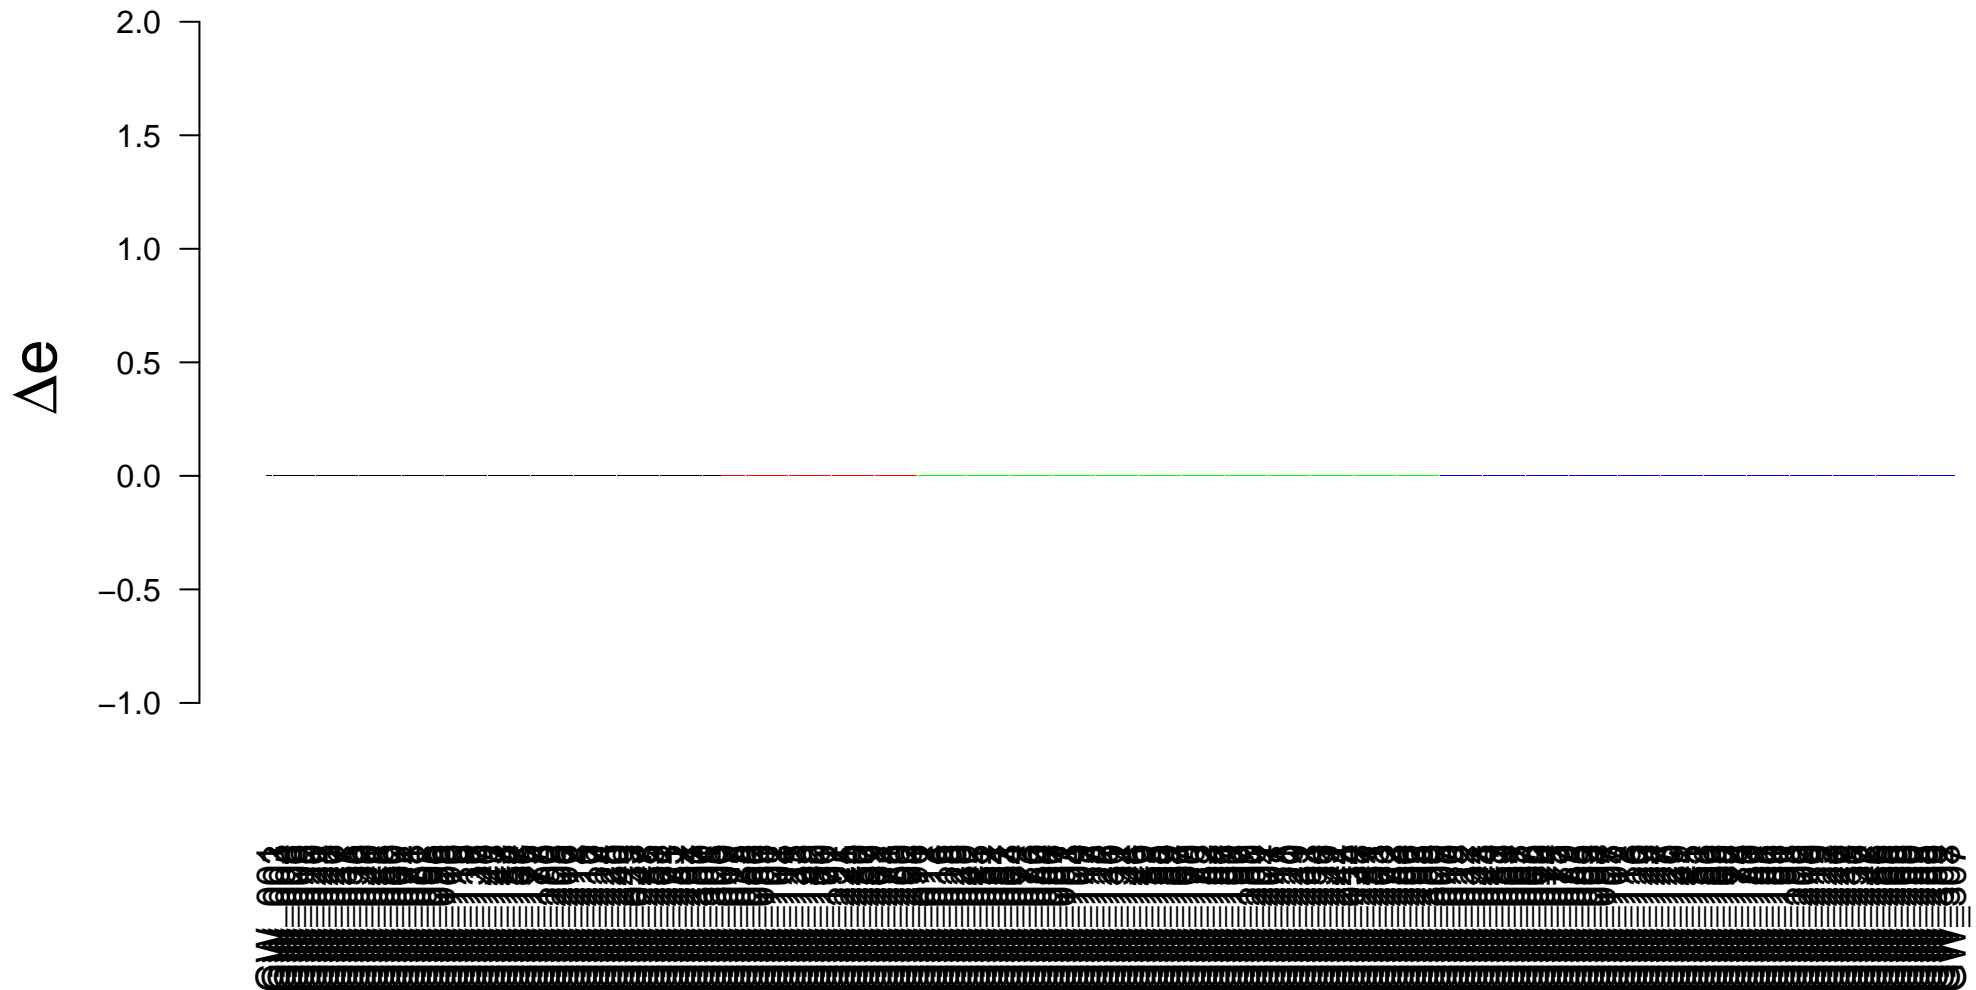

Expression of transcription regulatory region sequence-specific DNA binding in Spot F

