

translation factor activity, nucleic acid binding

translation factor activity, nucleic acid binding

Enrichment in spots: translation factor activity, nucleic acid binding

Expression of translation factor activity, nucleic acid binding in Spot A

Expression of translation factor activity, nucleic acid binding in Spot B

Expression of translation factor activity, nucleic acid binding in Spot D

Expression of translation factor activity, nucleic acid binding in Spot E

Expression of translation factor activity, nucleic acid binding in Spot F

Expression of translation factor activity, nucleic acid binding in Spot G

Expression of translation factor activity, nucleic acid binding in Spot H

Expression of translation factor activity, nucleic acid binding in Spot I

Expression of translation factor activity, nucleic acid binding in Spot J

Expression of translation factor activity, nucleic acid binding in Spot K