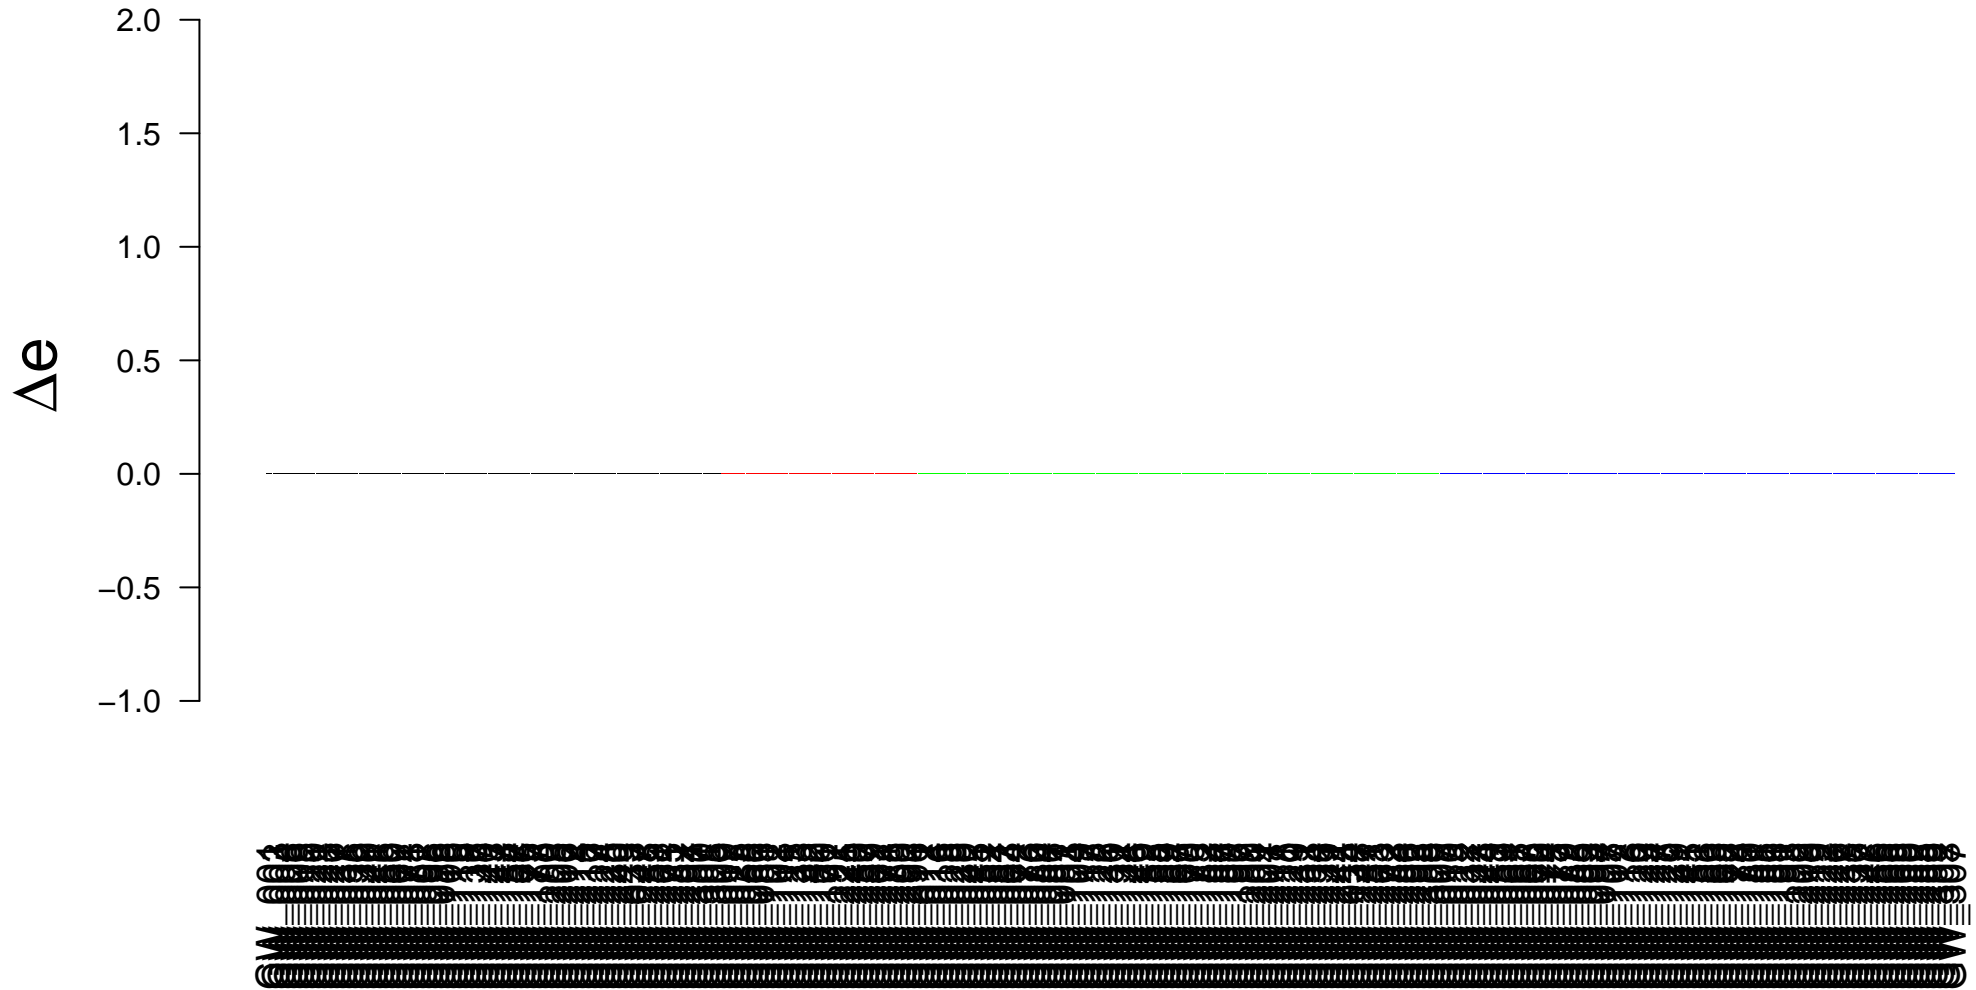

Expression of transcription regulatory region sequence-specific DNA binding in Spot G

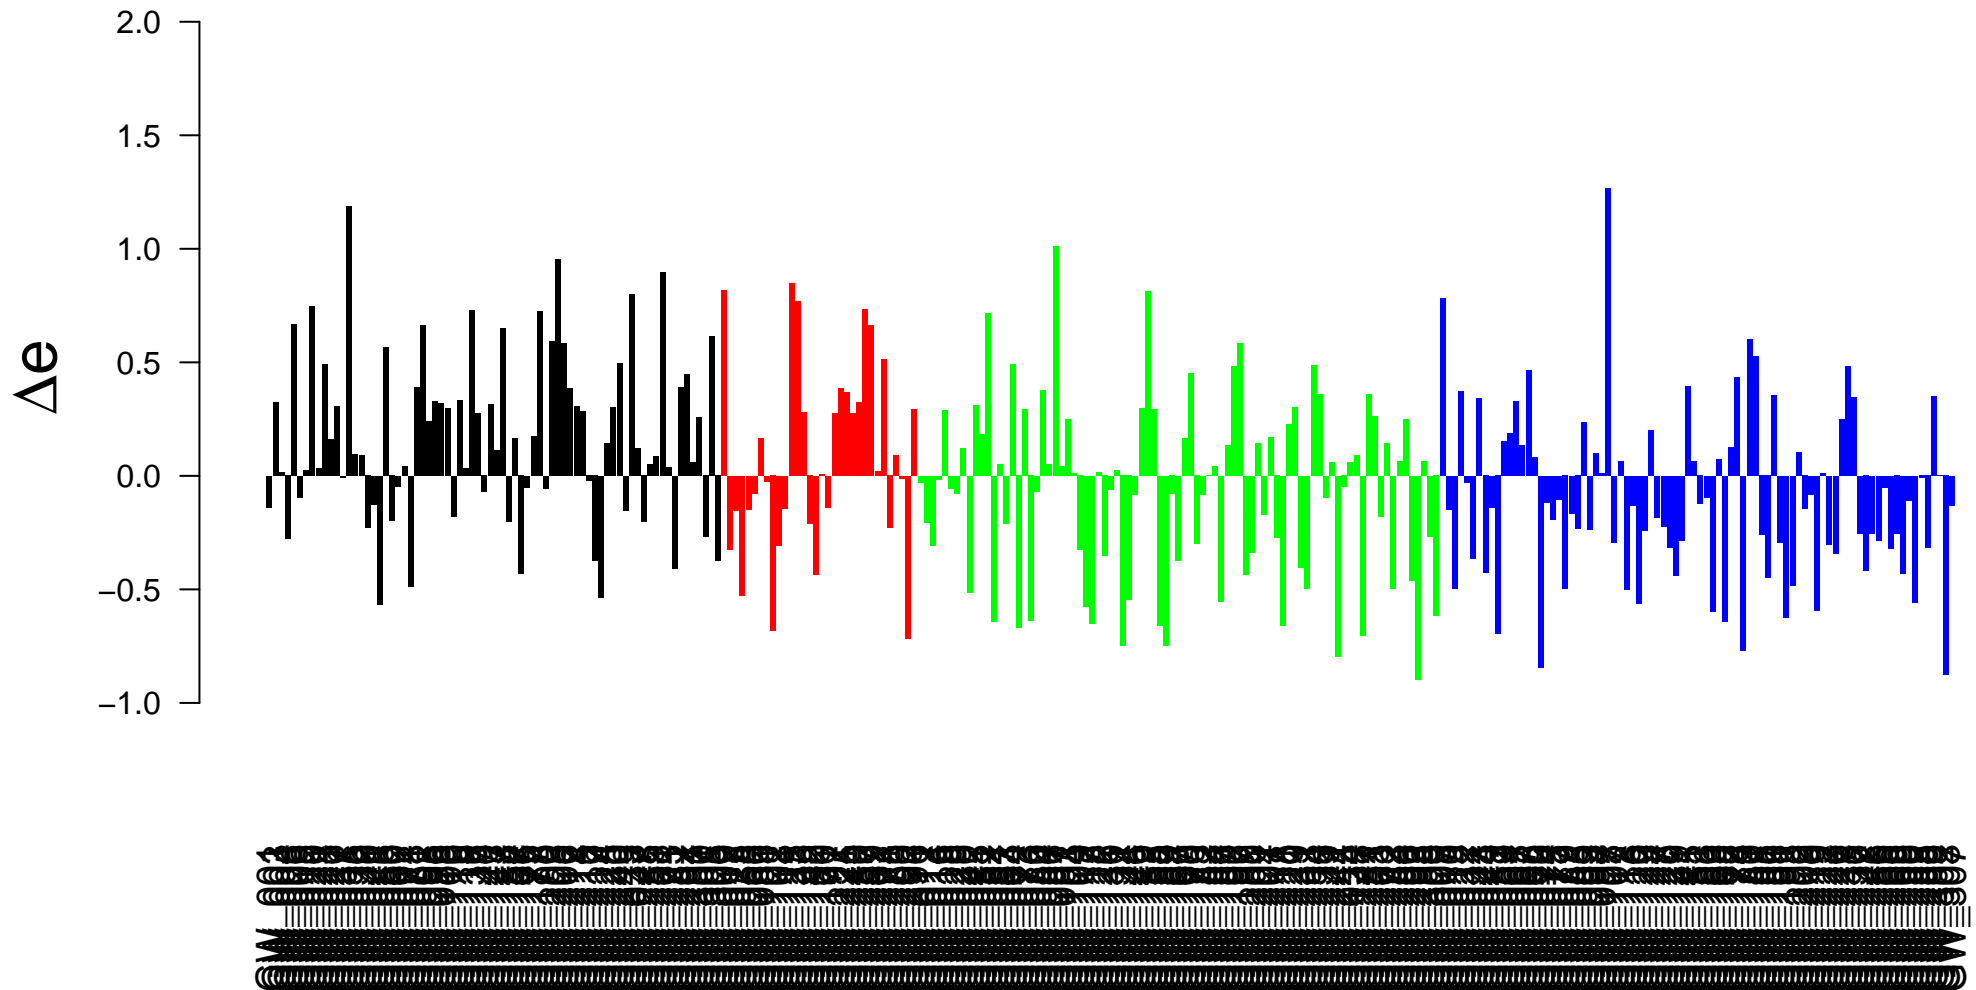

Expression of transcription regulatory region sequence-specific DNA binding in Spot H

Expression of transcription regulatory region sequence-specific DNA binding in Spot I

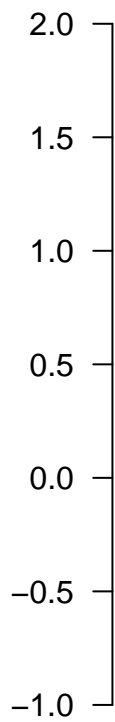

Expression of transcription regulatory region sequence-specific DNA binding in Spot J

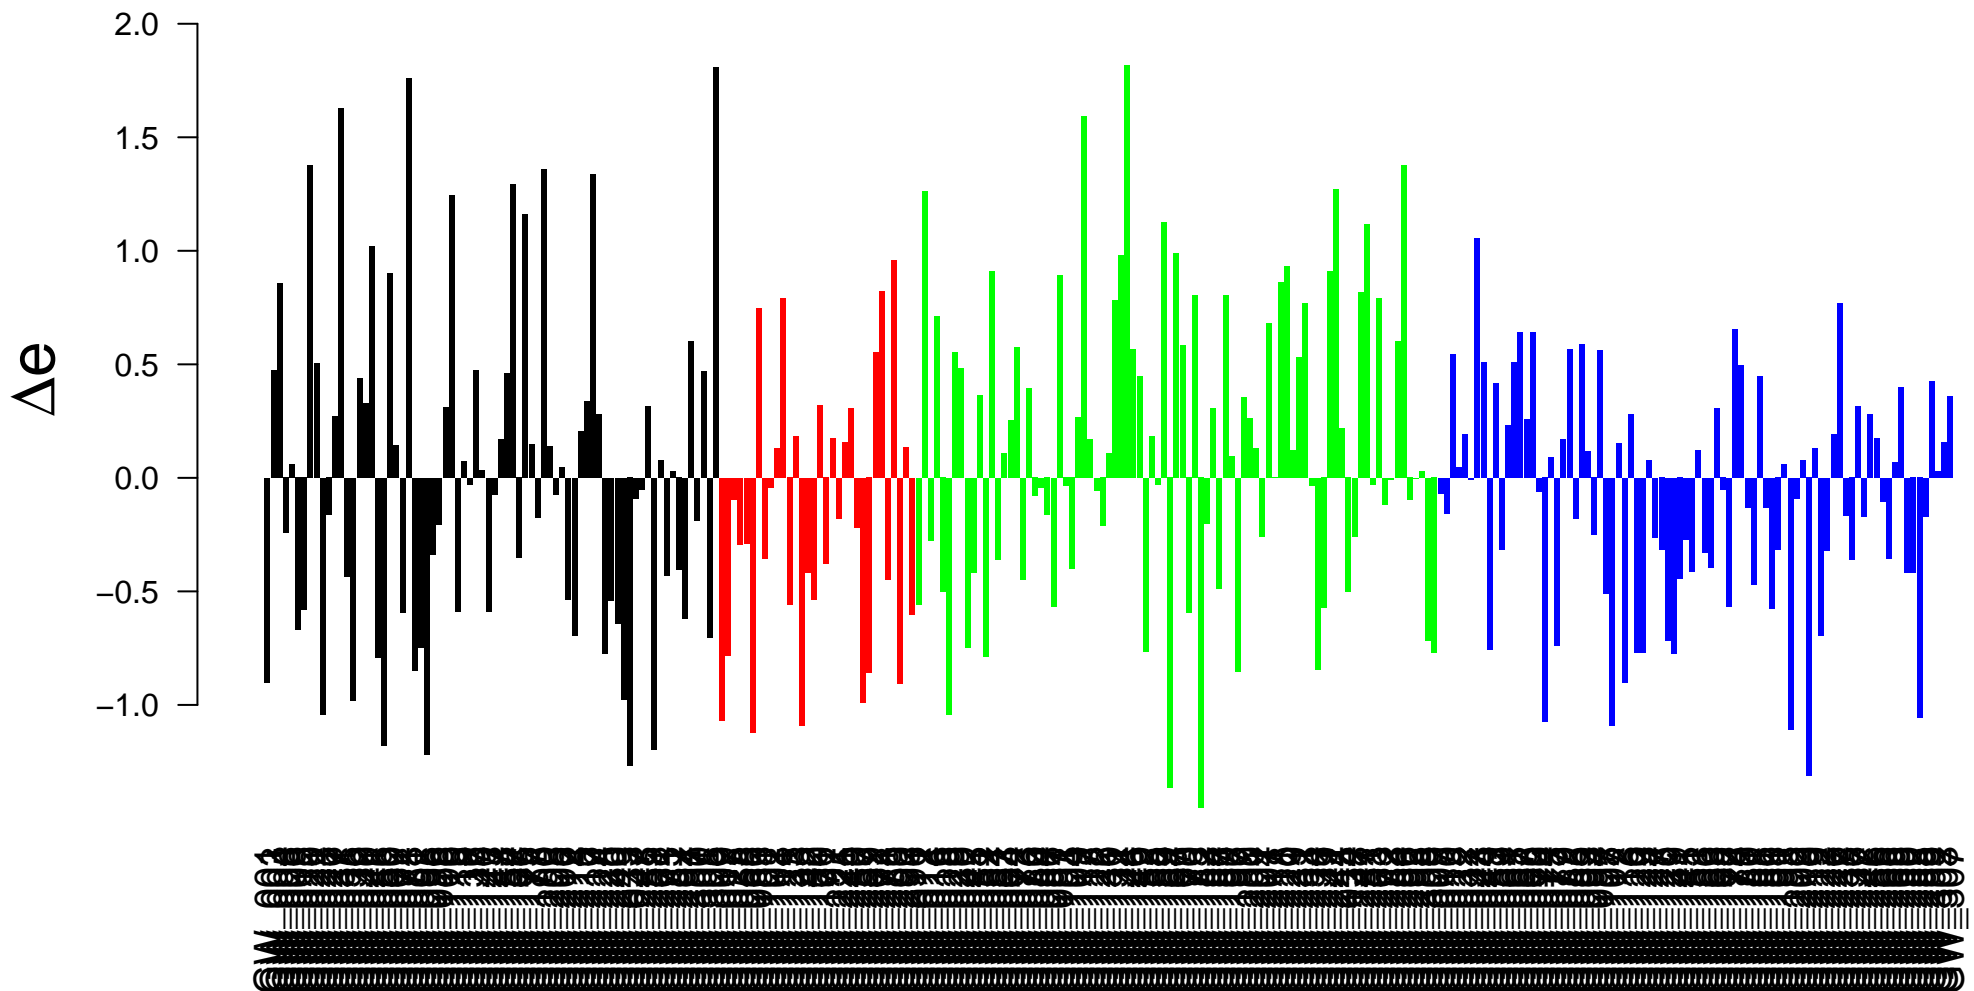

Expression of transcription regulatory region sequence-specific DNA binding in Spot K

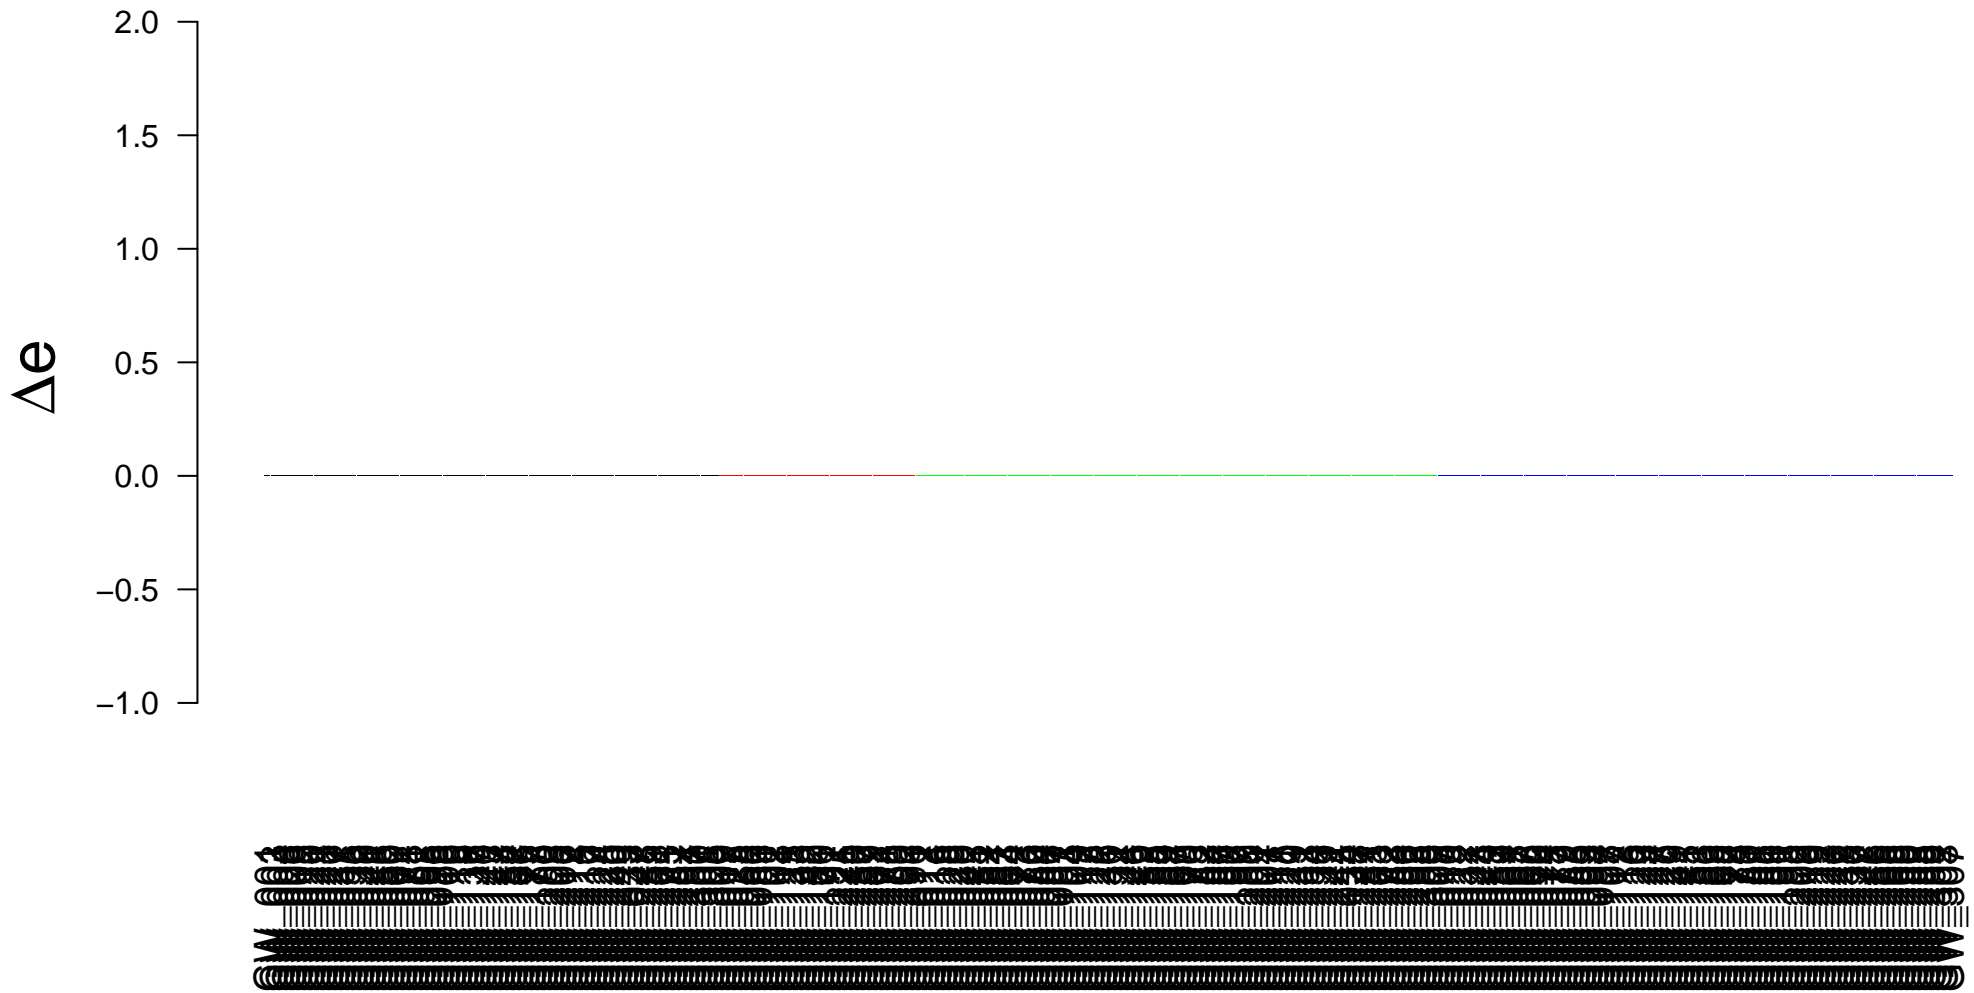

Δe

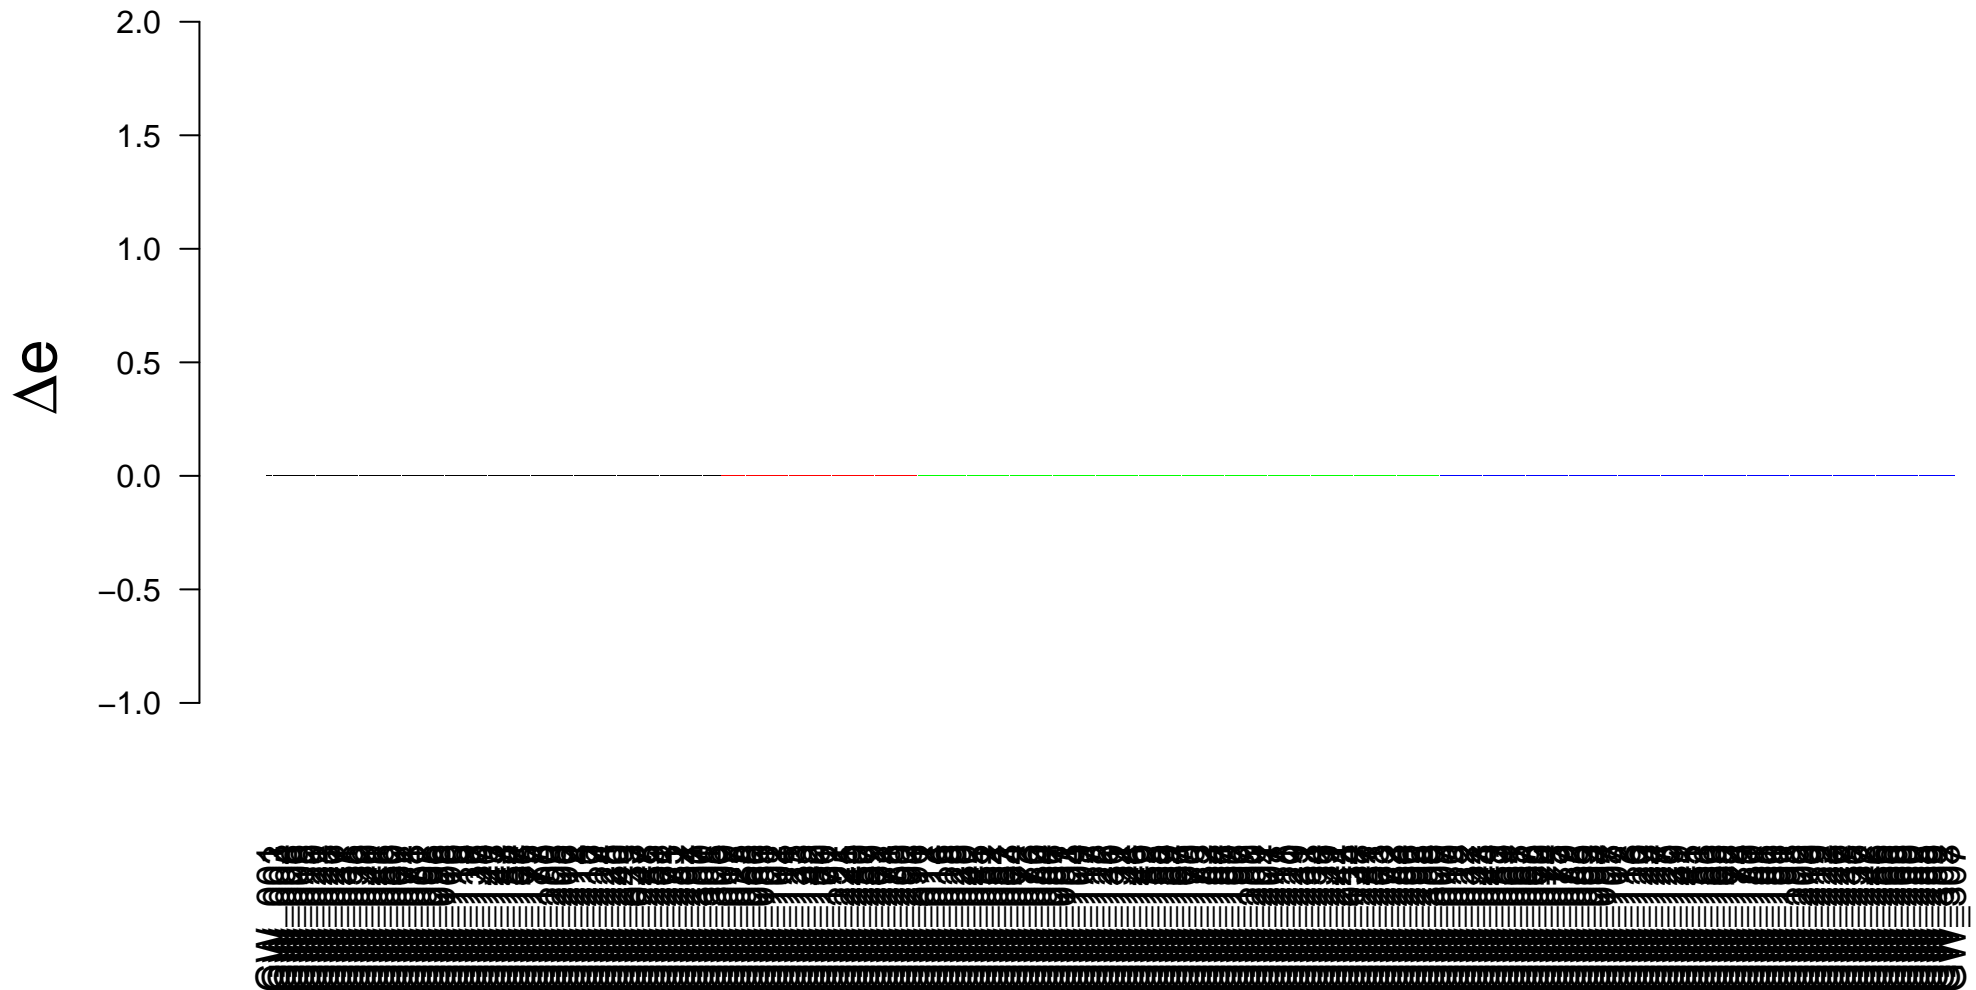

Expression of transcription regulatory region sequence-specific DNA binding in Spot L

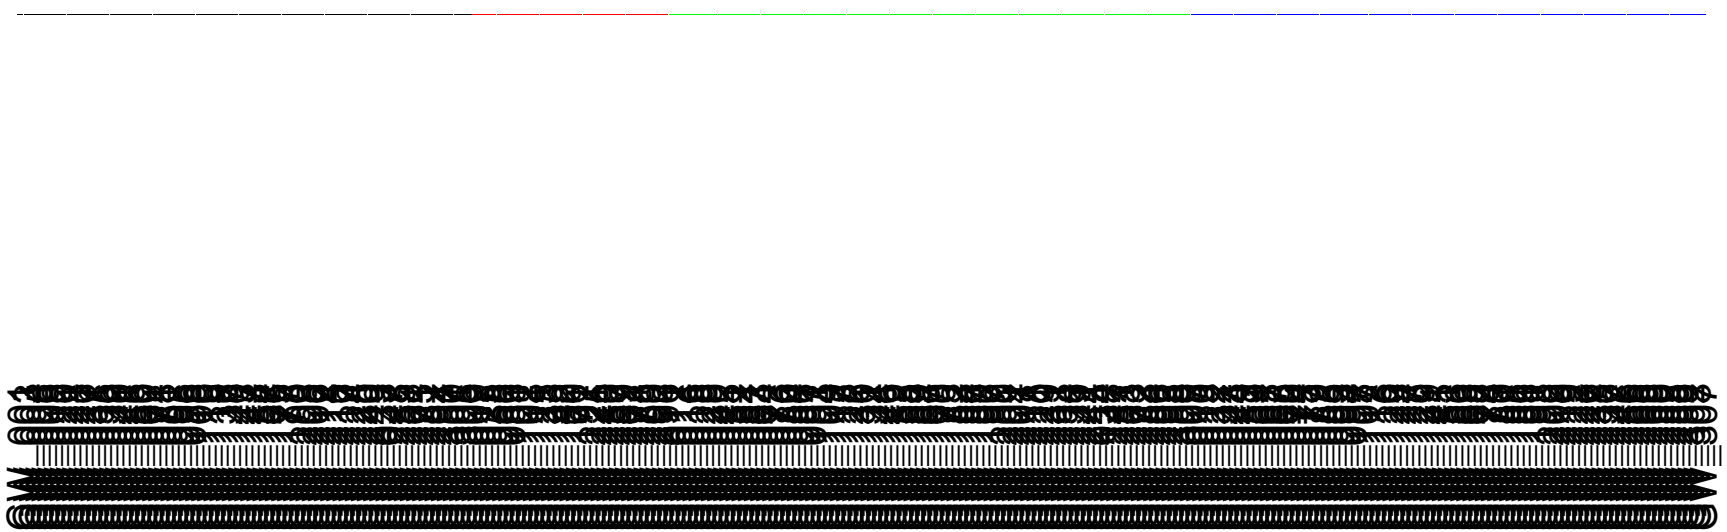

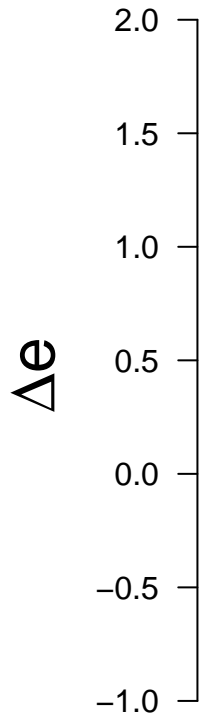

Expression of transcription regulatory region sequence-specific DNA binding in Spot M

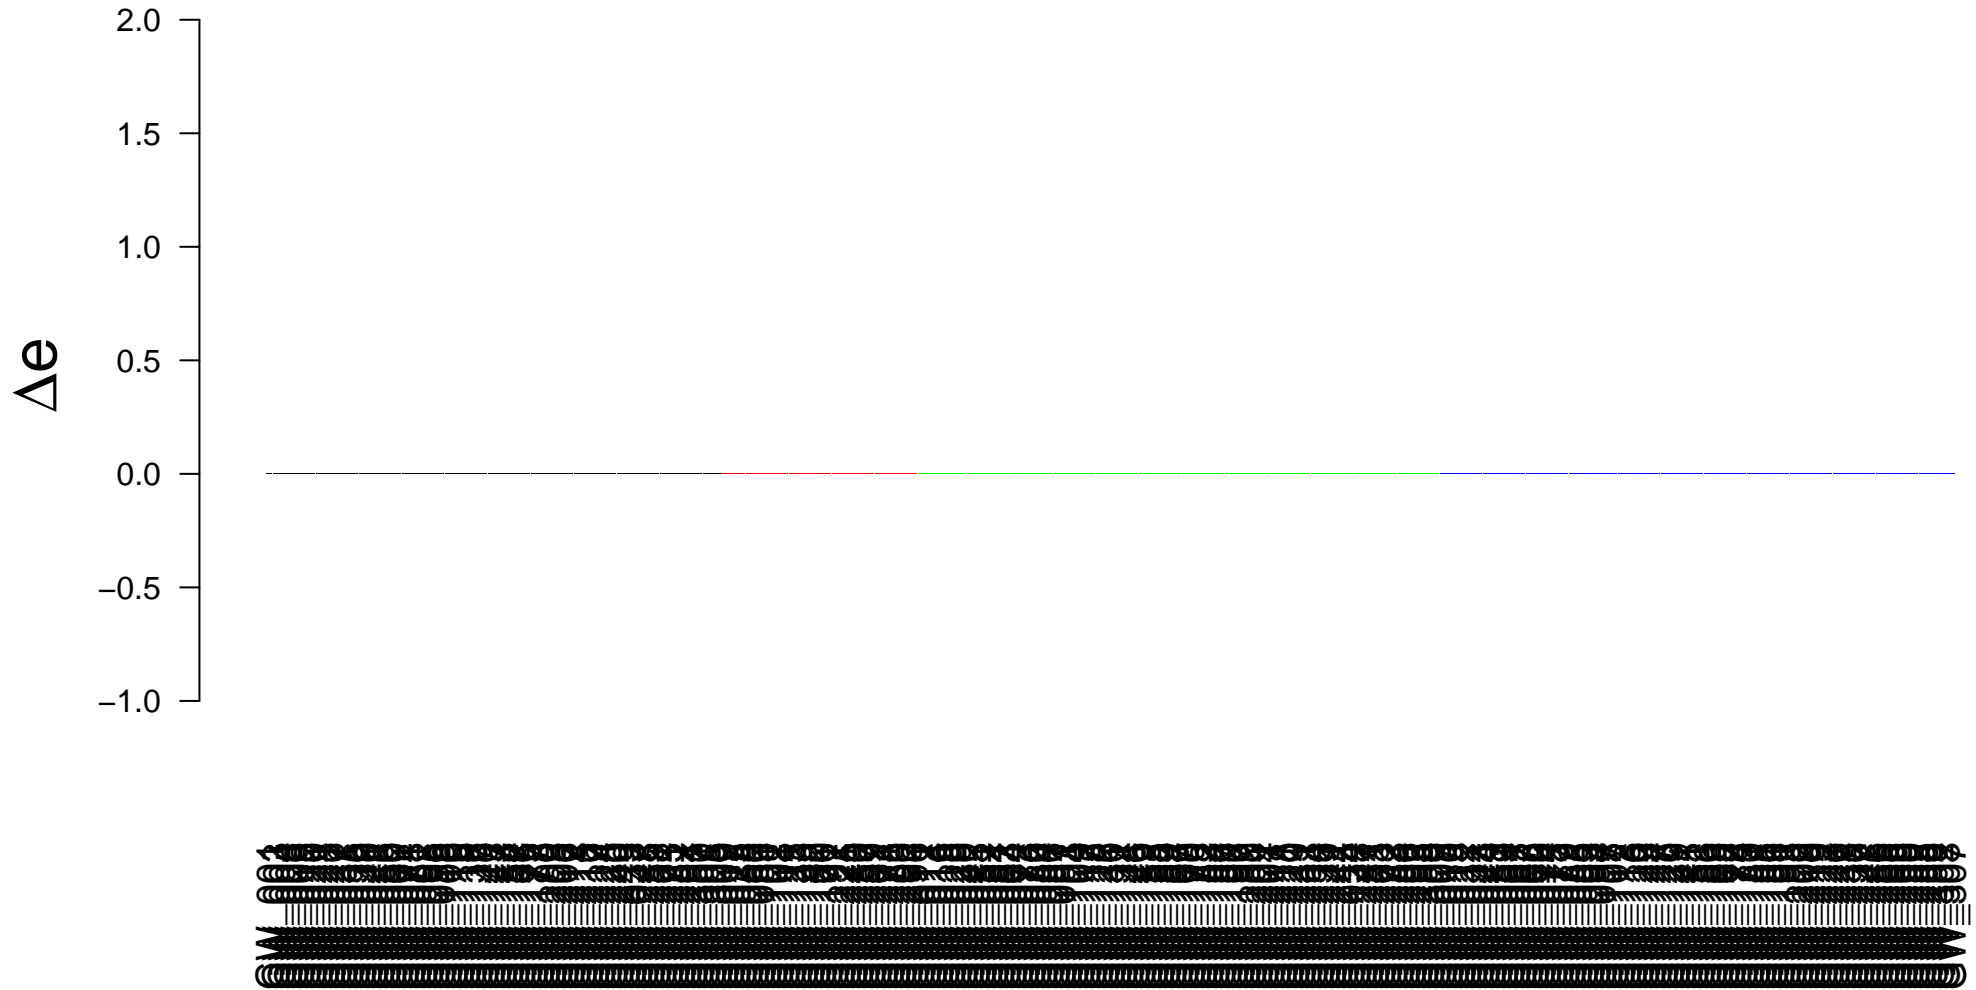

Expression of transcription regulatory region sequence-specific DNA binding in Spot N

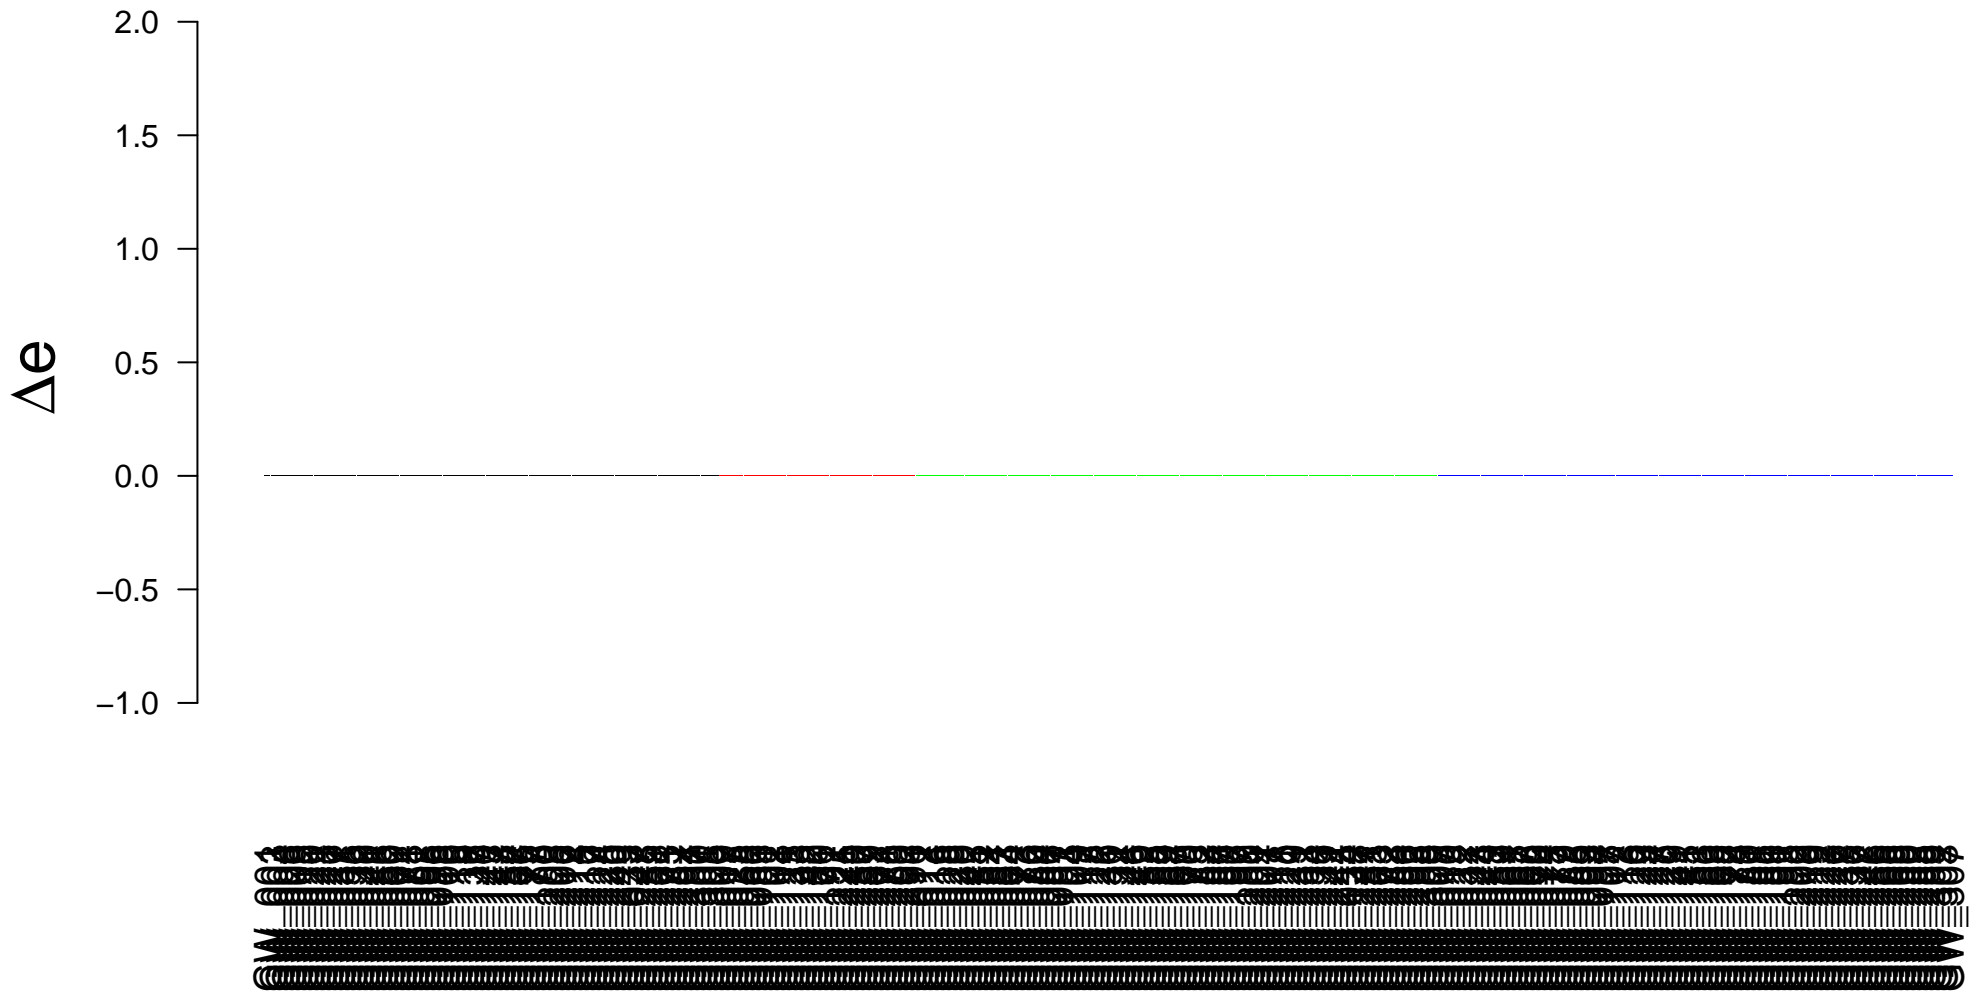

Expression of transcription regulatory region sequence-specific DNA binding in Spot O

Expression of transcription regulatory region sequence-specific DNA binding in Spot P

Expression of transcription regulatory region sequence-specific DNA binding in Spot Q

Expression of transcription regulatory region sequence-specific DNA binding in Spot R
